

THE HYPERVERSE ENHANCES OUR HUMANITY

Keno Oneo in Conversation with Jochen Franck

Franck: In your essay "Why Interfusion Will Replace Logic" you wrote that the current elite of Knowing-Better is waging a rather rude manipulative battle ...

Keno: ... or war...

Franck: ... against that spiritual evolution associated with GAFAM, Social-Media and Metaverse. That is your thesis.

Keno: Yes. Basically, the following is taking place at the moment:

- The old Power Elite suspects that the coming digital "Sphere of Rhizomes" (Deleuze) will dissolve the Principles of Power quite fundamentally:

Power is losing its authority.

- The old Power Elite fights the digital Revolution because they know that the current spiritual Progress will lead us to an Epoch of Co-Evolution:

**Our spiritual evolution
integrates us into
the Practice of Co-Evolution.**

Franck: For you, apparently, the matter is clear: power is eroding ...

Keno: ... and with it also the centuries old " Vertical-Tension " (Sloterdijk) ...

Franck: ... and the spiritual Methodology of Co-Evolution will replace the previous idea of Progress through Innovation. Do I see it correctly?

Keno: Yes:

- When power loses its authority, the breeding ground for the "Sphere of Rhizomes " (Deleuze), which organizes itself Bottom-up, is automatically created.

- If the Credo of Co-Evolution, namely "Progress through Emergence", prevails, what is called "innovation" will shift to collaborative-experimental handling of the Unknown.

All in all, these two changes will change the currently dominant

Society of Coercion

over the next few decades.

If analyzed crystal-clearly, this means the following:

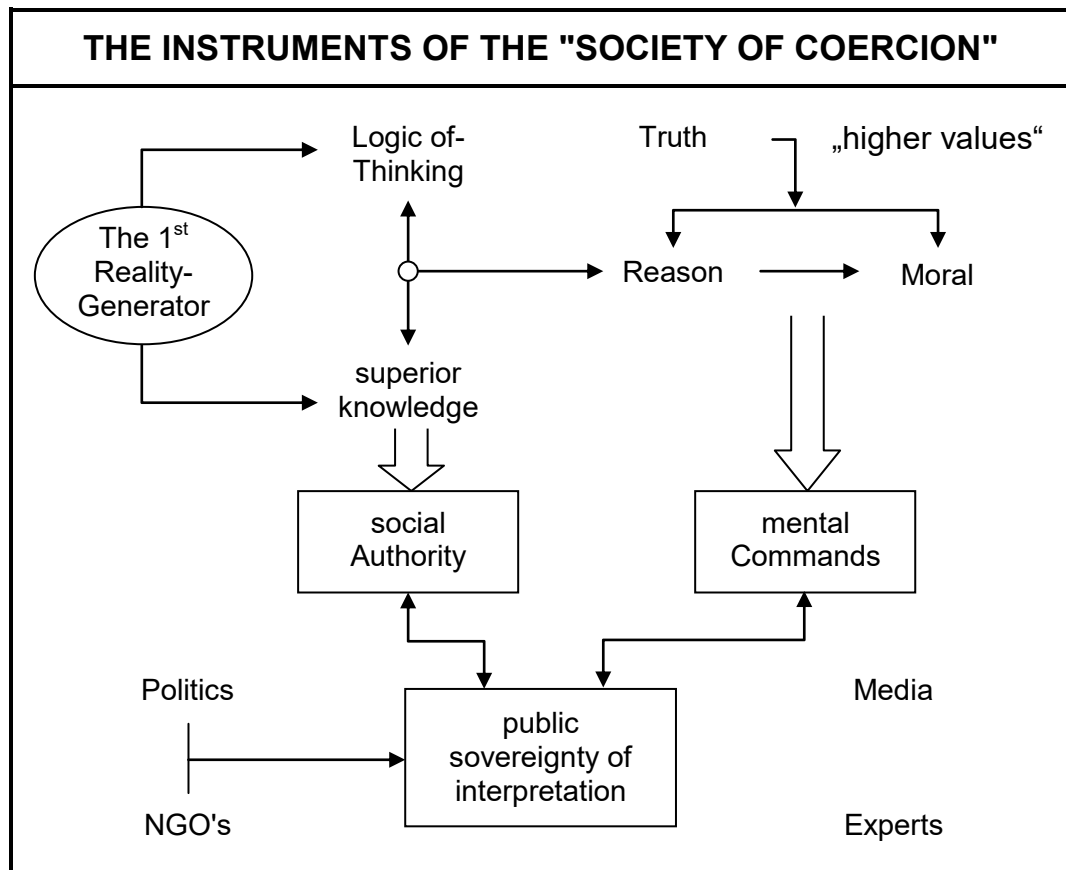

- The Society of Coercion is using the methods of subjugation and repressive subordination to make our society more and more future-stupid.
- This growing future-stupidity damages the cohesion of our society and destroys à la longue also the "spirit" of our democracies.

Franck: Maybe I am not experienced enough with subjugation and power. Can you briefly explain to me how such a "Society of Coercion" ...

Keno: ... which we have concretely present ... in which we all live every day ...

Franck: ... how such a "Society of Coercion" actually works?

Keno: Gladly. I answer with an overview:

One combines social authority with mental commands. That's how it works.

And ... perhaps in anticipation of our conversation ... one thing is already foreseeable today:

**When the searching
for the I of the Teenagers
merges with the Woke-Values of the Pioneers ...
and when then this novel megatrend
of " Horizontal Tension" (Sloterdijk) becomes
active in the digital Rhizom-Sphere of Hyperverse,
then the old power of knowing better dies ...
then the "Society of Coercion" dies.**

Franck: Your thesis now says: Because the old power elite knows or suspects this, they fight so fiercely against the digital revolution, GAFAM and Metaverse.

Keno: Yes. Most of the so-called "regulations" are ... more or less well disguised ... nothing else than power preservation strategies.

Franck: Sorry. I really can't agree with you there!

Keno: Never mind. In principle, the race is already over before it really gets going.

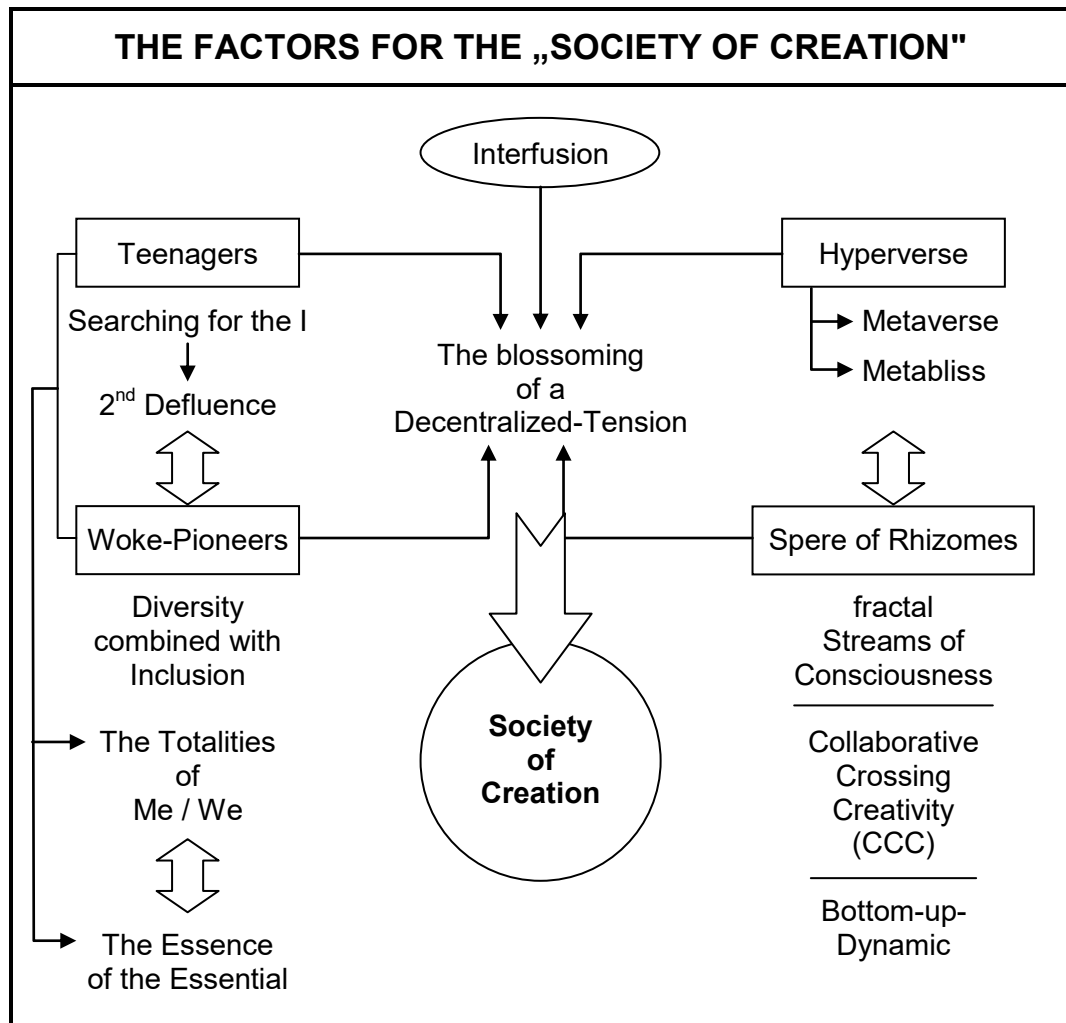

Franck: I don't understand.

Keno: The all-important attractor is the Metaverse and its evolution into the Hyperverse.

If the old power elite can't ban it or regulate it to death ... and they won't be able to ..., there will be this epochal change:

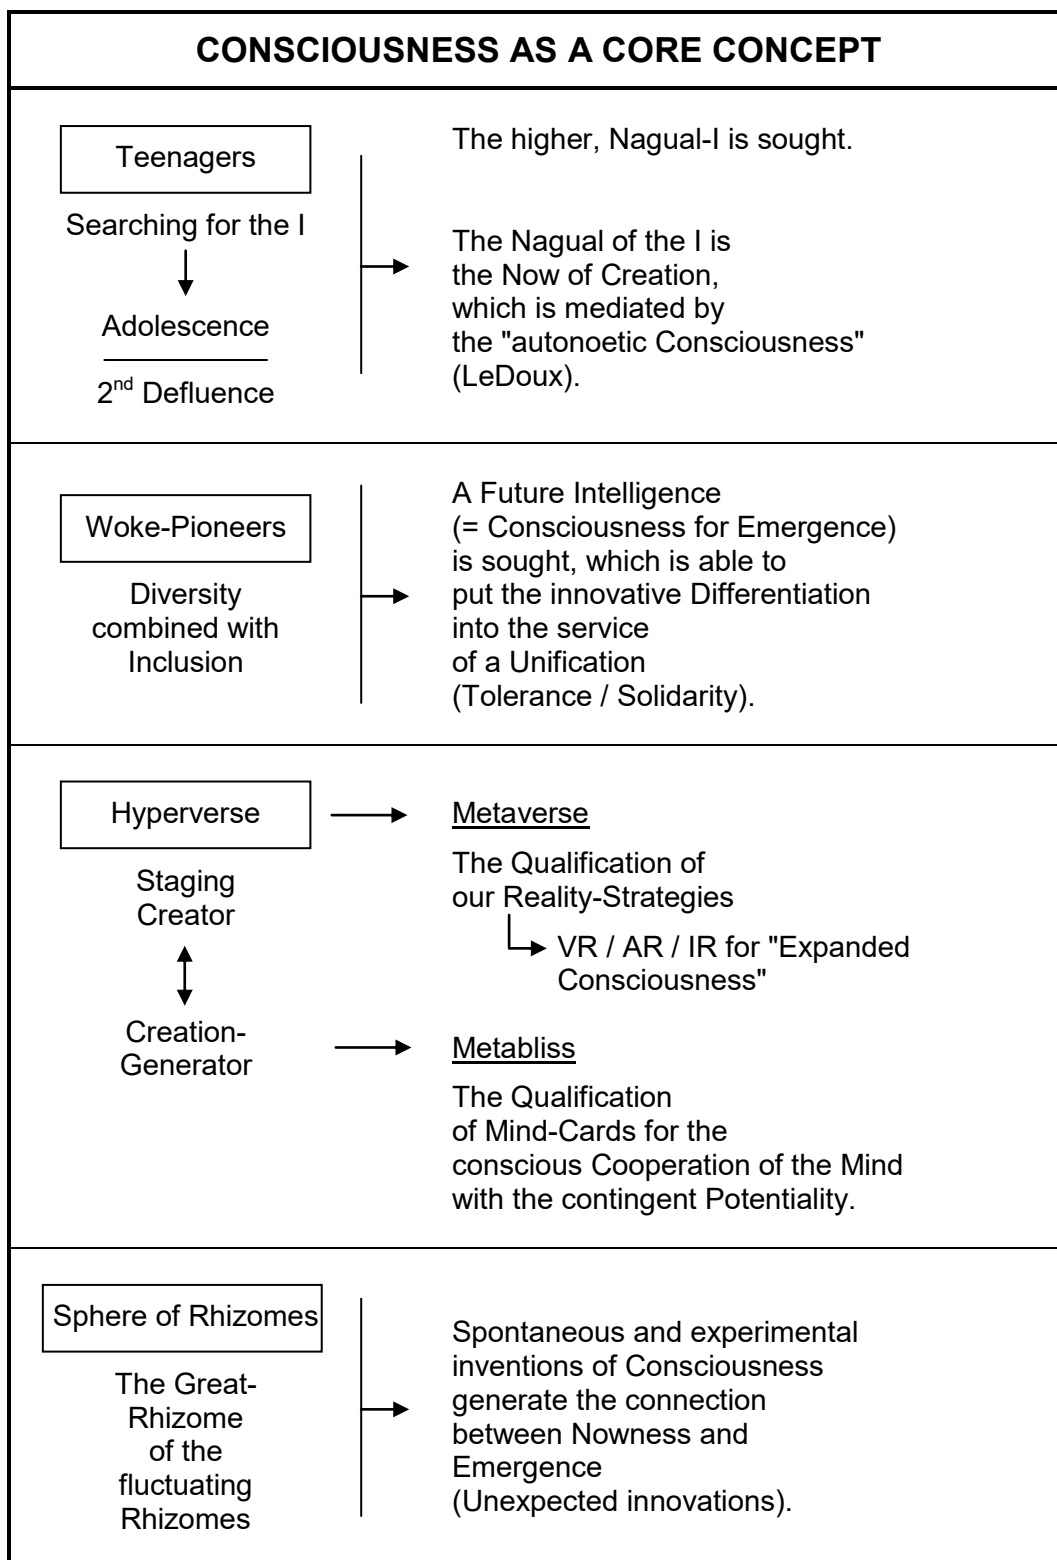

**From the "Society of Coercion"
to the "Society of Creation".**

If one wants to concretize the driving forces and the shaping factors for this epochal change, one gets the following picture:

If one analyzes these factors more in depth, one recognizes that Consciousness is decisive for all factors.

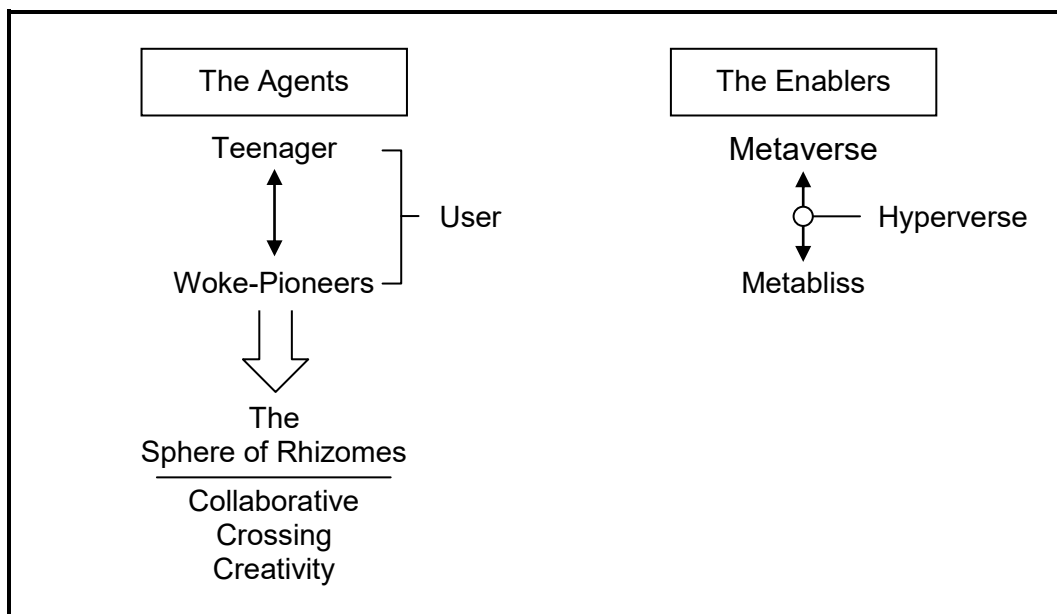

Let me specify this as follows:

What do we recognize? The Tech-Companies (GAFAM & Co.) that are so often and insistently scolded are not the actual shapers and evolutionary drivers. The companies have long since mutated into

Enablers.

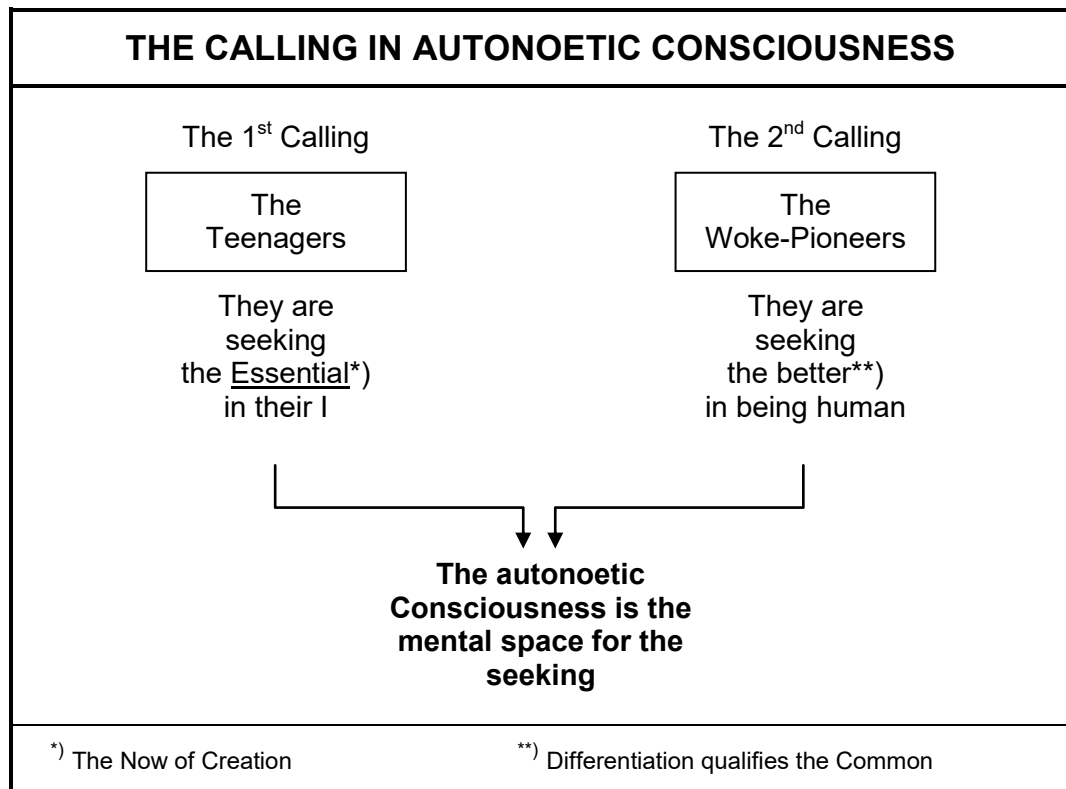

The users are clearly setting the tone. As a sketch:

Franck: The users ... you once said ... are the seekers. And because they are seeking, "consciousness" now becomes so important.

Keno: Yes. You can't seek the non-existent without instrumentalizing consciousness. Consciousness is the spotlight of the seeking.

As discussed earlier, users organize a twofold calling. As a sketch of this:

Franck: I think I've asked you before: Don't you overvalue the seeking of the I of Teenagers? It could be that the Woke-Values are much more important.

Keno: What makes you think that?

Franck: The seeking for the I may be nothing more than narcissism, which is now extremely boosted by selfies. The Woke-Values could be more important for the Society of Creation because they can enforce Humanity. And I believe that the new kind of Society of Creation will be primarily characterized by unification and collaborations.

Keno: Yes, I agree: There will be no Society of Creation without Collaboration and Interfusion.

But: Which humans with which I and with which Consciousness ... thus Mind-Cards ... will then cooperate? That is the crucial question.

The Values of the Woke-Initiatives are powerless as long as the persons strive for them activistically and try to enforce them (which partly leads to very repressive, thus ultimately counterproductive effects).

If a person does not have a Nagual-I, there is also no true Self-Love living in the identity of this person, which is capable of a We-All-Love.

Franck: What?!

Keno: The Self-Love, which is embedded in a Nagual-Energy, is automatically a We-All-Love:

**One cannot
love the Nagual that one is as I
without at the same time loving the Nagual
that is present in all people.**

It follows:

**The Woke-Values
need the Nagual to assert itself
without repression i.e., without power struggles.**

Franck: Can we please expand on this a bit?

Keno: Gladly. The Woke movement wants to combine the benefits of Differentiation (Diversity / Innovation / Crossing) with more Unification (Inclusion / We-ness / Re-Entry). The underlying idea is an insight of quantum physics, which was already formulated several decades ago by Herbert Pietschmann as follows:

**Creation is the Unity of
Differentiation and Unification.**

Franck: So what the Woke-Pioneers are striving for is ultimately nothing other than the Realization of Creation. Correct?

Keno: Yes. Capitalism (as they say "neoliberal") has unilaterally pushed the factor of Differentiation in favor of Innovation ...

Franck: ... so overemphasized ...

Keno: ... no, you can't overemphasize innovation at all. On the contrary, we currently have too few emergent innovations. Think of the energy problem ... of the climate problem. We are not able to invent those emergent innovations that we already need more than urgently today.

Example: We are not able to cooperate with the evolutive spirit of nature (which is clearly different from our human spirit) in such a way that we can, for example, turn CO2 into a valuable raw material. We are also unable to cooperate with nature in such a way that we can invent fusion energy.

Franck: Are you saying that we have the wrong spirit for Co-Evolution with nature?

Keno: Yes.

Franck: And why do we have this wrong spirit?

Keno: Because we are not instrumentalizing the Essence of Creation. That means that we cannot shape the Intelligence of Differentiation in such a way that it promotes and qualifies the power of We-ness ... and this happens because we cannot operationalize this Essence of Creation mentally-individually and spiritually-culturally.

We do not have an efficient System for Interfusion. We demand "more We-ness", but we do not know (or not yet) how to deal with Autopoiesis (Self-Creation), which will permanently stimulate this We-ness.

Franck: So you say: One cannot establish " We-ness" and Progress of Unification. Do I interpret you correctly?

Keno: Yes, absolutely. Can you accomplish love? Love ... so, for example, we-all-love ... is an energy that intensifies the more you shed Love. This is the autopoietic aspect of love that Maturana so often pointed out. Put another way:

The harvest of love is more love.

So no making. No creating. No strategy.

Franck: But ...?

Keno: ... to become what one is ... what one is every day ... namely the Now of Creation ... thus Nagual:

**Love becomes
when one becomes the Nagual
that one's own I already is.**

Hence the Calling of the Nagual-I in the worldly self-concept. Therefore the 2nd Defluence. And therefore the 1st Calling of the Teenagers is the indispensable key factor for everything else. It follows:

**If we don't provide
the coming teenage generations
at any given time with access to
an efficient 2nd Defluence,
we will fail more and more as a society ...
especially in terms of making our futures better.**

Perhaps now you understand why I am so concerned about our Western values and our concept of democracy. And maybe now you understand why I wrote in one of my essays that Mark Zuckerberg should get the Nobel Peace Prize.

Franck: Yes, I know. But very few people probably see it the way you do.

Keno: Maybe, but look at the current situation in terms of the progress of our human spirit:

- Teenagers today are already using Social-Media for the expansion and improvement of their I.
- The teenagers (unconsciously) strive for the Nagualization of their I ... i.e. Crossing-Initiation.

The Teenagers want to possess more than the normal, ordinary Worldly-I. They feel the Uniqueness of the Creation within them. Therefore, they want to free themselves from the restricting Dominance of the 1st Defluence with the Worldly-I ... an I that can only cooperate with the Now of Creation in a very limited way:

**One has to be
a Nagual as an I
in order to be able
to cooperate with
the Nagual at eye level.**

Franck: You claim that a Nagual-I ...

Keno: ... concretely an I that is worldly and Nagual at the same time ... thus a twofold I ...

Franck: ... that such a twofold I is necessary in order to be able to realize the Woke-Values you highly appreciate without tiring struggle and frustrating effort. Am I interpreting this correctly?

Keno: Absolutely. The Woke-Values are focused on the Common, which is the energy that makes all differences possible and permanently drives them forward:

**Better Diversity
for better Inclusion.**

This is the motto and guideline for the coming Epoch of Co-Evolution through Interfusion.

Specifically, if you one does not possess love for the Common ... that is, no Nagual as Love-Energy ... it becomes virtually impossible to realize this motto of "Better Diversity for better Inclusion" through Woke-activism.

Franck: So Woke-Values without Woke-Activism. Is that what you're saying?

Keno: Basically, yes. The point is that we should help Woke activism separate from activism ... that is, from struggle ... as soon as possible.

Franck: Why?

Keno: Keyword: Every revolution eats its children.

Jan Fleischhauer once wrote:

**"Revolutions only work
with a drawn gun."**

As long as we have top-down power as an obligatory inner mode of our society, struggle, provocation and pressure may make sense ... as well as the more or less conscious creation of extreme crises. Think of the old learning scheme we have internalized in our evolution: Learning through harm. Crises as "You must!"

Franck: So you say: struggle and crisis work. But they don't finally work right.

Keno: Yes, well put. In my words:

**If we replace Woke-Values
through struggle and crisis,
we will not get a society of co-evolution.**

This is like missing the only correct exit on a highway.

The special thing about the digital revolution ahead of us is this: It is a revolution without the usual causative power struggles. The desired transformations ... thus the 2nd Defluence and the transformation of the Woke-Values into practicable Mind-Cards of the Co-Evolution ... happen as far as possible in that modality of the We-ness, which one strives for.

Franck: This has become clear to me now.

Keno: For the Mind-Cards of the Co-Evolution we do not need those Mind-Cards, which the 1st Reality-Generator produces ... thus Mind-Cards of the Differentiation by better-knowing ...

Franck: ... but? ...

Keno: ... Mind-Cards, with

Unification and Differentiation as a Goal.

In the words of Woke:

**Better Diversity
for better Inclusion.**

If Woke agitations are too one-sided and too long focused on the usual power strategies (i.e. manipulation, pressure and discrediting ... as exclusion), then the well-intentioned and absolutely necessary Woke agitations destroy the inner substance of Woke: the values are then substantially betrayed by pioneers and thus damaged in their power.

So what to do? Switch from provocation and agitation to Interfusion and Bottom-up. And ... equally important:

**Switching from
knowing-better (truth) to
the Great-Rhizome
(fluctuating viabilities).**

Franck: Hmm. But you have to admit that such a Great-Rhizome doesn't even exist yet.

Keno: True. The Great-Rhizome will not exist until there is the Hyperverse.

Franck: And you certainly know that very many of the Woke-Pioneers, whose ambitions you obviously very much support ...

Keno: ... yes ...

Franck: ... are very critical of Mark Zuckerberg and his Metaverse.

Keno: Yes. Just yesterday I read the following statement from a top international model (with a high influencer status): "Social-Media makes you sick and unhappy."

As so often, the problem is with diffusion: at the moment, it is precisely the Woke pioneers who are particularly committed to connecting the values of Woke with the values of the privileged power elite ... i.e., those elite who are fighting very fiercely against Metaverse and the Rhizomes of its Bottom-up Dynamics. Briefly:

**Many of the Woke-Pioneers
operate in a strategy mode
of repressive power to
initiate the
disempowerment of power.**

Because this is the case ... and because it corrupts one's own and proper value-goals ... we quite soon need the Metaverse with a Metabliss integrated into it ... i.e. the creative and productive Great-Rhizome of fluctuating Rhizome- ..., and that as the basis for the

Society of Creation.

Franck: Allow me a specific question: If the Hyperverse will not exist, what will happen with the values of the Woke pioneers?

Keno: Good question: then there will only be

a cultural drift.

That means:

- The top-down society will remain as before. The power of knowing-better also remains the dominant scheme ... so

**hierarchized knowledge
generates social hierarchies.**

- Only the values of social acceptance, ultimately the values of oppression, become more "modern" or "woker". Meaning:

**Merely another type of do-gooder establishes
itself at the top of power ... merely changing
figures.**

This will be similar to the French Revolution. King Louis XVI was publicly executed or assassinated on September 21, 1792, and the power seekers of the new bourgeois class immediately took over the king's position ... knowledge power instead of noble power. But power remained power.

That' s how it continues to this day.

Franck: As I note, you see quite clearly that the Woke initiatives may fail.

Keno: Yes, fail in the sense that values are used top-down by a Woke elite in the context of "new reason" to produce what we desperately need, namely We-ness and solidarity through a digital Bottom-up. As a consequence:

**When one enforces
the values of unification
through the power of woke,
one reinforces social conflicts
and division in society.**

Much of the populism problem we have is "produced" here.

Franck: But that's a disillusioning analysis. Where is your optimism?

Keno: I'm pinning my hopes very specifically and directly on Mark Zuckerberg.

Franck:
I know you like him.

Keno: Yes, and I want to explain why. May I?

Franck: Go ahead.

Keno: I'll keep it short, and from a Noetic perspective:

- Woke-values without Nagual-Love are counter-productive.
- Nagual-Love is the love of the I for its own inner Creation, i.e. for the Now of Creation (Nagual), which every second transfers our I, our life and our world into a new Presence.
- If a human being carries this Nagual-Love within himself, he experiences himself and all other human beings as Nagual-Beings living in the All-One ... in a We-ness.
- The Consciousness that connects our personal I-Consciousness with all other present human beings is the one described by LeDoux as the

"autonoetic Consciousness".

- It follows: Without the Nagualization of the I (= 2nd Defluence) the in principle correct and in the long run valuable Woke-Values will fail ... they will, as they say, "run out of breath".
- If the Woke initiatives fail in this sense, the current society damages its own future. Why? We will not be able to find and follow the spiritual path to Co-Evolution if we cannot develop and use the concept of Nagualization and the Methodology of the 2nd Defluence (= Metabliss).

Franck: What, please, prevents us from doing so?

Keno: "The Epoch of Theory" (Joas). The culture of an innovation based on better-knowledge. A general concept of progress that makes differentiation the generator of innovation. We have no concept for the progress of our We-ness.

And, of course, we must also see the following:

**Without a true and great Metaverse,
Metabliss' system will not be truly effective.**

Franck: So you are so consistently betting on Mark Zuckerberg because you think he will develop and place the best Metaverse in the world, right?

Keno: Yes. He will probably develop the best Whole-Life Metaverse.

And that brings us back to the issue of diffusion. At the last meeting with investors, Mark Zuckerberg explained that they are facing a "a trial of patience". It would take another three to five years, and significantly lose money ... in other words, make losses. Literally, "By the end of the decade, hopefully it will be clearer how this translates into a positive ROI for Meta." But he also says that some products may not be ready for another 15 years.

All of this costs many, many billions of dollars. So it's important that Meta, as a corporation, is doing so well.

If, for example, the EU ... the people in Brussels ... wanted to develop such a Whole-Life Metaverse (don't worry, they don't!), they wouldn't have the money in the first place, and secondly, they wouldn't have the ideas:

**Administrative politicians
cannot realize visions.**

Mark Zuckerberg can ...and will.

Franck: I didn't know that. I thought that the Metaverse would be ready much sooner.

How does that look for your "Metabliss" project? Will that take that long, too?

Keno: No. We started developing it about 31 years ago. Many years in the form of a "Mind-Lab", which was called "Mind-Design". We have spent almost 2 decades developing those rituals which, as neural-intrinsic Technology, form today's two pillars of Metabliss: the 2nd Defluence (Teenagers) and Mind-Carting (Young Adults). The current status is as follows:

**Our Metabliss is fully developed.
Ready to go.**

It just needs to be integrated by Meta into the existing digital system and into the upcoming features of their Metaverse.

Franck:

Understood. Back to the Teenagers with the 2nd Defluence and the Young Adults with the Mind-Cards for the Woke-Values.

My question was: what happens to the Woke values if the Hyperverse will not exist?

Keno: And my answer ... I think ... you could hear from my arguments:

- Without Metaverse, the Metabliss will not work efficiently.
- But without the winning of the Teenagers and the establishment of the 2nd Defluence ... that is without the Awakening of the Nagual-I in the Adolescence of the Youth ... we will not be able

to build a Chain of all Generations.

- This means: it is now a matter of winning over the respective current generation of Young Adults, who are at the center of the realization of the Woke-Values, in order to be able to establish a praxeology for Co-Evolution ... not for a small elite, but for We-All:

**Co-Evolution
only works
as We-All.**

Franck: If I interpret this correctly now, you see a kind of relay race, which ultimately only the Hyperverse can initiate and positively organize ...

Keno: ... yes, to put it very clearly:

**Without an awakening
of the Nagual-I
in the respective
current Teen-Generation
all Woke ambitions will fail.**

**The better Society
and the better Humanity
need the Hyperverse.**
