

<b>On the Road to the Hyperverse</b>
<b>HOW TO FREE OUR CONSCIOUSNESS FROM OUR MIND</b>

- ① We are programmed by our biological and Spiritual Evolution to understand the inventions we make as "reality" as "real truths" (mentally encoded Icons).
- ② As we pass on this mental ability to invent epigenetically and culturally ("cumulative transmission" / Tomasello), we have made continuous progress in the techniques of iconizing inventions:

From a phase of pre-rationality, we have evolved into two stages of development that build on each other (beginning with the 1<sup>st</sup> Axial-Age):

**from the  
"epoch of the power of the holy" (Joas)  
to today's epoch of the power of better-knowledge.**

So, from the belief in the beyond to the worldly striving for knowledge.

- ③ From this the today's "Modernity" has developed and with it a culture which is built on knowledge and better-knowledge (literary culture).
- ④ This focus on knowledge has set the following process in motion:
  - We invent and encode more and more Icons that we mentally invent in such a way that we can certify them as "real truths."

**We certify  
ourselves.**

- This means: Over the centuries we have become better and better at inventing and encoding even those Icons as truths that our mental techniques of icon invention (Iconization) place in the rank of truths.
- Our methods of cognition (which influence our processes of perceiving and interpreting the world) have now gained the position and function of a

**Meta-Consciousness**

... however, without being a Meta-Consciousness. It is a Surrogate-Meta-Consciousness.

- ⑤ Because of this, we are currently unable to invent another (i.e., true) Meta-Consciousness. In other words:

**We invent (and reinforce)  
those Consciousnesses  
that prevent us from  
inventing an Evolutionarily  
effective meta-Consciousness.**

**We believe  
too intensely in truth.**

- ⑥ Now one should know that we primarily strive for the processes of "Iconization" and master them so perfectly because we as human beings have the Now-of-Creation (Nagual) present as Permanent-Consciousness in our Mind and in our I:

- Consciousness is the Agent of Creation. Nagual-Consciousness is our partner in creating our Fitness.
- The biological survival program (D. D. Hoffman: "Fitness") enables our Consciousness to become ever fitter for "Iconization".
- That what we are mentally practicing, i.e., encoding our inventions as "truth", in the sense of the biological Spirit of survival, is therefore right, important and successful.

- ⑦ "Fitness beats Truth" (D. D. Hoffman) is the general conditioning behind all the Spiritual-cultural progress we have shaped since the beginning of the 1<sup>st</sup> Axial-Age (ca. 500 BC):

- The growing progress of our Evolution ... is based on

**Fitness by Cognition –  
Cognition creates Progression ...**

...is connecting with the established, culturally anchored, Surrogate-Meta-Consciousness (boosted by the growing importance of Sciences, in particular).

- Because of this, our real and massive progresses in the field of "knowledge and cognition" initiate a process which separates our Consciousness more and more from that Nagual-Consciousness which is present in our Mind and in our I in a very essential form as partner and helper:

- Our Consciousness drifts into a growing un-Freedom.
- Our Consciousness progresses isolate us from our Nagual-Consciousness.

⑧ The isolation of the Nagual-Consciousness (primarily organized by the 1<sup>st</sup> Defluence in the period from birth to the end of adolescence of the Teenagers) creates a significant Fitness problem:

- Our successful Fitness-Strategy ("Fitness by Cognition") creates a worldly reality that ... because of its successes ... is characterized by three challenges:
  - increasing Complexity
  - increasing Acceleration
  - increasing Contingency
- This means: the positive design and mental coping of our life becomes more and more difficult, caused by our successful Fitness strategy and reinforced by the growing un-Freedom of our Consciousness (keyword: Surrogate-Meta-Consciousness). Conclusion:

**Our hitherto  
successful Fitness-Strategy  
is losing its Fitness.**

⑨ In this situation the biological and Nagual-Spirit of Survival (operationalized in the 1<sup>st</sup> Reality-Generator and in our worldly I) loses some of its function as Partner and Helper.

⑩ Because of this, integrated in the biological Spirit of Survival, a higher level of the biological Spirit activates:

**The biological Spirit of Co-Evolution  
becomes present in  
our human Consciousness.**

⑪ Since the Consciousness is the Agent of Creation, the Nagual Consciousness acts in our Consciousness, and it acts as a Helper for our Evolution. This Nagual-Consciousness reacts to the increasing failure of our Fitness strategy (see point 8) by " Upgrading " its Help and Cooperation.

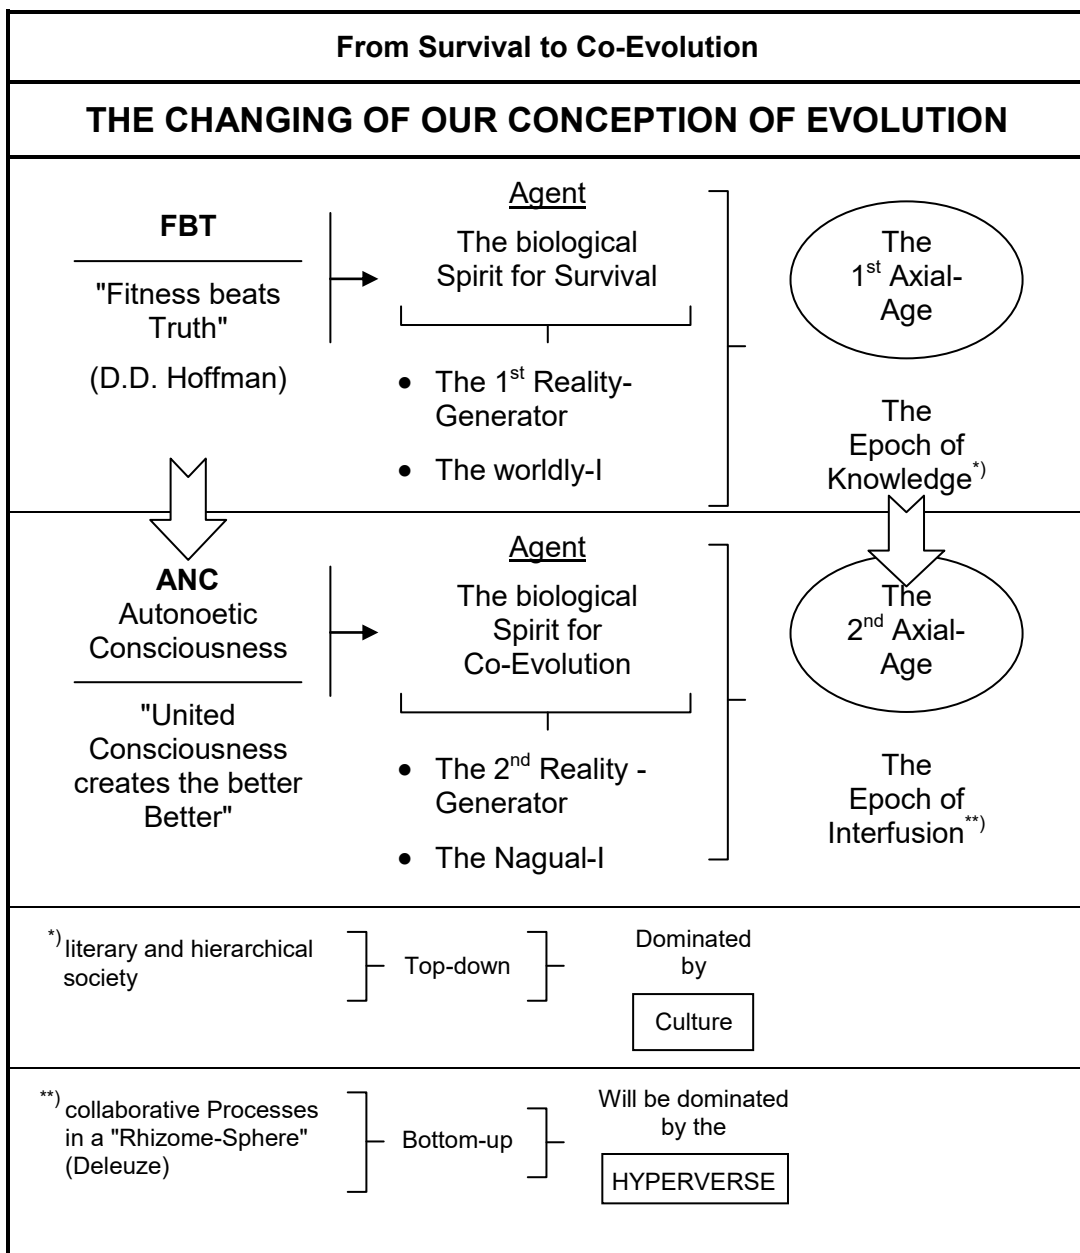

12) This "Upgrading" consists in a permanently intensifying Presence of the ANC as an

**"Autonoetic  
Consciousness"  
(LeDoux).**

13) Because of this happening, already today a re-alignment is developing concerning our human Evolution-Conception:

**from "Fitness beats Truth"  
to "United Consciousness  
creates the better Better".**

As a sketch to this:

- 14 This shift, which will become increasingly evident over the next few decades, will significantly change our techniques of coding and Iconization:

**The striving for absolute truths  
will become the striving for  
the most evolutively efficient usefulness.**

- 15 This means, among other things, that we will align our inventions ever more consequently with ANC and with the development of a Praxeology of Co-Evolution.

In this context, the current Surrogate-Meta-Consciousness will successively dissolve. This will liberate the "unfree Consciousness" we have now, enabling the path to a new kind and quality of Meta-Consciousness to unfold.

- 16 The Creation and social establishment of this Meta-Consciousness will be ideally realized by the collaboration of Metaverse and Metabliss in the format of a

**Hyperverser.**

- 17 What will determine the contents of this coming Meta-Consciousness? The following statements can be made here:

- The Values of the Woke-Movement will feed into the coming Meta-Consciousness ... the concept, that is:

**The Qualification of  
our Differentiations (Diversity)  
generates the Intensification  
of our We-ness (Inclusion).**

- In the next Teen Generation (Generation A), young people ... influenced by the growing presence of the ANC ... will begin to develop ideas and concepts that can open the existing worldly Identity (1<sup>st</sup> Defluence) to a Nagual-I (2<sup>nd</sup> Defluence / Crossing-Initiation).

- 18 Teenager and Woke. Both trends will be positively reinforced and qualified in their respective functions if the following development prevails in the context of the digital revolution:

- 19 From Social Media to the Hyperverser. This Evolution is absolutely vital for our Inclusive-Fitness ... for the development of a Meta-Consciousness.

Why?

**It's about  
freeing our Consciousness ...  
freeing it from our Mind programs.**

To put it more clearly, we programmed our Mind very efficiently for Fitness and cognition ... more precisely, it was the connecting of the world and Evolution ... that is, survival through progress.

This was absolutely necessary and valuable. This connecting of survival and progress ... Fitness and cognition ... was and still is a powerful programmer of our Mind. It follows:

**We have successful  
Fitness programs in our Mind.**

**But no Programs  
that can generate the Progress  
of our own Consciousness.**

**We have no Meta-Consciousness  
in our Mind.**

②0 Who or what is blocking the development of this Meta-Consciousness? First it is our own Mind with its Mind-Cards, Belief-Systems and Dispositives. However, "complicit" are, among others, biology (genes and epigenetics) and the culture shaping us and our I (1<sup>st</sup> Defluence, Education, Cultural-Ideologies, etc.). Likewise, the so-called "incisive personal experiences" in the course of life.

②1 Our Mind ... and thus our 1<sup>st</sup> Reality-Generator ... ultimately consists of 2 attractors:

- Truth / Knowledge
- Happiness / Fitness

Donald D. Hoffman, in his book "The Case against Reality" (2019), emphasizes the formula

**"Fitness beats Truth"**

and points out that Fitness and survival have evolved into the very driving force and director of our pursuit of cognition (truth):

- We primarily develop those insights that improve our Fitness.
- We organize our lives and our future through a "world Fitness scheme."

- ②② Thus, our Mind performs a very violent and effective dressage:
- We develop a truth of the world that we believe to be "true" because we have coded and iconized it as "objectively true."
  - We live and act as believers in an objectified world that permanently excludes contingency and invention through the formula "knowledge for Fitness."
- ②③ This truth does not allow for a truth that does not consist of "world." It follows: The Now-of-Creation (Nagual), the ANC and the Consciousness as Something are consequently excluded from our Consciousness of Something ("World"). Whoever believes in such a thing is either a nutcase, mentally ill or a deeply-believing esoteric.
- ②④ In and of itself, this situation is not so bad. But for some time now the following problem situation has arisen and intensified:
- The neuronal "world-program", which our Mind uses for shaping our present world, is less and less able to cope with the fundamental problems of the world.
  - Since the problem-solving strategies that we use are conceived and implemented by the "world-Fitness-scheme", there is a permanent reinforcement of the "world-program" that has caused the problems. Motto: turning the buck into the gardener.
- ②⑤ Nations, Democracies and civil societies are currently trying to suppress this dilemma. One therefore offensively relies on more experts, more research, more science, more "clever" strategies (think tanks, etc.) and also on the use of AI.

But all of these offensives are part of the "world program" of our Mind and the "world Fitness scheme" of our actions.

**One thus organizes  
more of the wrong.**

- ②⑥ Much of the public crises, conflicts, and divisions that have run high in democratic nations have a root cause here:

**The Intelligence of  
"Fitness beats Truth"  
becomes the  
public Spectacle of Failure.**

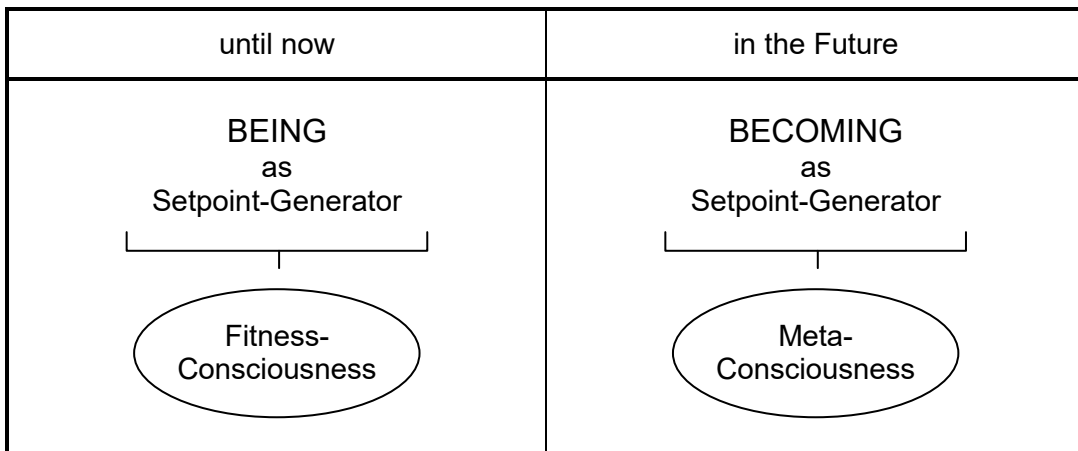

- 27 Thus, it is time to put the factor of "Truth" ... that is, cognition ... back at the center of our Evolution, to be able to reconceptualize and instrumentalize the "cognition" factor:

**We need  
a start to a different  
quality of cognition.**

**But we can only  
generate this new quality  
if we have a new kind  
of Meta-Consciousness  
which enables us to bring  
our own Consciousness to Progress.**

- 28 So far, the real World (our Being ) and our biological-Spiritual Survival-Program has shaped and successfully qualified our Consciousness (Mind).

But the new kind of Meta-Consciousness cannot be developed by these two Sources. We need a new and presumably unknown source for formative power ... we need a new partner for the shaping of a better "world program". We need the factor of "Becoming" to be able to develop the new kind of Meta-Consciousness. As a sketch:

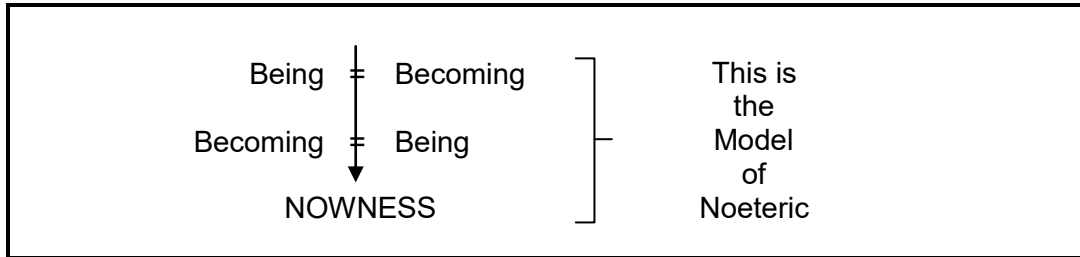

- 29 If we want to put the factor " Cognition / Truth" back into the center of our life, we need a Reorientation of the "Cognition" system... a different quality of Cognition:

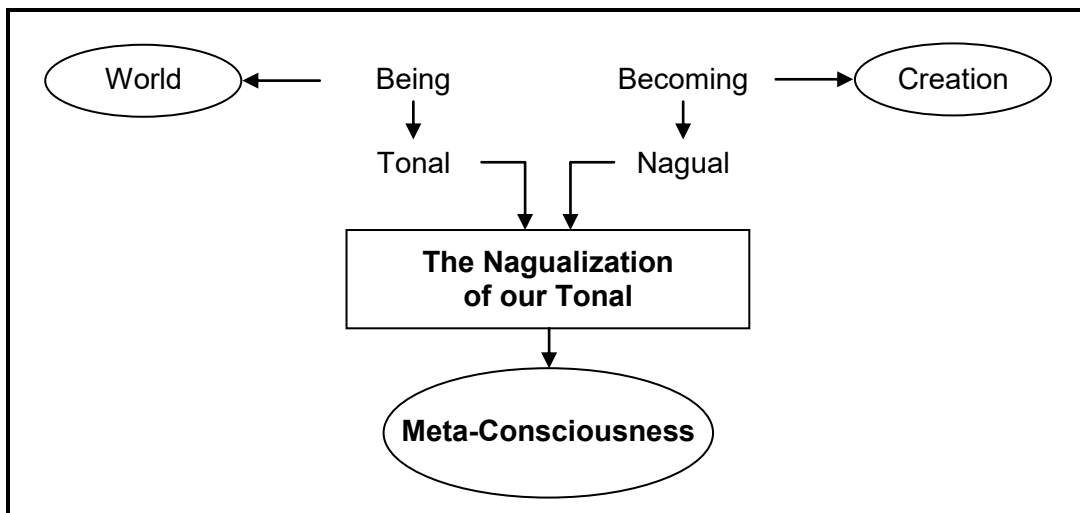

**From the  
"Cognition of Being"  
to the  
"COGNITION OF BECOMING".**

- 30 Meta-Consciousness is based on the permanent "Influx of Becoming" into the "Now of our Being". This makes the following formula the "Foundation of Meta-Consciousness":

- 31 In the model of Noetic the Now-of-Creation (Nagual) becomes the Setpoint-Generator for our World-Program, i.e., for our "World-Fitness-Scheme" and for our Meta-Consciousness. As a sketch in the terminology of Noetic:

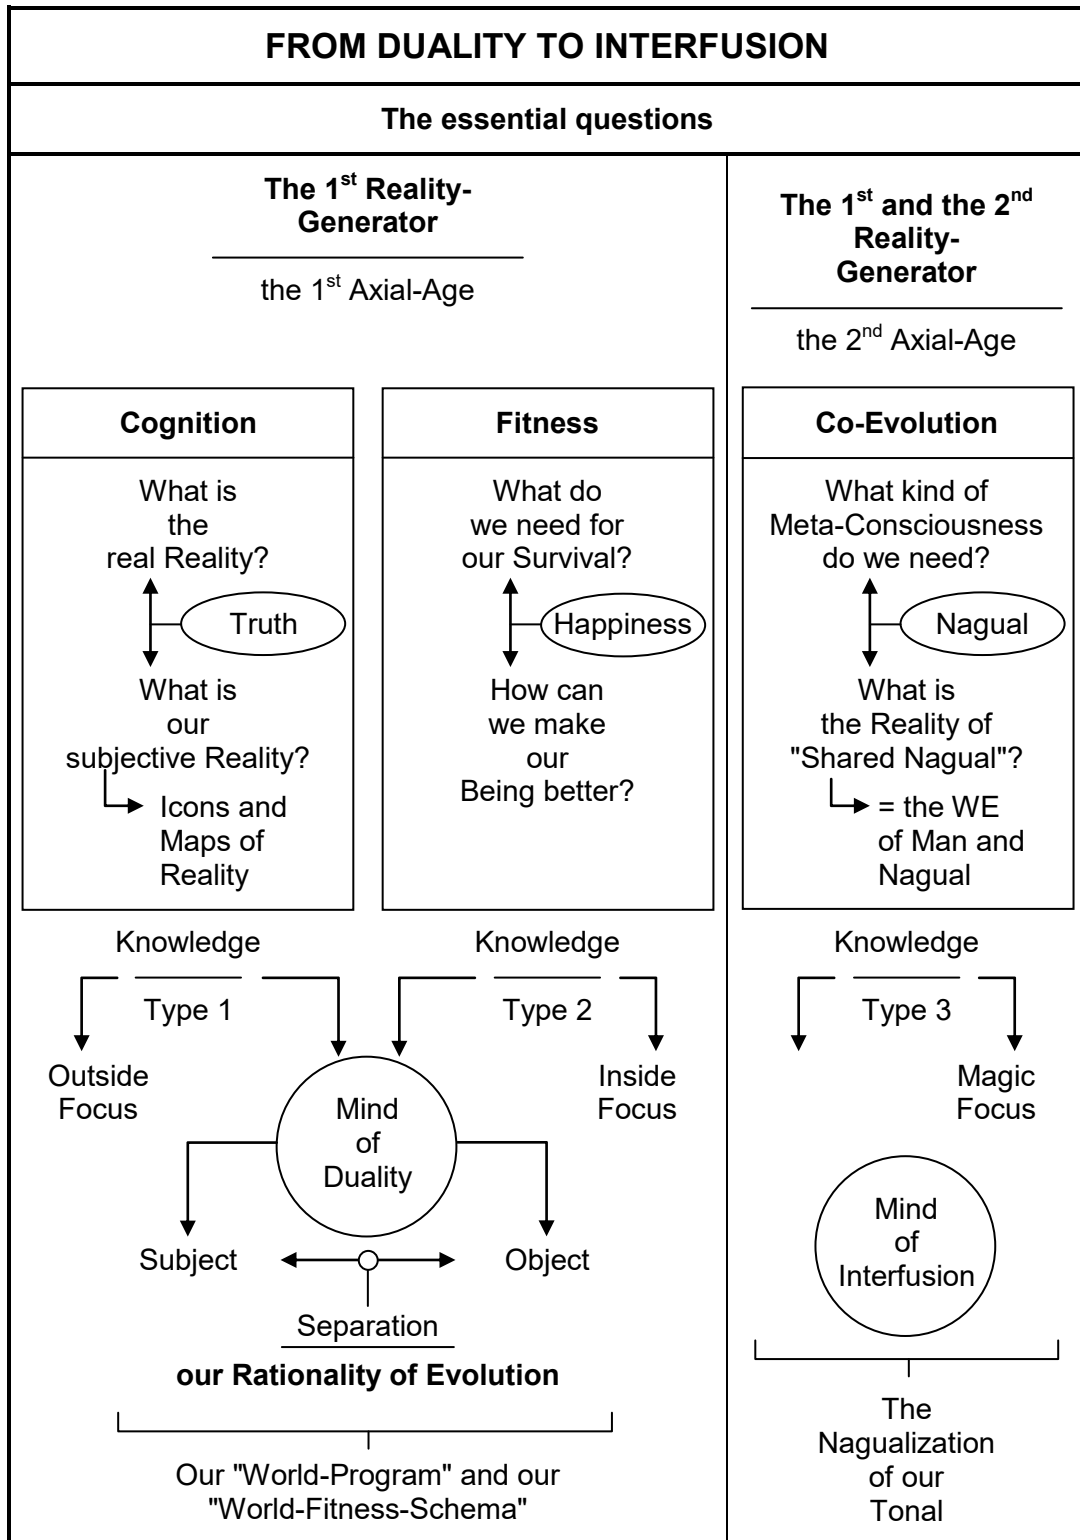

- 32 It is about enabling our mind to organize the permanent Influx of the Nagual into the real Situation of our Tonal.

**If we succeed in this,  
we as Humanity will  
initiate and enter  
the 2<sup>nd</sup> Axial-Age.**

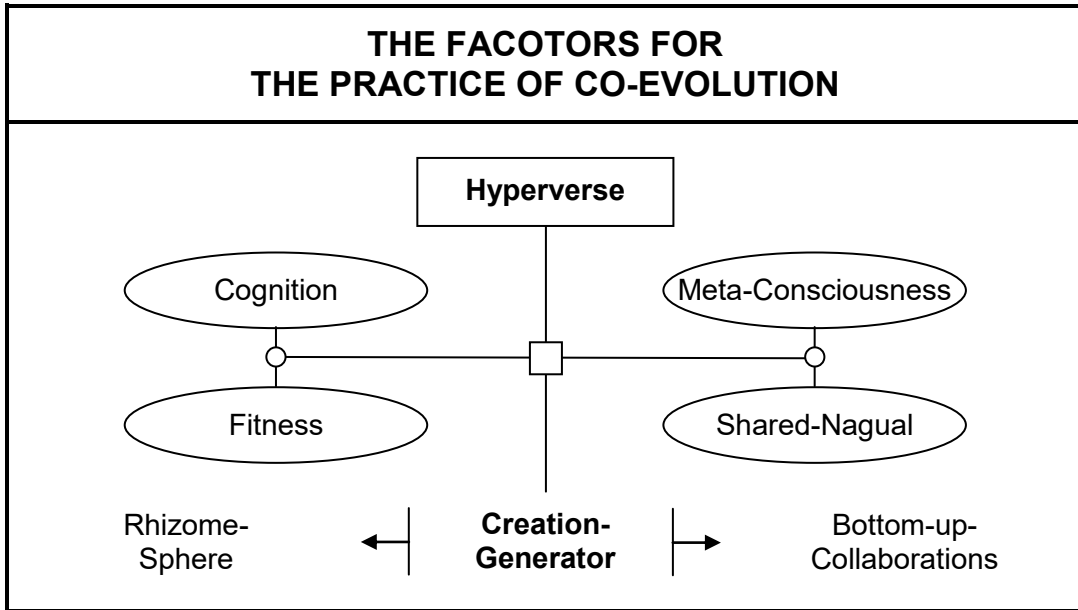

- 33 This requires the following step:

**from Duality  
to Interfusion.**

In order to make this step recognizable and shapeable, the following questions can be helpful, which the following diagram outlines:

34 A new kind of organization and conditioning of our Consciousness is what lies ahead of us (keyword: 2<sup>nd</sup> Axial-Age), as the following sketch shows:

- 35) The point is to make our Consciousness smarter ... smarter than it was until now. This can be successfully accomplished if we empower ourselves to mentally switch

**from Evolution  
to Co-Evolution.**

- 36) For this Switching we need the Cooperation of Metaverse and Metabliss in a system which can be called

**Hypervers.**

At the Core of these two use-offers ... thus Metaverse and Metabliss ... is

**the Creation-Generator.**

This Creation-Generator overcomes the "Mind of Duality" as well as the present Dominance of the Power of Knowing Better (Society-of-Coercion). It connects the coming Rhizome-Sphere with an organization of Bottom-up-Collaborations, which will positively foster the Development of a

**"Society-of-Creation"  
with a  
"New Spirit of Democracy".**
