

<b>HYPERVERSE... THE SPIRIT FOR A BETTER FUTURE</b>
From Keno Oneo, Mastermind of the Metabliss-Project

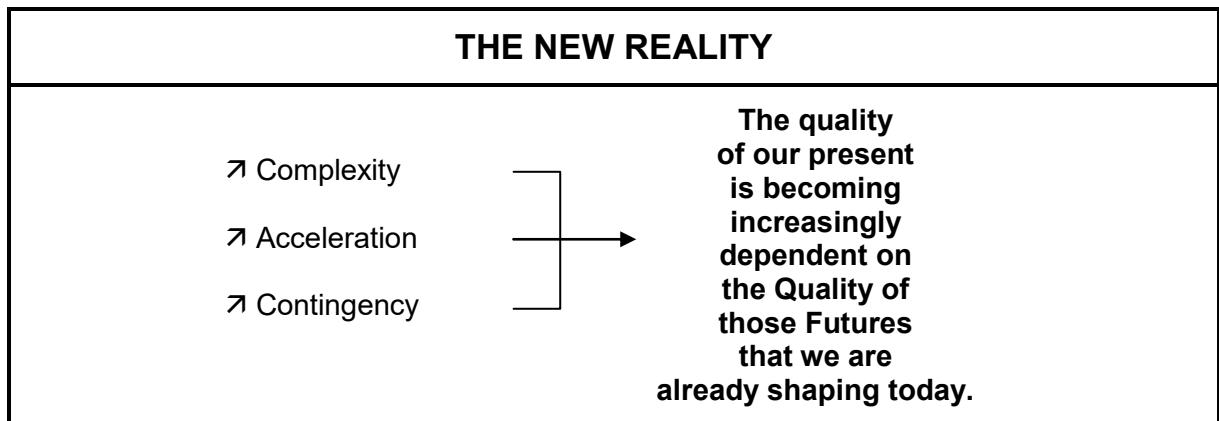

In the long history of mankind there has never been a century (the 20th century) in which the cultural program of "Progress through Innovation" has caused such an

**Explosion  
of Transformations.**

Through this evolutive development, which is in principle positive, the life situation of man and society has changed radically. In the meantime,

**a new  
Reality**

has developed and prevailed:

The question that is becoming increasingly urgent in this situation is:

**What kind of Consciousness  
will we need to develop  
in order to deal with the New-Reality  
in such a way  
that we do not become its victims?**

We need a new kind of Future-Intelligence, i.e., a consciousness that is specifically geared to Emergence (the Unknown). But we can only establish this intelligence if we mentally enable ourselves to develop

**a special Consciousness  
programmed for the  
Evolution of our own Consciousness.**

That is, a Consciousness for the purposeful and continuous improvement of our own Consciousness. This is the development of a

**Meta-Consciousness.**

This development is a great challenge. Who can develop this Meta-Consciousness with which instruments and make it efficient as a new kind of Future-Intelligence?

To be able to answer this question, one should first analyze the constellations and the possibilities. Three aspects can be specified here:

- 1 The New-Reality is directly dependent on the Type and on the Quality of the Consciousness. We Humans and our Mind-Sets are the Originators of the New-Reality, i.e. our Intrinsic is the Originator.

There has never been a situation in the history of mankind where Consciousness was as important as it is now:

**Only our own Intrinsic  
can be the Creator of the Better  
in the Here and Now.**

- 2 The New-Reality can ... creatively and constructively ... only be managed in a very limited way by "culture"... culture has the wrong foundations for Meta-Consciousness:

**Culture is eliminated as  
a source for Meta-Consciousness.**

**Culture will be replaced  
by the "Sphere of Rhizomes".**

- 3 The New-Reality needs a different (or extended) brain program, i.e. a Qualification of our Mind-Cards.

We need a special (second) Reality-Generator that in the space of the Unknown can invent, create and manifest the Probabilities for the next Better:

**For the establishment of  
such a Reality-Generator  
we need the constructive cooperation  
of the "autonoetic Consciousness" (LeDoux).**

If one summarizes these three aspects as keywords, one gets the following statements:

## THE NOVEL FUTURE-INTELLIGENCE

- ① The Quality of our Intrinsic and the Meta-Consciousness are deciding. No more knowledge and cognition.
- ② Culture drops out as the shaper of the new kind of Meta-Consciousness ... the Sphere of Rhizomes becomes the maker of the new Intelligence.
- ③ The auto-noetic Consciousness will become our Cooperation Partner in developing the new of the Meta-Consciousness.

Even further condensed, three theses emerge:

- ① **Subjective (Nagual) Intrinsic becomes more important than knowledge and cognition.**
- ② **The Great-Rhizome takes over the role of Culture.**
- ③ **The auto-noetic Consciousness will be our partner for the "better future"...**

In the subsequent explanations, these three theses will be analyzed separately.

### **1<sup>st</sup> Thesis: The importance of the subjective Nagual-Intrinsic**

In the present " Epoch of Theory " (Joas) and thus in a society that organizes its intellectual progress through the power of knowing better, the subjective, the intrinsic ... and thus the specifically human are what are marginalized and suppressed as "non-operable".

If the hierarchization of knowledge and the cognition of truth are the engine of the programmatic "progress through innovation", "cultural traditions" dominate, ensuring that positive progress is automatically associated with a specific kind of "inhumanity". Alain Badiou wrote:

**"Truths are inhuman."**

**"The inhuman is thinking itself."**

Thought and Truth are the instruments of our cultural tradition. We use them to encode and manage the human Fear of Contingency ... the Fear of the Unknown ... the alleged Chaos.

Now, the more Contingency shifts into the actual today in our time, the more virulent the Contingency Problem becomes.  
From the point of view of the model of Noetic, Contingency is

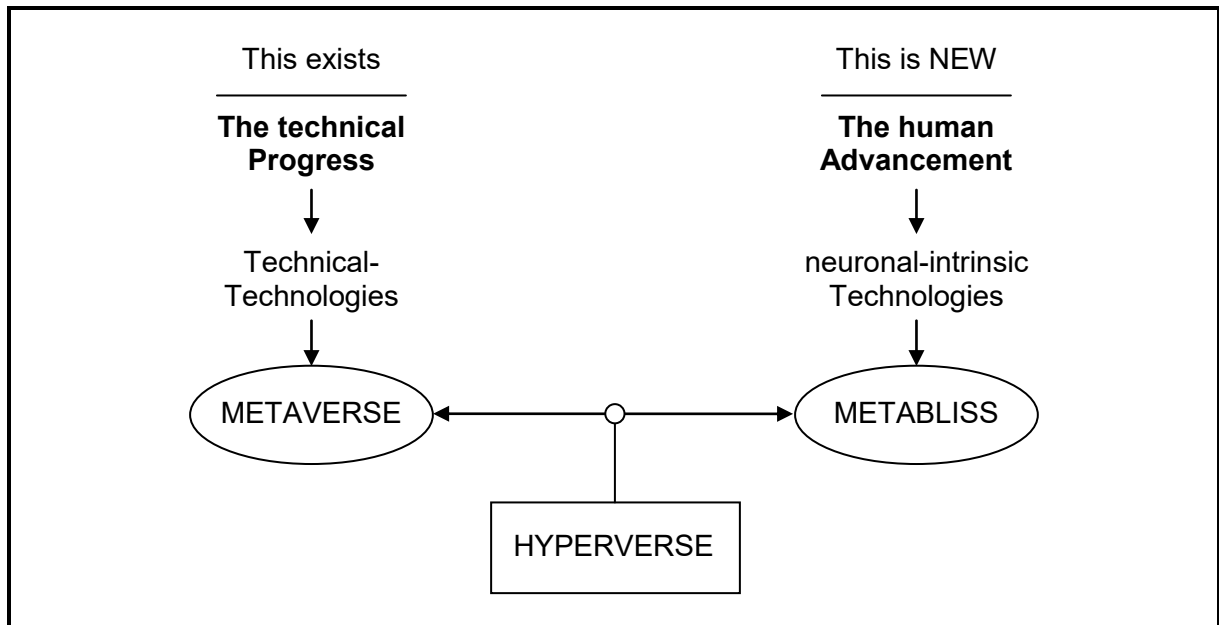

**the truth of  
the Now of Creation (Nagual).**

It follows: If it is possible to integrate our Consciousness into the Nagual ... if therefore our Mind can develop into the " Agent " of the Nagual ..., then the amount of the produced Inhumanity becomes smaller and smaller:

**The Nagual is  
the Now of every Human-Being.**

**The Nagual cannot  
produce Inhumanity.**

For the development of an Evolution, in which the progress of our Humanity shall become the programmatic of our technical Progress, we need the interaction of two different technologies. As a sketch:

META of Mark Zuckerberg is thus faced with a major task:

**It is to integrate,  
as early and committed as possible,  
the intrinsic (Nagual) Effects  
of Metabliss into the current  
technical developments of  
META's Metaverse.**

Why? The earlier and more aggressively the Intrinsic, which is marginalized by society, can be integrated into mixed media (VR, AR, IR) offerings, the more

**evolutively-positive  
effective**

the Metaverse will develop and prevail in society. In other words:

**The acceptance of  
META's Metaverse decisively depends  
on whether it succeeds in,  
to integrate a positive  
(Nagual) Intrinsic into the Metaverse.**

Why have we so fundamentally marginalized the Sphere of the Subjective and the Intrinsic in our modern society? Paul Feyerabend has ... probably more intensively than any other scientist ... comprehensively analyzed this issue.

The core of his argument is (mostly in my words):

- 1 Our cultural Traditions are our blind spots. We do not recognize the Inhumanity which our 1<sup>st</sup> Reality-Generator generates with its dualism and with its one-sided focus on thinking, truth and cognition.
- 2 Since we have coupled our programmatic "progress through innovation" exclusively to this 1<sup>st</sup> Reality-Generator, our extrinsic progress ... the more intense it becomes ... produces a growing Inhumanity (which is, among other things, the problem of "neoliberal Capitalism").
- 3 The so called private and intrinsic " Life-Problems " (John Kekes) can cannot be solved by the strategy-framework given to us by the 1<sup>st</sup> Reality-Generator, namely

**problem and problem solving  
as the way to a  
better life and to a  
happier I.**

This means: man is left alone with his intrinsic problems. He is merely advised that he should use extrinsic-technical advances to "somehow" get a handle on his private-intrinsic problems and deficits ... which are continually increasing .... This is the extremely damaging double-bind problem of human

**Commitment to Resilience.**

The society organizes offers for resilience. But it does not offer ways that the person's I and Intrinsic can be freed from this negative commitment to resilience.

Much of the growing problems with depression, mental illness, drugs, suicide, and aggression have their roots here. The digital revolution and social media cannot help here either:

**The smartphone  
does not free people  
from a society that  
makes people sick.**

What is needed is the Nagualization of the I and the Intrinsic (Mind-Cards) ... that is, an Integration of the Personal-Consciousness into the Now of Creation (Nagual). As a consequence:

- We cannot heal the sick society by more and more cognition and better reason.
- We need that Metaverse which is able to connect the I and the Intrinsic of the people with the Nagual ... very fundamentally and every day. That is why we need the Hyperverse ... the connection of Metaverse and Metabliss ... in line with the Credo:

**"Give People the Now  
of Creation."**

A Hyperverse can successively dissolve the destructive commitment to resilience. Namely, when it connects the 2<sup>nd</sup> Defluence of the Teenagers with the Mind-Carting of the Young Adults, i.e., when

### the Chain of all Generations

can be established. It follows:

- Without Digitality, we will not be able to develop a Society that has the Meta-Consciousness that can heal our Society.
- Without Hyperverse, we will not be able to reduce or resolve the growing intrinsic " Life-Problems" of people:

**An unhappy I  
developed in adolescence  
remains an unhappy I throughout life.**

**A negative Mind-Set  
established in the  
dispositional phase  
remains a life-long  
a Mind-Set whose Mind-Cards  
transform the real lived life  
into a permanent problem.**

So it is a matter ... and here I again follow Paul Feyerabend ... that in our democracy one puts "the view of the citizens" at the center of the collective spirit. And that "their subjectivity" is given validity, "and not what small groups of incomprehensibly talking people declare as being".

So the point of the Hyperverse is to dissolve the elitist Power of Knowing Better, with the following objective:

**Our Society learns that  
the Private of People  
and the Intrinsic of People  
will be the factor that  
leads us to the Meta-Consciousness,  
i.e. to a new kind of Future-Intelligence.**

**2<sup>nd</sup> thesis: The Rhizome replaces the culture.**

The starting point is the following statement:

**Only when the  
Private-Intrinsic of People  
is the focus of  
the Collective-Consciousness of our Society...  
only then the Great-Rhizome will be acting as  
the Source for the Becoming-Better.**

Our society is learning that the hierarchization of better-knowing, that is currently the norm, carries a collective energy and practice of exclusion into our society. This continuous accomplishment of exclusion is increasingly damaging the Spirit of our Democracy.

This continuous execution of exclusion is increasingly damaging the spirit of our democracy.

Currently, the 1<sup>st</sup> Reality-Generator that we all have "in our heads" ensures that the Private-Intrinsic is more or less rabidly marginalized ... across the board and on a daily basis. As Paul Feyerabend has analyzed, we do this because our "traditional traditions" imply or command it.

These are the following "traditions", which at the same time are also effective as officially authenticated ideologies:

- 1 The world and its future consist of resolvable problems.
- 2 There are clear (thus provably successful) methods for problem solving solutions ... universal solution paths.
- 3 The non-solvable problems are to be excluded, because they belong to the pure private sphere.

These 3 traditions represent at the same time the orientation patterns of the western culture with the Christian dogmas. Anette Kurschuss, the chairwoman of the highest body of the Protestant Church in Germany, describes the following two dogmas as centrally important:

**"The fundamental  
Sinfulness of human Beings"**

**"The need for  
Redemption of Mankind."**

Behind these western Christian values is man's

**Fear of Contingency,**

that is, his mental inability to accept, love and constructively (co-evolutionarily) use the principally open becoming and the formative power of the unknown.

Coupled to this Fear of Contingency is the wrong learning scheme of our culture ... i.e.

**"One becomes  
wise by harm".**

This is a programmatic that uses the negative (conflicts, crises, threats, problems) to produce the better from it. Meaning:

**Our cultural learning scheme  
organizes cooperation with the negative.**

**On this basis,  
no novel Future-Intelligence  
can be developed.**

The Fear of Contingency and the wrong Learning-Schema are mutually interconnected. The mediating Common is both our biological survival program and

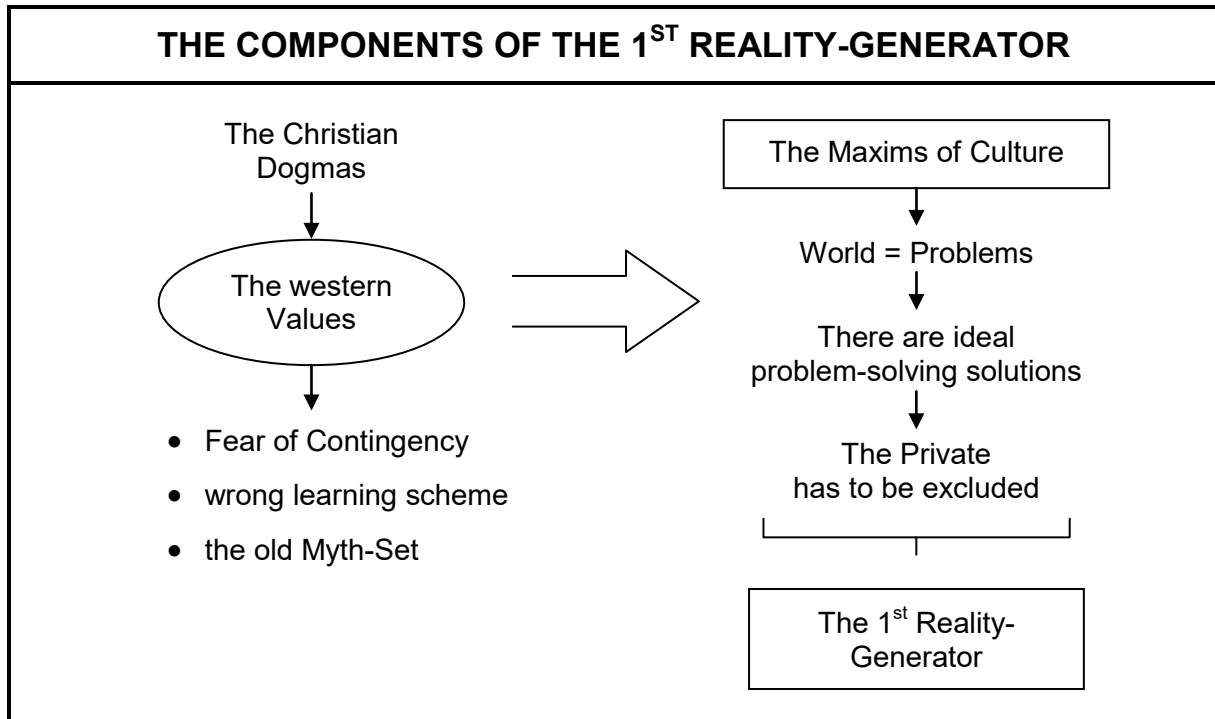

**the old Myth-Set**

... that is, the coupling of our reality strategies to

**the Beyond**  
**the Absolute**  
**the Truth.**

If one presents these factors just mentioned in an overview, one gets the following picture:

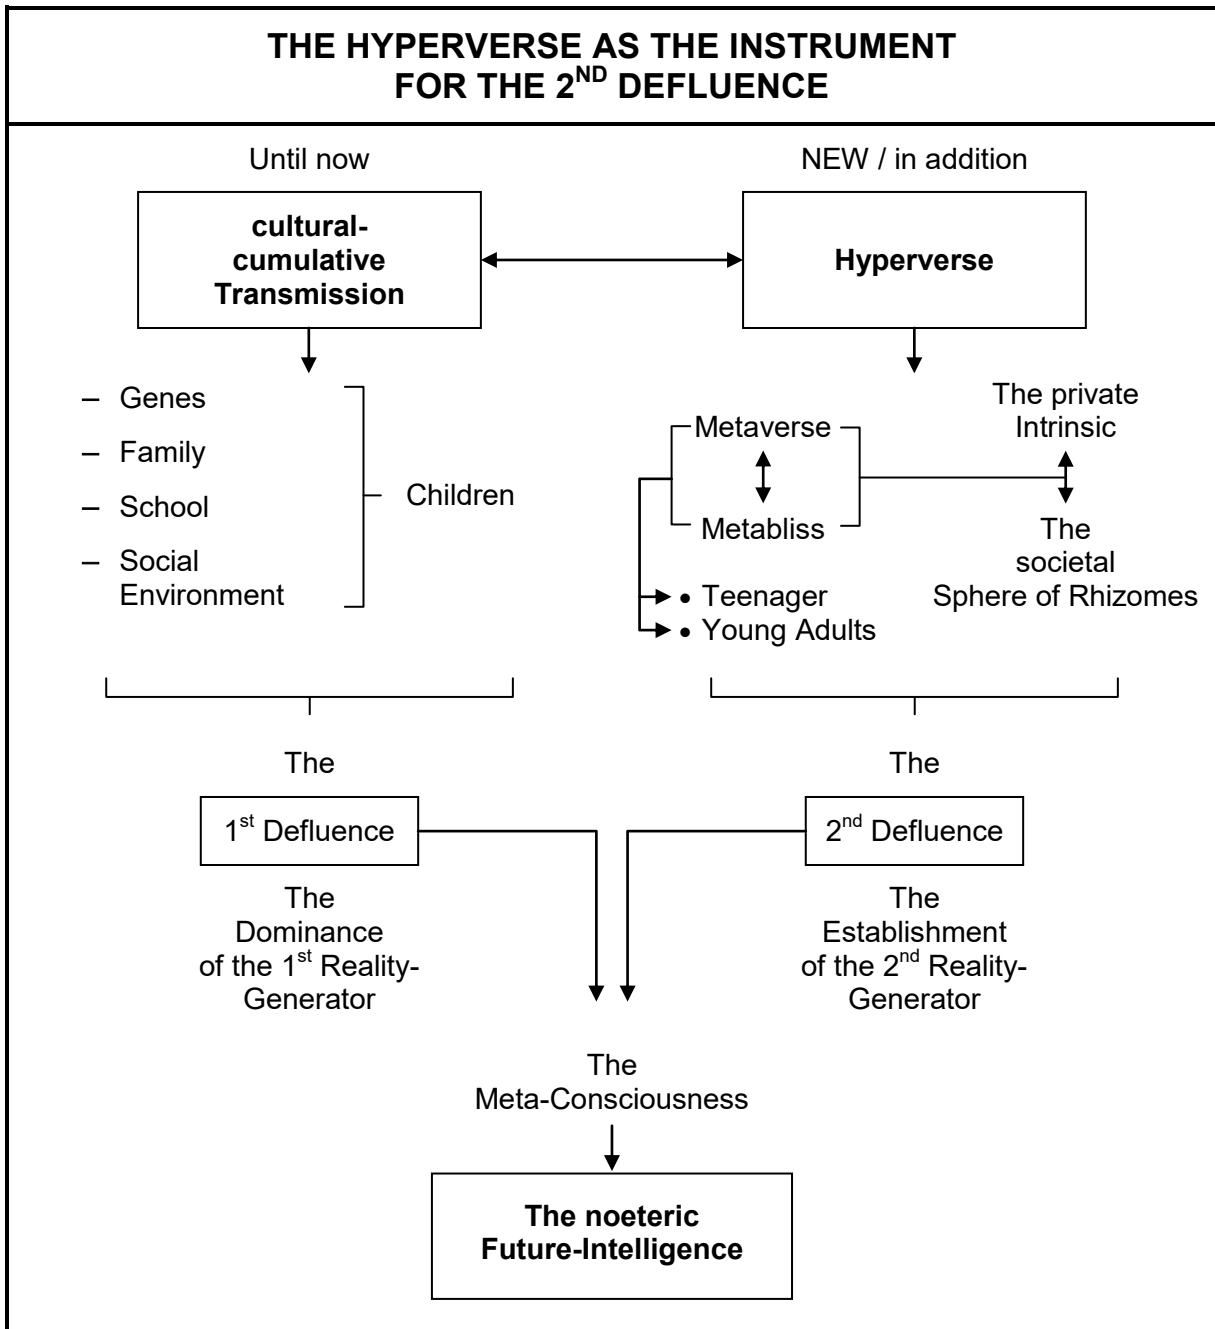

The culture that permanently surrounds and shapes us is the processor of the 1<sup>st</sup> Reality-Generator that increasingly fails when it comes to organizing the becoming-better together with the Now of Creation ... as a practice of Co-Evolution. It follows:

The growing mental failure of the 1<sup>st</sup> Reality-Generator in terms of the Future of the Better, is permanently programmed into the mind-cards of each new generation by the "cultural cumulative transmission" (Tomasello), which is a compulsory social program for all children and young people:

**The spiritual Future-Competence  
of the coming generations is  
permanently degraded by our Culture.**

What we need is a system that works independently and parallel to the culture and that is aimed at establishing a 2<sup>nd</sup> Reality-Generator ... ideally in the mind of each person. The Hyperverses can become this system. As an explanatory sketch:

Cultural cumulative transmission integrates our traditions and the respective old values, ideologies and schemas into the 1<sup>st</sup> Reality-Generator. Meaning:

**Powerful pasts  
are mentally used  
to produce the Future of the Better.**

**We connect our intelligence  
with principles of the past  
to live our life and to  
lead our world into a better Future.**

With this spiritual equipment (1<sup>st</sup> Reality-Generator) in the mind, the coming Generations can only become the Losers of their Life. They live with their young Life into an existential Future-Crisis.

The young generation has woken up when it comes to the topic of "climate change". They have understood that the future of their lives will be in danger if, for example, the energy crisis is not resolved in a timely and thorough manner.

When it comes to the topic of the "future crisis," young people have not yet woken up. Why not? Because the results of the 1<sup>st</sup> Defluence are dominating in their Consciousness. The 1<sup>st</sup> Defluence blocks the Perception of the failing Consciousness.

The "Future-Crisis" is a Crisis of Consciousness. The youth ... equipped with the 1<sup>st</sup> Reality-Generator ... does not have that Consciousness which they will need to recognize and comprehend the "Future-Crisis".

So the question arises, who can impart the missing Consciousness to the coming youth. It will not be culture, nor the 1<sup>st</sup> Reality-Generator, nor the 1<sup>st</sup> Defluence, nor the cultural cumulative transmission.

The elites of the knowing-better likewise not ... thus neither the politicians, the NGO's, the media, the scientists and the so-called "culture creators". These elites are primarily interested in combining their intellectual-social skills with official power, in combination with securing their privileges.

If one looks at it very closely (i.e. without mental blinkers), one recognizes the following:

- The Future-Crisis is a Crisis of Consciousness.
- The Crisis of Consciousness is a Youth Crisis.
- The Youth Crisis is a Crisis of our Culture.

The inner programmatics and traditions of official and public culture are increasingly losing their fitness. Why? Because the culture is unilaterally and dominantly shaped by the 1<sup>st</sup> Reality-Generator, and because it is conceived as a Vertical-Tension, that is, a

**Top-Down-Dynamic  
of Knowing Better.**

What is missing is the connection with a "Sphere of Rhizomes" (Deleuze), which has yet to be built and which, in a novel and digitally organized Decentralized-Tension, ensures that the hitherto excluded Private and the Intrinsic of People can become the content of a 2<sup>nd</sup> Reality-Generator. In other words:

**The specifically Human  
becomes the Raw Material  
of the new Future-Intelligence.**

Not knowledge, facts, logic, intellectuality and cognitive processes determine the efficiency of the 2<sup>nd</sup> Reality-Generator, but the Private and the Intrinsic of the people. Thereby the following takes place:

- The spiritual creation of the Better is democratized.
- The establishment of a digital Sphere of Rhizomes gives the Youth the Chance to accomplish their 2<sup>nd</sup> Defluence ... consciously disconnected from the schemes and dogmas of the Top-Down-Culture:

**The Rhizome frees  
the mind of the Youth  
from the growing Future-Stupidity  
of our culture.**

This Future-Stupidity is caused by our mental inability to constructively use the growing Contingency (the new reality) as a partner:

- Contingency is that Now of Creation (Nagual) that is surprising us.
- If one cooperates with the Now of Creation (Nagual), Contingency becomes the Co-Creator of that Spirit that makes Better-Being possible.

The Future-Stupidity arises when one tries to rationally-logically control Contingency. The novel Future-Intelligence arises when one transfers or integrates Contingency into a Rhizome. Ultimately, it will be the Sphere of Rhizomes that creates the 2<sup>nd</sup> Reality-Generator and makes it permanently productive. This is the positive Reality that the Hyperverse will donate to the Youth.

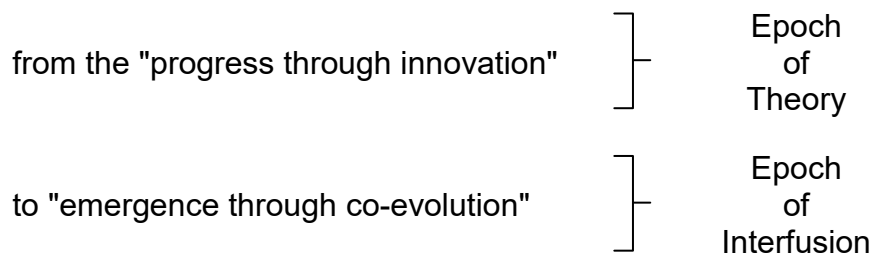

On this basis, let us analyze the Essence of the Great-Rhizome:

**CHARACTERISTICS OF THE GREAT-RHIZOME**

- 1.- The Rhizome destroys the Linearity of Cause and Effect. It dissolves thereby the hierarchical expectation logic.
- 2.- The Rhizome incarnates surprising (not planned) Contents of Consciousness in the mode of the Nowness. (Deleuze: "the most instantaneous present").
- 3.- The Rhizome represents the most intense and stable Common, present in all contingent (fractal) events. The Rhizome is the great Unifier of all fluctuating Differences.
- 4.- The Rhizome is open on all sides, and is therefore a "surface topology" (Deleuze) designed to evoke nomadic, impersonal and pre-individual Singularities". The self-generating Occurrences become more important than the individuals involved.
- 5.- The Rhizome autonomously produces "the Power of Affirmation" (Deleuze), thereby generating a constant Energy of Self-Overcoming that can be harnessed collectively.

**3rd thesis: We cooperate with the auto-noetic Consciousness.**

The Model of Noetic is the attempt to reflect the growing presence of the auto-noetic Consciousness in our human Consciousness and ... as far as possible ... to make it mentally usable, e.g. for the following change in the shaping of the world:

The Model of Noetic is based on the following three guiding principles:

<b>THE PRINCIPLES OF NOETERIC</b>	
<p>①</p> <p>②</p> <p>③</p>	<p>The world basically consists of the Now of Creation (Nagual). Problems are part of this creation.</p> <p>All problem solutions generate further / other problems. So there are no unique (principally correct) or final problem-solving methods.</p> <p>Only the Private and the Intrinsic connect our Spirit (Consciousness) with the Now of Creation (Nagual). The Mind-formed (worldly) problem-solving methods do not connect us to the Nagual.</p> <p>Thus, the human Spirit is the best evolutive problem solution, and that happens when it becomes the Representative of the Nagual. It follows:</p> <div style="display: flex; align-items: center; justify-content: center; margin-top: 20px;"> <div style="text-align: center; padding-right: 20px;"> <p>The Noetic Future- Intelligence</p> </div> <div style="font-size: 3em; padding-right: 10px;">}</div> <div style="text-align: center;"> <p><b>The more intensively we shape the Nagualization of the human Spirit, the fewer harmful problems will arise in our coming Futures.</b></p> </div> </div>

The auto-noetic Consciousness is at the center of the Methodology of Nagualization. It is assumed that this special Consciousness will be the Partner that will help us to initiate and accomplish the Nagualization of the human Spirit.

The underlying assumptions can be described as follows:

- Due to our enormous evolutive progress (especially in the last century) the new reality has established itself as "our present", i.e. growing Complexity, Acceleration and Contingency. Meaning:

**Our Present is transforming  
into an open Future.**

- This constellation, which puts the new time mode of Nowness more and more in the center of the collective Consciousness, is the Caller of the auto-noetic Consciousness. In other words:

**The auto-noetic Consciousness  
is becoming more and more present  
in our Consciousness because our  
extremely successful Progress has called it.**

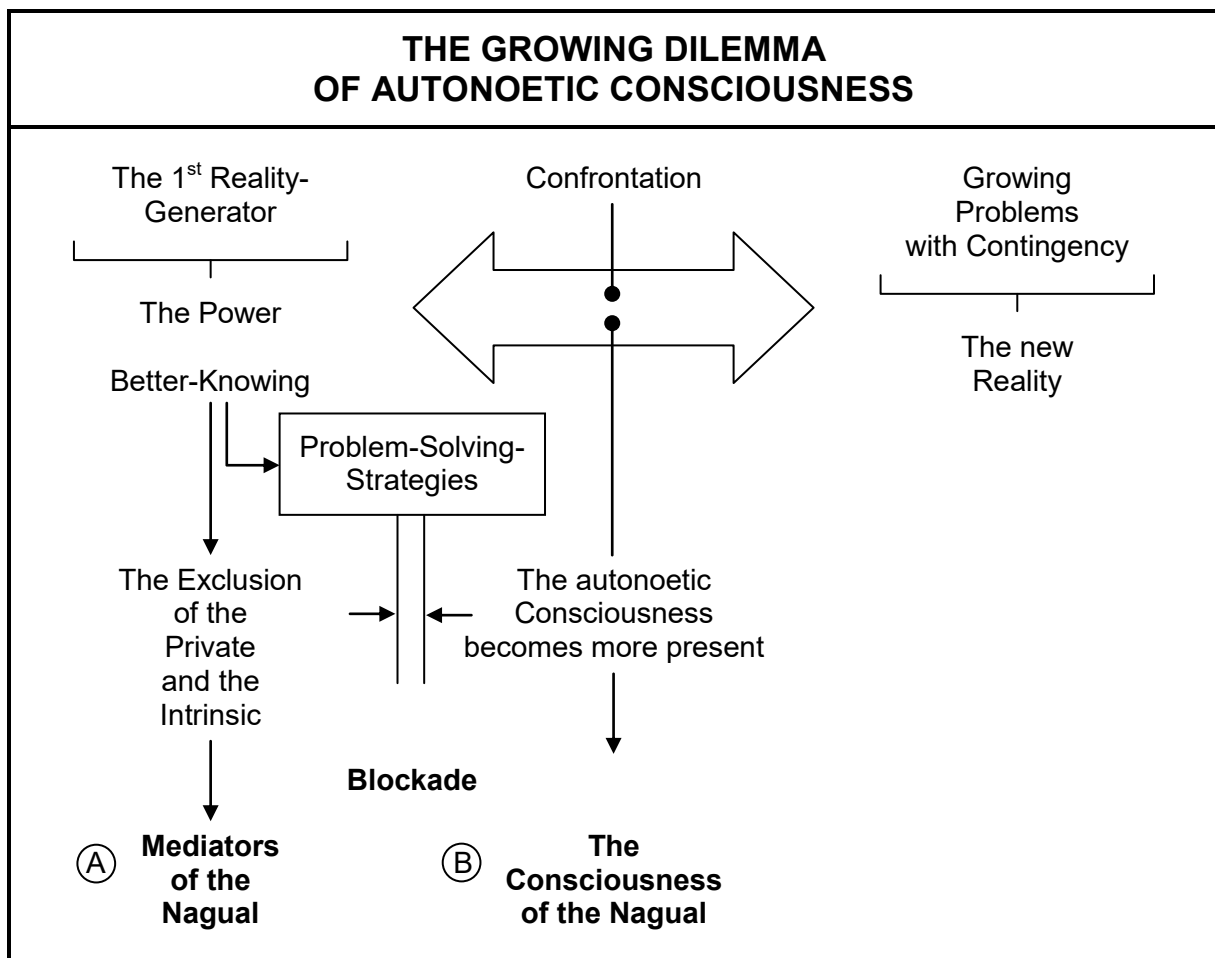

- If we spiritually fail to harness the growing Presence of the auto-noetic Consciousness for our Future, we will be forced to permanently develop and enforce (with growing intensity) Problem Solutions that in fact create avoidable problems.

The energy and climate policies of experts and governments are an example of this.

- If the conflicts and crises dramatically intensify, the 1<sup>st</sup> Reality-Generator, which consistently excludes the Now of Creation (Nagual) as well as the Private and the Intrinsic, becomes the Dominator ... the alleged "Knight in shining armor". The consequence of this:

**The auto-noetic Consciousness  
cannot be activated as  
the "Knight in shining armor".**

The situation is thus quite "weird": With our evolutionary progress we have called the auto-noetic Consciousness into our Consciousness. But the Mind-Sets and Belief-Systems of our 1<sup>st</sup> Reality-Generator are fading out the auto-noetic Consciousness as far as possible. The following sketch tries to illustrate this:

Growing Contingency generates the growing Presence of the auto-noetic Consciousness. But the 1<sup>st</sup> Reality-Generator can only cope with the old logics of the problem-solving strategies to these Contingency-Problems. But these strategies produce the wrong thing, that is the Blockade.

Which blockade? What is blocked? Blocked is the cooperation of (A) = Mediators of the Nagual and (B) the Consciousness of the Nagual ... the auto-noetic Consciousness.

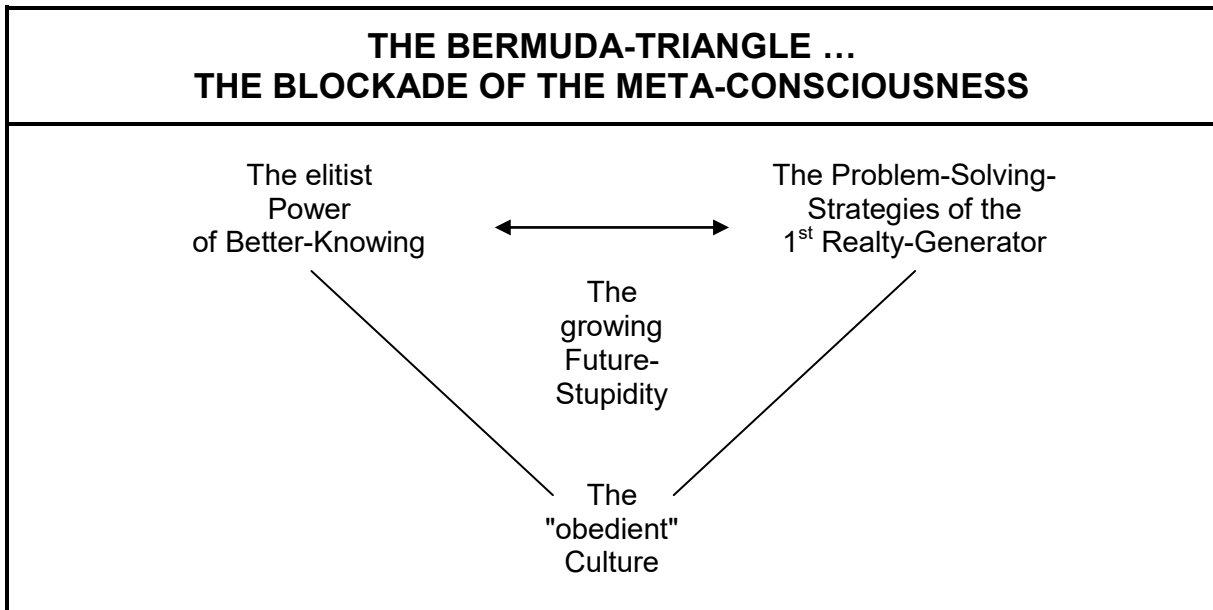

Who are the Mediators of the Nagual? The private and the Intrinsic. That is, the Being of ordinary people ... beyond the hierarchized power of knowledge and expert authority. Meaning:

- If we want to organize a Nagualization of the human Spirit, we will have to separate ourselves from the dominance of a culture that primarily organizes itself through the power of knowing better.
- The following areas will therefore become more important than ever in the coming decades:
  - A. The Totality of Me and We, i.e. the We-All the factor of Unification).
  - B. The Essence of the Essential (= the Relation between Consciousness and Creation).
- If we want to consistently activate and progressively shape the areas A and B in our society, we will have to use the rhizomatic possibilities of digitality, i.e. concretely

**establishing a Hyperverse  
that can combine the  
Reality-Mix of Metaverse  
with the productivity of  
the Intrinsic organized by Metabliss.**

We cannot expect (or demand) that the "Bermuda Triangle" of now more and more failing societal politics can resolve the growing problems and conflicts. The currently dominant system that we use to produce better futures cannot accomplish this:

From this, the following questions arise:

- Which system is placed well enough outside our "obedient" culture?
- Which system is so independent that it does not have to subordinate itself to the hierarchical rules of the power of knowing better?
- Which system is spiritually so close to the people that it can successfully strengthen and optimize their Intrinsic?

The answer is: Quite fundamentally... it is the digital revolution. And it is social media and its now beginning transformation ... into the dimensions of Metaverse. Ultimately, it is the platforms from California that have been so often and so heavily criticized ... i.e. GAFAM and Co.

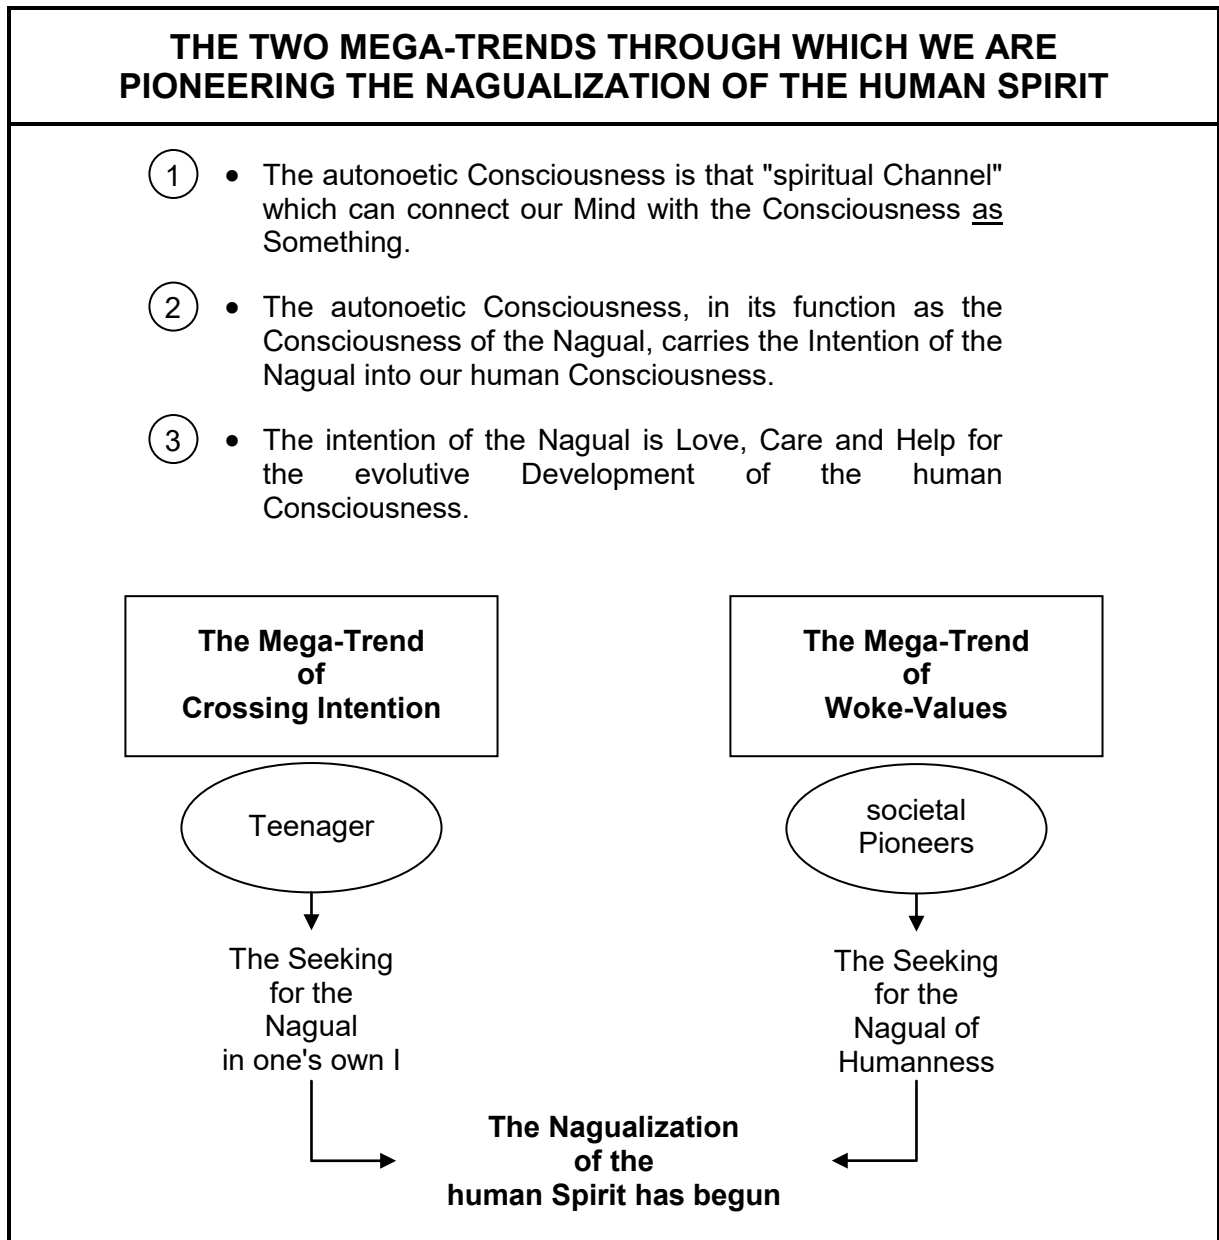

It is about the societal instrumentalization of "Totality" (see A above) in connection with the "Essential" (see B above). If one thoroughly reflects on this, one ends up with the interaction of Metaverse and Metabliss in a Hyperverse. In other words:

**If we as Humanity  
want to reach the  
next Level of our Evolution,  
we will absolutely need the Hyperverse.**

The Hyperverse is that digital-ritual system that can harness the presence and intention of the auto-noetic Consciousness in such a way that continuous Co-Evolution between the Now of the human Spirit and the Now of Creation becomes possible.

If one wants to make the intentions of the auto-noetic Consciousness usable for our own Evolution, one will have to develop beside the functions of the 1<sup>st</sup> Reality-Generator (Rationality / Cognition / Thinking-Logic) those functions and place them in a 2<sup>nd</sup> Reality-Generator, which ... e.g. on the basis of Noeterics ... can connect the Intentions of the auto-noetic Consciousness with the Intentions of Humanity (Thesis of Interfusion).

Now one might say that this is all quite idealistic or theoretical. But it is not: If one analyzes the current mega-trends in our democracies, one can see that even today (i.e., before the appearance of the Hyperverse) there are streams aimed at connecting the auto-noetic Consciousness with our Values. The following diagram describes these currents:

The Metaverse is currently being developed. The Metabliss is ready. The Hyperverse can soon become existent:

**The two Mega-Trends are  
waiting for the Hyperverse.**
