

METaverse... THE NEW HORIZON OF EVOLUTION

From Keno Oneo, Mastermind of the Metabliss-Project

- ① The human mind, if one follows the neuroscientist Joseph LeDoux, has taken about "four billion years" to evolve into that quality which we today call "our mind".
- ② LeDoux describes the most important stages of our mental evolution as the continuous and biological action of a survival program:

**Our spiritual qualification
continues to this day
as a biological survival program.**

- ③ If one tries to depict the beginning of this development of our spirit broadly speaking, one gets the following picture:

④ LeDoux assumes that we are "the descendants of those who were not courageous, but often huddled fearfully in a cave". Therefore, WE-ness ... accomplished through the protection of Unification ... is the central impetus of Archaics.

⑤ From this point of view, Archaic can be described as follows:

**Archaic is the neuro-programming
that seeks to liberate man's Now-Consciousness
... to liberating from the fear of being at the mercy.**

**The liberation is organized
by the production of WE-ness (Unification)
within the given social constellation.**

- ⑥ Thus, WE-ness and Unification are not, as sometimes claimed, the goal of an enlightened "civil society", but the primordial ground of the human Spirit.

If we are currently lacking the WE-ness, then this merely says that in the currently dominating stage 3 (= Knowing-Better through differentiation) we have placed too one-sidedly on the programmatic of Rationality of Meaning and Cognition of Meaning, i.e.

**Progress through those Innovations
which become possible
through creative Differentiations.**

- ⑦ This program is absolutely not wrong. On the contrary, it has enabled us as humanity to develop sciences and, in particular, progressive technologies. It follows:

**The current dominance
of digital-Technologies ...
e.g., Internet, Metaverse, Crypto and AI ...
are consistently leading our human Spirit
into a Transition of Epochs, into an epochal Break.**

- ⑧ What is this epochal break? The epoch of fears is coming to an end. The epoch of courage emerges on the horizon (see point 4).

- ⑨ It is the task of technical-digital-Technologies to culturally initiate this epoch of courage:

**We are spiritually moving from the strategy
of innovative Differentiations (Evolution) to the new strategy
of a Magic accomplished by Interfusions ... Co-Evolution.**

- ⑩ From this follows as a prediction: in the next 10 years (maybe even sooner) we will mentally prepare ourselves for the expansion of the system we call "technology". As a sketch:

- ⑭ But this will not suffice: "Digital Mixed Realities" need the integration of neuronal-intrinsic Technologies to equip our mind for the cooperation of the mind with the Spirit of Creation.

As quantum physicist Herbert Pietschmann has analyzed that the Now of Becoming is always particularly productive and positive when the actor (e.g. a human being or a culture) can merge with the inherent Dynamics of Creation (= Interfusion).

- ⑮ What is this inherent Dynamic of Creation? In the words of Pietschmann: "It consists of the Simultaneity of Differentiation and Unification."
- ⑯ It is about spiritually cooperating with Creation in such a way that the best possible Evolution can emerge ... this is the strategy of Co-Evolution.
- ⑰ Interfusion is the basis for this Cooperation. This implies: since Creation consists of the Simultaneity of Differentiation and Unification, for stage 4, which is focused on Emergence and Co-Evolution, we need a novel conception of creative Differentiation that can actively promote the Common ... that is, WE-ness through Unification ... :

**We need a creative
Differentiation that positively
promotes and qualifies the Common.**

- ⑱ Thus, the primordial program of our spiritual Evolution ... that is, WE-ness through Unification (see point 3) ... is now becoming very actual and significant. This means:

**If we want to spiritually
proceed into the Epoch of Courage (= Inclusive-Fitness)
and into the Practice of Co-Evolution,
we absolutely need the Simultaneity and Interactivity
of METAVERSE and METABLISS.**

- ⑲ The following model is the basis for this statement:

20 Both Metaverse and Metabliss lead the collective Spirit of Humanity out of the one-sidedness and dominance of hierarchical knowing-better and dogmatic exclusion of people and beliefs that do not conform to the mainstream. This means:

- Everything that is now being discussed and agitated across the broad spectrum of woke ... from feminism to diversity to anti-racism to cancel culture to liberated sexuality ... can be realized if we can put the creative power of differentiation at “the service” of a new kind of WE-ness.
- Interfusion is the strategy by which we can qualify the power of Unification (WE-ness) so that Co-Evolution succeeds.

21 Co-evolution will only succeed if we enable ourselves to make the inherent Dynamic of Creation (= the Simultaneity of Differentiation and Unification) our future partner. This means:

The more our Spirit transforms into the Now of Creation, the more efficient Co-Evolution will become, that we organize.

22 Now, how can our Spirit become identical with the Now of Creation? That is the key question. The answer:

It will only succeed once a "Whole Life Metaverse" integrates the Rituals of Metabliss in itself ... only then the human Spirit can transform into Creation ... into the Now of Creation.

23

All in all:

- The next stage of our spiritual evolution absolutely needs the development and establishment of that system which is called "Metaverse".
- However, the unfolding of the strategy of Interfusion, typical for the coming Epoch of Courage, requires not only the technical-digital Technologies (VR, AR, Immersive Reality, etc.), but at the same time the development and use of neural-intrinsic Technologies ... that is METABLISS.
- The neural-intrinsic Technologies of Metabliss are essential for the innovative Differentiation power of the Metaverse to merge with the harmonizing Unification power of WE-ness.
- When Differentiation becomes the engine of a growing WE-ness, we as Humanity will be able to establish a Practice of Co-Evolution:

**The effect of Co-Evolution
is to democratize the Spirit
of making our futures better,
from Bottom-up.**

This will be a great historical leap ... our entering into the 2nd Axial-Age.
