> # TEENAGER AND WOKE-PIONEERS
> # ARE FORMING THE NEW HYPERVERSE
>
> From Keno Oneo, Mastermind of the Metabliss-Project

(1) The Hyperverse is a digital system that uses technical-Technologies (Metaverse) and neural-intrinsic Technologies (Metabliss) to connect our human consciousness with

> ## the Essence
> ## of the Essential.

(2) This essence is a relation with an inner dynamic continuously focused on

> ## Interfusion.

The underlying dynamic is focused in fundamental form on the interactions of

> ## Consciousness and Creation.

When this primal relation is mentally instrumentalized, a new form of Intelligence emerges that is focused on Co-Evolution:

> ## The Inclusive Fitness.

(3) The more our present transforms into the Contingencies of unknown Futures ... which is now increasingly happening ... the more important this relation between Consciousness and Creation becomes for our Society to shape better Futures.

(4) If one wants to use this nature-given relation for the Creation of better Futures, one needs a Methodology that can make this relation usable ... that therefore can instrumentalize the Essential.

What makes the essential usable? The following may be useful here:

A - The establishment of a special reality generator, which is able to make that consciousness, that is existing and active in the relation to Creation, conscious and usable in our human Consciousness (Mind).

B - This special Reality-Generator develops through the following components:

– The 2nd Defluence, i.e., the awakening of the
Now of Creation in the worldly self of the

person, giving rise to a higher, Nagual-I.

– The instrumentalization of Idealities that possess good power for Evocation, i.e., that are able to bring the Potentiality of the Nagual into Interfusion.
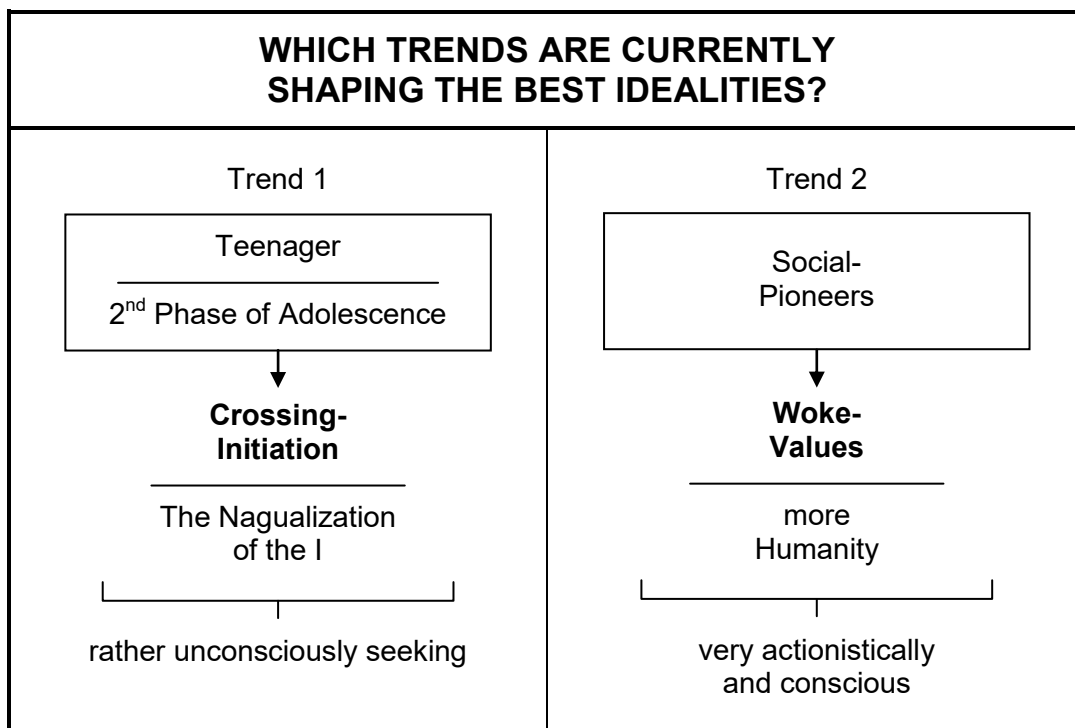

(5) Thus, the integration of Ideality into the special, i.e. 2nd Reality-Generator, is of great importance:

**The more Evocation Power
is active in an Ideality,
the more productive and creative
the Interfusions become.**

(6) This means that the shaping of Idealities becomes the center of attention if one wants to organize Co-Evolution:
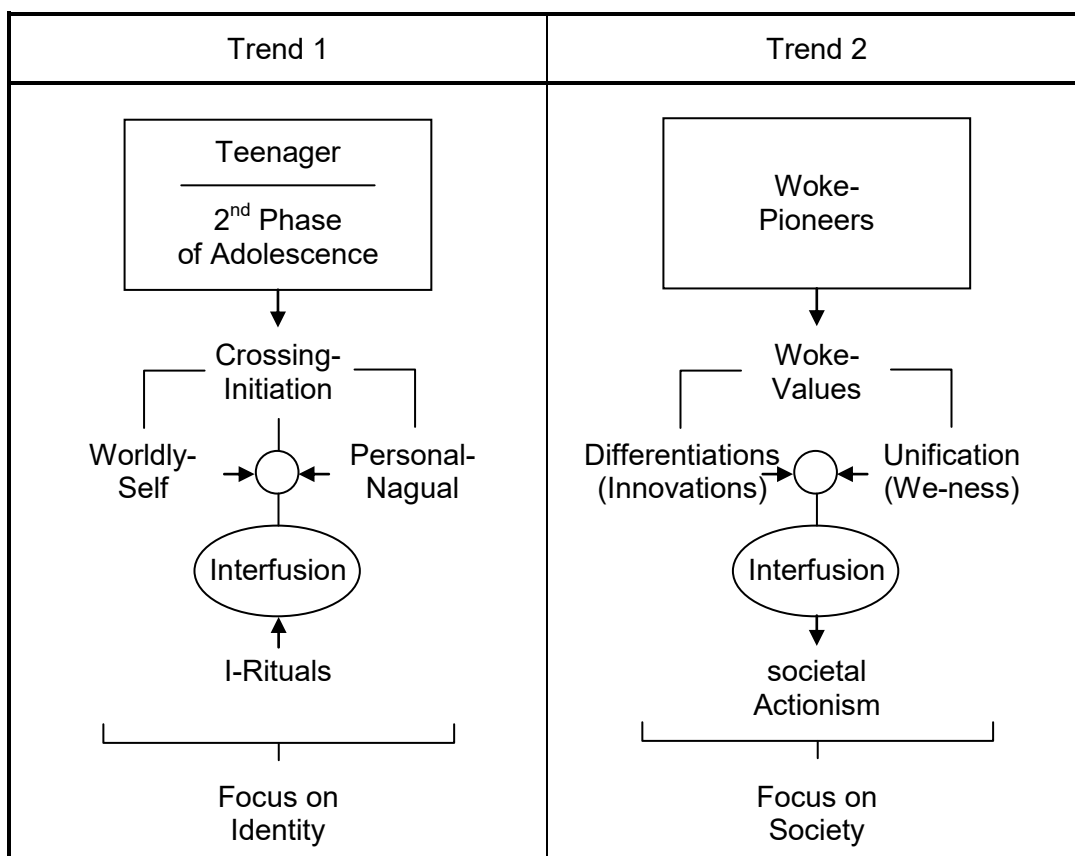

– The instruments of the 1st Reality-Generator ... i.e. Rationality of Meaning, Cognition and Thinking-Logic are only limitedly able to form such Idealities ... spiritually ... mentally.

– The Crossing-Initiations, which are sought by the Teen Generation and are already accomplished in social media through Selfies, are a novel instrument for the shaping of efficient Idealities.

– The Woke-Values of the social pioneers, who strive for more Humanity and Inclusion, are another instrument for the shaping of efficient Idealities.

As a sketch:

WHICH TRENDS ARE CURRENTLY SHAPING THE BEST IDEALITIES?

Trend 1	Trend 2
Teenager —————— 2nd Phase of Adolescence	Social- Pioneers
↓	↓
Crossing- Initiation —————— The Nagualization of the I	**Woke- Values** —————— more Humanity
rather unconsciously seeking	very actionistically and conscious

---

(7) What we currently observe as a trend toward the shaping of Idealities is tied to Teenagers and Woke Pioneers. However, their respective aspirations and initiations are hardly effectively linked at present.

But both trends have something in common ... both streams are concepts for interfusion. As a sketch of this:

Trend 1	Trend 2
Teenager —————— 2nd Phase of Adolescence	Woke- Pioneers
↓	↓
Crossing- Initiation	Woke- Values
Worldly-Self → ◯ ← Personal-Nagual	Differentiations (Innovations) → ◯ ← Unification (We-ness)
(Interfusion)	(Interfusion)
↑	↓
I-Rituals	societal Actionism
Focus on Identity	Focus on Society

---

(8) What is mostly not articulated in the analyses is the following: Both trends reinforce the presence and power of

**"autonoetic
Consciousness"
(LeDoux).**

What follows from this?

What Teens ritually perform in social media is less important than the strengthening effect in terms of autonoetic Consciousness.
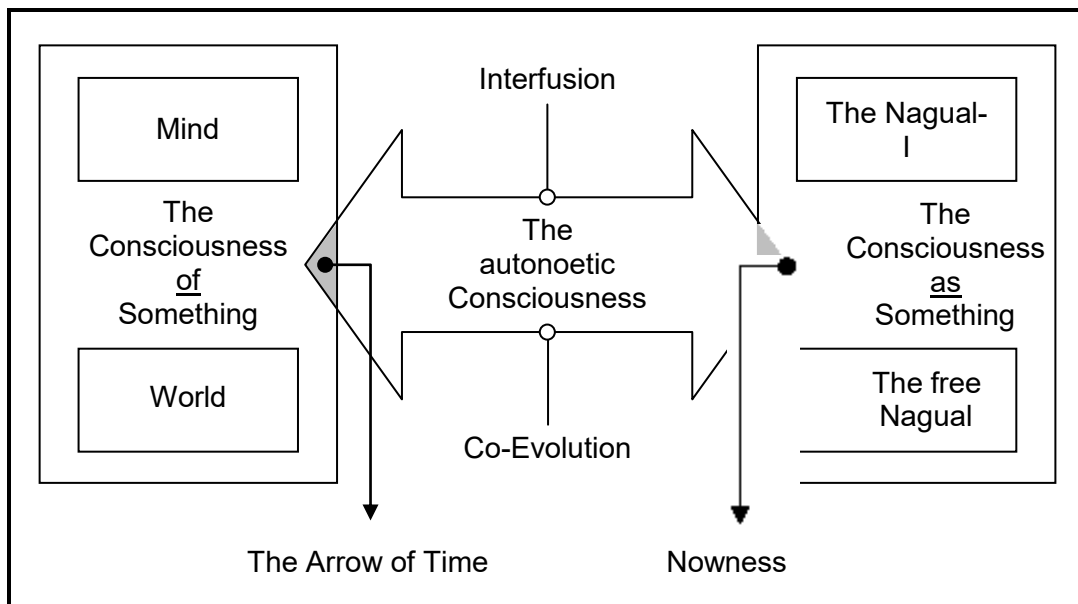

The same is true for the Woke-Pioneers. Their activist initiatives and public effects are less important than the ... strengthening ... of autonoetic Consciousness also accomplished by them. In other words:

**The Teenagers reinforce
the autonoetic Consciousness in the Intrinsic.**

**The Woke-Pioneers reinforce
the autonoetic Consciousness in the Extrinsic.**

(9) What is currently developing in our Society is the growing Presence of the Autonoetic Consciousness. How will it progress?

The autonoetic Consciousness will connect our Mind, that is our Consciousness <u>of</u> Something, more and more effectively with Consciousness <u>as</u> Something. As a sketch:

(10) The more intensively and consistently the Teens and the Woke Elite reinforce and functionally qualify the autonoetic Consciousness, the higher the likelihood that these two Trends will unite ... i.e., "force" our Society into a truly relevant and positive Transformation.

(11) In order for these Trends ... which are both geared towards Interfusion ... to stably unite, we need the use of two types of technologies ... embedded in a Hyperverse:

A the technical-Technologies of

| Metaverse |

Reality-Mix
↕
Staging Creator

B the neuronal-intrinsic Technologies of

| Metabliss |

Mind-Carting
↕
Creation Generator

Hyperverse

(12) When the Hyperverse is brought to bear in the next few years, the following developments will take hold:

– There will be a rapid and significant dissolution of our collective and culturally elaborated Fear of Contingency.

– There will be a distinct trend toward " Self-Empowerment".

Quoting Steward Brand, "We are like gods and could become just as good."

– On that basis, there will be a huge push toward Bottom-up Creativity and Collaborations.

– There will be a significant shift away from the resilience strategies currently in use ("You don't have a chance, so take it.").

– Likewise, a move away from the many compensation concepts (wellness for the soul, etc.).

– A new kind of value cluster will develop that redefines the Dignity of the Individual:

Dignity is lived Nagual.

(13) If the individual and social Effects of Hyperverse become more and more powerful (keyword: Chain of all Generations), the following new Idealities will be able to successively establish themselves:

A   The ideal of a happy I will prevail $\dfrac{\text{Individual}}{\text{personal}}$ intrinsic

B   The ideal of a rhizomatic organization of consciousness will prevail $\dfrac{\text{collective}}{\text{societal}}$ extrinsic

(14) When A and B become established, we will begin to live in the 2nd Axial-Age. From this follows:

THE BEGINNING OF THE 2ND AXIAL-AGE

- The beginning does not succeed without a Hyperverse.

- The beginning does not succeed without the Effect Unity of Metaverse and Metabliss.

- The beginning does not succeed without the I Rituals of the Teenagers.

- The beginning does not succeed without the Woke-Values of the Pioneers.

---

(15) What is most important for the beginning of the 2nd Axial-Age? What has the strongest originating power?

It is clearly the joining of Teens (Crossing Initiation) and Woke Pioneers (Values of Unification/Inclusion) that is coming.

As Teens and Woke-Values unite in the increasingly active autonoetic Consciousness, Tech-Companies will become Enablers:

- The critical and intellectual public accuses GAFAM of destroying or damaging our social reality. The Tech-Companies are being discredited as "enemies".

- The truth is: it is the people (Teenagers / Woke Pioneers) who have started to fix and "up-skill" our social reality. The Tech-companies are helping them do it.

(16) If we didn't have GAFAM, Social Media and Metaverse, and if we didn't get Hyperverse, our social and democratic reality would deteriorate year by year. It follows:

**The alleged
enemies of our society
are ... already today ...
the healers of our society.**

(17) The elite of the know-it-all and the fighters against GAFAM have the so-called sovereignty of interpretation in most Western-oriented democracies: One fights relatively offensively the developments of the Metaverse (verbatim in the FAZ: "Mark Zuckerberg lives in a make-believe world"). But one does almost nothing to help the Teenagers to better accomplish their striving for a Crossing-Initiation (2nd Defluence).
And there are ... presumably caused by the current social conflict climate ... almost no public ambitions directed at using the neural and mental unification power of digital media to be able to develop

more Humanity.

(18) From a more high-level perspective, our situation can be described as follows:

– The digital revolution is consistently gaining ground and permeating more and more areas of life.

– The current developments to the Metaverse (which are extremely offensively promoted by the governments in China and South-Korea) are being fought over here as "anti-democratic" and "harmful to society".

– Largely independent of this (and hardly noticed), the striving of the Teenagers and the Woke-Values are converging and uniting in a spiritual space (evoked by themselves), which is formed by the new kind of autonoetic Consciousness.

– What is already happening today in terms of the autonoetic consciousness cannot be recognized by our society. Why not?

Because our culture is not able to operationalize the effects between

Potentiality

↓

Ideality

↓

Reality

Likewise, our culture cannot functionalize the essential of human existence ... i.e., the relations between consciousness and creation ....

(19) It follows:

**We are unable to form
and create those Idealities
that we would need
to create a quantum leap
of Intelligence and Humanity
out of the digital reality
that we ourselves have created.**

(20) This quantum leap can be described as follows:

MORE EMERGENCE PLUS MORE WE-NESS

better Intelligence	better Humanity

The coupling of the Worldly-I and Consciousness to the personal / Free-Nagual

The Awakening of the personal-Nagual in the WE-ALL

more Emergence

more We-ness

The impulse of the Teenager

The impulse of the Woke-Pioneers

Interfusion

Co-Evolution

---

(21) Why can't we "officially" make this quantum leap that digitality is now offering us? Why are we blocking?

Why don't we couple the impulses of Teenagers (their selfie rituals) to the possibilities of social media and Metaverse? Why aren't we coupling the impulses of the Woke pioneers to social media and Metaverse?

Why aren't we promoting the big tech players in terms of these two pairings ... quite aggressively?

(22) The answer might be as follows: We are defending a typical Western culture of mind of which we are officially, or perhaps just unconsciously, very proud.

What does this typical Western intellectual culture consist of?

1. <u>The old Myth-Set</u>

    – The Beyond ⎤   The
    – The Absolute ⎬ ⎯   "Vertical-Tension"
    – The Truth ⎦   (Sloterdijk)

2. <u>The existing 1st Reality-Generator</u>

    – The rational
      Worldview   The Values
    – The Cognition-   of
      System   Reason
    – The Logic of Thinking

3. <u>The classical learning Model</u>

    "Damage makes you wise."
    └─────────┬─────────┘

    Crises

    Threats ─────┼───── Problems

    Conflicts

(23) This typical western mind-culture is mentally not able to switch to

the evocative Power of Idealities.

The currently dominating 1st Reality-Generator (rationality of reason / cognition / thinking logic) has no constructive approach to these Idealities.

(24) What to do?

Probably a publicly not that observable parallelism of two processes will develop:

A - Due to the inability of our mind-culture to develop evocatively powerful Idealities, crises, conflicts and problems will escalate more and more.

    This will more and more activate the classical learning schema, i.e., it will "switch into alert mode".

    Accordingly, there will be an attempt to replace the urgently needed
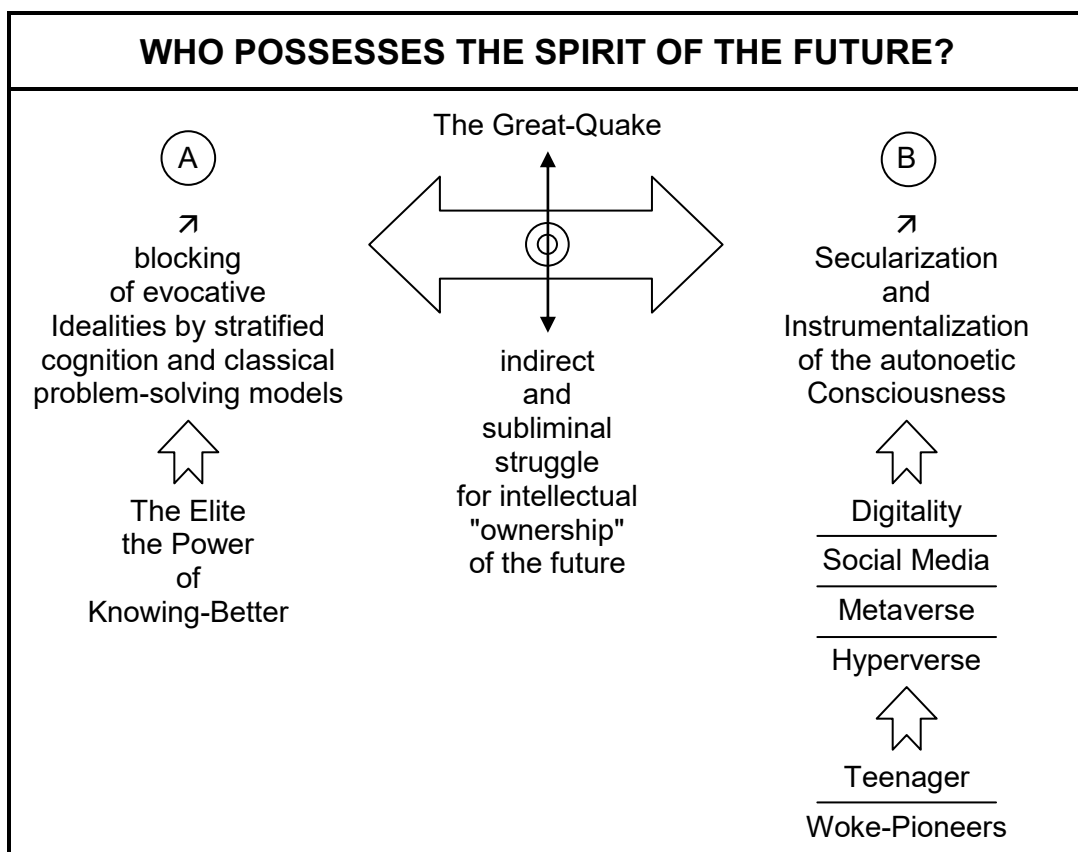

co-evolutive Intelligence

with an ambitious cognitive intelligence.

But this will block the necessary opening of the Mind to Co-Evolution.

B - Independently and in parallel, the usage of Social Media, Metaverse and Hyperverse will change significantly, and this will be done by the users. In other words:

**The seeking of Teenagers
and the wanting of Woke-Pioneers
will use the digital platforms
in such a way that
the autonoetic Consciousness
will become more and more
distinctly worldly-operable.**

(25) On the one hand, then, a blocking of Ideality by cognitive intelligence (Theory and Knowing Better). On the other hand, a secularization of the autonoetic Consciousness by Teenagers and Woke-Pioneers in the digital systems. As a sketch:

WHO POSSESSES THE SPIRIT OF THE FUTURE?

The Great-Quake

(A)   (B)

↗   ↗
blocking   Secularization
of evocative   and
Idealities by stratified   Instrumentalization
cognition and classical   of the autonoetic
problem-solving models   Consciousness

⇑   ⇑

The Elite   Digitality
the Power   indirect   ─────────
of   and   Social Media
Knowing-Better   subliminal   ─────────
                             struggle   Metaverse
                             for intellectual   ─────────
                             "ownership"   Hyperverse
                             of the future
                                                ⇑

                                                Teenager
                                                ─────────
                                                Woke-Pioneers

---

(26) As yet, this underlying struggle has not become virulent and thus public. This gives the elite of the knowing-better time and opportunity to use the supposedly apocalyptic threats emanating from the Californian digital corporations to make it impossible or difficult for the Teenagers and Woke-Pioneers to culturally diffuse their burgeoning autonoetic consciousness:

One manipulates our culture's public value system in such a way that the Teenagers and Woke-Pioneers tend to voluntarily (i.e., out of "reason") refrain from realizing their evolutionarily very important strivings and ambitions through digitality.

During the book burnings in the Middle Ages, there were similar power strategies directed against the emergence of a new kind of evolutionary society. As a reminder, the eminent scientist Leibniz said that "the terrible mass of books ... threatens us with a return to barbarism."

And today? This time the Elites of the old Power are fighting the Emergence of a Society of Co-Evolution.
