

THE HYPERVERSE AND THE BIRTH OF A HIGHER CONSCIOUSNESS

From Keno Oneo, Mastermind of the Metabliss-Project

**The next Epoch of human Evolution
will not be determined by the Data of Digitality,
but by the Consciousness of the User.**

In the last century, Ernst Schrödinger, quantum physicist and Nobel Prize winner, wrote:

**"The unification of all consciousnesses
in one consciousness ...
because fundamentally
there is only one consciousness."**

We can interpret this as follows:

- There is one Consciousness as Something, which is the raw material from which all other forms and kinds of Consciousness arise. This is the truth of the only one Consciousness.
- If there are diverse (countless) Consciousnesses of Something (e.g., as objectifications of the world), then they are derivatives of the Consciousness as Something ... i.e., formed derivatives.
- We humans have shaped and qualified our minds in the course of some "four billion years of evolution" (LeDoux) so that we can combine our derivatives of objectification (facts) with creative-speculative derivatives of invention (spiritual innovations).
- It may be that one day a special consciousness will develop and activate in our Mind ... a consciousness that can enable us to make the relations between the Consciousness as Something and our Consciousness of Something more productive and intelligent:

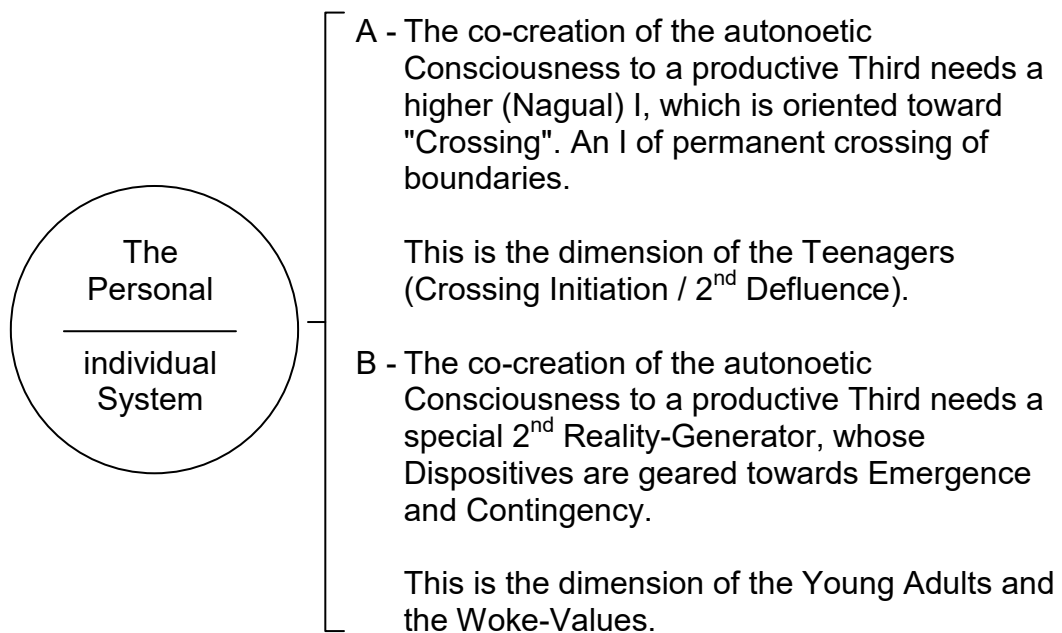

**This is
a Consciousness as Mediator ...
the "autonoetic Consciousness" (Le Doux).**

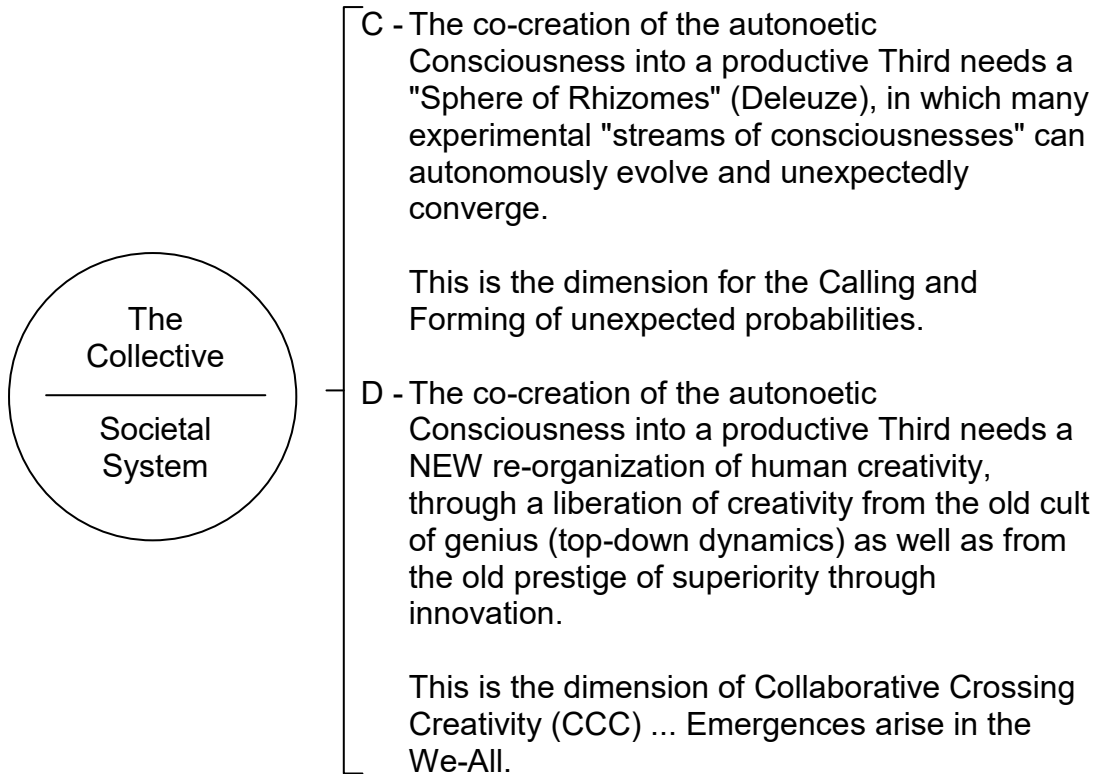

- This novel Consciousness as Mediator can be formed and experienced by our Mind as

the Third.

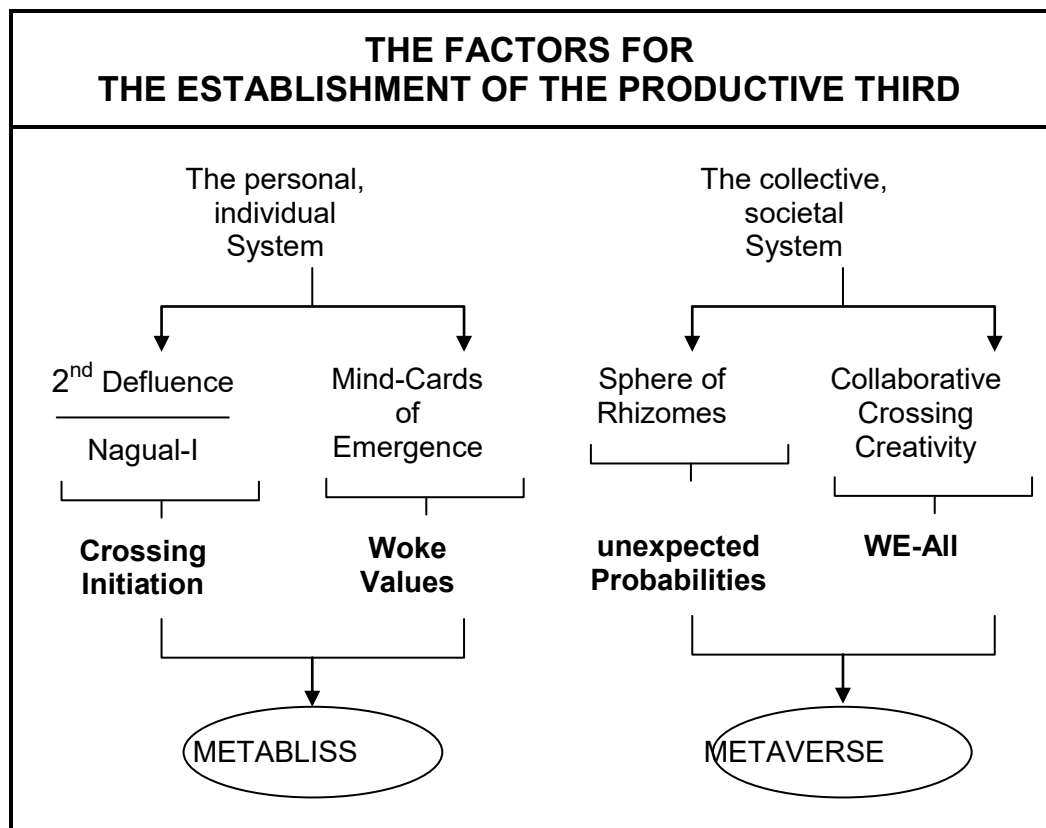

- This auto-noetic Consciousness is "provided" by the Consciousness as Something ... the sole raw material for all Consciousness derivatives ... as a caring "gift", so to speak, of the Consciousness as Something for the human Spirit ... as an offer to us humans for the beginning of the epoch of Co-Evolution.
- But the auto-noetic Consciousness only becomes a productive Third if it is co-created by the human Consciousness (like a coin consisting of two sides). In this respect the Third is already accomplished Co-Evolution ... mental-intrinsic Co-Evolution.
- Now how can human Consciousness, which is an objectifying Consciousness of Something, co-evolve the auto-noetic Consciousness, if this Consciousness cannot be objectified at all? What kind of evolutive system will we need to be able to shape the productive Third? This is a key question for the coming Epoch of Co-Evolution.

The answers to this question are:

In summary, the following picture results:

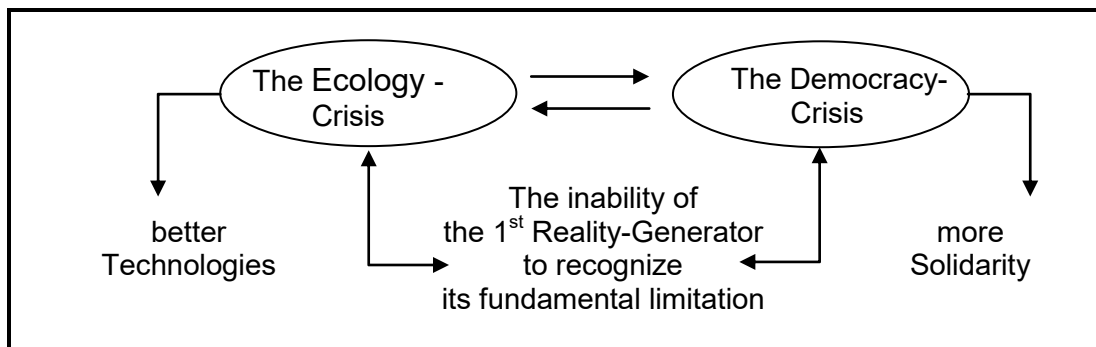

The auto-noetic Consciousness (whose arising is only now organizing itself) is that " spiritual place " where we as a society can form the

productive Third ... systematically planned, as a stable evolutive system that enables us as humanity for Co-Evolution.

People who are fully reliant on the intelligence of the 1st Reality-Generator (and who therefore cannot believe that we can develop a higher quality of intelligence) will not develop mental strategies aimed at asking and animating Creation (represented by the auto-noetic consciousness):

Cognitive intelligence is arrogant.

Much of the many and continuously increasing crises in our society have their cause here. This is especially true with regard to the two most dangerous crises we currently have. As a sketch:

We can only develop a higher intelligence, i.e., specifically

a better future intelligence,

in cooperation with the Now of Creation. So only in that "spiritual space" (= auto-noetic Consciousness / the productive Third) in which we as Nagual beings (= as children of Creation) are concretely cooperating with the Nagual (Creation):

The generation of emergences requires co-evolution.

The cognitive intelligence of the 1st Reality-Generator has no spiritual access to the auto-noetic Consciousness. And it also cannot mentally accomplish the formation of the productive Third in any way. It follows:

- We as a society will not be able to cope with the two most important crises ... ecology and democracy ... without the functioning interplay of Metaverse and Metabliss in properly system of a Hyperverse.
- Without the establishment of a Hyperverse, democracies built on the Western values of freedom will not have a good future.

The creativity organized by the intelligence of the 1st Reality-Generator is ... already visible ... unable to produce those inventions and technological breakthroughs that we will require for a

progressive ecology.

The climate movement and the official environmental policy are running into an unproductive dead end.

The same intellectual spirit is also unable to create the We-ness that we will need to give our democracies a new and powerful spirit ... a solidarity that is not made up of slogans, but of a truly lived We-ness.

What is going wrong in the democracies?

- Solutions to the ecological- and climate- crisis are primarily based on concepts of sacrifice (saving) and transitional technologies (e-cars instead of petrol cars). The more "successful" these

emergency strategies

are, the worse the unavoidable crisis will be.

- The crisis of democracy is primarily addressed by the concept of "return to reason and morality". This means that the elites of the Better-Knowing are trying to force people top-down into an artificial solidarity.

But reason is ideology.

Morality is command.

- But on this basis, one produces even more social conflicts, even deeper (i.e., irreversible) divisions and an extremely destructive energy of

cultural civil wars.

As a side note: If I were the dictator of China, I would do everything and invest a lot of money to radically block and prevent the developments towards Metaverse, Metabliss and Hyperverse (wrapped in soft power). The EU administration in Brussels (with its anti-digital acts) is pretty fierce in making the awakening to a new co-evolutionary spirit in the democratic West impossible or so distorted that it becomes powerless ... cowardly ... unproductive.

The blockades of the upper power elites are officially aimed at liberating the social spirit from fake, hate and data abuse. There is absolutely

nothing wrong with this objective. But it runs with open (or closed) eyes past the essential.

What is the real thing? What is it actually about?

- It is about freeing our consciousness from the dominance of the 1st Reality-Generator.
- It is about the continuous making of the productive third ... conjointly created by the human consciousness and the Now of Creation (Nagual).

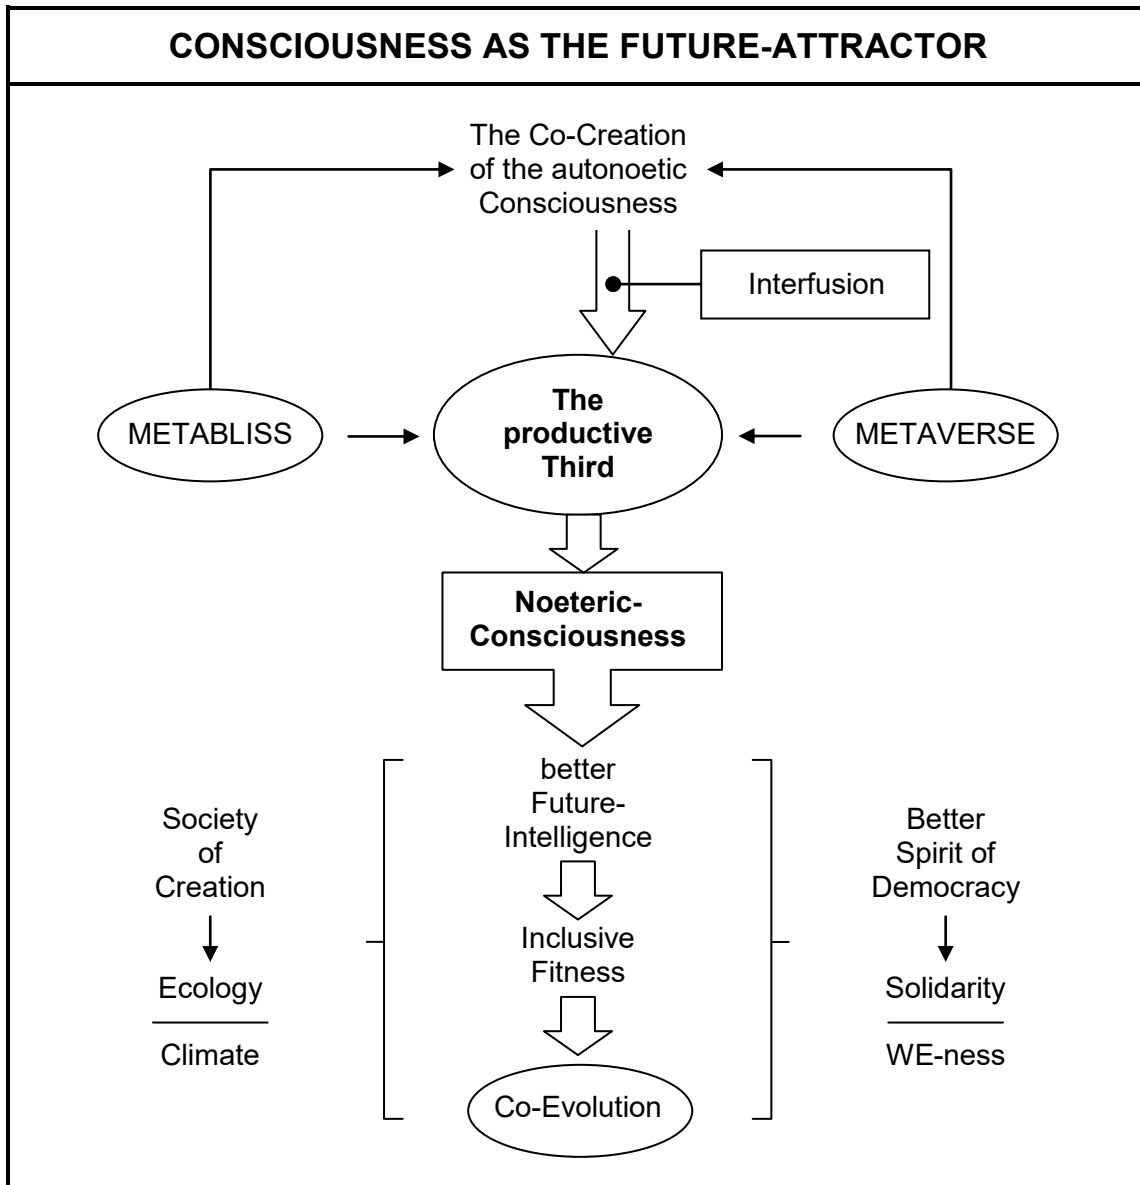

A "Society of Creation" is a society that creates its futures through Co-Evolution. So predominantly by a higher placed Future-Intelligence, which is able to generate

Emergences through Contingencies.

The all-important question is therefore:

**Are we able
to establish that Noeteric-Consciousness that,
together with
the auto-noetic-Consciousness,
will establish Inclusive-Fitness?**

The following overview outlines these aspects:

Without Metaverse, Metabliss and Hyperverse we will not be able to develop this Noetic-Consciousness. And all the 1st Reality Generator's intellectual strategies will not. This is the concealed drama of our culture.

Our culture is still based on processing and creatively coding our

Fear of Contingency.

In particular during the 1st Axial-Age and until today, this culture has developed and continuously qualified as follows:

- At first, the survival program dominated

- Linked to this were Myths as collective explanatory Narratives and later additional experiential Models of the Spiritual

- On this basis, today's dominant 1st Reality-Generator established itself ... starting with the Renaissance.

Our culture is thus a mixed program of Archaic, Mysticism and Rationality. On this basis, the decisive Fear of Contingency could qualify itself better and better:

The "Zone of Conversion" established itself in the brain.

"Conversion" means the relatively perfect transformation of worldly external events into an "affect logic" (Ciompi) that helps the person's mind master the "dangerous of the world" (the Risk).

By this our prudence for the reduction of dangers developed, as an essential part of our present intelligence.

Now if the world we are making (through the creative productivity of our progress) turns more and more into a new kind of danger, namely through

then the "zone of conversion" neuronally programmed for risk reduction begins to fail.

We need a consciousness for the emergence of the new reality, which is largely identical with the factors of this reality ... identical, in order to be able to cooperate on the same level and in the same dynamics. This means:

- We need a 2nd Reality-Generator that can operationalize the "Zone of Emergence".

- We need a 2nd Reality-Generator that succeeds in forming a Consciousness for a better Future-Intelligence out of Complexity, Acceleration and Contingency.

The 1st reality generator is based on what Kant described in the concept of reason as follows: We need a meaningful, higher order, in which all phenomena and events of the world can be classified as far as possible:

Our brain has also physiologically organized itself in such a way that we can comply with this scheme. The power of better-knowledge, which is integrated in the " Epoch of Theory " (Joas), is the enforcement-instrument for this scheme of order, which in the end is aimed at excluding Contingency.

Now, when the new reality ... that is, the increase of Complexity, Acceleration and Contingency ... begins to dominate, the following happens:

**A permanent de-ordering
 becomes a productive factor,
 based on breakings
 and spontaneous transitions.**

From this follows:

**The scheme of
 the illogical Rhizome
 begins to replace
 the scheme of the clever order.**

Looking at the Rhizome in its inner dynamics, one comes across a description by Deleuze, the most important theorist of the Rhizome. He defines the rhizome as a novel " Formula of Evolution." In "Difference and Repetition" (2007), he describes the following:

**"The more complex a system is,
 the more specific
 implication values appear in it."**

The process of this appearance of new " Streams of Consciousness" (implications) from Complexity, Acceleration, and Contingency is Magic ...

a modern, co-evolutionary Magic.

Accordingly, Deleuze speaks of a coming "Shamanization of the human spirit."

The inventory for this Magic and Shamanization can be outlined as follows:

- That which used to be "danger" ... meaning Complexity, Acceleration and Contingency ... is increasingly becoming the Source of a new kind of Future-Intelligence.
- The scheme of clever order, hierarchically arranged upwards, is replaced by a dynamic of the fractal rhizome.
- The philosophy of representation loses its formative power. The awakening of the unforeseeable through Nowness gets more and more formative spiritual power.
- Rhizomes do not function in a Top-Down way. Rhizomes do not obey intellectual power. Rhizomes can only function collectively and in open multi-networked constellations (i.e., best in digital systems):

**Rhizomes need the We-All ...
the spiritual Power of We-ness
that is alive in digital systems.**

Because of these transformations, the coming "Society of Creation" will be a society that has to cope with the following changes:

- The hitherto supporting system of our culture, which has been organized in a distinctly elitist and Top-Down way, will be relegated to the second row:

**The Great-Rhizome of
fluctuating Rhizomes
generates and controls the novel ...
Emergence-focused ... Future-Intelligence.**

- The so far dominating 1st Reality-Generator will successively develop into the "helpful partner" of the new 2nd Reality-Generator:

**The 2nd Reality-Generator
will evoke those
qualities of Consciousness
which the 1st Reality-Generator
will subsequently transform into worldly forms:**

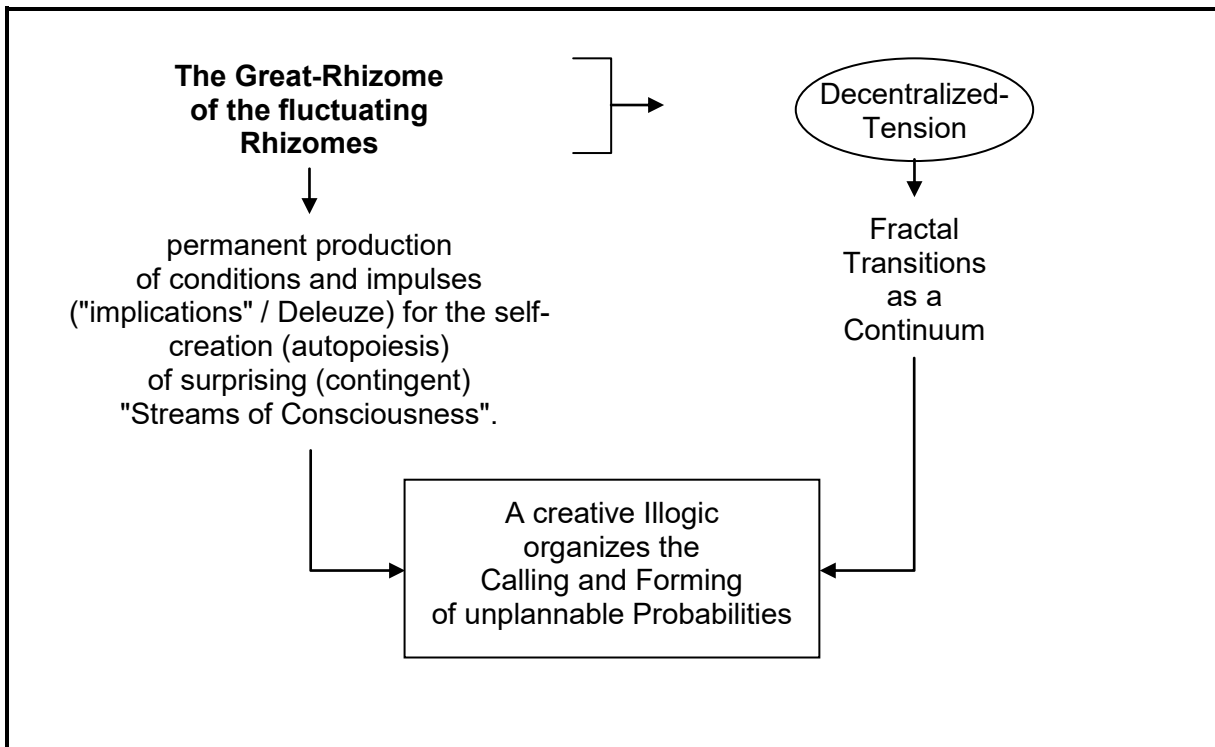

The 1st Reality-Generator will lose its dominance.

In addition, a "Society of Creation" needs the establishment of another Tension. Sloterdijk has described two diverging societal tensions: "the Vertical-Tension and the Horizontal-Tension." He sees our post-modern Society on the way to the Horizontal-Tension. This is certainly true:

**The Emergence of
the Horizontal-Tension
is eroding the
hierarchically structured Vertical-Tension.**

**This enables the Spirit of Society
to gradually free itself from
the Power of better-knowledge.**

But this is only the first stage of the transformations. The next stage will be to build a rhizomatic decentralized Tension on the basis of the Horizontal-Tension. As a sketch for the overview:

The establishment and "nurturing" of the Great-Rhizome is a prerequisite for the functioning of a "Society of Creation" and at the same time for the development of an Inclusive-Fitness ... i.e., an Intelligence, which is geared to permanently shape the Collective-Consciousness of a Society as an inner Progress.

Inclusive-Fitness is based on a special Consciousness, which is able to organize the collective Consciousness of the Society as a "flowing Evolution" ... as a transversal, i.e., permanently transcending Intelligence:

**Spontaneous Truths ...
organized through breaks
and transitions.**

Our previous learning scheme "one becomes wise through harm", through which the negative becomes the cause to change positively, will successively dissolve:

**If we keep
the old learning schemes
in the new worldly Reality
of daily Contingencies,
we will not learn the Intelligence
and Care of the Nagual,
but will become more and more
accomplices of unsolvable problems.**

The establishment of a "Sphere of Rhizomes" (Deleuze) is the basis for a "Society of Creation" that shapes its futures through Co-Evolution, and that makes the Betterment of the Futures the Source of a better Present.

For such a "Sphere of Rhizomes" to function in the larger play, the following conditions must be fulfilled:

1. the establishment of Metaverse

as a system that can combine open, i.e., extremely decentralized, networking with illogical, spiritual spontaneities in the context of a stimulating "reality mix" (VR / AR / IR). Keyword: Staging Creator.

2. the establishment of Metabliss

as a system that permanently qualifies the quality of creative inputs brought by people into the digital "Sphere of Rhizomes" in which those inputs are not based on education and knowledge or social status, but on two crucial variables:

In this sense the system of Metabliss is the permanent Evolution-Engine for the digital System of the Sphere of Rhizomes of Metaverse.

If Metaverse and Metabliss are well cooperating in a system which can be called " Hyperverse " ... which includes the special conception of an

Operating System of Interfusions,

the tradition which has formed the inner core of the "Epoch of Theory" up to now ... focused on knowledge and knowing better, will dissolve.

According to Paul Feyerabend's analyses, this inner core of Theory consists of the following 3 ... as he elaborates ... erroneous postulates, which he calls "Traditions":

- 1 It supposedly "depends on solving problems." The world predominantly consists of problems.
- 2 For all problems, there is always a more or less "unique method of solving problems."
- 3 There are special problems which are separated from the normal problems ... these are the "Problems of Life".

These problems are independent of the Traditions of the Society. They remain unsolved and private.

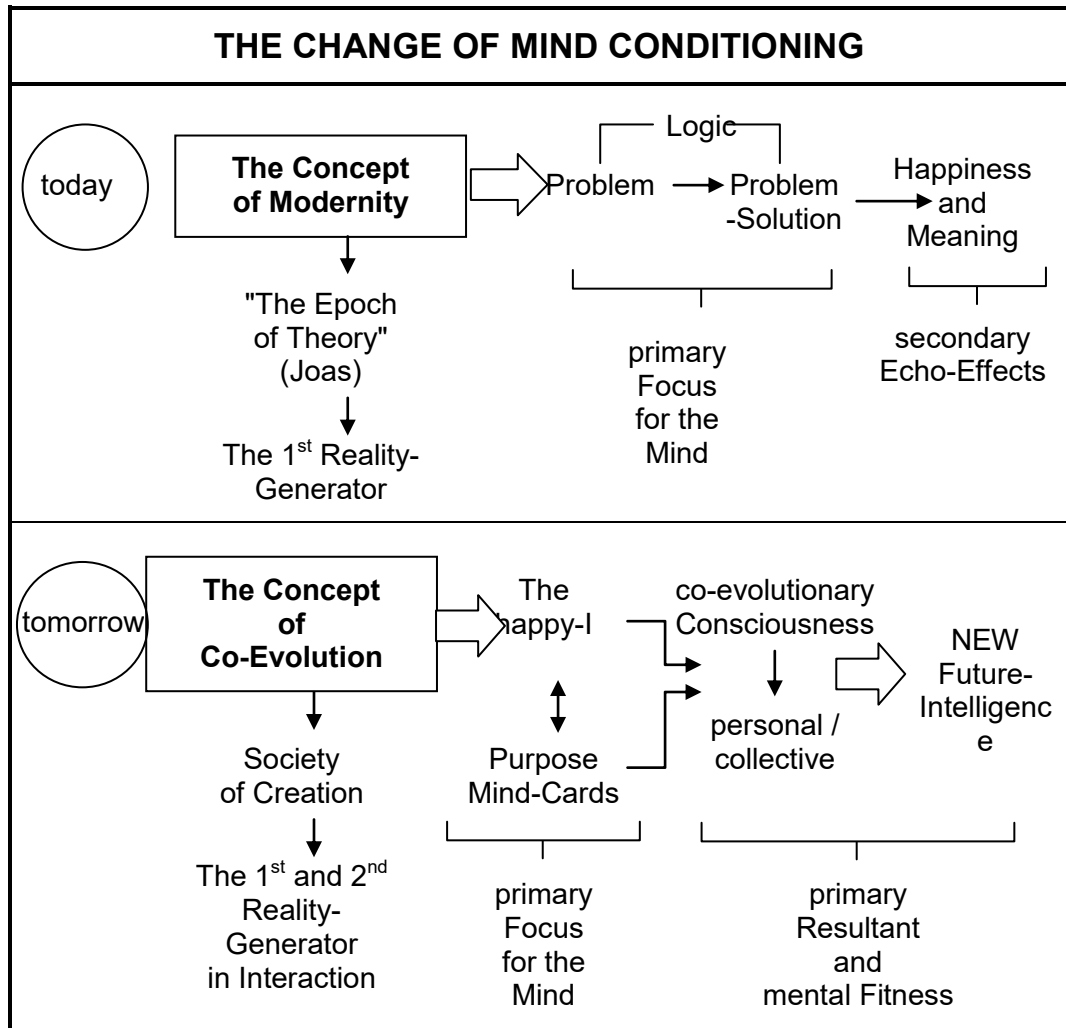

These 3 "traditions" very fundamentally shape the worldly Intrinsic of the People. This worldly Intrinsic is thereby programmed on concrete world problems. The so-called "Problems of Life" are excluded side-topics ... private matter. What follows from this?

- The conditioning of the mind is principally wrongly organized. This conditioning asserts:

**Only then,
when the "Problems of Life"
are resolved, the I can become happy.**

**Only when
the personal world
is reasonably in order
Life does get its meaning.**

- Happiness and Meaning become Echo-Effects of these three "traditions" ... i.e., they become downstream of rational-cognitive problem-solving strategies. Rational Logic is declared to be the creator of Happiness and Meaning.
- But a reversal of this conception would be urgently needed in the present phase of transformation. As a sketch:

The formerly private ... i.e., also the intrinsic Problems of Life ... are differently coded in the concept of co-evolution:

The Personal and Private becomes the key factor for co-evolutionary Consciousness.

No more secondary Echo Effect.

The 2 big Mega-Trends of our time, namely.

shape from this point of view the 1st Stage of our Society on its way to the Establishment of a 2nd Reality-Generator.

A "Society of Creation" no longer divides into primary effects and secondary effects:

**A "Society of Creation"
only knows primary effects.**

When the mind-focus is set on the Happy-I and on powerful Purpose-Cards, primary resultants arise, which develop the mind that enables us to a new kind of

Future-Intelligence.

As conclusions:

- When human intelligence is programmed for "problem solving," the personal-private becomes the victim of life. Suffering is the result.
- But: If one programs the human intelligence to the "Happy-I" and to "meaningful Life", the intelligence is transformed "upwards". A new kind of Future-Intelligence is created.

However, this new kind of Future-Intelligence will only be able to unfold in our society when society develops a special Consciousness for the central role and for the productive function of Consciousness. It follows:

**We need a Meta-Consciousness ...
a Consciousness for
the Qualification of our Consciousness.**

Why? The Meta-Consciousness cannot be developed through the 1st Reality-Generator...that is, through Rationality, Cognition and Thinking Logic....

The Meta-Consciousness needs an independent way for its development. There are two postulates which become important for this way:

- The Intrinsic-Private should no longer be a marginalized Echo Effect.
- Consciousness should no longer be a Zero Factor ... that is, a factor that fundamentally dissolves itself in the mental objectifications of the world.

What is needed is to activate and unite Consciousness and the Intrinsic-Private into a Meta-Consciousness. This Meta-Consciousness will be the basis for the development of our new kind of Future-Intelligence.

So, the question arises as to which authority could exist in our society that can consciously organize this fusion of consciousness and the intrinsically

private independently of the 1st reality generator ... comprehensively. The answer is:

**It will be the Effect-Unit
of Metaverse and Metabliss ...
thus, the Hyperverse.**

We need the Hyperverse. The faster, the better.
