

The Transformation of Democracy
THE SOCIETY-OF-CREATION
Keno Oneo in Conversation with Jochen Franck

Franck: It seems to me that you favor two aspects in particular, namely the "Bottom-up Dynamics" and the "We-All"

Keno: ... yes, because those will be the basis for our coming "Society-of-Creation" ...

Franck: ... but I can't see why you explicitly associate this with the development of a new ...

Keno: ... and better ...

Franck: ... Future-Intelligence. It seems like the better-making of our futures is what you ...

Keno: ... especially Futures 2 and 3 ...

Franck: ... disconnected from the currently dominant and successful tools, such as culture, schools and education, media, knowledge and science ... not to mention the sectors of technology and economy.

Keno: So, the key question for me is:

**Do we want
a "Society-of-Coercion"
or do we want
a "Society-of-Creation"?**

For me, the answer is very clear:

**If we want
to pursue Co-Evolution,
we need a Society
whose collective Spirit
is focused on "Creation".**

**Such a Society is
the "Society-of-Creation".**

Franck: I agree with this: A Society built on Conformity (Cowardice) and Submission (Coercion) will hardly be able to enter into a permanent Cooperation with Creation ...

Keno: ... yes, with the Now-of-Creation (Nagual) ...

Franck: That is clear for me. My question refers to something else: Can't we reprogram the hitherto successful instruments ... that is the whole spectrum from culture to economy ...?

Keno: Why? Reprogram them to what?

Franck: Using your approach: reprogramming from the current focus of Evolution to the new focus of Co-Evolution. Why should this not be possible?

Because then we don't need this " We-All" and we don't need the "Bottom-up Dynamics" coupled to it. Get it? Your model is roughly what used to be called "communism." All power is shifted down. All decisions about the future are made ... supposedly ... by " We-All."

That didn't work back then. And it won't work tomorrow either.

Keno: Hm. A "Society-of-Creation" is a Consciousness-Society, which democratizes its Futures by making a Rhizome-Sphere the Generator of the respective better Consciousness. A "Society-of-Creation" thus combines the function of a "Creation-Generator" with the functions of Freedom, Love and We-ness.

To put it even more concretely:

**A "Society-of-Creation"
transforms Freedom and Love
into experimental
Streams of Consciousness.**

The "Creation-Generator" consists of a "Rhizome-Sphere" (Deleuze) and CCC ... Collaborative Crossing Creativity. But such a "Creation-Generator" does not fit the current power of knowing better and the status privileges coupled to it with their Top-down Dynamics.

What we lack are not the facts and the theories, nor knowledge and better knowledge. All we lack is a central social Instrument that is able to purposefully and professionally couple the collective Now-Consciousness of our Society with the Now-of-Creation. As a sketch:

We have a Consciousness-Problem because our Society (being equipped with the dominance of the 1st Reality-Generator) is too one-sidedly focused on the following formula:

**We solve the
problems we have with
the intelligence of our thinking.**

Thinking separates Consciousness from the Now-of-Creation. Strenuous Better-Thinking separates the Consciousness from the Spirit-of-Creation ... separates it through the combination of logic and abstractness.

But we need a system that is able to connect our Collective-Consciousness, which is based on We-ness, with the Now of Life and Creation. And this connecting cannot be organized through intellectual abstractness. This connecting needs

In our now dominating society, which is characterized by the power of better-knowledge ...

Franck: ... please don't forget progress through Innovation ...

Keno: ... I neither see any Functionalization and Operationalization of Freedom, Love and Nowness.

On the other hand, if the Now-of-Creation (Nagual) can be experienced and used mainly through Freedom, Love and Nowness, then it is wise to place these three Noetic Factors at the center of a system that has the task to connect our Collective-Consciousness with the Nowness of Life (Being) and Creation (Becoming). From this follows:

**We need a 2nd Reality-Generator
that is focused on a
productive Instrumentalization
of Freedom, Love and Nowness.**

If we try to draw a conclusion at this point, we get the following result:

- 1.- We need a Rhizome-Sphere, which is active as a "Workbench" in a "Creation-Generator".
- 2.- The Hyperverses will be this "Creation-Generator" in its ideal form, thus the Fusion of Metaverse and Metabliss.
- 3.- We need the "We-All" and the "Bottom-up Dynamics", because only this

**social Reality
of We-ness**

can make the Rhizome-Sphere functional and productive.

- 4.- We need a 2nd Reality-Generator programmed for the Interfusion of our worldly-Being with the Nagual- Becoming, making it possible to integrate the Intelligence of the Now-of-Creation (Nagual) into our own future-oriented actions.
- 5.- We need the Noetic-Rituals (Metabliss) because they can perform the mental programming aligned with Interfusion ... based on Freedom, Love and Nowness.

However, our 1st Reality-Generator focused on duality and Differentiation has no relation to Freedom, love and Nowness. It objectifies the world (as allegedly true reality) and quite rigidly excludes Freedom, love and Nowness:

**If Freedom, Love and Nowness
are excluded as a "private matter",
no public We-ness can develop
that would be able to cooperate
with the All-One,
which is the Nagual.**

Franck: You describe the Nagual as the All-One. We should discuss that in more detail.

Keno: There is an aphorism from our Neuro-Lab "Mind-Design" that could help us here:

**"The Nagual is all that is
without being what it all is."**

From this aspect, the Nagual is the All-One. As a sketch:

Franck: From this point of view, the Nagual is the whole world ...

Keno: ... yes, our universe ...

Franck: ... but it is nevertheless always more than this whole world, right so?

Keno: Yes, that is how it is conceived as a model.

On this basis, if one describes the Nagual as the All-One, then one can substantiate the relation of the We-ness to the All-One as follows:

This allows for the following conclusions:

- The Nagual is our We-ness.
- Our We-ness is the All-One, which is the Nagual.

And based on that:

- If we want to have a "Society-of-Creation", we will need a We-ness that can cooperate with the Nagual ... that is, to practice Co-Evolution:

**Co-Evolution
only works through
the We-ness of a Society.**

- Evolution is different. It could work on the basis of geniuses, experts of Innovation and intelligent knowledge. But Co-Evolution needs the whole society, i.e., the digital Rhizome-Sphere and the functioning of a "Creation-Generator". It follows:

Franck: And how do you substantiate this ... let's say ... "steep" thesis?

Keno: Quite straightforwardly:

**We need a stable and
intensely positive We-ness ...**

Franck: ... sorry: But all Democracies I know are miles away from that. Conflicts, social crises and divisions are everywhere. Looking at this, there is for me ... unfortunately ... only one statement:

**Democracies are
no longer able
to create a powerful
and positive We-ness.**

Keno: Yes, and that's exactly why we need the Teenagers and the Woke-Pioneers.

But back to my first thesis:

1. We need a stable and positive We-ness.

Such a We-ness carries the energy of " Radical-Hope" (Lear) and at the same time the Ideality of a Love for the "We-All" ... that is, practiced Inclusion.

2. Radical-Hope (sometimes called " Nevertheless-Energy") and the love for the "We-All" are not to be developed by intellectual cleverness, nor by morality or ethics.

But they must be developed if one wants to have a stable and positive We-ness.

So, the question is how to produce this Energy of Hope and this Love for the "We-All" ... as I said, as a Collective, i.e., as a social implemented Reality.

The answer is: through the Nagual-I that is built by the Teenagers. And ... based on it ... those Nagual-Mind-Cards that are realized by the Woke-Pioneers and the Young-Adults in the concept of a 2nd Reality-Generator.

Franck: So again, your two theses: "It's all about the Teenagers" and "We need the Chain of all Generations".

Keno: es, that's it. And that leads us to my third and final thesis:

- 3. We will need a digital system that helps the Teenagers and the Young-Adults / Woke-Pioneers to successfully Nagualize their Identity (= Teenagers) and to Nagualize their Mind-Cards (= Young-Adults).

This system must be available for free. And it must be fun, fascinating and playfully simple in its application. And universally available. At any place. At any time. And it must have an accumulative quantity as a basis: The more users, the faster and more clearly the desired We-ness can develop:

The power of We-ness is the number of users.

The Hyperverses is such a System, i.e., the Interaction of

When the Space-Time Experiences of Mixed-Reality combine with the Nagual-Resonances evoked by the Noetic-Rituals, it self-dynamically unfolds the "Nagualization".

In this context, Self-Dynamic means the following: The Nagualization of Identity and Mind-Cards does not need processes of communication. And also, no processes of coaching and training. And also, no inputs or commands from culture and politics.

Franck: So Nagualization pretty much "develops on its own"?

Keno: Yes, that's one way to describe it. To put it a little differently:

**The Using of the Hyperverses
activates that ANC in the
mind of the user which helps
the Consciousness of the person
to build up his Nagual-I and Mind-Cards.**

If one looks closely, one can see the following:

**The Nagualization
of the I and the Mind-Cards per se
are already a process of Co-Evolution.**

And one recognizes something else:

**The power of
the elite is eroding.**

Franck: What do you mean?

Keno: When Self-Dynamics and Co-Evolution combine to create We-ness through Nagualization, then Consciousness processes (Streams of Consciousness) replace the old function of elites. Then knowledge and better-knowledge becomes a merely subordinate factor for the generation of these Streams-of-Consciousness.

On this basis, a new type of elite is emerging.

Franck: And that would be?

Keno: Elite becomes a Consciousness-Process of Emergence ... i.e. a process that has a lot of "Unpredictability" in it.

Predictable Consciousness-Processes can very well be based on facts and better-knowledge. But emergent Consciousness-Processes need the "Crossing" ... i.e., the Integration of the Mind into the Unpredictability of the coming Futures.

Elite is therefore no longer a social status factor, but a Spiritual-evolutive Process based on the function of ANC (Love and Helping).

Franck: You have elaborated that Self-Dynamics and Co-Evolution should combine to help our Society become a productive We-ness through the processes of Nagualization. Ultimately, you claim that if we fail in " Co-Evolution" the current social conflicts, the growing de-solidarization and the increasing division of society will remain. Do you really see it that way?

Keno: Yes. We need the Practice of Co-Evolution ... and we need it as a Daily-Practice that generates real added value for the majority of people in their personal lives. We don't need an elite and better knowledge. Thus, no smart intelligence that acts repressively Top-down ... often combined with a morality of reason that is aligned against the Woke principles of Freedom and We-All.

Franck: But you are aware that the so-called "silent majority" ... and these are mostly conservatives and middle-class hard-working people ... sometimes have major problems with Woke-Values and the diverse Woke actions (from Cancel-Culture to Post-Colonialism).

Keno: Yes, I know. Neo-Liberalism, which is supposed to be so progressive, has basically had its day...as is (often backwards) Conservatism.

The silent majority has two problems, as I see it:

One does not want an elite that behaves repressively.	\longleftrightarrow	But one also doesn't want Woke activism that is "too progressive."
---	-----------------------	--

Franck: Yes, I can well follow this perspective. What to do?

Keno: To establish Hyperverse as quickly and consistently as possible, so that we can soon begin to develop a Praxeology of Co-Evolution, which, as has been emphasized many times, needs the realization of two concepts: "It's all about Teenagers" and "We need the Chain of all Generations".

On this basis, elite will separate itself from social status:

**The new Elite is
the emergent Consciousness.**

Thus, the now dominant "Society-of-Coercion" is drifting into its erosion. A collaborative Bottom-up Creativity (see memes, gifs and viral processes) organizes itself (spontaneously and fractally) in the digital Rhizome-Sphere (Internet 3.0).

Emergent Consciousness needs ... to be born ... the following:

All in all – we need the Hyperverses.

Franck: Sounds good. But it doesn't solve the conservatives' problems at all. The silent majority can't do very much with the coming Hyperverses.

Already, 77% of citizens surveyed in the U.S. say, "We don't want Zuckerberg to build a Metaverse." A survey of 1,000 American adults (all ages) found that most people prefer a Metaverse that runs on a decentralized blockchain platform (Advocate Group, 2022). So, people don't want monopolization by META.

Keno: Basically, we are dealing with two parallel developments here:

- The basic idea of the Hyperverses will meet with growing acceptance. The survey you quoted showed that 49% of the respondents expect the Metaverse idea to be successful in three to six years.
- The Woke-Values will not find their widespread acceptance until the Woke-Streams can integrate into the Rhizome-Sphere of the Hyperverses:

**The natural home
of Woke-Values is
the Rhizome-Sphere of
the Hyperverses with its
"Collaborative Crossing Creativity"
organized Bottom-up.**

In Conclusion:

- Unless Mark Zuckerberg / META succeeds in integrating the Woke-Values into the Streams-of-Consciousness of the Rhizome-Sphere, there will be

**no Monopoly of the Better
for META.**

- If MTEA's Metaverse relies unilaterally on the technological Innovations of Mixed-Realities (headsets, smart glasses, avatars, holograms, etc.), there will be no awakening to a Meta-Consciousness ... there will be no productive source of emergent Streams of Consciousness as a result:

**Then META fails
in the context of the great,
unique and historical opportunity
to lead us as Humanity into the 2nd Axial-Age.**

Franck: Let me contextualize this a little bit. You say that we need the Teenagers
....

Keno: ... yes, and necessarily also the Teenagers of the conservative citizens, who have a higher level of Fear of Contingency than many progressive people or pioneers ...

Franck: ... and you say that we need the "Chain of all Generations."

You further assert that the "Monopoly of the Better" depends, among other things, on the establishment of a digital Rhizome-Sphere, coupled with the birth of emergent Streams-of-Consciousness ...

Keno: ... which ... very important! ... are born Bottom-up.

Franck: And you claim that on this basis we will be able to develop a powerful Meta-Consciousness. And you trust that this Meta-Consciousness will be able to dissolve or soothe many of the acute cultural, social and societal crises and conflicts and divisions ... why actually?

Keno: Because the yet to be developed Meta-Consciousness will only be vigorous... if it carries the three central attractors within itself:

As we have already briefly touched upon, the establishment of Attractor ③ ... i.e. the novel Time-Mode of Nowness ... is decisively shaped by the conception of the Reality-Mix of the Metaverse. Attractors ① and ② are primarily shaped by the Noetic-Rituals (Metabliss).

Franck: Disbelieving ... that is supposed to be the focus of the Metaverse? Help me a little.

Keno: The conception of the Reality-Mix makes our belief in absolute truth transparent ... diaphanous. That is:

**We switch ...
from objectifying Reality
to inventing Reality.**

Franck: That is, to what D. D. Hoffman described as " Iconization" ...

Keno: ...yes, we enable ourselves to conceive of Inventing as the specific Reality of our human Fitness:

**Inventing is the
next level of our Fitness.**

From this perspective, Co-Evolution is the Invention we need in order to better connect our Mind with the Spirit and the Now-of-Creation (Nagual).

This connection is of great importance. But we can only create it in a very limited way with clever knowledge and elitist power strategies. For this we need the following "Ingredients ":

- Teenagers — [— The Nagual-I / the Happy-I
- Young-Adults — [— The Nagual-Mind-Cards / The Woke-Values

Ultimately, the question will be this:

**Will we get a powerful
Meta-Consciousness in time?**

**If Meta-Consciousness
comes too late, we won't be able
to resolve many of the divisions in society.**

**And if we cannot resolve the divisions,
no stable and positive We-ness will develop.**

**If this We-ness doesn't unfold,
there will be no powerful Meta-Consciousness ...
so, no Co-Evolution for all people either.**

Franck: You are describing a strange problem situation: We need the Meta-Consciousness to be able to establish the We-ness. But we need exactly this We-ness to be able to establish the Meta-Consciousness. What to do?

Keno: To rely on the ANC ... on the Autonoetic-Consciousness. From my point of view, it has already activated itself very clearly. So, it is a matter of promoting it now, primarily through Metaverse and Metabliss.

The ANC is the driving force in the Consciousness of the Teenagers. This means: the

**" Search for Resonance"
(Martin Altmeyer)**

organized by the Teenagers and their Longing for Crossing-Initiation is already a (presumably indirect) Co-Evolution.

Franck: Crossing-Initiation. Can you explain that again?

Keno: Gladly.

Crossing-Initiation is that Ritual-Process which enables the Worldly-I (1st Defluence) to transcend itself in such a way that the Nagual Essence,

which is alive in every I can be recognized, experienced and loved. This is how the

Nagual-I

comes into Being, and it is through the effects of a digitally organized 2nd Defluence.

But the ANC is also the driving force with the Woke activists. You know my thesis:

Woke secularizes the ANC in the Reality of our World.

Franck: You have often emphasized that both the Crossing-Initiation of the Teenagers and the Woke-Values of the Woke-Pioneers (Young-Adults) are based on the Longing for the

Totality of Me / We

This has remained unclear to me.

Keno: The more the I-Consciousness of a person refers to himself (= Totality Aspect), the more intense the resonance of the ANC and the Nagual in the Consciousness of the Person.

Franck: So, it is not narcissism?

Keno: No: It is the beginning of a Self-Love, which increasingly turns to the inner Nagual. This is a development that can be described as follows:

The Nagual-Resonances stimulated by the Teenagers are the energetic Raw Material for the Fusion of Nagual-I and Free-Nagual to be striven for in favor of Co-Evolution.

What the Teenagers aim at, especially with the selfies and their staged videos, is the Establishment of an

Idealism of Love.

It is the Idealism of the beloved Nagual. The word for it is:

Dignity.

Then, as the Teenagers get older and then enter the stage of establishing Dispositives (Mind-Carding) around the age of 22 / 24, another attractor can be established in the Mind:

The Magic of Freedom.

A Mind-Card Set emerges, which connects the Woke-Values with the Now-of-Creation ... thus the Simultaneity of Differentiation (Diversity) and Unification (Inclusion). The result is

Autonomy.

Franck: So, Dignity and autonomy?

Keno: Yes. The Idealism of Love unites with the Magic of Freedom. The result is then not only the basis for the Meta-Consciousness, but also for the

Idealistic-Humanism,

which we urgently need.

Franck: Why urgently? And for what?

Keno: Our "Society-of-Coercion" focused on better-knowledge has begun to damage the Spirit of our Democracy. We therefore need ... as mentioned ... the building of a "Society-of-Creation", i.e., a Society that can instrumentalize a digital Rhizome-Sphere in such a way that it develops into a stable "Creation-Generator" that can turn the Bottom-up Creativity of the Users into Input for a new kind of Future-Intelligence and for our Inclusive-Fitness.

Franck: Sounds complicated. But if I'm reading this correctly, it's a swansong to our currently dominant combination of intelligence and Evolution in favor of an Idealistic-Humanism.

To me, such idealism is a throwback to the supposed power and wisdom of Romanticism. That's how I see it. And the aspired humanism is ... to put it harshly ... a kind of hubris, i.e., an irrational self-overestimation of man.

Keno: So, old hats? Backward longings, driven by illusions? Is that how you interpret it?

Franck: Basically yes, I see many justified longings, but I recognize a very clear backward model ... that is, no progressiveness. And I also can't see how you're going to bring that together with a new Future-Intelligence and inclusive Fitness.

Keno: Now we come to a very important topic. Let me expand a little bit:

1. We are leaving the field of Fear of Contingency, caused by the digital revolution ... and entering the field of Co-Evolution.
2. We do this because the new evolutive Reality we have created for ourselves (growing complexity, acceleration, and contingency) causes us to project the old fear of contingency onto the coming future. This fear of contingency is the backward you speak of.
3. So, we are entering the Field of Co-Evolution because of a very inconsistent mix:
 - reactivated fear of contingency
 - activated Self-Empowerment.

So (see 1.) we leave the field of Fear of Contingency only by

**combining Self-Empowerment
with the Digital-Revolution.**

This is the Evolutionary Sense of Social Media,
Metaverse and Hyperverse.

Franck: So, we are using the ancient Fear of Contingency and projecting it onto our current Future. Is it meant like that?

Keno: Yes. And this activates ... quite violently, by the way ... the ANC ... the Mediator of the Nagual ... which leads to the unfolding of our Longing for true Self-Empowerment.

If one transfers these processes to our current social situation, the following strange situation becomes apparent:

In such a situation, there is no turning back. There is only a "forward" ... towards an Idealistic-Humanism.

Franck: Well, oops! But your model of an Idealistic-Humanism is ... so my thesis ... a clear turning back. Idealism is retro. Classical or German idealism had its heyday in the 18th century and also still somewhat in the 19th century. So, it is from yesterday.

Keno: One can see it that way. But if you focus on the aspect of " Fitness" as described by Donald D. Hoffman, then the following perspective emerges:

- 1.- We have primarily built our Fitness on cognition. This is the function of the 1st Reality-Generator. Through its programming, our survival is guaranteed by cognition and knowing better. The Interpretation of a "relative Reality" as Truth is the declared goal. The scheme for it is:

- 2.- This kind of survival Fitness has worked extremely well. As Oded Galor analyzed in his book "The Journey of Humanity" (2022), it was the 19th and 20th centuries that gave Humanity a great progress ... and that was through recognition (knowledge) and Innovation (primarily through the STE system ... Science, Technology and Economy).

Franck: So, and now Idealistic-Humanism is supposed to put an end to this positive development. Is that your model?

Keno: Not at all. In the 21st century ... it's all about expanding and optimizing our coding strategy.

Franck: Ok, and how?

Keno: We stay with the 1st Reality-Generator. So, we absolutely stay with the Fitness-Concept of

Fitness by Cognition

Fitness beats Truth

But we develop an additional Reality-Generator ... the 2nd Reality-Generator ... which is based on a different, i.e., complementary, coding strategy:

"Coded by the Nagual of Creation"

"Coded by Co-Evolution and Interfusion"

If one wants to illustrate it in a somewhat simplified way, one gets the following picture:

Coded by World and Cognition	Coded by the Nagual of Creation
1 st Reality-Generator	2 nd Reality-Generator
<p>Here "world" is objectified dualistically (rationally).</p> <div style="text-align: center;"> </div>	<p>Here "World" is objectified noetically</p> <div style="text-align: center;"> </div>

With today's Coding-Strategy one gets a Mix of real-Reality and "relative-Reality" (Hoffman) ... so different grades of Truth, based on Recognizability and Objectifiability.

Franck: Yes, that is clear to me: the Fitness of the Mind generates the Fitness of our Survival ...

Keno: ... yes, but also the other way around: the Fitness of Survival generates the Fitness of our Cognitions (Hoffman: "Fitness beats Truth").

This ... so far extremely successful Coding-Strategy ... is based on the fact of a narrowed Fitness-Strategy. We as Humanity have not yet been able to develop a suitable and popularly-efficient system for the production of Co-Evolutive Consciousness. This means: our narrowed Fitness-Strategy prevents us from Instrumentalizing the Unknown and the Non-objectifiable:

**We have no mental Instrument
for Cooperating with the Unknown-Nagual.**

The Unknown-Nagual remains, using George Spencer-Brown's linguistic system,

**the absolute
"Unmarked-Space."**

It can possibly be represented as follows:

Franck: This seems to be getting very abstract or theoretical now. But let's get started anyway!

Keno: Thanks.

- 1.) We need the transition from Evolution to Co-Evolution ... so the Transition from the current 1st Axial-Age to the 2nd Axial-Age.

Franck: Yes, I can agree with that by now.

- 2.) For this transition it is necessary that we liberate the 1st Reality-Generator as much as possible, from its

Religion of Truth.

We need a Meta-Consciousness, which can take all forms of the Real into itself and make them operable. It follows:

**Without Mark Zuckerberg's
Initiative for the Metaverse ...
i.e., VR / AR and IR ...
we would not be able to mentally empower
ourselves to organize the
Change from Evolution
to Co-Evolution.**

Franck: Yes, but still, about three-quarters of people surveyed in the U.S. oppose Zuckerberg's Metaverse.

Keno: Yes, because they don't yet know what kind of progress they will get.

Franck: You leave me speechless!

Keno: Why? Overcoming the Absolute in the Form of Truth (which is ultimately a remnant of the religious " Power of the Holy" (Joas)) allows us to make significant Spiritual Progress.

I know that you see it differently. For you, the next Spiritual progress lies in the increase of our intelligence ...

Franck: ... which is why I am in favor of AI ...

Keno: ... but from my point of view it will not be a higher development of our cognitive intelligence whatsoever that will bring us forward, but the development of a Praxeology of Co-Evolution that can be used by all Humans.

And this Praxeology is based on the following pillars:

In other words, without the Hyperverses we will not be able to practice the Change from Evolution to Co-Evolution. And without an Idealistic-Humanism we will not be able to place the Instruments of Co-Evolution at the center of our Society (Society-of-Creation).

It follows: From my point of view, Idealistic-Humanism is not a backward Conception (as you interpret it), but a real Spiritual Progress and an Improvement of our Evolutive-Fitness.

Franck: Let's assume that this perspective will prevail (but I still doubt it), then we should discuss the point about the " Re-Entry" and the "Third as a Space of the Better".

Keno: Yes. First, we should ask what connects Co-Evolution to Emergence. As a suggestion:

Emergence occurs when one manages to instrumentalize the "Unmarked-Space" for the goals of Betterment.

From this follows that one should not only make the "Unmarked-Space" experienceable and usable (what one can describe with George Spencer-Brown as "Re-Entry"), but that one should ... as a continuation of this Re-Entry, so to speak ... program the "Unmarked-Space" for Ideality. In the Noetic-Model, the "Unmarked-Space" consists of:

- ANC
- the Consciousness-as-Something
- Nagual (Now-of-Creation)

Franck: Why Ideality?

Keno: You remember: Ideality calls that Potentiality to itself, which is to turn into a better Reality.

Franck: Yes, Quantum Physics. Ideality is formed by observing ... thus by Intention

Keno: The best (thus intentionally particularly effective) Ideality is the Invention of the

ANC.

The ANC is a Mediating-Consciousness, which can organize Interfusion. Interfusion follows George Spencer-Brown's credo:

**"This game only
works in Twos."**

"In Twos" is Love, Unification, the Common ... We-ness.

This "in Twos" is prevented by the 1st Reality-Generator, which is focused on Cognition through Objectification and Duality. This means:

**The Strategy
of Knowing Better fails
when it comes to
Emergence and Co-Evolution.**

Franck: Is this why you keep pointing out that without the

**Woke-Values of
Diversity and Inclusion**

we will not be able to make this Shift from Evolution to Co-Evolution?

Keno: Exactly.

**The We-ness of
our Society generates
the Ideality that the ANC needs
in order to be able to
generate the next Better-Becoming
in collaboration with us.**

It follows: Our Now of the World can be significantly improved if we combine Emergence and Co-Evolution with the function of Ideality. As a sketch:

The following consequences can be derived from this:

- If we want to live in better Futures, we need a powerful Ideality of Freedom.
- If we want to have an everyday Reality that becomes more and more human, we need a powerful Ideality of Love.
- If we want to have an I that can organize Crossing, we need an Ideality of Nowness. This Ideality is the Third. The key to Nowness of the Third is the Nagual-I, that is, an I that has completed the 1st and 2nd Defluences.

At this point we recognize the Attractor-Set of Noetic:

The 1st Reality-Generator is not able to connect these 3 Attractors with the ANC in such a way that the Processes of a Becoming-Better can develop out of them.

Despite all the Intelligence that the 1st Reality- Generator can organize ... based on the Rationality of Meaning, the Cognition of Reason and the Logic of Thinking ..., despite this Intelligence it cannot provide what we will need as a Priority for the Co-Evolution:

The Spirit of Inventing.

Franck: What does this mean concretely?

Keno: We are forced to invent and activate the ANC (as an imaginary Agent) because otherwise we will not be able to organize a Re-Entry oriented to Co-Evolution.

We are forced to invent those digital Rituals (see Metabliss) through which we can fuse the 3 Attractors of Noetic ... that is, the Idealities of Freedom, Love and Nowness ... with the ANC.

We are forced to invent the Third as

a specific Magic of Becoming-Better,

and as an oscillating Time-Mode that can resolve the usual paradoxical Impasses of Thought-Logic (that creates a Blockage based on Absolute-Truth).

Franck: I guessed it: now it becomes very abstract!

Keno: Maybe. But we have to go through this.

Franck: Why actually?

Keno: Because we (i.e. our 1st Reality-Generator) automatically discredits everything that has to do with Ideality and Love.

Franck: Ideality perhaps may be ... theoretically ..., but Love is now really quite officially a very important Factor in our Culture. Nobody has anything against Love.

Keno: Yes. Love has been downgraded as an "important Intrinsic" to a valuable private matter. That is:

We-ness and Love are not programmed to act as productive Factors for Becoming-Better.

In many Democracies and Societies, the connection between We-ness and Love has been properly repurposed into a

Concept of Resilience.

Franck: We should discuss that in more detail.

Keno: Gladly.

We have a "Society-of-Coercion" because we have oriented our Today and our Futures toward

the Power of knowing better.

That is, hierarchized cognition and knowing better feels responsible, as far as the Quality of our Now and our Future is concerned:

**We currently do not have
a societal-System that can
provide a fair Democratization
of the Betterment of our Future.**

Franck: And this is bad?

Keno: Yes. It is toxic to a Democracy in which the ANC ... as discussed ... is becoming more and more self-activating. Much of our Conflicts and Divisions comes from this Source.

Now, if the real Now-Reality is permanently deteriorating (which, as I said, leads to the ANC activating itself more and more), then a mixture of Protest and Anger is building up in the Collective-Consciousness of Society.

Franck: Is what you call "the real Now-Reality" really as bad as you make it out to be? I have my doubts about that.

Keno: Good. Let's take a look at that:

Franck: Resilience as a problem factor? That's new to me.

Keno: Yes. Resilience tells people, "If you become strong, you will become happy!" Meaning:

The Elites use the concept of resilience to secure their power status and their associated privileges.

This leads to a problematic (and depressing) double bind with the following content:

**"You have no chance
but use it."**

When the collective Spirit of Society is in this slant of social energies, there can be virtually no dedication to the Spirit of Invention. In other words:

**When the collective Spirit
is primarily shaped by
repressive energies of power,
the 1st Reality-Generator
becomes the
"Savior of the Situation."**

**But then no
Magic of Becoming-Better
will be able to be developed.**

Franck: Hm. Not an optimistic perspective. So again, the question: What to do?

Keno: And again, the same answer as before: bet on the Teenagers. And bet on the Woke-Pioneers. And bet on the Establishing of the Hyperverse.

If the Hyperverse is properly conceived, it will develop into a powerful

Creation-Generator.

This generator will continuously be able to
produce

the Spirit of Invention

... Bottom-up ... through CCC (Collaborative Crossing Creativity) ... tied into a digital Rhizome-Sphere.

Franck: What makes you so sure of that?

Keno: What is it ... the Spirit of Invention? Following the "Laws of Form" by George Spencer-Brown (1977) we can make the following statements:

1. Every Observing (= A) ... thus every form of Objectification ... automatically generates an " Unmarked-Space ", i.e., an additional Space of Consciousness (= B), which is excluded from Observation, and which contains the currently Non-Observable, but also the in principle Non-Observable (= C), e.g., the Nagual.
2. As a person one can align the Process of Observing (= A) to this additional (excluded) Space of Consciousness (= B). That is the completion of a Re-Entry (= D).

3. If one aligns his Re-Entry (= D) to the in principle Non-Observable (= C), then automatically that arises, which one needs for the completion of the Re-Entry (= D), namely the Noetic Effect-Unity of Freedom / Love / Nowness.
4. To be able to generate this Effect-Unity in our Consciousness itself, we need the Invention and Activation of an Autoetic Consciousness, called ANC.
5. The ANC is that invention which is necessary for the Spirit of Invention. It is the invention of a benevolent and helping mediator, which integrates the Consciousness as Something into our Observing (= A). In this sense, the ANC acts as an "imaginary Agent" that qualifies our Consciousness of Something in such a way that a Cooperation between Mind and Free-Nagual can happen. Thereby Nagual-Resonances arise. In this way Co-Evolution (= E) becomes feasible.
6. The ANC to be invented is the opposite of logic. "Logic is timeless" (Gábor Paál). The ANC is imaginary because its intrinsic-time permanently oscillates in a Third and as an active Third (true / not true / the in-between). Its Time is the eternal Oscillating:

**The Being of Becoming is
permanently identical with
the Becoming of this Being.**

This Third is the cooperating Nagual ... the Now-of-Creation, which from the outside (interpreted by the 1st Reality-Generator) looks like a fluid Conglomerate of Paradoxes:

**The Nagual is all that is
without being what it all is.**

7. The oscillating intrinsic Time of the Third can be experienced by us Humans as the

Bright-Ecstasy.

8. In the Nowness of the Third, the Consciousness of Something and the Consciousness as Something unite.

The "Space" that makes this Unification possible and organizes it as Interfusion consists of the Interactions of the Idealities of Freedom (Diversity) and Love (Inclusion).

In the Nowness of the Third, the Now-of-Creation (Nagual) becomes the Creator of the Now-of-Our-World (Tonal). This is the accomplishment of Co-Evolution (= E).

The Nowness of the Third is therefore

**the Nagual-Magic
of Becoming-Better.**

9. If it is possible to permanently fill the "Space" of Interfusion (see 8.) with the Nagual-Processes of Co-Evolution (= Shared-Nagual / = F), a permanently qualifying

Source of Becoming-Better arises.

**The Becoming-Better becomes
the permanent Partner of our Life.**

10. If the democratic Societies, which have built their collective Spirit on the typical Western Values, want to have a better Future, they will have to empower themselves to develop a

Society-of-Creation

to be established and fostered. This Society will be determined by the following factors:

11. As a person, one can align the Process of Observing (= A) to this additional (excluded) Space of Consciousness (= B). This is then the Accomplishment of a Re-Entry (= D).
