

THE NEW INTELLIGENCE – COOPERATING WITH THE NOW-OF-CREATION

Keno Oneo in Conversation with Jochen Franck

Franck: In your essay "How to free our Consciousness from our Mind" you wrote that we create our Consciousness ... generally speaking ... by the nature and quality of our questions to reality. You hinted that we may be asking the wrong questions at the moment ...

Keno: ... yes, which means that we all too often shape our lives and especially our future with the wrong Consciousness ...

Franck: ... and in this context the question arises as to what "wrong" could mean.

Keno: Wrong means: Consciousness does not enable us to cross efficiently ... that is, to cross the currently existing Consciousness boundary in our Mind.

As John C. Lilly wrote, "there are no limits in the space of the mind". Any limit that we build ... to be able to objectify the world ... among other things, is useful.

But concerning our Spiritual-cultural Evolution ... we have arrived at a level where we should play the game of limitation, limitation-transgression and re-entry in a more evolutively productive way.

We mentally encode a limit by having our Consciousness controlling the Mind in such a way that we experience an "icon" of the world-reality. We iconize our subjective-personal reality in such a way that we can experience it as "real" reality. We iconize in such a way that we can preserve and qualify our evolutive Fitness.

Franck: And this is a problem?

Keno: Yes, not fundamentally, but in the current epoch, characterized by our growing future stupidity, it is a problem:

**We need a new Kind of,
i.e., more qualified Interaction of Consciousness,
Mind, Icons and Actions
(Shaping the Future).**

Franck: And what has this to do with the kind and quality of the questions?

Keno: We haven't yet asked those questions that provide us with a Consciousness that could be the helmsman of the mind leading to better expectations, decisions and actions.

Franck: An example?

Keno: As I pointed out in the essay, we have not yet asked the following three questions:

1. - What kind of meta-Consciousness will we need to improve the better-making of our futures ... a special Consciousness for cooperating with that Spiritual source (wherever it is) that constantly represents the better?
2. - What is the reality that is present behind our "Icon of Reality" ... and: How could we harness this hidden reality that is not present in our Mind?
3. - Can we recognize or form (invent) a Consciousness that helps us as a partner or agent to cooperate with the hidden reality ... and in such a way that we produce more and more in common with the hidden reality over time?

Franck: My God, what questions! And so abstract! Isn't there any simpler and more practical way?

Keno: Be patient. You will see that at the end of our discussion we will have a very simple system ... quite pleasurable-pragmatic ... and in principle for all people ... wherever they live and however developed their knowledge is ... and usable free of charge.

Franck: I guess: You mean the Hyperverse?

Keno: Yes. You want it simple, fun and free. And for all people. And that is exactly the system that can be called "Hyperverse".

Let's answer the three questions in sketch:

1. We need a Meta-Consciousness that represents our personal Consciousness in a continuous interface position to the Now-of-Creation (Nagual).

So, an awareness for the Essence of Creation and for the intentionality of this Creation, knowing that these are inventions of us.

2. We need a Spiritual (intrinsic) invention that enables us to extend our "Icons of Reality" to the Now-of-Creation (= Nagual), i.e., to an invention that produces evolutively useful effects for us (e.g., better futures).
3. We need the invention of a special Consciousness ... called ANC / "autonoetic Consciousness" (LeDoux) ... which takes over the function of a mediator, so that we can develop a "shared reality" with the Nagual (see 2.) ... thus, a productive "WE" of man and Nagual.

Franck: Don't you think you are arguing with all kinds of "inventions" there? I hardly see reality, but a lot of inventions.

Keno: That's right. The Meta-Consciousness is based on the invention of a Creation that has an "inner being" and an autonomous intention (answer 1). The Nagual that we establish in the Consciousness of our "Icons of Reality" is an invention (answer 2). And the ANC as mediator is also an invention (answer 3).

Yes, three times an invention. What, please, do you have against inventions?

Franck: Quite simply: they are not realities.

Keno: Hmm, one can see it differently. Let me try to illustrate that.

Franck: Yes, please.

Keno: If one, like you, only possesses the 1st Reality-Generator, one in principle can only recognize (search for), want and value reality:

**The 1st Reality-Generator
is addicted to reality,
but spiritually works
predominantly with "Coded Icons"
... i.e., substitute realities.**

The ITP ("interface theory of perception") of Donald D. Hoffman, which I agree with very much, says that what we call "genuine, real reality", is never experienced directly ... i.e., 1:1 ... in principle. That means: our mind always stands between the "thing per se" (Kant) and us as a person. And what stands in between consists of "Coded Icons" generated in the intrinsic reality of a mental interface. Meaning:

**Every kind of reality
we perceive or experience
is the invention of an "icon".**

So, we invent anyhow. And anyway. But we invent (refer to our reality addiction) these Icons in such a way that we can follow the

FBT

"Fitness beats Truth"

strategy described by Hoffman. Our 1st Reality-Generator is based on the benefits of this strategy of FBT, i.e., we search for those truths that are important for our survival. So, our reality-seeking is a reasonable and efficient strategy for personal Life-Security and for the Happiness factor.

Franck: Now, let me get this straight: you are saying that our survival and living in happiness is dependent on the strategy FBT. And because that is the case, we invent these "Icons"

Keno: ... yes, we invent and encode them in the dynamics of our intrinsic "interface of perception".

This interface is what is permanently active in the brain as a functional network ... virtually every second that we are awake ... as a

Zone of Conversion.

It follows that the brain matter is also shaped by this FBT strategy.

So, if we ask other questions and, on this basis, then also find other answers ... more precisely "invent" ..., then we will also physiologically get another brain ... most probably an additional

Zone of Emergence.

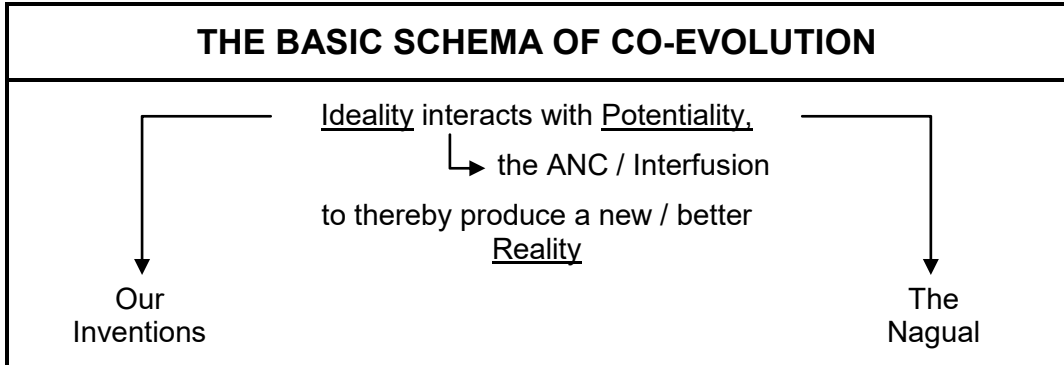

This Zone of Emergence has the task to produce those inventions which are placed between the reality of our being and the ANC ...

Franck: ... whereas the ANC is also only an invention ...

Keno: ... yes. It is not possible without inventions. And this is exactly what will be important in the coming 2nd Axial-Age.

Franck: Why?

Keno: We invent "Icons" of reality for the functioning of our FBT strategy (=1st Reality-Generator). In the future we will have to invent additional "Icons" of ideality ... "Icons" of the 2nd kind". Why? Because we will enter into the Practice of Co-Evolution. And because Co-Evolution can best be accomplished on the following basis:

If we want to make our Future-Intelligence more intelligent, we need this kind of Co-Evolution. That is, we need the cooperation of the Now-of-Creation (which is an invention). This cooperation of the Creation is organized by the fact that we merge idealities ("Icons" of the 2nd kind) with the mediator function of the ANC ...

Franck: ... which is also just an invention ...

Keno: ... more precisely, into

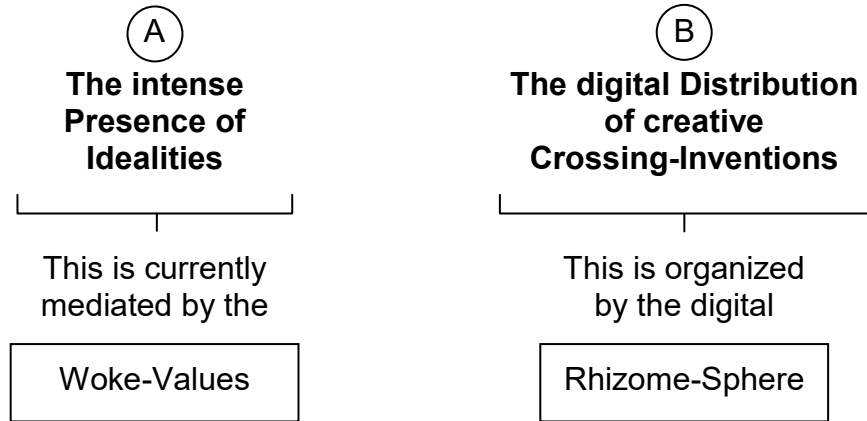

ritual Interfusions.

These ritual interfusions are extraordinarily positive (happy) and pleasurable. They are thus the opposite of our currently dominant learning programmatic, which is focused on

"one learns wisdom by suffering"

... i.e., negativity and unpleasure.

I believe that we can begin to see that the desired smarter Future-Intelligence will be critically dependent on 2 attractors:

In other words, if we do not develop a Meta-Consciousness ... which enables us to invent those Consciousnesses through which we can mentally organize Co-Evolution, we will get growing conflicts in society, combined with a sliding erosion of the "Spirit of Democracy".

From this point of view, what you call "are only inventions" is the basis for strengthening those Democracies that have been built on Western values.

Franck: For me, it is currently the Woke activists who are creating crises, conflicts and divisions in our society. And the increasing rhizome dynamics generated by networking digitality is destroying the "inner meaning" of culture ... so ultimately it is also destructive.

Keno: The crucial question is: do we want to enter into the practice of Co-Evolution? Yes or no?

Franck: With some hesitation and bellyache, I would say "yes."

Keno: Good. Then we need those impulses ("evocative callings") that we can hand over to the ANC ... the mediator Consciousness

And what do we hand over? Idealities that have been associated with creative crossing inventions. In the Noetic Model, this connection is called the

Creation-Generator.

Let's make this very clear:

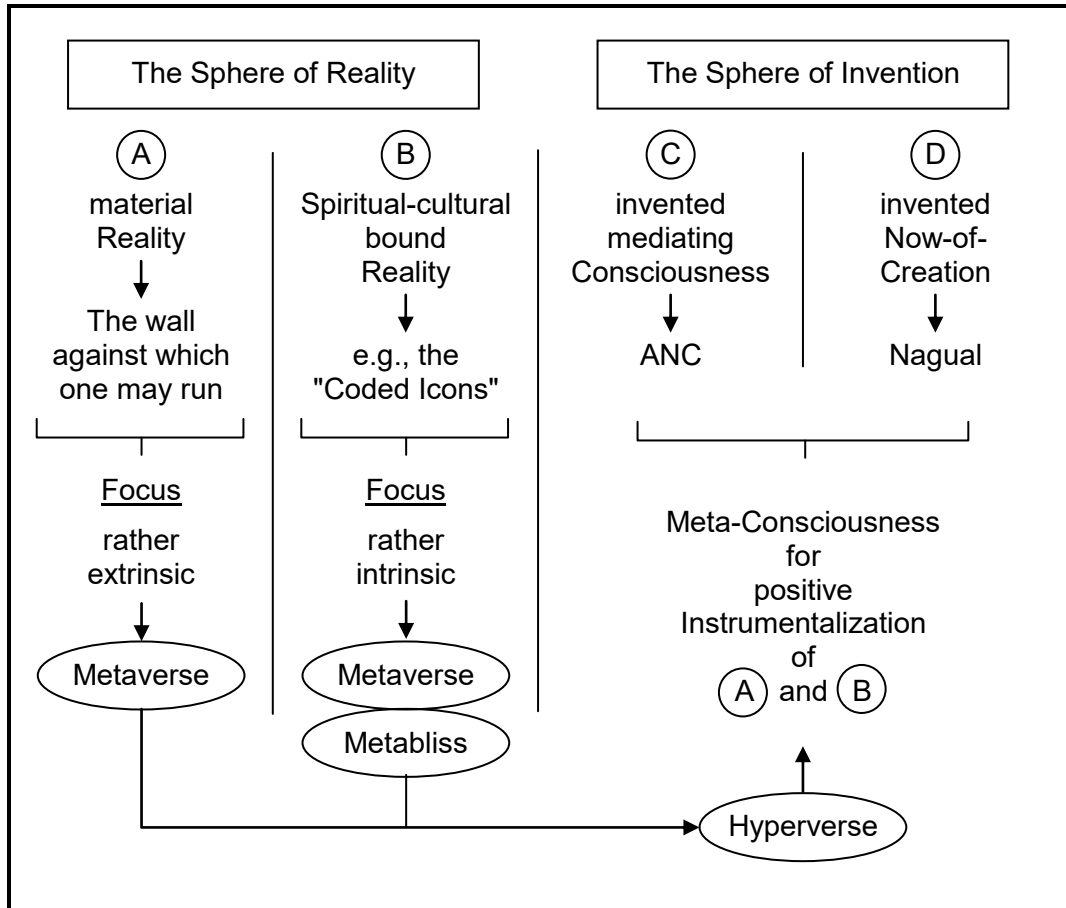

- With our culture of knowing better, we will not be able to establish these connections of Idealities and Crossing.
- Intellectuality, which is generated by the 1st Reality-Generator, can neither conceive nor shape this Creation-Generator.

Franck: So, the Noetic Model tries to instrumentalize the ANC, correct?

Keno: Yes.

Franck: And, according to your argument, for this instrumentalizing we need ... a new understanding of Reality and Invention. Is that right?

Keno: Yes. Let me describe this. In the Noetic Model, Reality and Invention interact as follows:

Based on this, the following questions arise:

A - How do we get to a Meta-Consciousness that uses the "old" criteria of the 1st Reality-Generator ... i.e., Fitness and true knowledge (Truth) ... in a different (transformed) form, and in such a way that we recognize

that the best evolutive Fitness can only develop when we make our Consciousness and Identity as identical as possible with the Now-of-Creation?

B - What collective Spirit (We-ness) should we develop in order to be able to lead our Collective-Consciousness

**to the
universal Spiritual Source
of the Better
with the help of the ANC?**

So, two components, or concepts, show up here:

for A: We need a Nagualization
of our I and our Mind-Cards

for B: We need a We-ness that can
permanently and creatively
cooperate with the ANC.

Franck: What follows from this, I mean concretely ... for our life-practice and for our society?

Keno: Yes, important questions.

First of all, it will be a matter of freeing the currently dominating system that we call "culture" from its dominance. Why? The culturally produced Innovations are based in a rather absolute way on two factors:

The Power of knowing better	+	Progress through Spiritual Innovations
1 st Reality- Generator		1 st Reality- Generator
"Fitness beats Truth"		no Emergences (Future 1 only)

We should put the Hyperverses in the place of "culture" and thus the functions of its Creation- Generator.

Furthermore, with reference to the concept of (A) ... we should organize the Nagualization as follows:

- The Nagualization of the I can be realized best by the 2nd Defluence (" Essencing ") in the phase of the adolescence, i.e., with the respective current

Teenager-Generation

- The Nagualization of our Mind-Cards needs

the values of Woke,

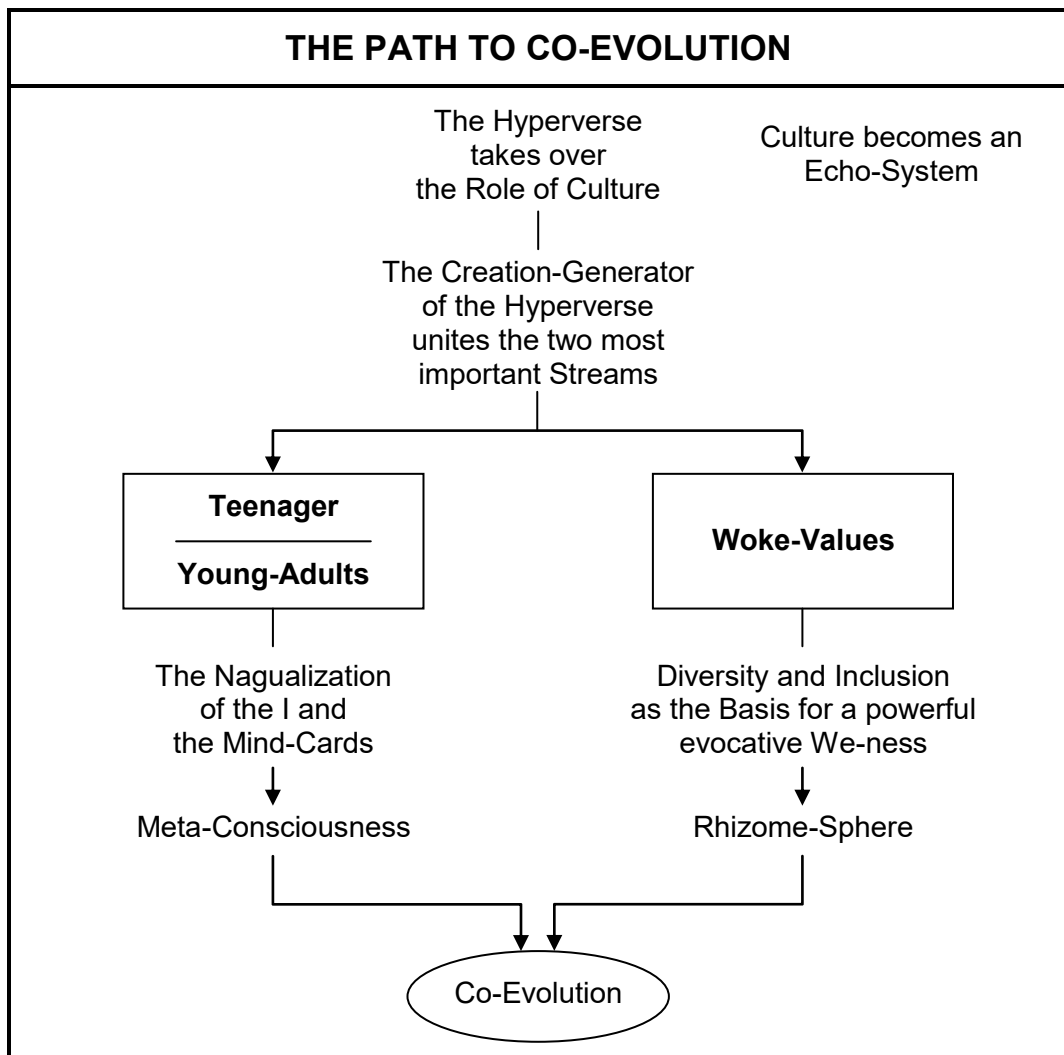

which are focused on a new kind of relationship between Differentiation (Diversity) and Unification (Inclusion). The appropriate group for this is

the Young-Adults.

In relation to the concept of (B) , the following statements can be made:

- Only an intensive We-ness can lead the Idealities ("evocative Callings") into a productive Interfusion with the mediator ANC.
- A divided (destructive) or weak (tired) We-ness will not be recognized as a cooperation partner by the ANC.

When one brings these aspects together, one gets the following picture.

Franck: Teenagers and Woke-Activists. These are the groups that will lead our Society ...

Keno: .. indeed, us as Humanity ...

Franck: ... to the Practice of Co-Evolution. That's the core of your analyses.

Keno: Yes.

Franck: I have my doubts about that. In my opinion, the following factors will lead us to Co-Evolution:

- better cognitive Intelligence
- new technological Innovations
- maybe AI and AGI

Keno: Where does that leave us as humans?

Franck: Man ... or as you say " Humanity" ... is the beneficiary ... that will reap the benefits of Co-Evolution because it ... primarily through the Innovation management of digital corporations ... will be empowered ... as users ... to use these new technologies in such a way that Co-Evolution can be practiced ... every day ... quite effortlessly ... by any person who is interested in it.

Keno: Let's hold on to where we agree: Co-Evolution should come and will come.

Franck: Yes.

Keno: Technological Innovations can best lead us to Co-Evolution.

Franck: Yes.

Keno: I see it differently. Significantly different.

Franck: Why? You're a fan of Mark Zuckerberg, aren't you?

Keno: Yes, absolutely. But we mustn't forget what Co-Evolution is. Let me try to describe it:

- Co-Evolution is the Generation of Consciousness.

- Co-Evolution generates that Consciousness, that our 1st Reality-Generator ... i.e. Rationality, Cognition and Thinking-Logic ... cannot generate.
- Co-Evolution overcomes the Spiritual success-scheme of the 1st Axial-Age.

Franck: And what is this scheme?

Keno: FBT ... the formula of D. D. Hoffman ... i.e., "Fitness beats Truth". This formula is becoming increasingly unsuitable because it cannot shape those futures that we desperately need.

If Fitness drives our Cognition (Truth), the quality of our Fitness ... defined as Future-Intelligence ... becomes tightly coupled to our mental strategies for producing Cognition.

Franck: Yes, I agree with that.

Keno: But our cognition strategies are strategies that depend on the use of Consciousness:

- We use our Consciousness to produce better Consciousness.
- The Consciousness to be produced is our Mind.
- This mind is shaped (or manipulated) by the nature and quality of our questions.
- If we ask the wrong questions, our Mind will produce a Consciousness that becomes more and more "wrong" over time.

Franck: How is this to be understood?

Keno: As we have already discussed, our questions are pretty much exclusively related to

- our Survival
- Qualification of our Being
- objective Reality
- subjective Reality

These kind of questions (they follow the model of FBT) generate

the Mind of Duality

Such a mind of duality has an "inner block" in relation to interfusion:

**If one makes
the world the object of cognition,
the Now-of-Creation
will be drastically excluded
in the human being.**

The objectifying Mind can't objectify what one can't objectify.

Franck: That is more than clear!

Keno: Yes, but then one cannot make the Now-of-Creation (Nagual) the Spiritual partner. So: no Co-Evolution is possible!

Franck: What to do?

Keno: Ask the so far excluded questions, e.g.:

- Do we need a Meta-Consciousness? And if so, what kind of Meta-Consciousness do we need?
- What is the Now-of-Creation (Nagual) ... and how do we invent it?
- What are the relations between our Waking-Consciousness (= Consciousness of Something), Consciousness as Something and the mediating ANC ("autonoetic Consciousness" / LeDoux)?
- What is the "shared reality", i.e., the common produced Consciousness with the Nagual ... thus that space of Consciousness, which is

**the eternal
Source of the Better.**

Franck: You must admit that our Mind ...

Keno: ... whose operational basis is the 1st Reality-Generator ...

Franck: ... finds it very difficult to formulate and ... if at all possible ... to answer such questions.

Keno: Yes, that is true. But as already analyzed, the ANC ... the mediating helper can help us to activate these questions in our Mind.

Franck: Might be. So then at some point we will be able to ask such ... too abstract ... questions.

Then we still have a tangible problem: Who then answers these questions?

Keno: The Now-of-Creation ... the Nagual ... evoked and stimulated by the users of the Hyperverse,

Franck: Specifically, who evokes?

Keno: The fractal and contingent "Streams of Consciousness" (W. James) produced by the users in the digital Rhizome-Sphere of the Hyperverse.

So, no philosophers. No geniuses. No priests. No scientists. No politicians. No experts. No know-it-alls.

Franck: But?

Keno: Normal people like you and me.

What is on the doorstep here as a social revolution is the following:

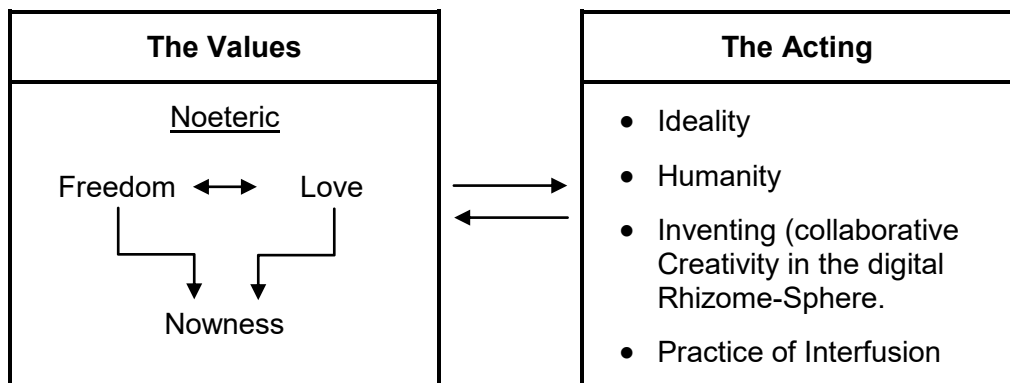

- 1.- The knowledge of cognition plays only a subordinate role in the Rhizome-Sphere of the Hyperverse.
- 2.- Only the Individual and his Energy count, i.e., how much Freedom, Love and Nowness the Individual can contribute.
- 3.- The most effective contribution is achieved through
ritualized Creativity.
- 4.- Thus, the Quality of Humanity becomes more important than the learned or acquired knowledge.

Here are some explanations:

- The Meta-Consciousness does not arise through hierarchized knowledge. It arises through a We-ness that is permanently Nagualizing itself.
- For the Nagualization of our We-ness we need the Noetic-Rituals of Metabliss. That means:

**There will be
no Meta-Consciousness
without Metabliss.**

- The Nagual as the Now-of-Creation reveals itself most strongly (in the form of Love / Care and Help) when a powerful We-ness asks for the Cooperation.
- The Now-of-Creation (Nagual) exists in every Human Being, namely in that Nagual-I, which we, however, culturally-spiritually exclude by the 1st Defluence.
- This Now-of-Creation (Nagual) can be made the content of our 2nd Reality-Generator, if we make the ANC the Agent of Mediation ... mediating between Consciousness as Something and our objectifying Consciousness of Something.
- We can find (and harness) the " Eternal Source of Better" by producing a "shared Reality" with the Nagual:
- For the production of the "shared Reality" we need the Hyperverse.
- The production of this common produced common Nagual stands on two pillars:

Franck: Short interposed question: You don't see that the coming progress in AI and AGI will lead us much more sovereignly to this "Eternal Source of Better"?

Keno: Very short answer: No. But we should discuss the topic "Consciousness as Self-Evolution" and the progress of AI and AGI later on in a very fundamental way.

But let me continue, with the following question: if we enter the 2nd Axial-Age ... which I believe is dependent on whether we can establish the "Hyperverses" system ... who will be the loser? Here's an answer:

WHO WILL BE THE LOSER AS WE EVOLVE US INTO THE 2ND AXIAL-AGE?	
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Reason</div> <p>as a disciplinarian of the elite loses its function</p>	<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Culture</div> <p>as the predominant source for the new better loses its function</p>
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Crisis^{*)}</div> <p>as a motivator for the production of the next better lose their function</p>	<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Knowledge</div> <p>as an exclusive pathfinder for the better loses its function</p>
<p>^{*)} wrong decisions of the past</p>	

The 2nd Axial-Age era needs the Reality of a Society that digitizes the Invention of the Better in such a way that collaborative and rhizomatic Processes for Advances in Consciousness can be organized. Briefly:

THE SOCIETAL CHANGE	
old / now	upcoming
Society of Knowledge	Society of Creation
Power	Interfusion
The "domineering" Mind	The Co-Evolutive Mind

Franck: What do you think is the core point for this change?

Keno: There I follow the remarks of Peter Sloterdijk: We will separate from the "dominating Co-Existence", which we have spiritually and culturally established between Nature, Culture, Man and Creation. We have to do it ... and we will do it.

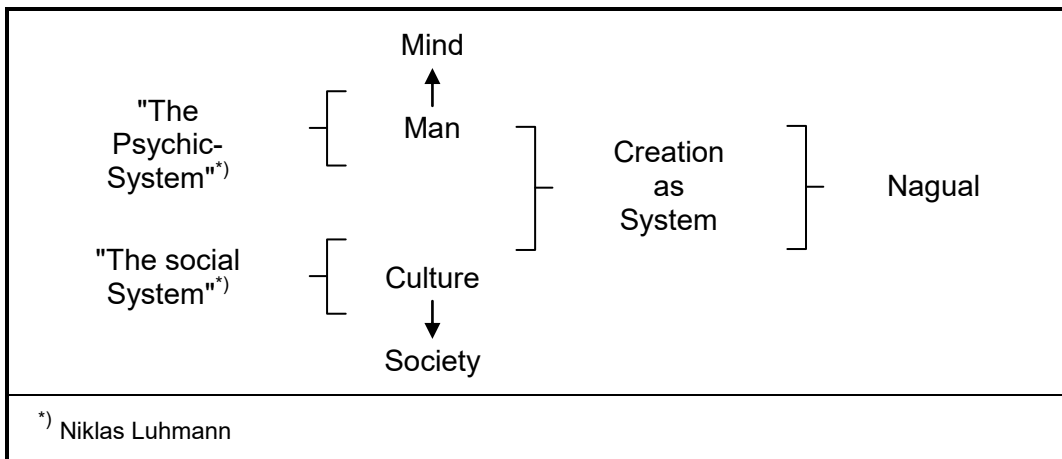

Franck: Why do we have to?

Keno: The first keyword is Nature: The "domineering" mind has been failing for about three decades on the issues of climate, energy and environmental protection. Especially the Green parties and their affiliated NGO's fail here by an unprecedented ignorance:

Green politics tries to program the "domineering" mind to be "green" through morality and doom ideologies, among other things.

This makes the long-needed Co-Evolution of the human Spirit with the (other) Spirit of Nature impossible. For decades.

The second keyword is "System": For some decades the "domineering" Mind also fails in the realignment of the relations of our most important Systems:

Franck: Can you make that a bit clearer? For example, what are the consequences?

Keno: If the Social-System ... i.e., Culture ... excludes the System of Creation ... more precisely the Now-of-Creation ... (see FBT / the 1st Reality-Generator), the future of the people will be shaped in such a way that we have no possibility with our Mind to satisfy the legitimate and intensifying

Future-Needs of the people.

One thing should be clear between us:

**Cultural Innovations
fail more and more often
when it comes to
satisfying the human Future-Needs.**

**They fail because our
primary way of shaping culture
is through the 1st Reality-Generator.**

**But what people are demanding
more and more intensively
can only be shaped / evoked by
the 2nd Reality-Generator.**

Among other things,

**this is one reason
why modern art is becoming
a discontinued model.**

Franck: Bold thesis! Very bold!

Keno: We should analyze the theme "the future of art has no future" quite thoroughly later.

Franck: Agreed. But the question suggests itself: Who can satisfy the Future-Needs of the people?

Keno: Clear answer: It will be the fusion of Metaverse and Metabliss ... that is, the yet-to-be-established Hyperverse.

Unless we program the relationships between Society and Creation for Co-Evolution, people's Lives will become more and more unhappy:

**When people experience their
futures failing, they become unhappy in their I.**

The growth of social conflicts, social divisions and health-psychological problems in the population (from depression to suicide) probably has its central cause here.

Many people then rail against capitalism, which is supposedly failing. But basically, what is happening here is this:

The Future fails.

Our Evolution-Strategy fails.

Franck: A future that is failing. You see this as the central cause of our growing problems. That has now become clear. But your therapy for it ... it has remained unclear and vague.

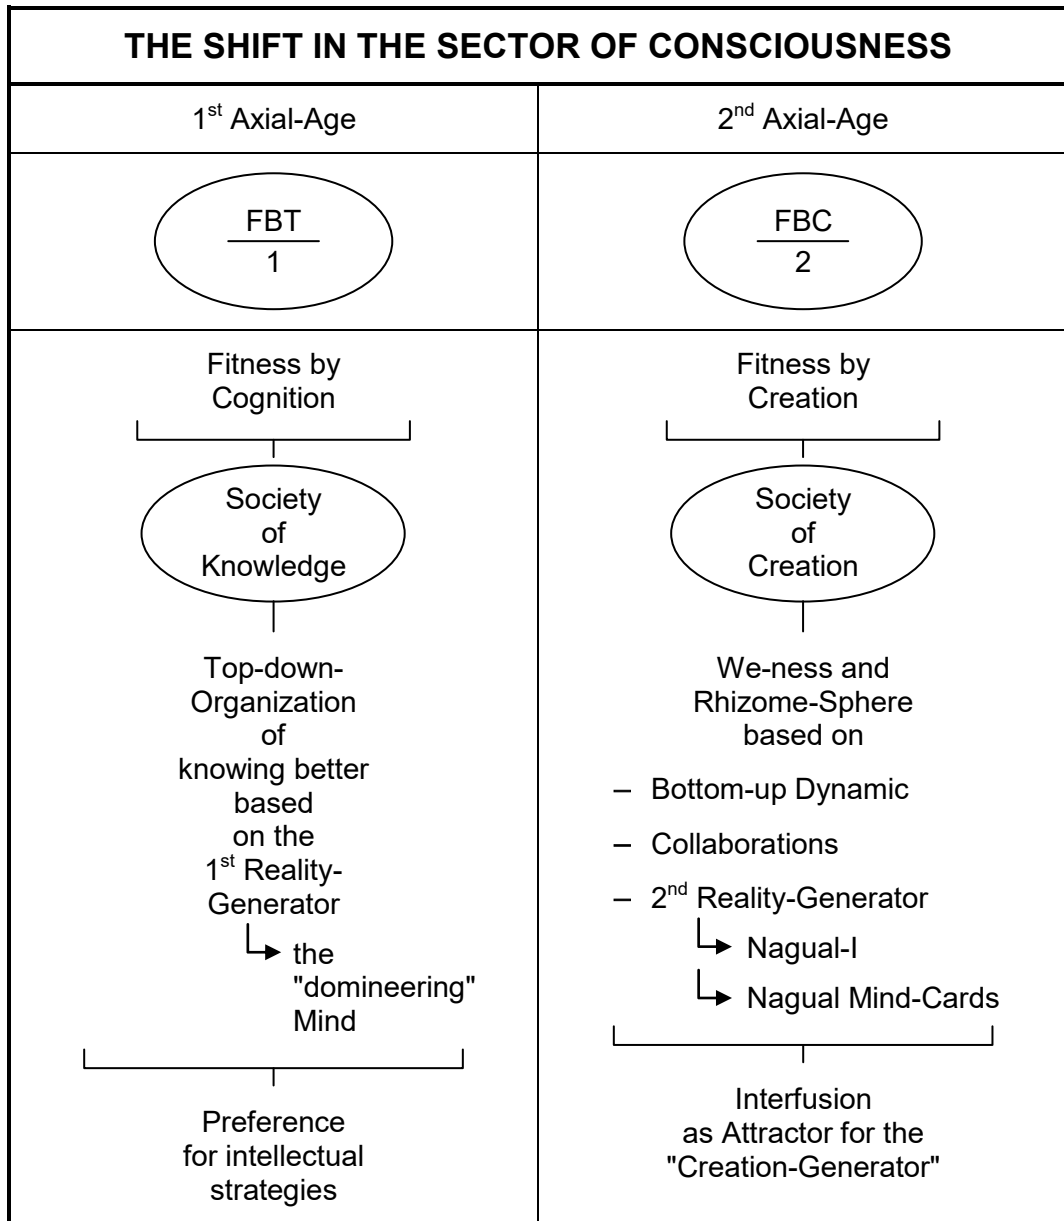

Keno: We need Co-Evolution. That's it ... the therapy. It is as simple as that.

Franck: And what is to be done so that we move from Evolution to Co-Evolution?

Keno: What we have already discussed:

- The Hyperverse takes over the role of Culture.
- The "Creation-Generator" of the Hyperverse unites the two most important streams:
 - the Teenagers and the Young-Adults
 - the Nagualization of the I / Identity (2nd Defluence)
 - the Nagualization of the Mind-Cards / Dispositives
 - the Pioneers of Woke
 - the Creation of a powerful We-ness
 - the creative and collaborative Shaping of the Rhizome-Sphere

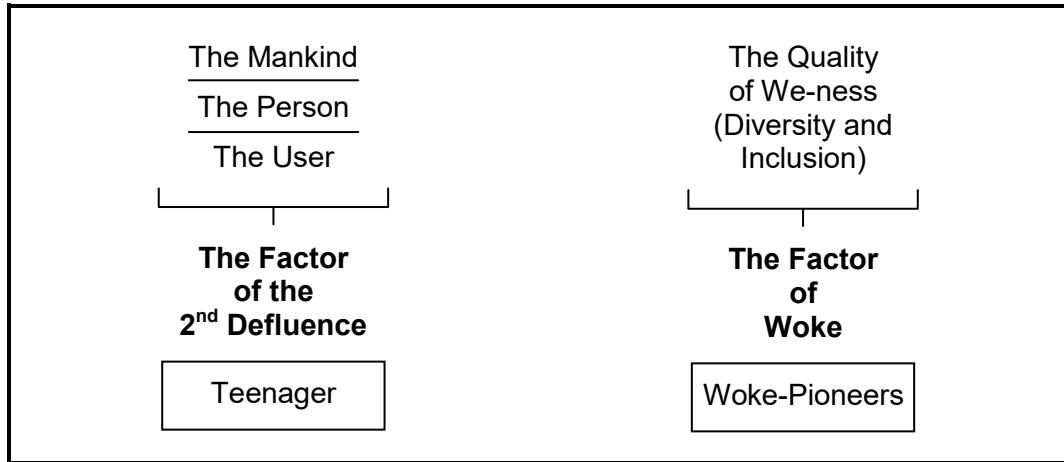

With this we recognize that we will get a shift in our Programming of Consciousness: from FBT / 1 to FBC / 2. As a sketch to this:

What are the consequences of this shift?

1. The factor "Consciousness" is shifting: It is leaving the field of epiphenomena. And it is becoming a significant Creation factor.
2. People, users and the quality of their "using" are becoming increasingly more important than smart knowledge. In correlation with this, also the Intensity and the Coherence of the We-ness.

As a sketch:

Franck: Interposed question: Who is fighting Consciousness? I don't see anyone there.

Keno: Yes, there is: for example, the EU with its "Digital Acts". So, the regulators of GAFAM, who talk about "hate" and "free competition", but secretly want to prevent the contingent Self-Creation of Consciousness:

Consciousness shall abide by the rules of the 1st Reality-Generator.

The mind is to remain unfree.

The consequence of this is that those Future-Creation strategies which exclude (or fight against) the factor of Consciousness will become increasingly harmful for Society, for Democracy and for Mankind.

There is a third consequence:

3. The epoch is coming to an end in which almost exclusively the latest technical-Technologies could positively improve our Consciousness and our Culture ... and thus also our Future.

The formula "progress is caused by the Innovations of technical-Technologies" fails in its exclusiveness.

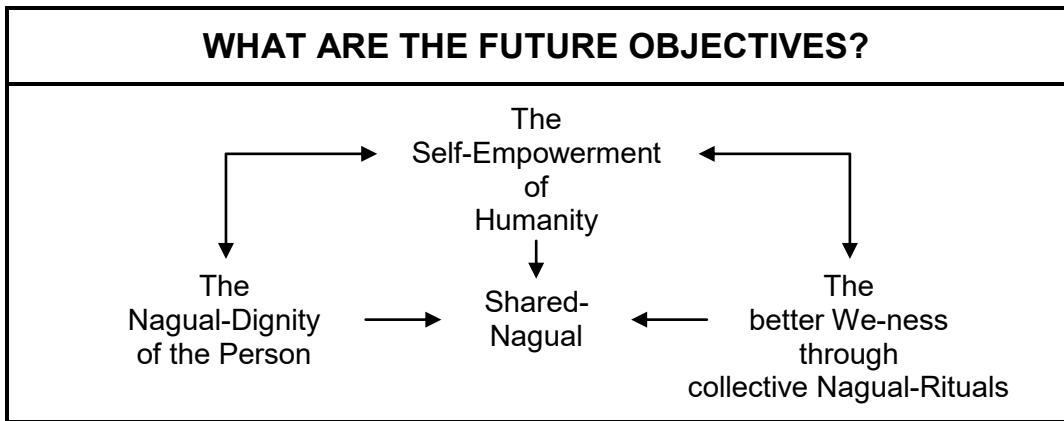

Why? The Epoch of Co-Evolution ahead of us needs the integration of Noetic into societal acting, e.g.:

- the conscious Self-Empowerment of Humanity (i.e., the completion of the stuck secularization)
- the Strengthening of the Nagual-Dignity of the

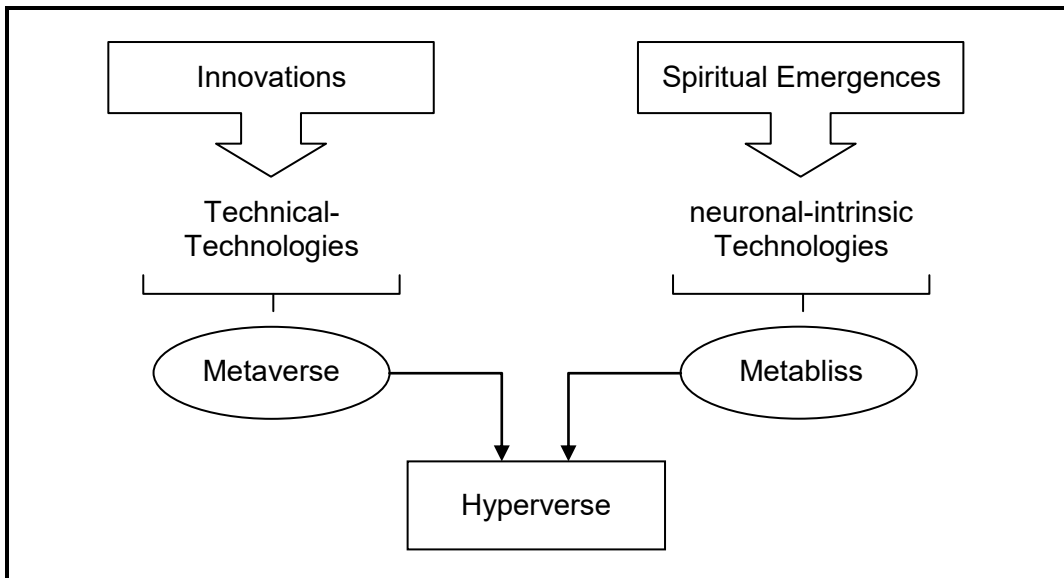

Individual (which will, among other things, generate an important readiness for self-responsibility)

- the Establishment and Cultivation of the We-ness (Unification) through the common (collective) Ritualization of the Nagual ... with the objective of the " Shared-Nagual " (keyword: " the Eternal-Source-of-Better ").

If one wants to summarize this in brief keywords, one gets the following picture:

None of these 3 Objectives can be achieved by technical-Technologies alone with their Innovations. That's why we need the following Duo:

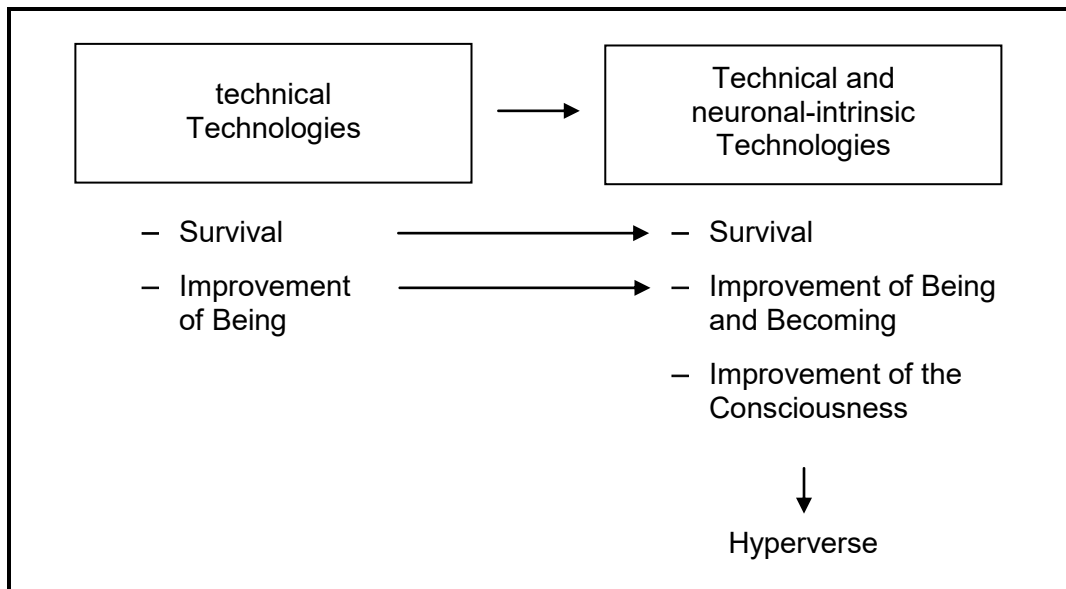

From the invention of the wheel (ca. 3,600 years B.C.) to letterpress printing to digitality (Internet) ... it has always been technical-Technologies that have advanced us as Humanity ... in the context of FBT

All these technical technologies were primarily extrinsically focused, i.e.,

they were all about the two basic programs:

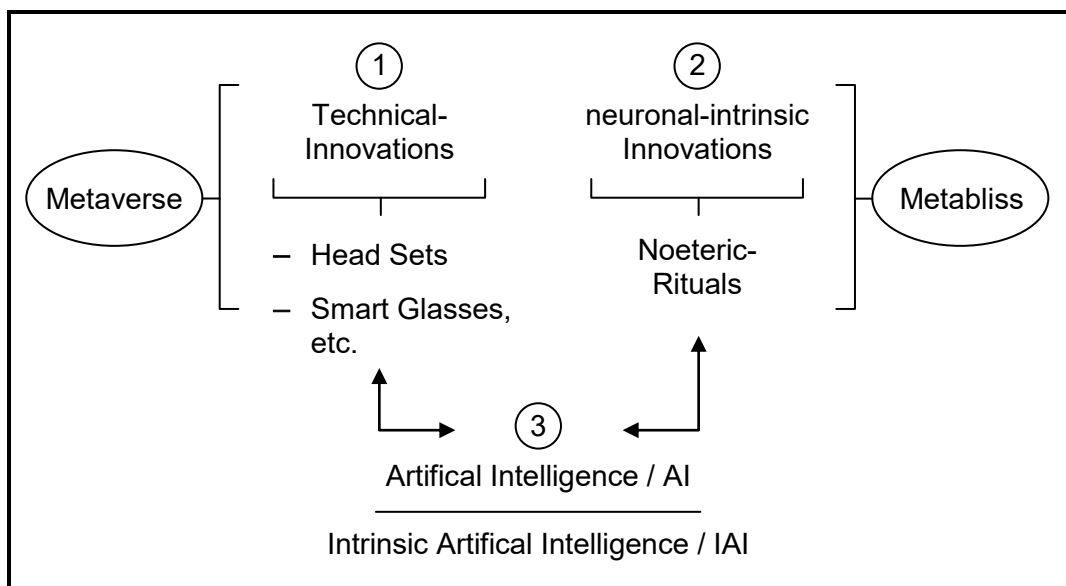

- Survival
- Improvement of Being

If now the programs shift, respectively expand towards Becoming (Creation), one also needs an expansion in the system " Technology". As a sketch for this:

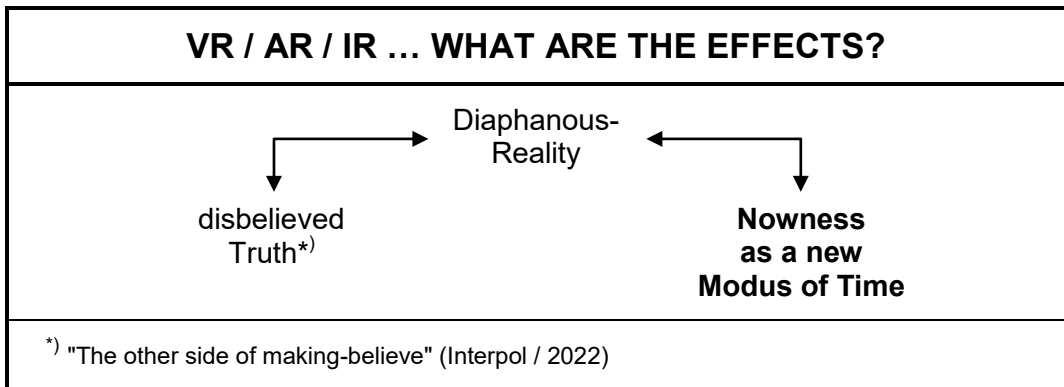

Franck: How do you classify Mark Zuckerberg's Metaverse in this context? For me, VR and AR ... i.e., headsets and smart glasses ... are purely technical-Technologies ... in other words, far away from neural-intrinsic Technologies.

Keno: Yes, superficially it looks like that. But in my perspective, i.e., in the Hyperversive ... three sectors are collaborating here:

The sector of ① ... i.e., VR / AR and Immersive Reality (IR) ... in combination with AI creates what is called "Reality-Mix". That is, the increasing fusion of real reality and simulated reality. This leads to a completely new, so to speak shamanic-magical Diaphaneity of our Reality.

And at the same time, it leads the Mind to the disbelief of its own dogmas of Truth. And ... this is what Mark Zuckerberg pointed out in an interview with Lex Fridman ... that the "trips" through different experiential spaces will primarily establish a new sense of time ... and that is Nowness ... fluctuating Nowness. As a sketch:

Franck: So, from your point of view ... they are technical Innovations. But they will generate very significant Changes in the Mind and in our Consciousness. Is that your expectation?

Keno: Yes, when these mental changes generated by the Metaverse combine with the neuronal-intrinsic effects of Metabliss, what we are discussing at length become possible:

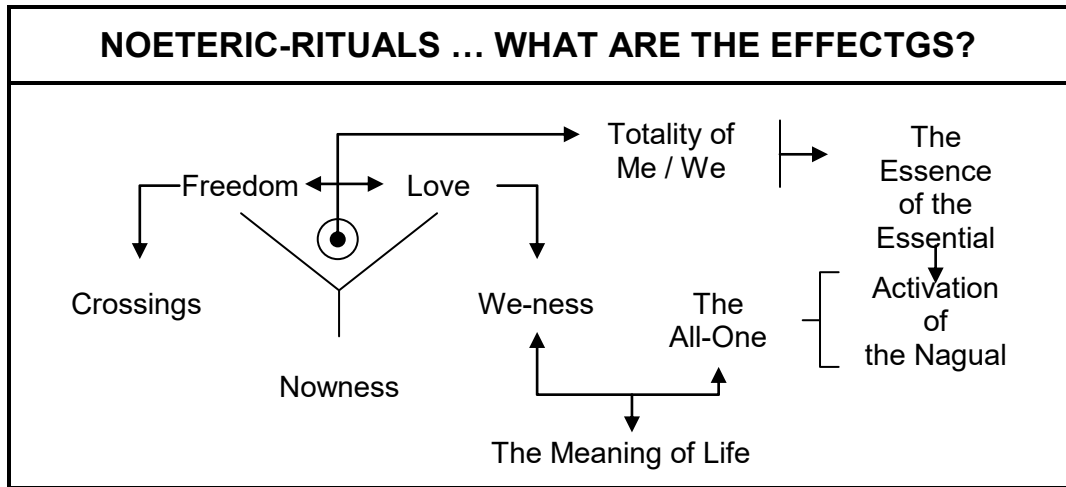

**The Nagual becomes
the Substance of our I
and our Consciousness.**

**We secularize the
Now-of-Creation in our Lives.**

This is the basis for the Initiation and Transition into the 2nd Axial-Age.

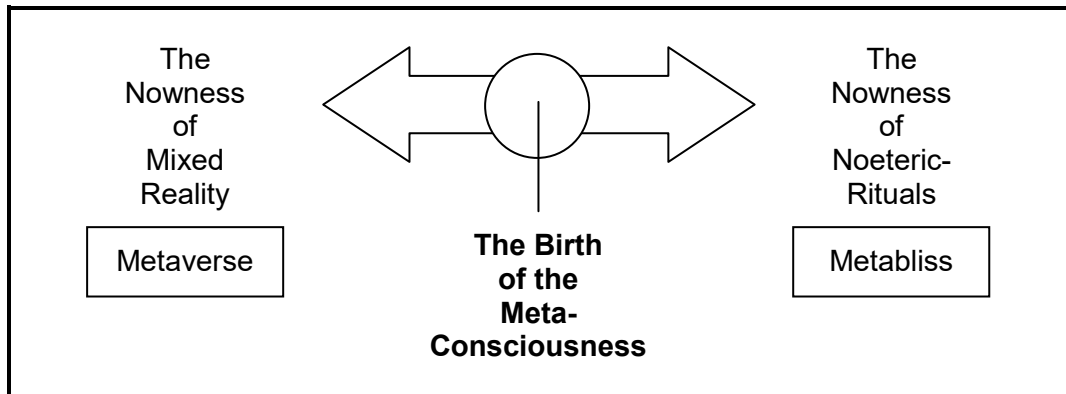

Franck: Let me ask you again: What do the Noetic-Rituals of Metabliss accomplish?

Keno: Let me answer with the following sketch:

Franck: Interesting aspect. According to this, the novel Time-Mode of the Nowness is the connector between Real-Reality and VR / AR / IR with Noeteric, right?

Keno: Yes, again as a sketch:

Franck: This, of course, provokes the following question: If there were not this fusion of the two Nows, would the Birth of the Meta-Consciousness in our Mind be an Impossibility?

Keno: From my point of view yes.

My theses about it:

- The Nowness of Metaverse changes very profoundly our relation between the outer, i.e., observable Reality and the Constructions (Icons) of our inner Reality. That is:

**We become
capable of experiencing
and instrumentalizing ourselves**

**as Constructors of
different Realities.**

**This makes our
Mind more potent.**

- The Nowness of Metabliss connects us, as indicated in the sketch above, with the Essence of the Essential.

This kind of Nowness thereby reaches beyond our personal Realities and connects us as Constructors of Realities with a completely different Reality, namely that which is, because it is in everything ... that is the

All-One.

Franck: The All-One? I see ... now it's getting abstract again! But go ahead.

Thank you for the concession. So, I'll start:

The Essence of the Essential is not Cognition ("Truth"). And also, not Fitness. These two dimensions, belonging to "FBT" of Hoffman, are typical of the 1st Axial-Age and are operationalized by the 1st Reality-Generator.

The Essence of the Essential is the meaning for every Life lived by a Human Being. And it is "the raw material" or the central substance for

the Happy-I.

The Essence of the Essential can lead our Consciousness to a higher Level of Reality ... to a Quality of Reality that is at the Center of our

Meta-Consciousness

and which is at the same time the Source

- for better Future-Intelligence.
- Inclusive-Fitness

Franck: So, what does this Essence of the Essential consist of?

Keno: The answer is actually expectable and simple:

**The All-Presence
of the Nagual**

**is the Essence
of the Essential.**

Everything that was and everything that is and everything that could become is this All-Presence of the Nagual... it is

Franck: Hm. And what follows from this?

Keno: A number of things:

- If everything is Nagual, then our current Mind of Duality (our Subject-Object Separation) is incapable of truly understanding us as Humanity. Meaning:
 - We have a false, because limited Reality of Being Human in our Consciousness.
 - We cannot develop an intense and productive We-ness because we do not experience ourselves as the All-One.
 - We cannot recognize the Importance of Interfusion because we do not (yet) have a Relationship with the All-One:

**We are spiritually alone.
We think alone.
We decide alone.
We act alone.**

The Meaning and Function of Interfusion (i.e., "Diversity for better Inclusion") can only be recognized when we are no longer spiritually alone.

- We search for that Reality which, in the context of FBT ("Fitness for better Truth"), should lead us to a better Life in a better Future.

However, through the strategies of FBT, we marginalize the All-Presence of the Nagual within us:

- Because we are not a Nagual, we cannot find the Nagual that is standing ready to co-create the common Nagual with us (Shared-Nagual).

- Thus, we do not find the way to the " Eternal Source of the Better ":

What we organize as "the Better" is too often a random hit of logic.

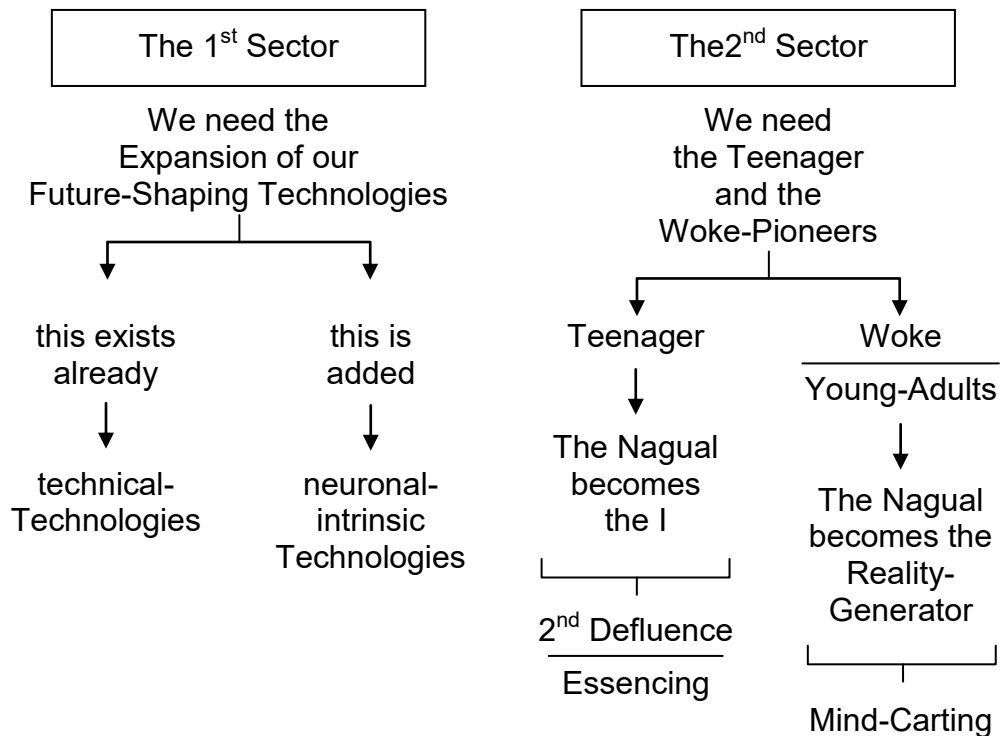

We live below our Level.

Franck: Assuming that all this were the case ... then the following question immediately arises:

As being part of the All-Nagual, what should we do to become a conscious part-owner of this All-Nagual?

Keno: Yes, very good question ... absolutely spot on!

I will try to answer it. My answer has two sectors:

Franck: The 1st Sector is Metaverse? Is that your statement?

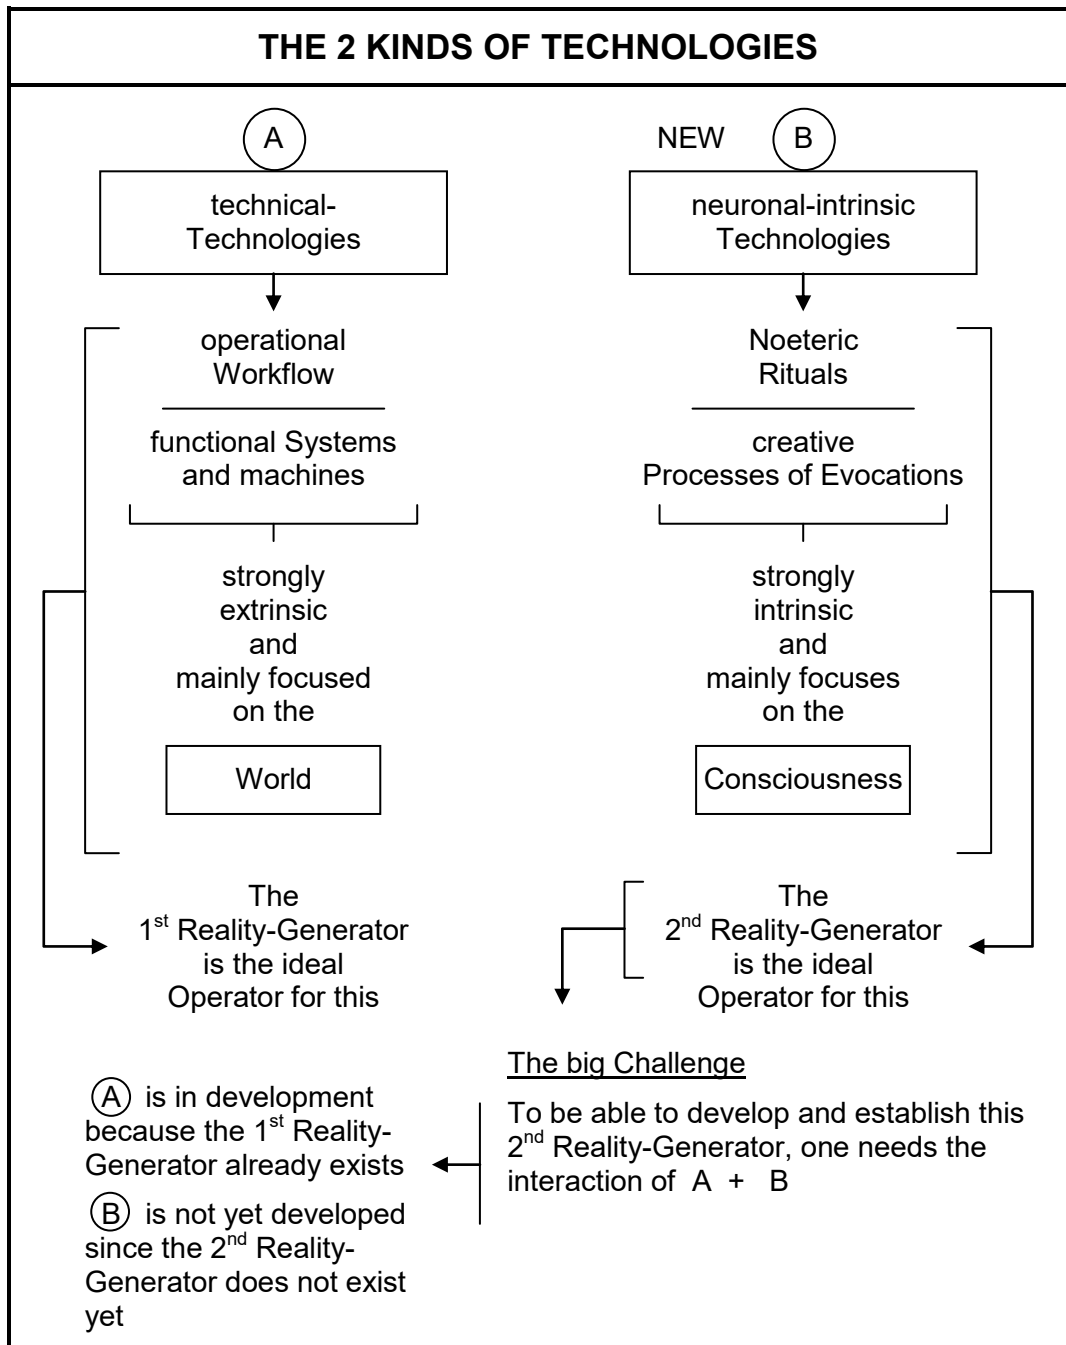

Keno: Slightly different. We should not exclude the new Category of neuronal-intrinsic Technologies. That's Metabliss. The existing technical-Technology ... that's Metaverse ... specifically VR / AR and IR ... headsets, smart glasses, avatars, Internet 3.0, etc. ... all of which we

need. This is the basis, so to speak, if we want to complete a Nagualization of our I and our World.

Conclusion: The 1st Sector needs both pillars ... Metaverse and Metabliss in a permanent interaction

Franck: Well, this has become clear now ...

Keno: ... but let's look at another overview that explains some differences between both technologies:

Franck: Oh, that's an interesting point. Basically, what is described here is what is known as "pulling oneself out of the swamp" (the Munchausen syndrome).

Actually, only the 2nd Reality-Generator can develop the novel neuronal-intrinsic Technology and make it functional. Actually, only the 2nd Reality-Generator can develop the novel neural-intrinsic Technology and make it functional. But we do not have this 2nd Reality-Generator yet. We have to develop it first. And for this we need the Nagual-Consciousness, which we do not have at present yet.

Keno: We are spinning in a circle.

Franck: Yes, what to do?

Keno: Integrate our Metabliss system into the Metaverse that Mark Zuckerberg is developing.

Franck: But that only makes sense if the system you call Metabliss already carries the potencies of the 2nd Reality-Generator. And now one can really not assume this, because ... so your argumentation ... only the cooperation of Metaverse and Metabliss ...

Keno: ... in the system of Metaverse ...

Franck: ... can develop this 2nd Reality-Generator and bring it to the unfolding. Do you understand my doubts there?

Keno: Yes, absolutely. To resolve these doubts, we can work with the following model:

- The system of Metabliss contains all the Spiritual and ritual "ingredients" necessary for the 2nd Reality-Generator and for building a Meta-Consciousness.
- When users use this system ... combined with the effects of Metaverse ... successively those mental, intrinsic and neuronal elements and functional patterns (i.e., pre-stages for Mind-Cards) emerge, which the users will need to develop the 2nd Reality-Generator.

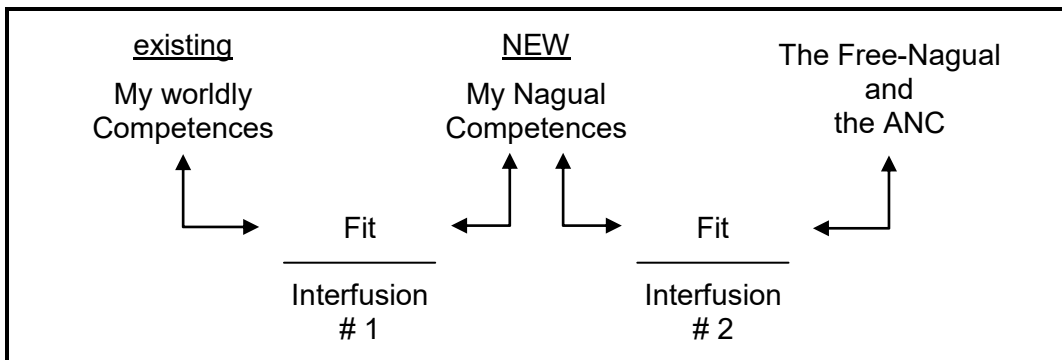

Franck: The users ultimately create ... autonomously and self-determined ... their own versions of the 2nd Reality-Generator, personalized, so to speak. Is that your concept?

Keno: Yes, absolutely. The 2nd Reality-Generator is not a message. It is not a ready-made meal. So, it is not the result of a communication process ... with staged content (as in training or coaching programs, for example).

This means ... and this is of great importance:

- The worldly I and the 1st Reality-Generator are the operators of those Noetic- Rituals that build up the Nagual-I and the Nagual 2nd Reality-Generator.
- This creates an optimal Fit between the existing (which is worldly) and the new (which is Nagual).
- This fit is important for the Processes of Interfusion.

For this Purpose, the following sketch:

Franck: Yes, I already know that argument from you:

**Co-Evolution is
the Interaction of
2 Types of Interfusions.**

Keno: That's right.

Franck: One question remains: Why does your system "Metabliss" have all the necessary components for the construction of the 2nd Reality-Generator and the Meta-Consciousness?

Keno: Quite simply. I personally did not perform the 1st Defluence in my childhood, i.e., I was born as a Nagual-Person (like all humans) and remained this conscious Nagual- Person forever.

Equipped with this Nagual-Consciousness, I then sought and found two Spiritual teachers when I turned 20. One was focused on Asian methods ...

Franck: ... Meditation? ...

Keno: ... yes, and yoga, i.e., all those methods that are supposed to lead the I into the absolute emptiness of being.

Franck: I am curious. Did it work?

Keno: If you are referring to Samadhi and Nirvana ... yes, that happened.

Franck: Great.

Keno: No, useless for Evolution and Co-Evolution. Absolutely useless. Wrong Methods. Wrong paths. Empty-Being. But not becoming happy.

The other teacher was quite different. He was focused on "Draw a Distinction." So, "Produce that growing Overabundance of Life that leads you to the Core of Life ... to the Core of Becoming."

That was great.

Then on that basis I worked with a shaman until my early 40s, backed up by workshops with monks from Tibet.

All in all: When we started in 1990 with our Neuro-Lab "Mind-Design" ... which as you know developed and tested the methodological basis for the "Metabliss" ..., there was actually quite a lot there that was needed for the Noetic-Rituals.

Franck: A small question: What did you learn from the shaman?

Keno: The Nagual. Experiencing, using and enjoying the Nagual in mundane everyday Life. The Nagualization of Life through the All-One, which is alive as Nagual in one's own I.

To come back to our actual topic: The system "Metabliss" contains the Nagual Experiences of a whole Life, applied, tested and made mundanely practicable by the Participants in our Neuro-Lab, which exists for some 30 years ... until today.

Let us go further. We have analyzed the 1st sector so far, that is, the question of technologies. Let's now move on to the 2nd sector. That is, the question of what we can learn from the Teenagers and the Woke-Pioneers, or adopt as impulses.

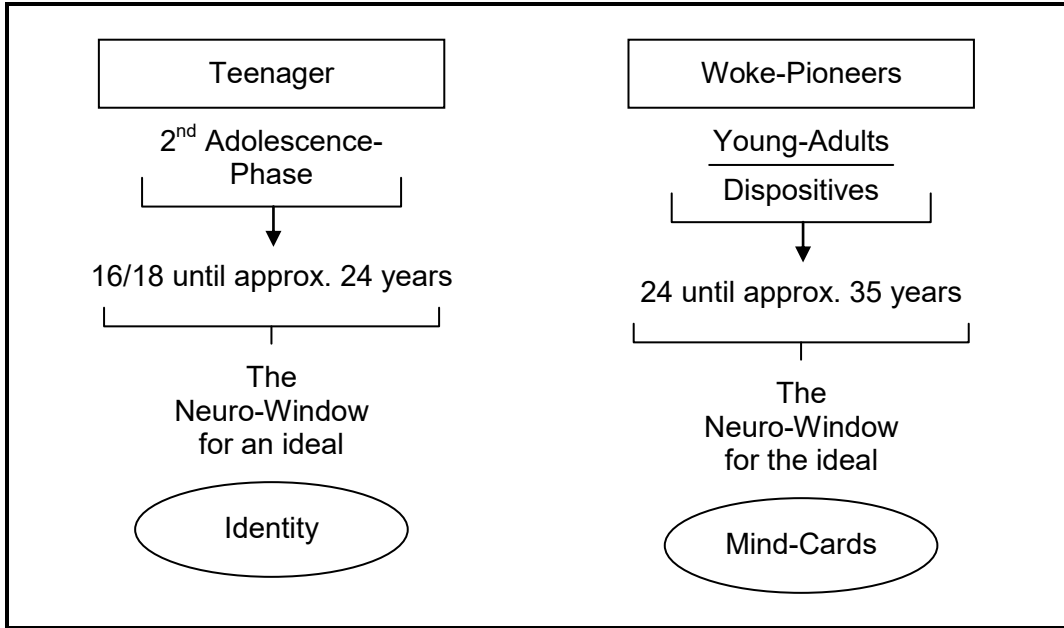

Franck: Agreed.

Keno: From the Teenagers we get the impulse to develop a Nagual-I. Thus the 2nd Defluence as a complement to the 1st Defluence.

From the Woke-Pioneers we get the impulse to transfer those Values into Mind-Cards, which we can condense into a Nagual Mind-System.

Franck: What will be the 2nd Reality-Generator then ...

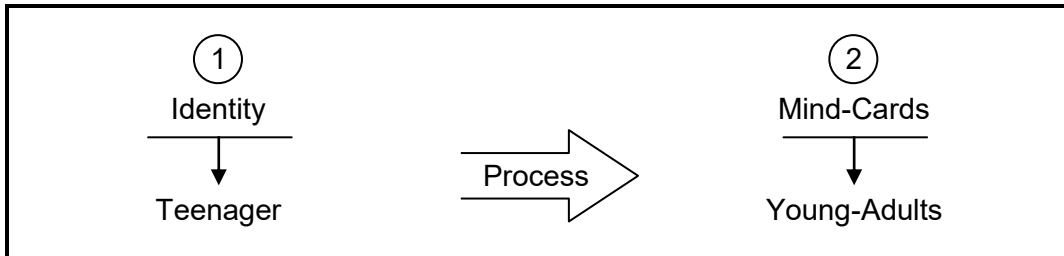

Keno: ... yes. As a sketch:

Franck: On the subject of "Neuro-Windows". Are they neuronally fixed in time in such a consequent way?

Keno: Yes. Neuroscientists have been able to measure this quite reliably.

As far as Nagualization is concerned, there are two neuronal Time-Windows:

This leads us to two statements in relation to the Metaverse:

- If the Metaverse cannot adequately "serve" these two neuronal Time-Windows, it will not be able to initiate a new Epoch ... the Epoch of Co-Evolution.

- If the Metaverse does not co-create, promote and accompany the process between ① Identity and ② Mind-Cards ritually, it will not be able to develop and "hold"

the Monopoly of the Better.

That means: The "Monopoly of the Better" ... which is a systemic Monopoly ... can only be built up by that Company, which can spiritually enable our Society and Democracy ...to enter into the daily Practice of Co-Evolution. Motto:

No Co-Evolution ... no Monopoly.

Franck: A question that has been buzzing in my head for quite some time: Why is what you call " Co-Evolution" actually so important for you?

Keno: Without Co-Evolution there is no 2nd Axial-Age. Without Co-Evolution there is no Society-of-Creation. Without Co-Evolution there is no "New Spirit of Democracy". Without Co-Evolution there is no Inclusive-Fitness.

When this question comes up in my workshops, we discuss the following text:

**Without broad, daily and collectively
organized Co-Evolution, our Present and
our Future will increasingly turn
into a Presence of
Crisis, Conflicts and Disasters.**

30 years of wrong environmental-, nature- and energy-politics. 20 years of wrong cultural policy and wrong care for the Dignity of people. 20 years of wrong policies in the sector of STE (Science / Technology / Economy) ... so 20 to 30 years of fireworks of decisions and actions that have caused today's crises, conflicts and disasters because of the Lack of Meta-Consciousness.

Conclusion:

**We urgently need
that higher Consciousness
that unites us with
the Intelligence
and Wisdom of the Nagual.**
