

Woke as Content for the Hyperverse
THE IMPORTANCE OF DIVERSITY AND INCLUSION
Keno Oneo in Conversation with Jochen Franck

Franck: You wrote that it is about connecting big themes ... Democracy and Society and Identity and Dignity ... combined with the very profane everyday life of all people. The "very big", integrated into the personal life-reality of very ordinary people.

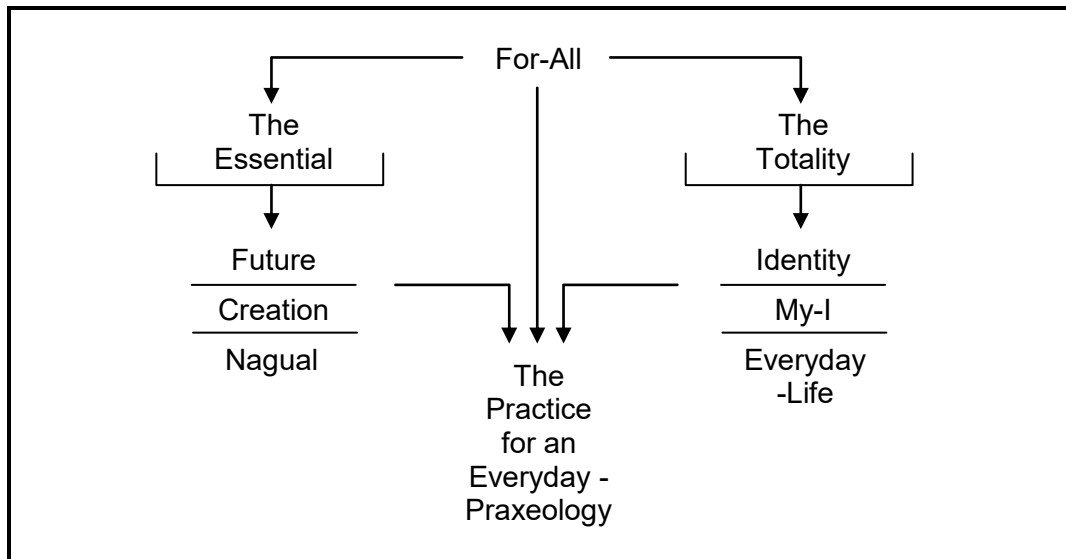

Keno: Yes. No Expert-Theories for the very Smart. No special Programs for an Elite of any kind. And certainly, no Forms of limitations ... combined with high Entry-Barriers for "those down there" and Privileges for "those up there".

Franck: This "For-Everyone" is obviously a central element for you. Why?

Keno: The orientation strategies and values that we have to develop for interfusion and Co-Evolution can best be designed in such a way that one connects the Essence of what is essential ... i.e., the meaning of our life ... with a dimension that we have often discussed , namely the "Totality of Me / We". As a sketch:

This sketch shows that the dimension of "For-All" is quite fundamentally linked with the aspects of the Essential and Totality ... and as follows:

If interfusion and Co-Evolution become a detached theoretical topic on the Internet ... thus developing in the direction of an elite ..., then things will go wrong, i.e., then we will not be able to develop a Society-of-Creation ... and also no "New Spirit of Democracy".

This also reveals the following:

**The great transformation
from the 1st Axial-Age to
the 2nd Axial-Age
that lies ahead of us
needs the individual ...
the individual human being.**

The connection of the Essential of Creation with the Totality of an I is an absolutely singular and intrinsic event. Only the individual human being is decisive.

Franck: But it is about the "for-all / everyone" and at the same time about a real everyday-praxeology of the single person ... and that in principle for the whole mankind. That contradicts itself!

Keno: Let me answer with a mystical from the ritual repertoire of Metabliss:

**When you walk
to the deepest
core of yourself
you will find the
Now-of-Creation
that we all share
because we are
humans**

My I lives in the I of all people. This I of all people is the Now-of-Creation. We all are this Now-of-Creation.

It follows: The supposedly huge Division between the Individual and the WE-ALL is an illusion ... D. D. Hoffmann would say that it is a miscoded "icon" that we authenticate too much as a "hard reality."

We are confronted here with the central desire of the Woke-Pioneers:

**Diversity leads us
to Inclusion.**

**Inclusion leads us
to Diversity.**

Franck: Got it. For you, Woke is a kind of wake-up process, isn't it?

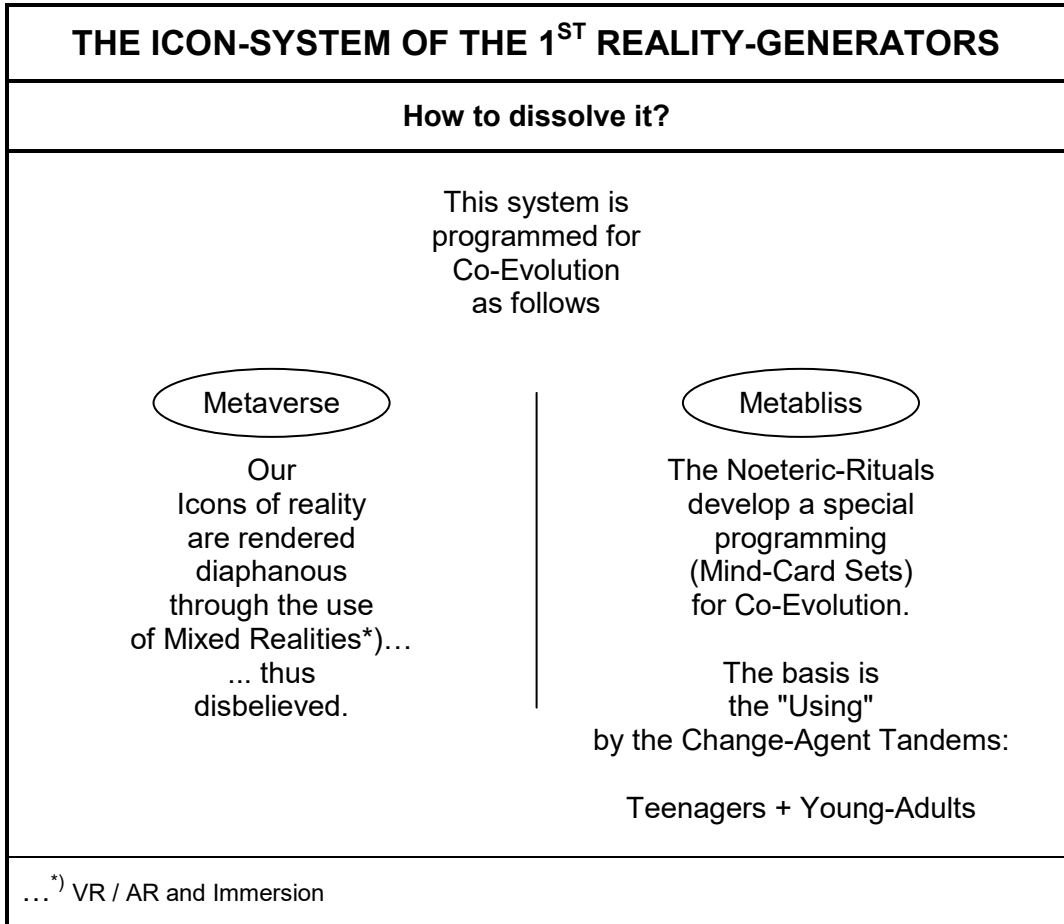

Keno: Yes, Spiritual awakening. The huge separation between the Individual (Diversity) and the We-All (Inclusion) is eroding as we Humans spiritually empower ourselves to integrate the Now-of-Creation (Nagual) in us ... in our I (that's the Teenagers' job) and in our Mind-Cards (that's the job of the Woke-Pioneers).

Franck: The divider is a coded icon that we have culturally coded ... as absolute Truth. This means ... so my interpretation ... that it is necessary in to dissolve this icon wall as much as possible. The question now is how we do that.

Keno: How to dissolve this icon wall ... which is our 1st Reality-Generator ...? With philosophical-theoretical insights ...

Franck: ... so, with what we are practicing right now ...

Keno: ... right, it definitely doesn't work with abstract theories. So, what is needed? As a sketch:

Franck: This is very interesting. Mixed Reality from Metaverse is involved in this. I would not have expected that.

Keno: Yes, it is: Metaverse is very extrinsically oriented and Mixed- Reality is based on a technical-Technology and not (like Metabliss) on a neuronal-intrinsic Technology, but the following has to be considered:

- Mixed-Reality organizes different perceptual-processes of reality.

As Daniel Heller-Roazen writes in his book "The Inner Sense" (2012), perception is the precondition for experiencing.

- All experiencing is an integration of the I and Consciousness into a subjective " Space-Time".
- If a person experiences many non-real experiences (VR / AR / IR), both the "Space-Mode" in the mind and the "Time-Mode" transform.

- The "Space-Mode" becomes transparent (diaphanous), thereby activating the factors of invention and promoting constructivism.
- The "Time-Mode" shifts from the dominance of the present to the presence of a contingency-oriented "Nowness".
- The Icons of reality thus become fluctuative-constructive. This means: what one calls "reality" is disbelieved by one's own belief in truth.

Franck: Very exciting. So Metaverse's Mixed-Reality offering is ... unlike what I thought ... not a toy for gamers or a distraction tool from boredom.

Keno: No. Let's be very clear about one thing:

1. What Teenagers are striving for as Crossing-Initiation (2nd Defluence / the Nagual-I) needs the experiences of Mixed-Reality.

Only a Worldly-I that has disbelieved itself as Truth can recognize that it is a Nagual-I.

2. The values of the Woke-Pioneers ... that is, for example, the activation of the factor " Unification" ... can only become socially relevant when they are ritualized and collaboratively-creatively "processed" in the Hyperverse.

Franck: This reminds me of when you said, "The Woke-Movement will not transform Society until it finds its Home ...

Keno: ... and its Stage ...

Franck: ... in the Hyperverse."

Keno: Yes. To put it more precisely:

**Woke will only be able
to initiate the 2nd Axial-Age
when Woke can
become creative in the Hyperverse ...
creative in a digital Rhizome-Sphere (Deleuze)
that organizes itself Bottom-up and collaboratively.**

Franck: This means ... from my point of view ... as long as Woke initiatives are primarily accomplished in the public culture and political scene ...

Keno: ... and with agitation and struggle ...

Franck: ... as long as Woke will not be able to positively transform our society.

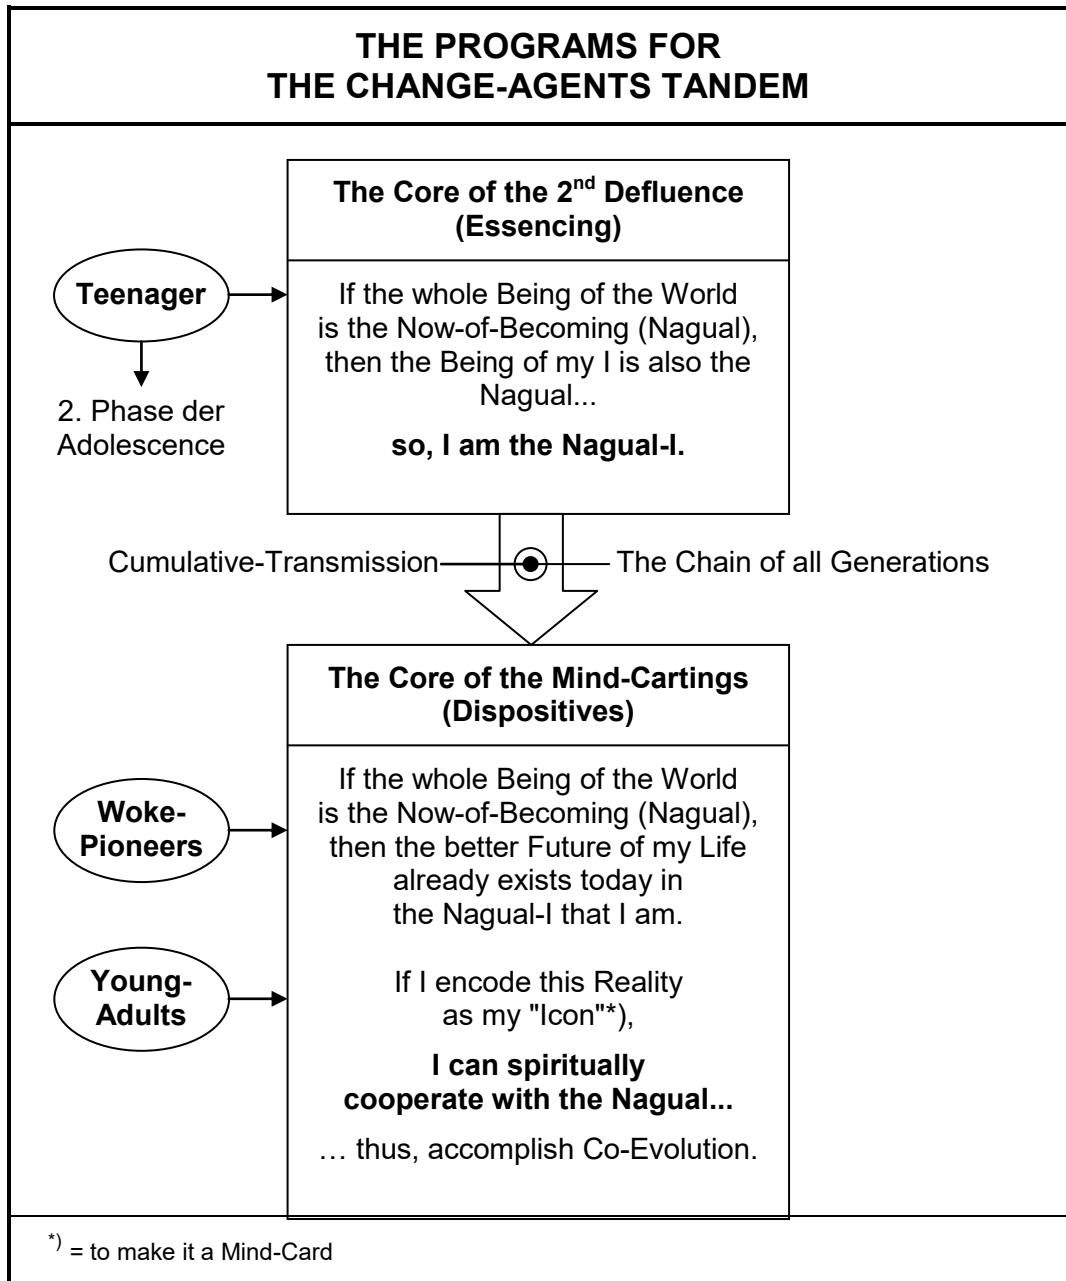

Keno: That's right. But we should still discuss the functional relationships within the Change-Agent Tandem.

Franck: What is important there?

Keno: Quite simply, it's all about Teenagers!

If we do not empower the Teenagers to accomplish their 2nd Defluence ... that is, the making of their Nagual-I ... there will be no effective "cumulative transmission" (Tomasello) of the Nagual.

The existence and function of the Nagual-I should therefore be able to be incorporated into the processes of Mind-Carting (Young-Adults / Woke-Pioneers). The following overview describes this:

Franck: If I now interpret this correctly, then you say that the Great-Transformation will not work without the Hyperverse.

Keno: Yes, and it becomes apparent that the

Chain of all Generations...

that is, the Cumulative-Transmission of the Nagual through the Generations... is an equally imperative prerequisite for a higher level of Humanity.

Franck: For you, the Teenagers seem to be the absolute must-factor. Without the Nagualization of the I of the Teenagers, there will be no Cumulative-Transmission of the Nagual. And ... according to your thesis ... without

this passing on of the Nagual

Keno: ... passing on to the Mind-Carting of the Young-Adults ...

Franck: ... we will not be able to develop and socially establish the next possible, higher level of our Humanity. Correct me ... but that is how I interpret your statements.

Keno: Yes, that is correct. From my point of view, that phase of our Evolution in which we could quite comfortably ... rely on our biology of survival with its gene impulses and Neuro-Time Windows of 1st Defluence is coming to an end. In other words:

**We have learned to develop
through "Fitness beats Truth" (Hoffmann)
that Evolution-Intelligence that
has led us to the new evolutive Reality
of increasing Complexity, Acceleration and Contingency.**

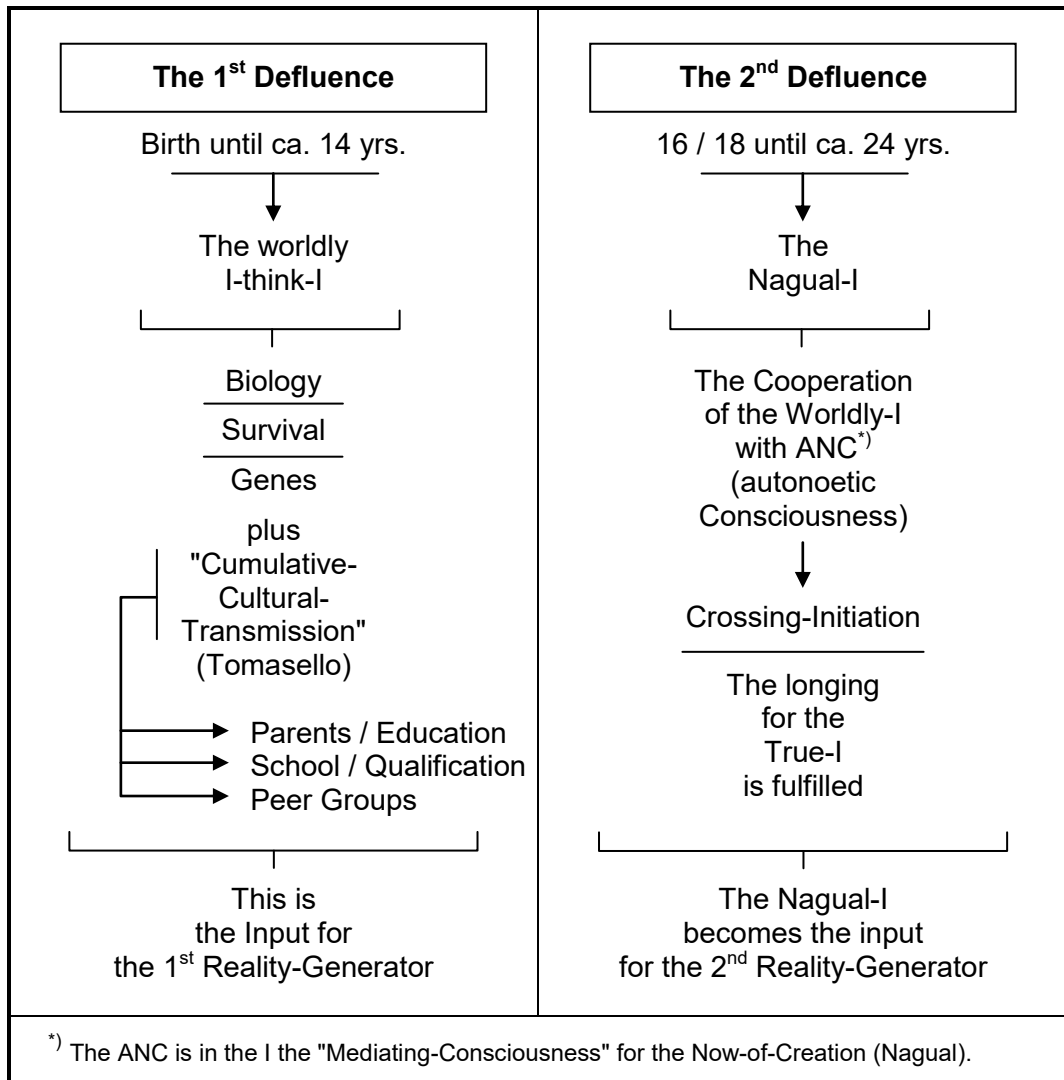

Franck: So, have we been too successful?

Keno: I wouldn't describe it like that. In my model, things look like this:

- Fitness and Truth. The combination of Survival and Knowledge. That is and was the general formula for the 1st Axial-Age.
- This Axial-Age is now coming to an end because the new evolutive Reality that has emerged and that we have to cope with can no longer be coped with Fitness and Truth alone. Our schemes and strategies are beginning to fail. This means:
 - The 1st Reality-Generator, which is the Dominator in our Mind, cannot produce the next level of our Fitness.
 - The worldly I-Think-I (Descartes) is becoming increasingly dysfunctional when it comes to the "Fitness" factor.
 - Our "Society-of-Coercion" ... that is, the Dynamic of Knowing Better (Exclusion) as the engine of our future-improvement ... is transforming more and more clearly into managing a permanent crisis.

Franck: Yes, I can see all this. But the question is still why the Teenagers can help us in this constellation.

Keno: Because it's about expanding our concepts of Defluence. As an overview:

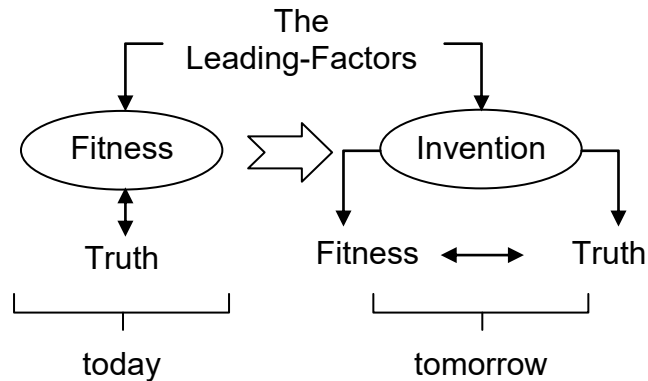

In general, we can say the following:

- If we as Humanity do not succeed in developing an efficient system for the 2nd Defluence and spreading it across Society ("for Everyone"), we will neither find nor be able to go the way to a higher level of Humanity.
- On the basis of a 2nd Reality-Generator we will be able to cope positively with the new kind of evolutive Reality.
- In order to cope with it, however, we need an expansion of our general Strategy for the Future:

**from Evolution
to Co-Evolution.**

– For this expansion we need the following schema change:

Franck: Invention. So, Invention as a new Leading-Factor?

Keno: Yes, the development of Meta-Consciousness, emergent Future-Intelligence and Inclusive-Fitness needs a change of the Leading-Factors.

That means: Our survival in the 2nd Axial-Age is organized by the Praxeology of a Co-Evolution. And to be able to make this factor "Invention" efficient on a broad front, we need the Noetic-System of Interfusion (= Metabliss). And a global big player ... preferably the Metaverse of Mark Zuckerberg.

The realization of this Interfusion needs the Nagual-I of the Teenagers ... and based on that the Nagual-Mind-Cards of the Young-Adults ...

Franck: ... which, as you have emphasized several times, are very much focused on the

Woke-Values.

Keno: Yes: Diversity for better Inclusion. Better Inclusion for better Diversity.

Franck: Very well. You bring a new leading factor into play: Invention. But that doesn't make sense to me. To me, "Invention" is something provisional and something improvised ... something on which one cannot build a Society at all.

Keno: Yes, this is a problem that the 1st Reality-Generator creates. Shall I explain it briefly?

Franck: Yes please.

Keno: The 1st Reality-Generator is the result of the following factors or processes:

1. The Epoch of "the Power of the Sacred" (Joas). Subsequently the Power of Better-Knowledge, on which our present Culture and Society is built. Thus: from Religion to Science. Secularization.
2. The connection of our survival-programs with the learning-scheme "On learns wisdom by suffering" (thus Original-Sin plus need of Redemption).
3. The old Myth-Set ... i.e., Beyond, Absolute and Truth ... the operationalized Fear of Contingency.

The 1st Reality-Generator that led us to today's Modernity is an old-fashioned Consciousness system, because it is built on old background beliefs. It is useless for Emergence and Co-Evolution. Useless for Interfusion and Invention.

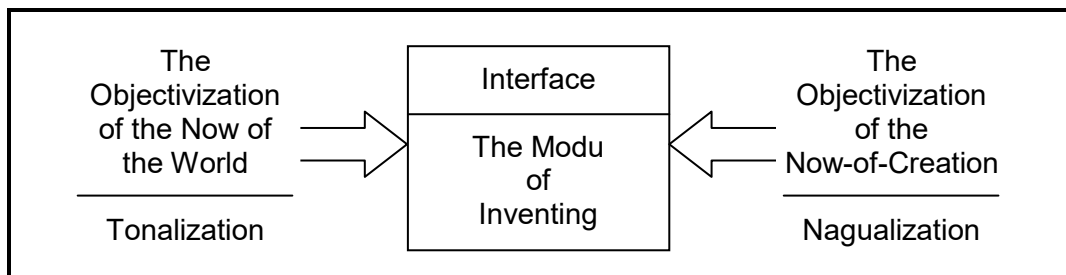

Now if one ... like you as a person ... has only this 1st Reality-Generator, then the switch from Survival to Invention is a mixture of irresponsibility and irrationality.

Franck: That's the way it is.

Keno: But if one has both the 1st and 2nd Reality-Generators, then one automatically realizes the following:

**The Mode of Inventing
is the best Interface
for Co-Evolution.**

As a sketch to it:

From this perspective, the Mode of Inventing is guaranteeing us as Humanity a better Fitness ... a smarter Survival.

Franck: Are you sure about that?

Keno: Yes. If we had started to establish a Praxeology of Co-Evolution ... based on Emergence, Interfusion and Invention ... about 30 years ago, we would most likely have hardly any Environmental Problems, no Climate Crisis and no Energy Deficits.

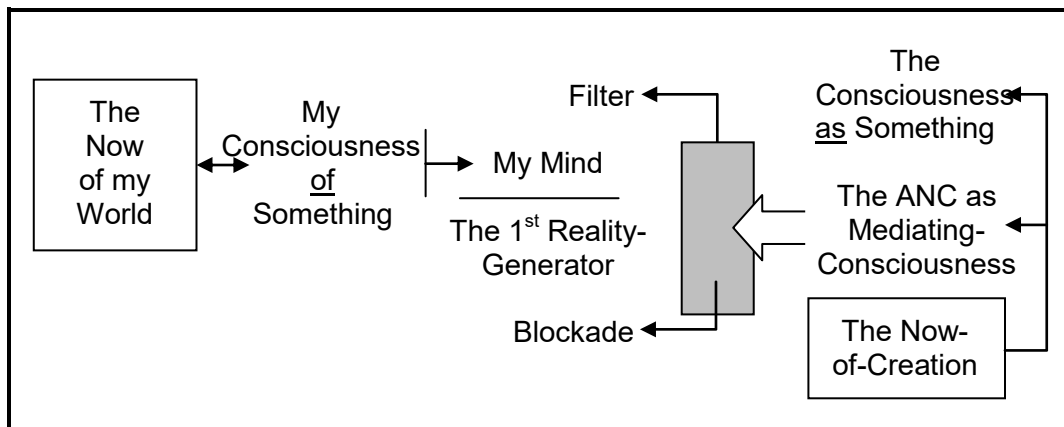

That means: With the dominance of the 1st Reality-Generator we practice, as Sloterdijk has described it, a

"domineering Mind",

i.e., a Mind that separates us as Humanity from what Consciousness can do for us. Our domineering Mind blocks the Intention of Love and Help that is offered to us by the ANC.

Franck: That's not clear to me. Can we deepen that a bit?

Keno: Yes, with pleasure. I'll answer with the following sketch:

Franck: I realize now why you put so much emphasis on the fact that we will need cooperation of the 1st Reality-Generator with a 2nd Reality-Generator. In my words: We need an Expansion of our Expectations of Reality.

Keno: Yes, that's it. In my words:

We need a permanent Liberation-Process of our Consciousness from the "Icons" (Hoffmann), which our Mind permanently generates.

Therefore Metaverse. Hence the Virtualization of our world-interpretation-concepts. Hence AR and immersion:

Everything that Mark Zuckerberg is currently developing serves to establish Co-Evolution.

We will have to invent the Mode of Invention. And in my view, this will succeed best if we proceed as follows:

If we do not become capable of Co-Evolution and Interfusion, our worldly Consciousness ... the Consciousness of Something ... will become less and less capable of appropriately shaping and programming the Now of our World for the "Better." In other words:

We are becoming less and less able to ask the right questions at the right time.

**Why?
Because we cannot make the ANC and the Nagual our Spiritual Partner.**

Franck: Are you saying that the right questions are stimulated by the ANC ... the questions that our Consciousness needs to be able to create the "Better"?

Keno: Yes. Let us look at the following sketch:

<div style="border-bottom: 1px solid black; display: inline-block; margin-bottom: 5px;">until now</div> 1 st Axial-Age	<div style="border-bottom: 1px solid black; display: inline-block; margin-bottom: 5px;">in the Future</div> 2 nd Axial-Age
The current problems produce the right questions	The interactions of the I with the ANC / Nagual produce the right questions
The Problems as a Partner	The Creation as a Partner

The interactions of our Mind with the ANC / Nagual need a Meta-Consciousness, which we currently do not have.

The Interactions of our Mind with the Problems of the World are regulated by the 1st Reality-Generator and with it the worldly-I. This means: "Fitness beats Truth" (Hoffmann). These interactions are based as said on the predominantly biological survival program.

In the future we will have to enable our Mind to interact not only with our Survival-Program but also with the Now-of-Creation. The biologically conditioned leading program " Fitness " is unsuitable for this. And therefore, we need the new leading factor " Invention ".

If the 2nd Defluence (Teenagers) works and based on this the establishment of the 2nd Reality-Generator (Young-Adults / Woke-Pioneers), the leading factor "Invention" will develop a new relation between Fitness and Truth ... that means Survival and Knowledge ...:

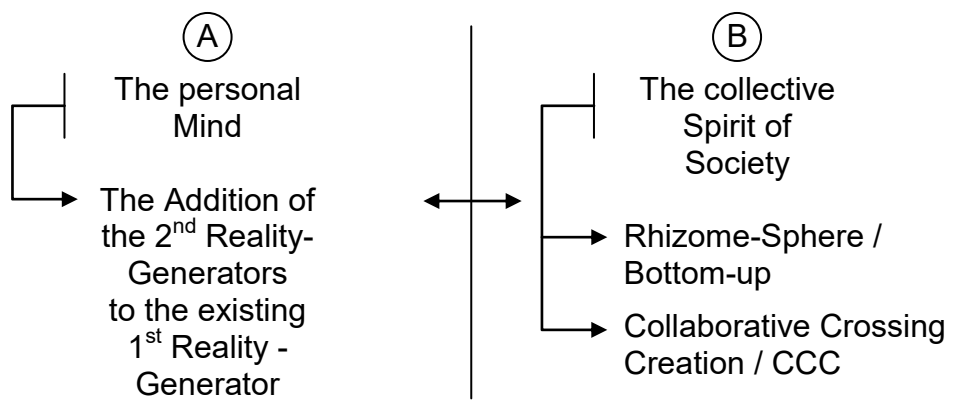

**The Intelligence of shaping
the Future moves
from Better-Knowledge (Truth)
to the Rhizome-Sphere:**

from Top-down to Bottom-up.

Franck: I have heard this argument from you many times. Obviously, I haven't really grasped it yet.

Keno: If the guiding factor "Fitness" controls the processes of cognition ... i.e., Truth / Cognition ..., the private Mind of the persons and the collective Spirit of the Society becomes "domineering" (Sloterdijk) and thereby stupid ... stupid related to the new Challenges of Emergence and Contingency.

If one wants to reprogram the personal mind and the collective Spirit of the Society to Invention, one needs the following set:

The establishment of the 2nd Reality-Generator (= A) will take place largely independent of Cognition and Knowledge.

The establishment of the Rhizome-Sphere (= B) will take place in a Bottom-up Dynamic of the Hyperverse.

This will successively erode the association of better-knowledge, interpretive power, and social status. And it will be this Erosion that will give our Society the Chance to reach the higher Plateau of Humanity. To put it another way:

**Better-knowledge
will not lead us
to better Humanity.
Nor will reason.
Nor will morality.**

Franck: From your point of view, it will be the 2nd Defluence (Teenagers) in connection with the Mind-Cards of the Woke-Values (Young-Adults). That is your thesis.

Keno: Yes.

Franck: But the Teenagers and the Young-Adults are much too young and inexperienced to lead us to a better Humanity.

Keno: That is superficially true, if you judge this issue with the "eyes" of the 1st Reality-Generator.

But basically, the issue is this:

- We need a new kind of Future-Intelligence.
- Only this Future-Intelligence can and will lead us to a Plateau of better Humanity.
- So, it is the Future-Intelligence, i.e., Co-Evolution by Interfusion ... integrated in a Meta-Consciousness built on the presence of the Nagual.
- The Teenagers and the Young-Adults will act as a Change-Agents Tandem i.e., they realize what our "Society-of-Coercion" with its culturally anchored "Power of Knowing Better" cannot want and could not finish.

Franck: And hence your repeatedly outlined statement:

"It's all about Teenagers."

Keno: Yes, and from this ... referring to META and Mark Zuckerberg ... one can make the following statement:

Only the Metaverse that is able to win over the Teenagers will get the "Monopoly of the Better".
