HYPERVERSE

WHO GETS THE MONOPOLY OF THE BETTER?

Keno Oneo in Conversation with Jochen Franck

Franck: As I read through the written transcript of our last conversation, the following question kept popping into my head: Couldn't it be that you're misinterpreting Mark Zuckerberg's "Metaverse" mission? He wants to modernize his company META to keep his profit business. You, on the other hand, see major and important breakthroughs in the "Spirit of Democracy" and the transformation of the current "Society-of-Coercion" into a "Society-of-Creation" whose values are based on Co-Evolution.

Keno: My understanding of your question is this: Mark Zuckerberg does the usual profit management. And my interpretations of Metaverse are illusionistic daydreams. And especially my concept of "Hyperverse" is pure idealism. Like that?

Franck: Yes, something like that. Sorry!

Keno: Well, let's analyze this. I'll start with a very general statement:

If Mark Zuckerberg manages
to establish the Hyperverse,
he deserves the Nobel Peace Prize.

Franck: Yes, I already know this thesis from you. Can you briefly summarize why that should be the case?

Keno: Gladly:

- If we want to create a worldly reality that is significantly better than our world today, it is not enough to try to solve the current problems.

- A significant improvement of our now-world will only be possible if we become capable of positively shaping the more distant futures as early as possible.

- With our current Future-Intelligence, we cannot shape the more distant (i.e., in principle unplannable) futures. These futures can only be shaped as positive Emergences.

- In order to be able to shape these positive Emergences, we will have to evolve spiritually:

from Evolution to Co-Evolution.

Co-Evolution means that the human mind is in a permanent Cooperation with the Now-of-Creation (Nagual).

- The consequence of this:

A - The I must become a Nagual-I.

B - The Mind must become a Nagual-Mind.

- For Ⓐ (Nagual-I) one needs the 2nd Defluence ... accomplished by the Teenagers in the 2nd phase of the puberty.

- For Ⓑ (Nagual-Mind) one needs a Mind-Carting, which enables the person to evoke Emergences. The content for this is the values of Woke:

Better Diversity
for better Inclusion.

- Co-Evolution is thus based on the establishment of a Nagual-I in all coming generations of Teenagers.

- And Co-Evolution is at the same time based on the integration of the Woke-Values in a new kind of 2nd Reality-Generator, which is placed in the Mind ... in the Mind of all Young-Adults.

- Thus, it is about to mentally-neuronally uniting Teenagers and Young-Adults with the Nagual . It is about the

Nagualization of
the "Chain of all Generations".

- Accordingly, as Humanity and as a society, we need a system that brings as many people as possible into this "Chain of all Generations".

- The combination of Metaverse (Reality-Mix) and Metabliss (Noeteric-Rituals) ... i.e., the establishment of Hyperverse ... is able to realize this objective of a comprehensive Nagualization.

- If Hyperverse succeeds, Co-Evolution becomes the cause for making our world better.

  For this there should be the Nobel Peace Prize.

Franck: The Nobel Peace Prize for "making the world a better place"? Is that logical?

Keno: Yes, the motto is "Better by Co-Evolution". And when Co-Evolution becomes the everyday practice of nations and societies, the occasions for conflicts and wars decrease drastically ... and stably:

Peace
gets
a better future.

Franck: Fine, understood. In this context, you have emphasized several times that our society's path to Co-Evolution depends on us addressing the I-Ambitions of Teenagers ...

Keno: ... Keyword: Crossing Initiation …

Franck: ...and the values of the Woke-Movement. In this context, my next question is: What exactly do you mean by the Woke-Motto "Better Diversity for better Inclusion"?

Keno: I'm glad you asked that. Let's take some time to thoroughly analyze this.

Franck: Agreed.

Keno: So, let's get started:

- We live in an epoch of civilization in which the hierarchization of knowledge largely generates and reinforces social hierarchizations as well:

  "better-knowing is at the top."

- The inner engine of our progress consists of Innovation, produced by Differentiation:

  "Draw a Distinction."

- When Besser-Wissen combines with the mental methodology of Differentiation, a society inevitably emerges that ... according to Peter Sloterdijk ...

commits the Spirit of society to the practice of a "suppressive co-existence of nature, culture and man." This means:

The methodology of Differentiation ... which in principle is neutral ... becomes the cultural instrument of exclusion and submission (Society-of-Coercion).

- Since our society is highly dependent on Innovation (= realized Differentiation), the evolutive counterpart of Differentiation ... i.e., Unification ... is automatically excluded from shaping the future (Democracy, among other things) and shifted to the "purely private". This means:

For the evolutive factor of Unification (Inclusion) there is no official and relevant future-function in our society.

- In short: In our Society, Unification is not an instrument for making our reality better.

- Creation (according to the quantum physicist Herbert Pietschmann), however, is based in principle on the interaction of Differentiation and Unification. There is a productive interfusion between these two factors in Creation.

  That means: Each factor helps the other factor to improve.

- If a society now sets out to learn and practice Co-Evolution, then this society will have to evolve as far as possible into a Society-of-Creation. Motto:

- Co-Evolution succeeds when Humanity acts as Creation with the Now-of-Creation (Nagual) in a permanent cooperation.

- The question is therefore, how can we transform our society into a

Society-of-Creation?

The currently dominating top-down culture of our "Society-of-Coercion" will not want and certainly not promote this development. A society that has made the factor of Differentiation the core instrument of a "Suppressive-Mind" will do little if anything on its own to develop a novel balance (interfusion) between Differentiation and Unification.

- "Better Diversity for Better Inclusion." That's the next stage. If this is to become a social Reality, we will need the Woke-Values.

Franck: So, it is about values. From my point of view, the epoch of modernity has produced a clear secularization of formerly religious values ...

Keno: ... what values are you thinking of? ...

Franck: ... e.g., Christian values such as "charity, solidarity and helpfulness" ... from my point of view, these are now generally accepted values in our society. What is the point of Woke?

Keno: Yes, modernity, which we have today, is based, among other things, on secularized values. But: Despite their social-cultural anchoring, these values are ultimately only "private values", i.e., intrinsic regulators for the individual sense of life and the personal happiness in life.

We may have socially canonized these values, but we have not ... consciously not ... made them a prerequisite for our current "Fitness beats Truth" strategy.

We shape our futures through the following schema:

Differentiations
create Innovations.

Innovations
are the guarantee
for our progress.

Our progress
is our Fitness
for survival.

This is the credo of modernity. Our epoch uses the mental techniques of Differentiation (Diversity) for the shaping and improvement of our Evolution.

But our modernity does not use the mental techniques of Unification (Inclusion) ... not for our Evolution:

Unification has no official function in our concept of progress.

Behind this is the following belief: Unification can produce contentment, security and possibly happiness ... but Unification is not a productive factor when it comes to organizing progress. Unification exists ... but it runs on a different track.

This functional exclusion of Unification does not fit the coming Epoch of Co-Evolution. Why not?

Because Co-Evolution only works when one spiritually cooperates with Creation. And Creation is ... as Herbert Pietschmann has analyzed ... the Simultaneity and alternating Effectiveness of Differentiation and Unification.

Franck: So, you are assuming that we will be forced to integrate the Unification factor into our concept of progress if we want to do Co-Evolution.

As you know, I very clearly support the trend toward Co-Evolution. But I could certainly imagine concepts that work without this Unification factor.

Keno: Which ones?

Franck: Better education. More science. Better education in intelligence, or better thinking strategies, presumably linked to the coming Artifical Intelligence (AI).

Keno: Yes, I encounter this line of reasoning quite often. But in the end, it's all just a continuation of the previous formula "Fitness by Knowledge".

Franck: And is there anything wrong with that?

Keno: This concept sticks to Innovation without making the breakthrough to Emergence ... thus blocking the Creation of the better today through the positive Creation of Future 2 / 3.

This concept unfortunately also sticks to the belief: "Only progress organizes our survival."

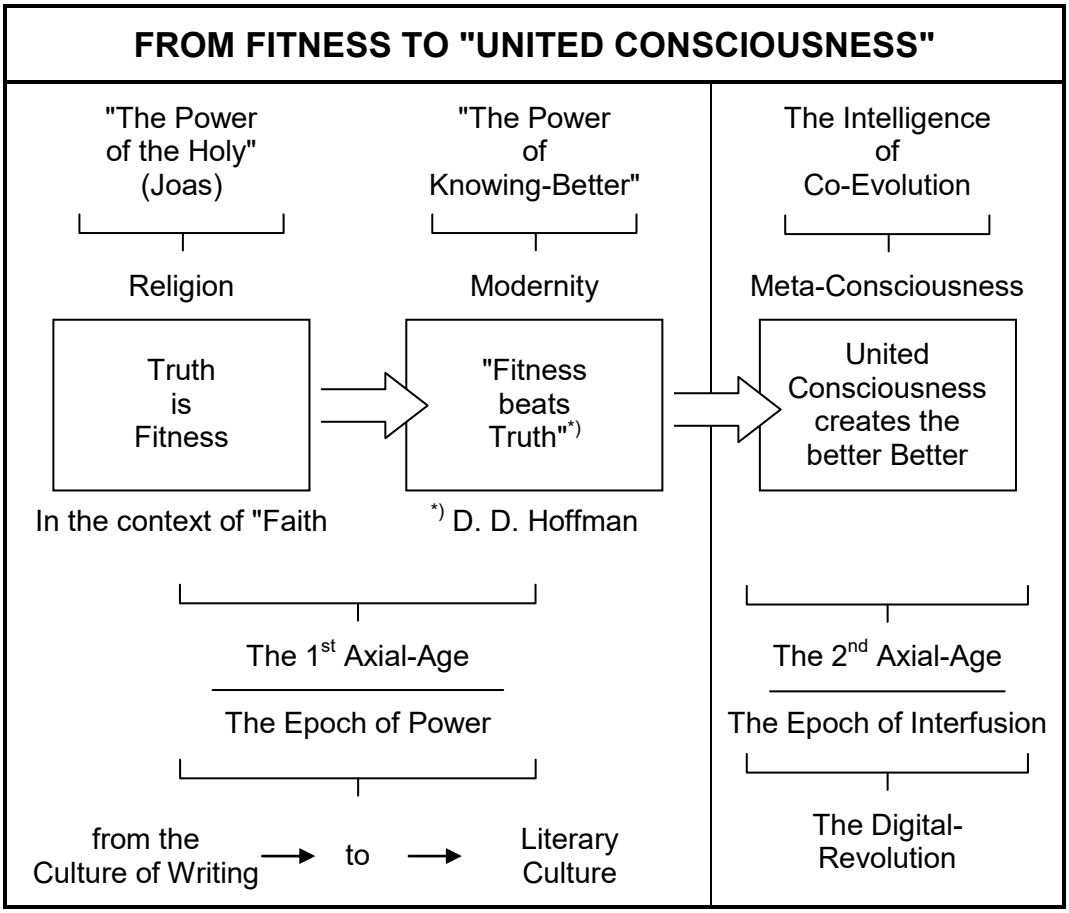
Franck: I see absolutely nothing wrong with that.

Keno: No, there's nothing wrong with it. However, it is inefficient in terms of making our Consciousness better (keyword: Meta-Consciousness).

We need a special Consciousness for exploiting the factor " Consciousness":

Co-Evolution is Consciousness-Cooperation.

We as Humanity are moving from "Truth" as religious belief (Faith) to "Fitness" through knowledge to the "United Consciousness" factor. This is our journey. And the Woke-Values, among others, are an important input for the coming strategy of Consciousness-Cooperation. Let me share an overview on this:



As for the Woke-Values: There will be no Epoch of Interfusion without the Functionalization of Unification. There will be no "Consciousness-Cooperation" without the Woke-Strategy, which is focused on the fact that the growing Diversity (Differentiation) leads to a growing Inclusion (Unification), as well as vice versa:

We need the
Spiritual Power of Unification (= Courage)
to improve the Quality of our Differentiations.

Franck: This is a strange statement: you really believe that Unification ...

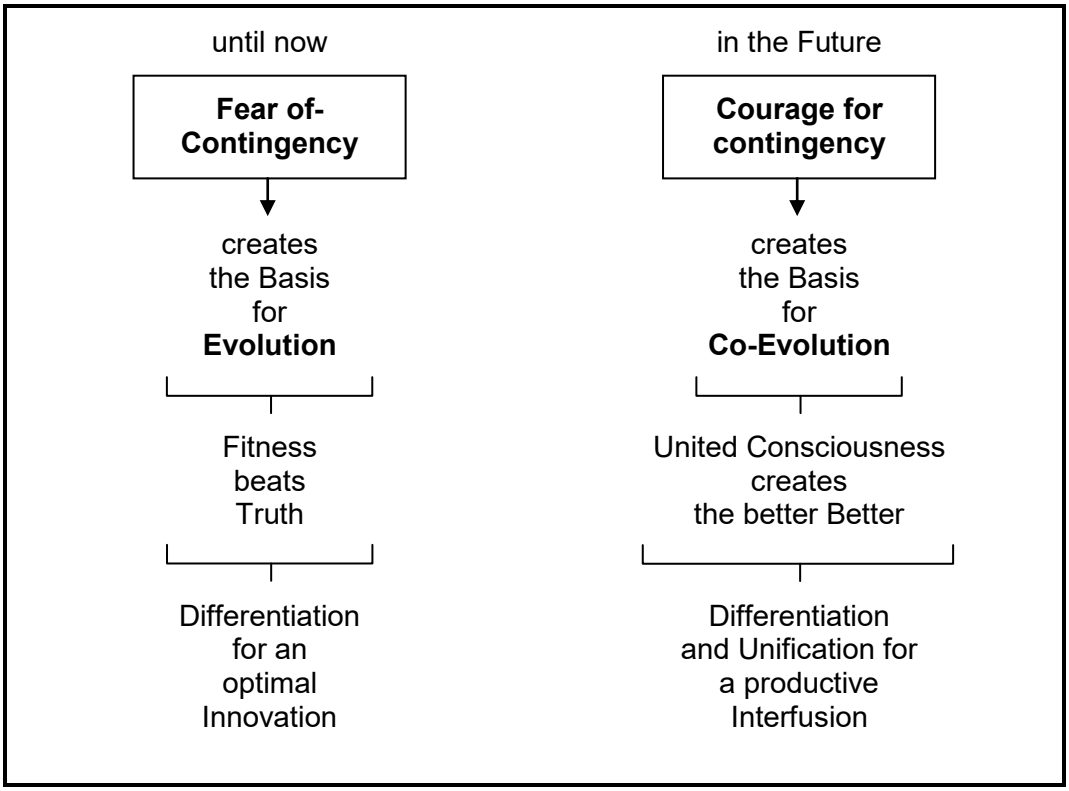
Keno: ... an intense Unification ...

Franck: ... that provides a Society with the Energy of Courage ...

Keno: yes, with the

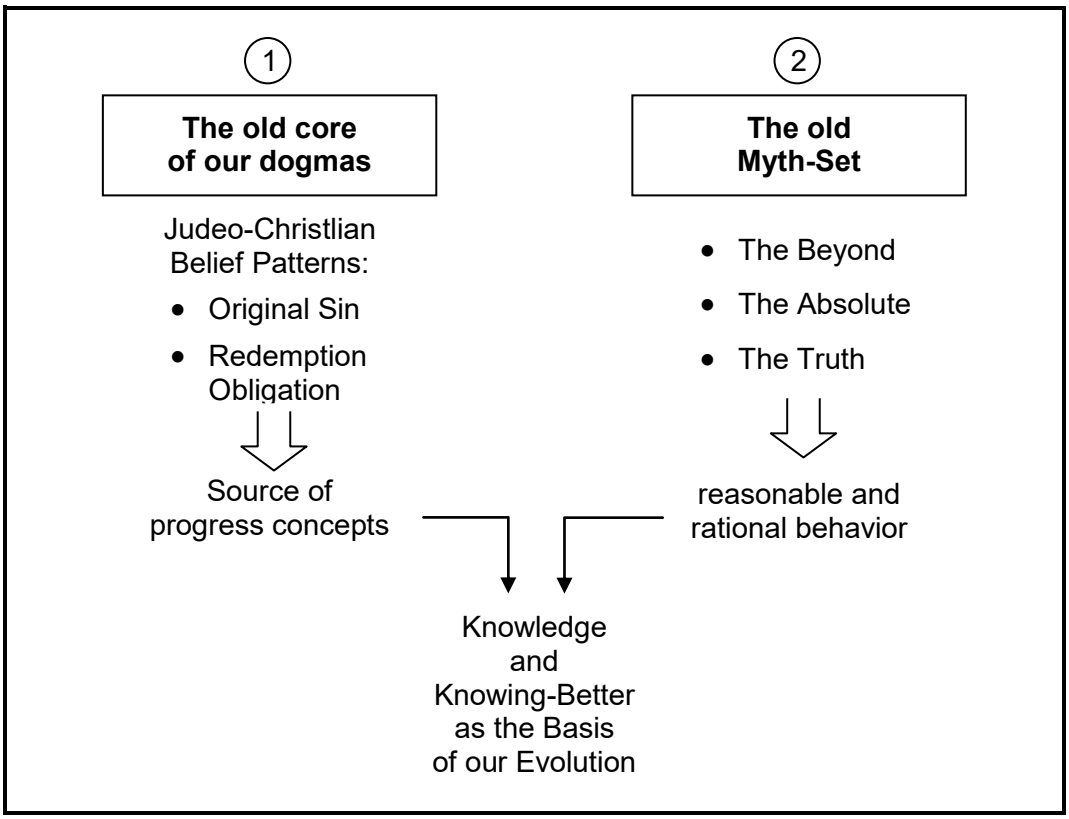
Courage
for Contingency.

So, we get the following picture here:



Here is an aspect that very rarely comes up for discussion: the Fitness strategy of modernity looks very cognitive-rational.

But if one looks more closely, one can see that the Fitness of modernity is built, as one would expect, on the biological program of survival, but equally on two cultural domains that are old and now increasingly useless:



So, the Fitness model of modernity is not that insanely "modern." And building on that, one can say:

The Woke-Movement
will reactivate
the stuck Secularization
in our Society again.

Franck: You mean the dissolution of the old dogmas and the old set of myths just described?

Keno: Yes, our strategies of progress, Innovation, ratio-reason and Evolution carry the "legacy" of religious belief-patterns and myths. What is special about it is the fact that these Spiritual "legacies" help to shape and favor the one-sided (dominant) conception of Differentiation we are discussing. In other words:

**The exclusion of the
factor of "Unification" from
the concept of progress
is supported and rationalized
by old and ineffectual
belief patterns and myths.**

It is to be expected that the Woke-Movement ... if successful ... will develop a new basis for our concept of progress:

**The basis of our progress
is the We-ness that we create
and cultivate through Unification.**

Franck: So, a conscious integration of Unification into our strategies of future improvement.

Keno: Maybe it is a re-integration. If one follows LeDoux, the evolutive progress of mankind began quite fundamentally with a strong We-ness and a carefully (ritually) cultivated communality.

Franck: And that is why you locate the factor " We-ness through Unification" in the energy field of "Courage for Contingency"?

Keno: Yes, and that's why it is so problematic and harmful when the Western-oriented Democracies develop more and more in the direction of value-conflicts and divisions ... thus the opposite of We-ness.

Franck: But ... don't you see that it is mainly the Woke activists who are dividing our society: from Cancel Culture to liberated sexual Identity. The majority of citizens are against it. That's why conflicts and division. The Woke activists are fighting the cultural sanity of our established values.

Keno: Yes, on the surface it looks like the Woke activists are turning our societies into societies of strife.

But from a more distant perspective, a different picture emerges.

Franck: By all means, please continue the discussion.

Keno: Yes, with pleasure. The following statements:

1. The ANC (autonoetic Consciousness) has been activated (in part by our crises) and is becoming more influential in the collective Consciousness of nations and cultures.

   This ANC is that (so far largely suppressed) Consciousness which wants to help our human Consciousness to find the way to Co-Evolution. The ANC is a mediating Consciousness.

2. The Woke-Pioneers do nothing else than to secularize this ANC. They are beginning to socialize the ANC. This makes Co-Evolution virulent as a longing and a goal.

   This creates a conflictual tension in society:

   – An opposition to Woke and Co-Evolution builds up.

   – The opponents against Co-Evolution exist in two groupings:

     A - <u>The further developers of modernity.</u>

     They want more reason and more progress through more mental Fitness. This grouping combines elitist better knowing with securing privileges and status. For them, Co-Evolution is a loss of power. The Bottom-Up Dynamic of a "Society-of-Creation" is fought by them Top-Down and intellectually.

     The group accepts many aspects of Woke for tactical reasons:
     One publicly accompanies the progress of Woke in order to essentially basically defuse and help shape the Woke-Values.

B - <u>The Rewinders of Modernity</u>

They cultivate a longing for revision: Progress through return and partly through the reactivation of the old dogma core and the old myth set.

For them, disappointment with evolutive reality (growing complexity, acceleration and contingency) is combined as an experienced permanent crisis with a force of negativity.

For this grouping, Woke is often identical with "decadence."

Grouping Ⓑ wants Woke to disappear (the goal is defeat). Grouping Ⓐ seeks to incorporate Woke in such a way that Woke strengthens A's position (the goal is fatal embrace).

Basically, however, both A and B are opponents of Woke. Both groups do not want Co-Evolution. Nor do they want a "Society-of-Creation" built on a rhizome sphere that organizes itself bottom-up.

As a note, the rhizome sphere is based on the model of Noeteric, i.e. Freedom (Diversity) combined with love (Inclusion) ... made operational in the "safe space" of Nowness.

Conclusion: both groups have no interest in the development of a Meta-Consciousness based on the Nagual, nor sympathy for the intention of a Self-Empowerment of Humanity. Meaning:

The development of
an Idealistic-Humanism
is not supported by
the opponents of Co-Evolution.

The Teenagers (2nd Defluence / Nagual-I) and the Young-Adults as Woke-Pioneers will have to do it alone. The official "Players" will either deliberately play foul or engage in a kind of silent sabotage through powerful disinterest.

Franck: The teens and the Woke-Pioneers as saviors of our future. Don't you think that's a very one-sided (i.e., Woke) view of the situation? All I know is that Woke sucks, makes mistakes, and is powerfully divisive. Doesn't your model take that into account at all?

Keno: No.

Franck: That blows my mind!

Keno: My reasoning is quite simple:

- The present Woke ("Woke Now") is the beginning of a long birth process ... this process will cause many and partly violent birth pangs.

- The many mistakes, exaggerations, aberrations, irrationalisms and also aggressions of "Woke Now" are these birth pangs.

- The "Woke Now" will make the "Woke Final" possible. But the "Woke Final" will be distinctly different from the "Woke Now." In the end ... let's say in about 50 years ... the Woke-Values (i.e., "Better Diversity for better Inclusion") will be kind of a given.

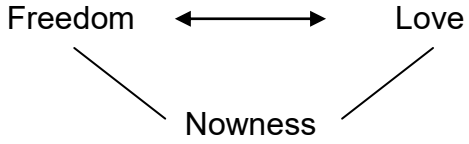
Franck: And what happens to teens and their quest for a Nagual-I?

Keno: My prognosis is something like this:

- The great apocalyptic drama of climate will shift more and more from teens to the STE system ... i.e., Science/Technology/Economy.

- The coming Teenagers will be more and more interested in their Crossing Initiation (2nd Defluence / Nagual-I). The more they ... with the help of the more and more active ANC ... feel and understand that a Nagual-I is a principally Happy-I, the more energetically they will reorient themselves, as follows:

  From "the decaying European metaphysics" (Peter Sloterdijk) with its typical punishing reason (which is basically an arsenal of moral commands) to the Rituals of Noeteric:



- The more the 2nd Defluence connects with the Rituals of Noeteric (Freedom / Love / Nowness), the more clearly the currently still dominating "Society-of-Coercion" will dissolve, so that the "Society-of-Creation" can establish itself.
- The old core of dogmas (original sin / redemption) and the old Myth-Set (Beyond / Absolute / Truth) will successively lose their influence. The more the "Chain of all Generations" is established, the more Humanity will turn to the vision of self-empowerment.

From this point of view, Teenagers and Woke-Pioneers will take over the role of Change Agents in the next 20 to 30 years:

Change-Agents
for the entry
into the 2nd Axial-Age

The following overview outlines these aspects:

TEENAGERS AND WOKE-PIONEERS AS A CHANGE-AGENT TANDEM	
What will they accomplish?	
Teenagers and Woke-Pioneers will initiate the following transformations in our society:	
1. The secularization of the ANC - Autonoetic Consciousness:	
positive impact on <u>daily Reality</u>	This will promote the development of the Meta-Consciousness and the new Future-Intelligence
2. The dissolution of the currently dominating "Society-of-Coercion"):	
positive impact on <u>Democracy</u>	This will promote the establishment of a Rhizome-Sphere based on Bottom-up Dynamics
3. The beginning of a conscious Self-Empowerment of Humanity:	
positive impact on <u>Identity</u>	This will enhance the Dignity of the Person ... in favor of a We-ness that thereby becomes a Factor of Emergence

Franck: Thus far, your prognosis. So, you expect very significant changes from the Change-Agent Tandem ...

Keno: ... yes, for daily Life, for Democracy, for Society and for the Identity and Dignity of the Person.

Franck: But what would happen if the Tandem of Teenagers and Woke-Pioneers do not get a Hyperverse as a platform?

Keno: Yes, this is an important question. We have said that it will be important for this Tandem to have a Hyperverse established and offered ... preferably by Mark Zuckerberg.

Franck: Uh-huh. So, without a Hyperverse, the Tandem will have a hard time with all the positive transformations you describe.

Keno: Let's take a closer look.

Teenagers are about establishing an additional Nagual-I alongside the normal secular I. Keyword: 2nd Defluence. Here we can state very clearly:

Without Hyperverse
this Nagual-I will not exist.

And without a Nagual-I
there will be no Co-Evolution.

With Woke-Pioneers things are not so clear. The Woke-Values are already strongly activated, discussed ... supported and fought in the cultural and political public.

This will certainly produce many lasting and positive effects. But if Woke activists want to help shaping the transition into the Epoch of Co-Evolution, this will not be enough.

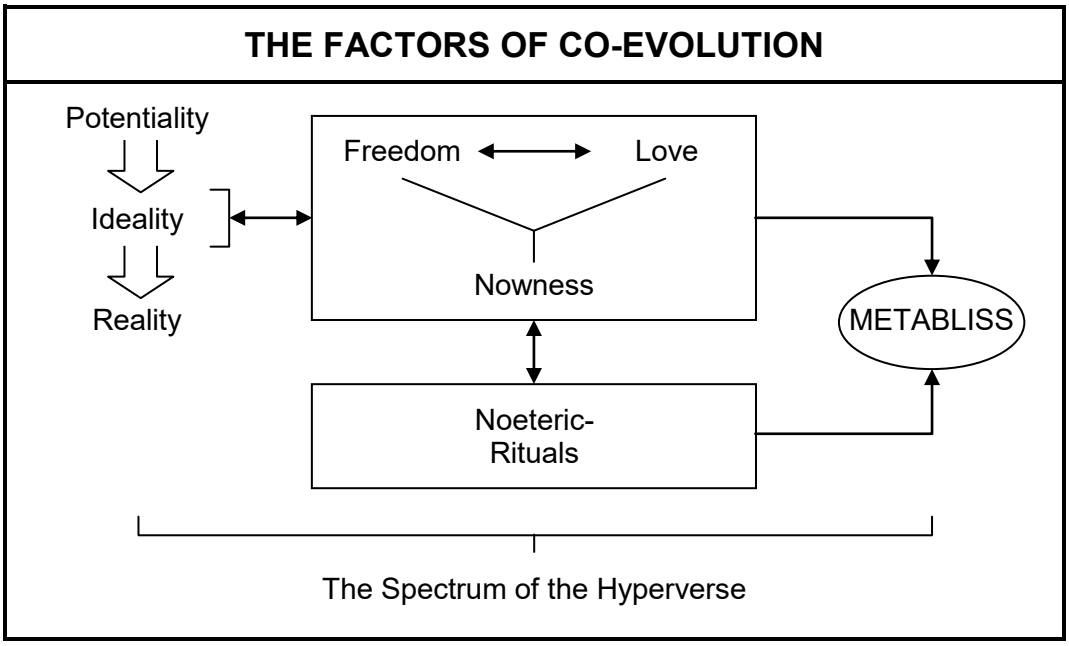
Co-Evolution not only needs the Nagual-I (keyword: 2nd Defluence with the Teenagers), but also a Nagual-Consciousness (keyword: Mind-Carting with the Young-Adults).

Franck: So, if ... this is how I understand your statement ... the Woke activists cannot develop qualified mind-carting, then our society's entry into the practice of Co-Evolution will not happen. Correctly interpreted?

Keno: Yes. Woke will partially change the landscape of our socially relevant values and certainly significantly improve some areas of Inclusion.

But Co-Evolution does not happen by this.

Co-Evolution needs Noeteric Mind-Cards that have been programmed for the Interaction of Potentiality, Ideality and Reality, and which are then aligned with Ideality as a "Calling Process" through Noeteric-Rituals. For this the following sketch:



From this point of view, a certain change of values, which will certainly be shaped and enforced by the Woke initiatives, will not be sufficient to enable society to co-evolve.

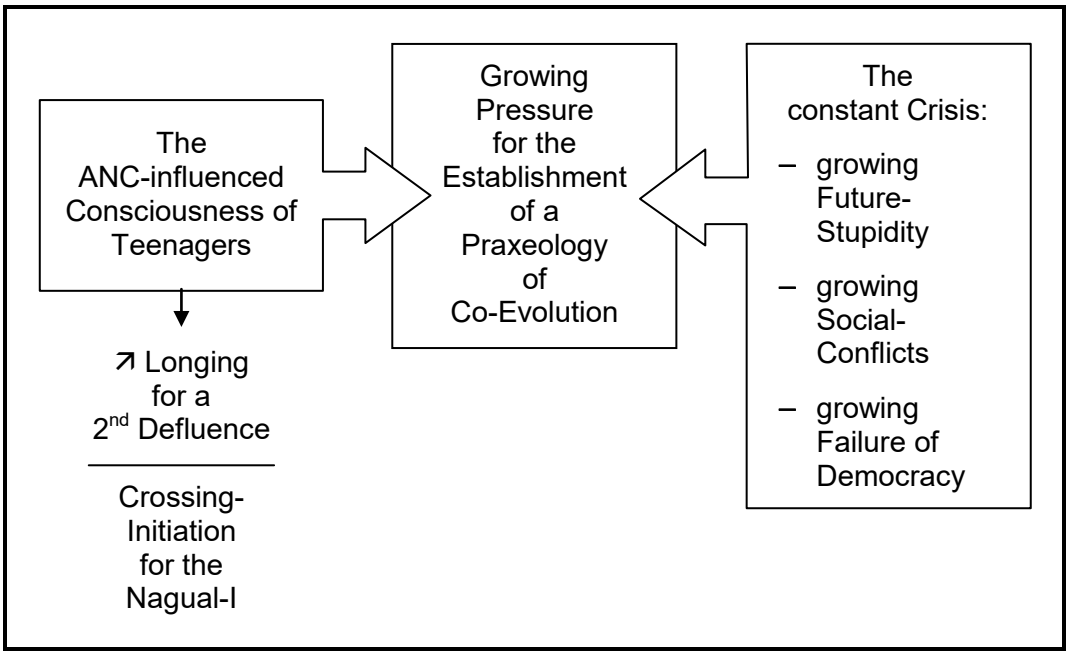
Franck: This means that if the Woke initiatives do not find a home or a place of operation in a Hyperverse, the aim of entering the epoch of Co-Evolution will fail ... or come to nothing. Right?

Keno: Not necessarily. We should not forget that the Teenagers are getting older. And with them, the ANC is becoming more prominent in society.

This will dissolve the old concept for progress even without Hyperverse ... i.e., the connection of the biological survival program with the religious core of dogmas and the old myth-set.

Franck: Dissolve the concept for progress, because of the Teenagers and their Mind?

Keno: Well, it's probably going to be two areas that are putting a squeeze on our society. As a sketch:



The constant crisis exists already now. And it will certainly become more intense ... even if technical-Technologies come into play, i.e., Metaverse with VR, AR and immersion:

Even the most technically perfect Metaverse
will not help society progress towards Co-Evolution.

Franck: Well, that tells us that without a Hyperverse, evolutive pressures will become more and more intense. But that doesn't say that this growing pressure will make any Metaverse provider to develop the system of Noeteric-Rituals of Metabliss ...

Keno: ... so, the still missing neuronal-intrinsic Technologies ...

Franck: ... to be able to offer them to the users.

Keno: Yes, this is ... as one says ...

an open Horizon.

We'll see. But one thing is already certain:

Whoever is the first to put
the Hyperverse on the market
will get a monopoly ...

The Monopoly
of the Better
