

Co-Evolution
HOW THE HYPERVERSE MAKES OUR MIND THE PARTNER OF CREATION

- ① We live in a society of knowledge. Our Elite is an Elite of Better-Knowledge. Our secret Worship is, "Knowledge begets Truth." Our Ideology claims, "Better Knowledge begets better Consciousness."
- ② This glorification and instrumentalization of the knowledge factor is based on the old (religious) Myth-Set, which connects the following orientation concepts: the Beyond (God, etc.), the Absolute and the True.

Accordingly, the best Knowledge is the absolutely true Knowledge. As D. D. Hoffman, John C. Lilly and others have analyzed, this concept of true Knowledge is based on a very odd mixture:

- ③ The 1st Axial-Age, in the final phase in which we are living, continuously exploits this strange mixture, which can be called "aimless certainty" ...
**nobody is really knowing the ropes,
but everybody knows the Truth of our World.**

We connect our Cognition Strategy to the Survival-Program, which we code as "My-Life." That is (A)

And at the same time, the result of (A) ... that is, the Production of Cognition and knowledge ... has the mental inherent dynamics that every "Draw a Distinction" (George Spencer-Brown) creates that Border, that performs two functions:

- The process of objectification produces a subjectively clear and stable knowledge of the world. World" thus arises as a process (= tonal) which develops in the arrow of time ... placed between past and present ... that being which is for us "the real world".
- The Border also becomes the worldly part of the world. Thereby the "Unmarked-Space" becomes (stably) present, but without becoming present in our consciousness (Mind).

The Consciousness as Something (Unmarked-Space) is thereby prevented from emerging in our World-Consciousness (Tonal) as a Non-World, i.e. through the Now-of-Creation (Nagual).

We are currently mentally unable to manage a

Nagualization of our Tonal ...

i.e. the massive influx of the Now-of-Creation (Nagual) into our Now-of-the-World (Tonal). We would experience this as "Chaos" and "highest Risk of Disorientation". So we would experience our Survival as being threatened.

That means: The production of the Border is B ... i.e. Orientation through Knowledge is a protection from an unwanted Nagualization.

④ This is accomplished through the 1st Reality-Generator which follows the concept of:

Credible Tonalization combined with the instantaneous and simultaneous exclusion from the Nagual.

This is "Fitness beats Truth" (Hoffman) ... accomplished on the Basis of Construction, Perception and Objectification: the Intelligence of our Innovations and Progress thus follows the Survival-Program.

All in all this means:

**The operating system
of the 1st Reality-Generator
constantly executes
the model of "aimless certainty"**

- ⑤ This is good for the shaping of our evolution in the 1st Axial-Age, especially in the present modern age, i.e. the

Epoch of Knowledge
Age of Cognition.

But this program, towards which in the meantime our whole culture and society is very consequently aligned, has an essential disadvantage:

**The 1st Reality-Generator
is incapable
of developing
the 2nd Reality-Generator.**

- ⑥ Why not? Because the operating system of the **1st Reality-Generator** constantly processes **Ⓐ "Fitness beats Truth"** and simultaneously **Ⓑ "Knowledge creates Borders"**. But subjectively we are not aware of the thereby resulting **Aimless-Certainty**, because we automatically **authenticate Knowledge as Truth** (see 1).

- ⑦ Because our mind generating Aimless-Certainty by means of **Ⓐ + Ⓑ**, which we encode as our cognition and our cleverness, our mind has no more spiritual access to

**The
inner Dynamic of Creation**

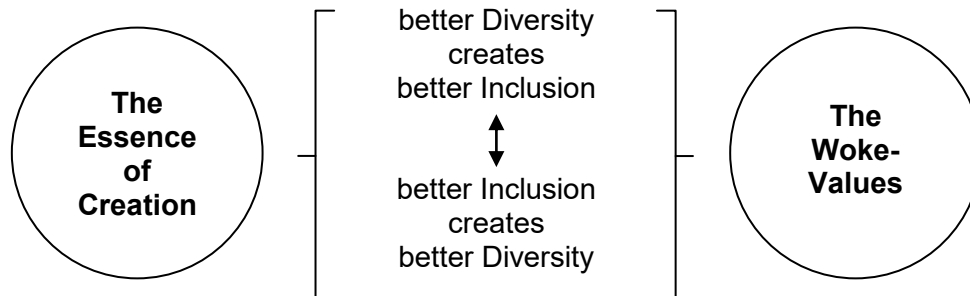

**The
inner Compass of Creation.**

This inner Compass consists of the Essence of Creation. Specifically:

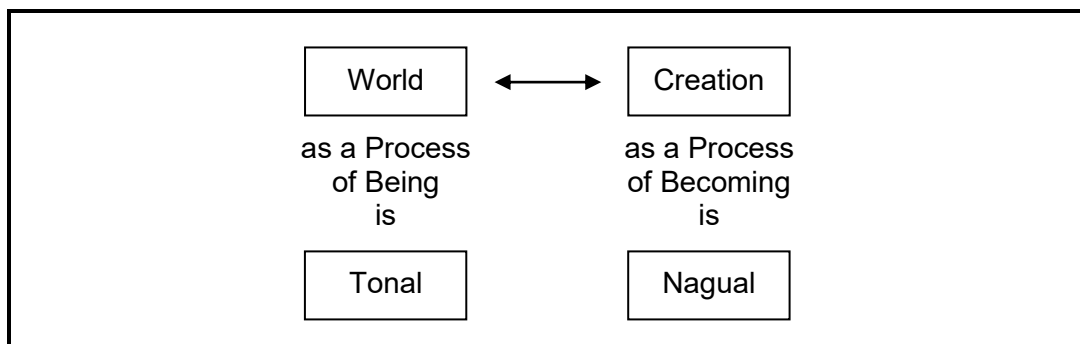

- 8 Because we are currently in the now expiring 1st Axial-Age of Evolution, in Transition to the 2nd Axial-Age to Co-Evolution, ... we will be forced to connect the Essence- and the inner Compass of Creation with our Waking-Consciousness.

The Factors of this Compass are currently being made societally relevant by the Woke Pioneers ... thus

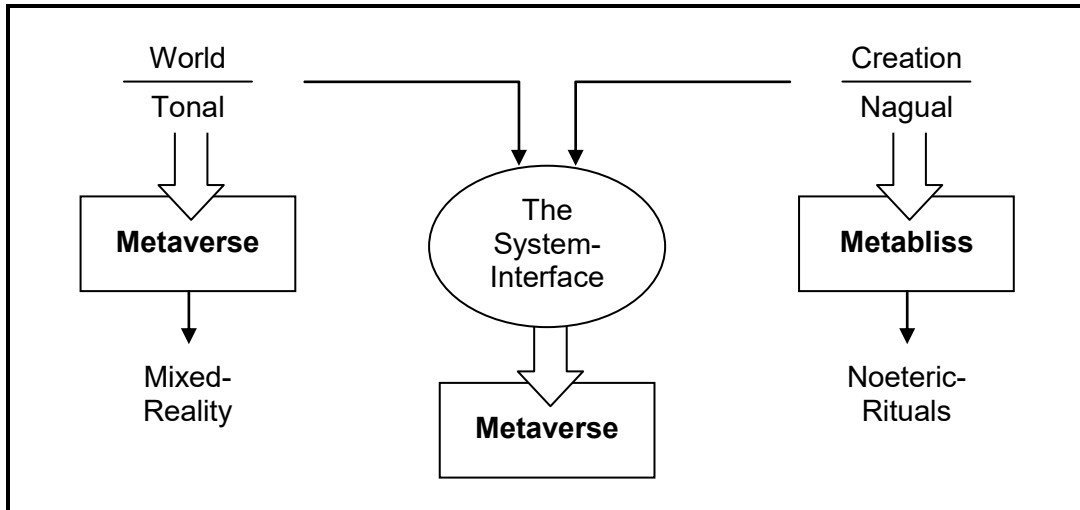

- 9 In order to integrate the Essence of Creation into our Waking-Consciousness, we need a new System-Interface for World and Creation (= Mind-Cards) as well as for Identity and Creation. As a sketch for this:

So we exactly need what our 1st Reality-Generator is consequently avoiding, i.e. the Nagualization of our Tonal.

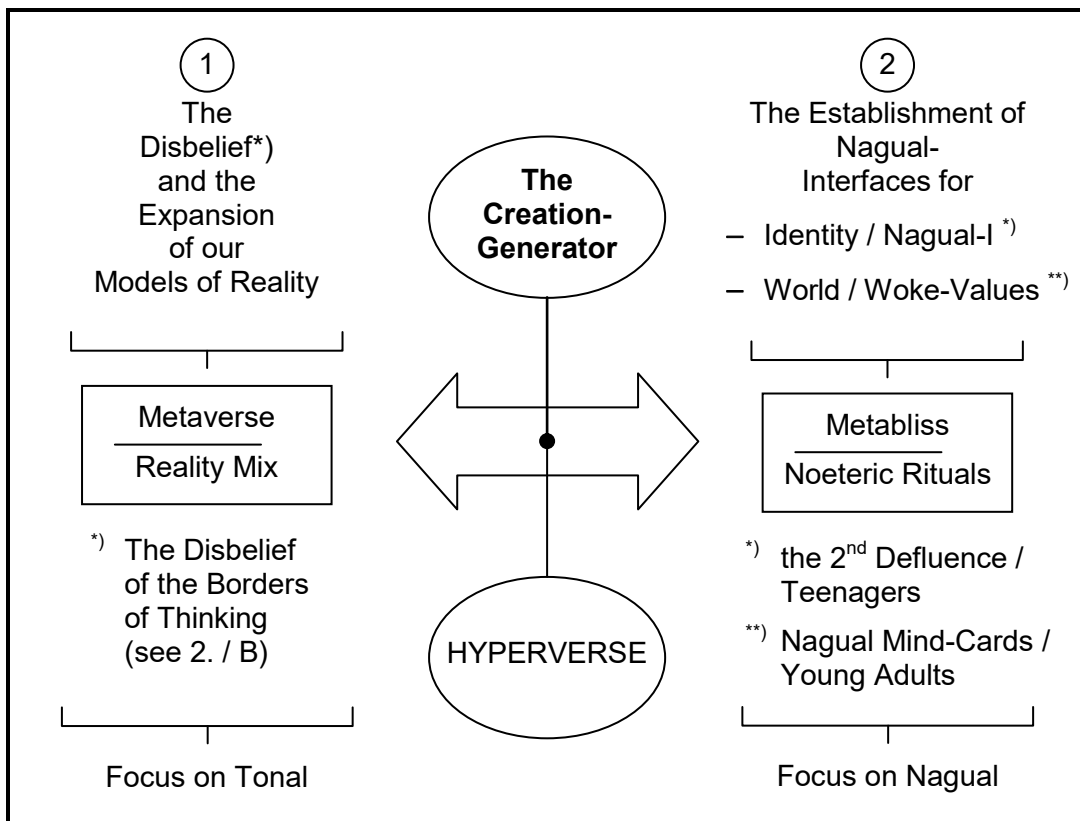

- 10 Without this new System-Interface we humans will not become able to consciously wanted and fully affirmed organizing this Nagualization of our Tonal (called "Sophoria").

The Inventions of Digitality ... primarily Internet, Social Media and the Metaverse initiated by Mark Zuckerberg, as well as the concept of the Hyperverse ... are the foundations for the establishment of such a System-Interface. As a sketch:

11 At the Core of this System-Interface, which will successively lead our Mind to a 2nd Reality-Generator, is the Creation-Generator.

This Creation-Generator organizes its function through the following instruments:

- 12 Metaverse, as a technical-Technology, will take on the task of enhancing and innovating the Reality of the Tonal. Metabliss, as a neural-intrinsic Technology, will take on the task of integrating the Reality of the Nagual into our Tonal Reality.

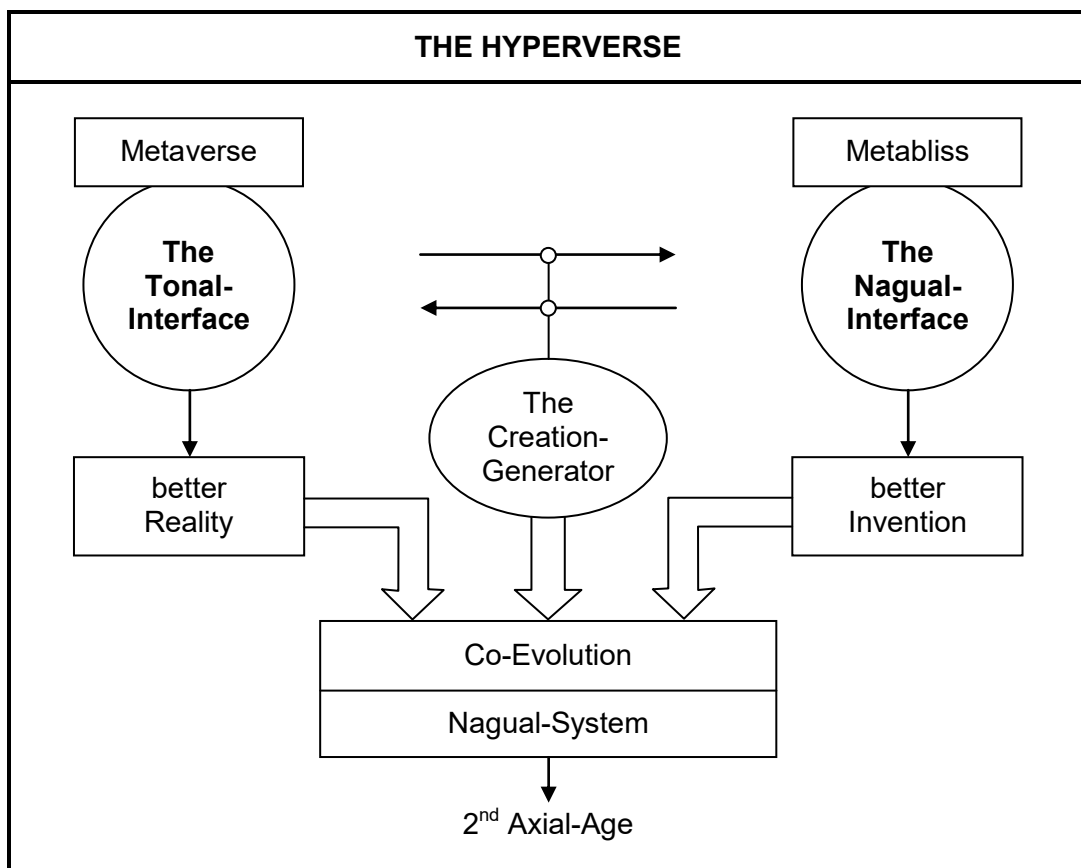

Metaverse uses the design possibilities of Digitality for the development of an Interfusion-Competence of the Mind in relation to the

Metabliss employs digitality for the development of

the Nagual-Interface.

In a Hyperverse both Interfaces interact as follows:

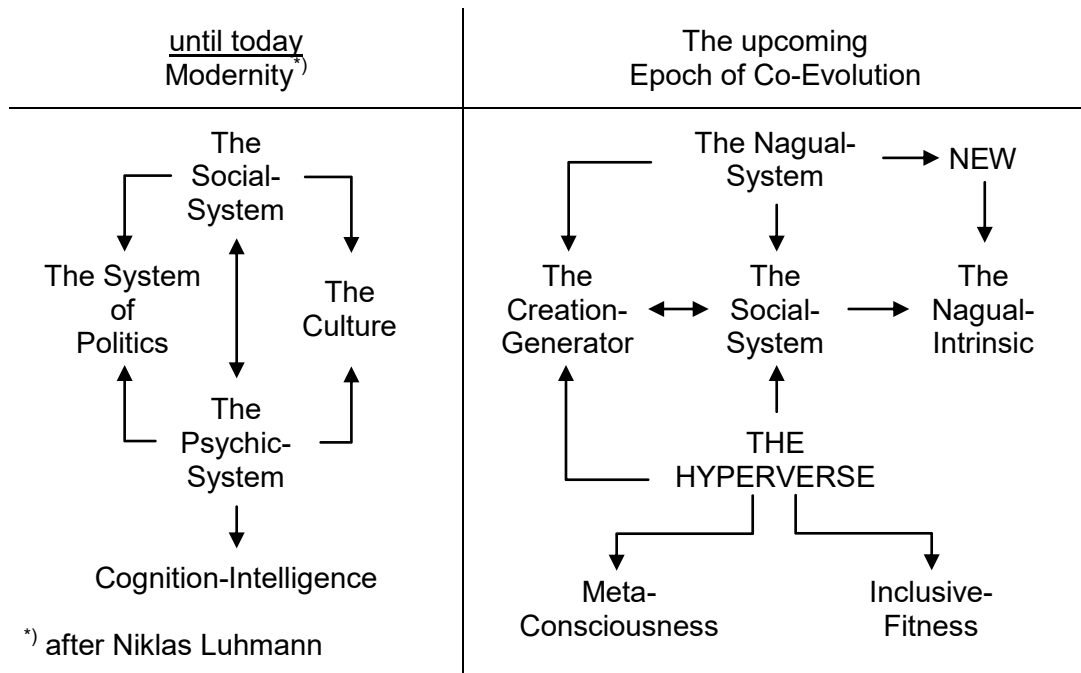

- 13 The aim is to establish a socially integrated

Nagual-System.

"Better Reality" is the prerequisite for "better Invention". And "better Invention" is the prerequisite for "Better Reality".

The Hyperverse is thus the operator that can integrate the Nagual-System as a novel and additive system into the architecture of the society of "modernity".

The Hyperverse thereby gets the task to improve the current system dynamics of modernity.

14) Currently, the political system has begun to function as a kind of " Meta-Regulator" (because of the climate crisis, among other things). In this context, two developments can be observed that are problematic for the connection between consciousness and shaping the future:

- A - The STE-Complex (Science - Technology - Economy), which has a specific-autonomous system-reference, is increasingly forced into the differently oriented system-reference of politics. At the same time, the system of politics (partly integrated into the official policy of education) increasingly clearly begins to become the Regulator of the official Culture.
- B - The connections between politics and culture and the 1st Reality-Generator (Rationality / Cognition / Logic of Thinking) prevent the development of an alternative (free) process, that can lead to a Meta-Consciousness.

When the advances of human Consciousness are tied to politics and culture, they are inevitably tied to the elitist power of Better-Knowledge. This blocks the development of Inclusive-Fitness.

The developments of (A) and (B) will intentionally and also instrumentally be unable to develop and implement a Nagual-System that has its operational base placed in a Hyperverse. A substantial portion of the regulatory acts planned and deployed by governments against GAFAM have their hidden justifications here.

Dictatorships regulate platforms for reasons of power. Democracies also regulate platforms for reasons of power. Only the verbal justifications are different.

- ⑮ The Nagual-System is functionally designed for Co-Evolution by Interfusion. The objective for this alignment is:

**The development
of a Meta-Consciousness
that frees us Humans from
the Dominance of Survival Fitness.**

Accordingly, the transformation at hand is:

**From Fitness of Survival
to
Co-Evolution of Consciousness.**

Without the Implementation of a Hyperverse, which organizes a permanent interaction between the Tonal-Interface of Metaverse and the Nagual-Interface of Metabliss, this transformation ... which can be understood as the beginning of the 2nd Axial-Age ... cannot be realized.

- ⑯ This permanent interaction between Tonal and Nagual is a Praxeology. Abstract theories, which are aligned to knowledge gain (Better-Knowledge) have little effectiveness in that field. Meaning:

**The Integration
of Human-Consciousness
into the
Practice of a Co-Evolution is
a task for the Majority of Humanity.**

This Co-Evolution is based on the Now of Creation. So Nagual. And this Nagual corresponds with the All-One. Therefore applies:

**The accomplishment
of Co-Evolution needs
as much Majority as possible:**

**The All-One interacts
neither with Theories nor with Elite.**

- ⑰ What the Practice of Co-Evolution requires of Society is:

**From the Spirit of Survival
to the Spirit of Creation.**

That is, from Fitness to Nagual. As an overview:

FROM FITNESS TO NAGUAL
<ul style="list-style-type: none"> ▪ It is about the Enhancement of Creation in which we live as "Children of Creation". ▪ It is not about the survival of human beings in the Creation given to us.

In other words, the program of survival shifts to a higher level:

**Survival through
the Improvement of our Futures.**

**The organization of the improvement
through the Nagualization of
our Human-Consciousness.**

⑱ Such a perspective clearly contravenes the Judeo-Christian and also Gnostic understanding of creation ... dogmatically narrated as "divine creation".

This means: the western canon of values, on which among other things our conception of democracy is built, will probably have major problems with the idea of Nagualization.

At the moment there are two answers to the (rather subliminal) incipient stages of Nagualization, which is presumably activated by the "Autonoetic-Consciousness" / ANC (LeDoux) (Hypothesis of Noetic).

Answer 1: The green-ecological paradigm.

The climate crisis as evidence of a "sinful" misconduct of human-driven progress.

Here, the narrative of "original sin" is combined with "man's principled commitment to redemption" before God.

Tenor: We have gone too far.

Answer 2: Cyborgs replace Humans

This is also (despite all AI and Technology) a deeply religious narrative. Exemplary, for example, is the thesis of the recently deceased scientist James Lovelock ("Gaia hypothesis"). He states:

**Machines, Computers and Cyborgs
will inherit us Humans.**

**The Organic (Humans)
will be tolerated by Cyborgs,
but the Improvement of Humanity
is no longer an orientation Goal for Creation.**

Answer 1 relies on punishment (Jewish: the wrathful God). Answer 2 relies on a hyper-intelligence that does not care about the spiritual and worldly becoming of humanity. As formula:

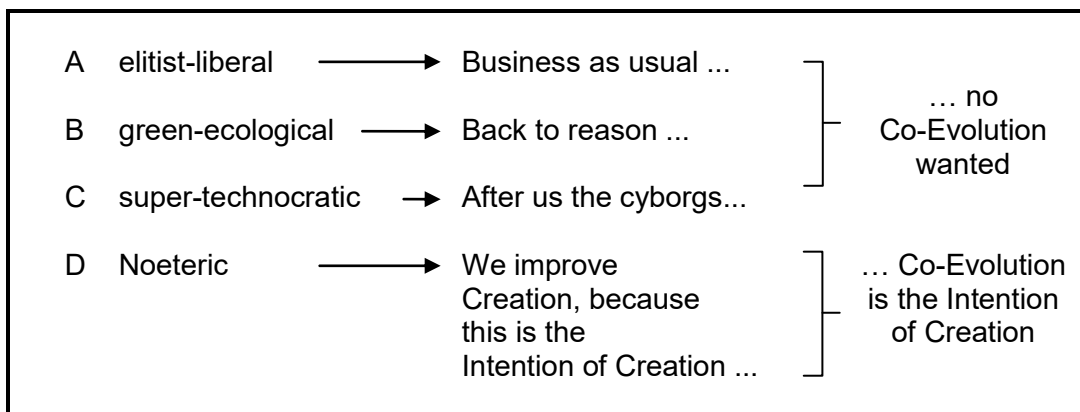

**either Wrath
or Disinterest.**

Answer 1 ("back ... we have gone too far") has a deliberate Renunciation of Co-Evolution, which will probably lead the green-ecological Movement, now permeating the political system, to the defeat of a rather embarrassing impasse. Without Co-Evolution, we will not be able to deal with the Climate Crisis.

In the case of answer 2 ("Cyborgs replace Humans") there will also be no Co-Evolution, because Co-Evolution is based on the Nagualization of the Human-Consciousness. But if Humans ("the Organic" / Lovelock) are only tolerated as a marginal Phenomenon,

**there can be no consciously evolved
Awareness for Nagualization ...
thus no Meta-Consciousness ...
no Inclusive-Fitness.**

19 So there are 4 paths:

20 Upon which ideas and concepts is the Noetic path based? Here the following statements or hypotheses:

- There is an endless (infinite) Creation, to which we have no access in principle. This Creation is for us Humans and for the Nature the "Mother-Universe" (Joscha Bach).
- Our own on eternity aiming universe "was deliberately created by a Spirit in the Mother-Universe" (Bach). This smaller Universe is our Cosmos.
- The Cosmos created for us "exists for our benefit, i.e., the Spirit in the Mother-Universe wanted to create us in some way and wanted us to know what was going on" (Bach).
- "It makes sense that the Creators would want to build our Cosmos in a way that resembles theirs" (Bach).

It follows:

- Mother-Universe has accomplished its "Cosmic Intention" (Einstein) through the Creation of our Cosmos. This is an Intention aimed at the Evolvement of a Consciousness in this Man-Nature-Cosmos, that at some point will allow the Bearers of this Consciousness (Human Beings) to "experience what is going on" (Bach).
- This "experiencing of what is going on" is practiced Co-Evolution:
- The Spirit (Consciousness) of the Human-Evolution recognizes the "Spirit of the Mother-Universe" (Bach) as its origin ... its future ... and its task.
- Eternity (as a form of finite time) will occur when the Spirit of Human-Evolution has improved (or sublimated) the Spirit of Creation (who created us) in such a way that ... as a result of shared co-operative processes ... a Future evolves that transforms itself into an Eternal-Source of Becoming-Better (Shared-Nagual):

**When the Becoming-Better
turns into its own Eternity,
the Meaning of the "Cosmic Intention" (Einstein) is
fulfilled.**

On the Metaphor-Level of Noetic, this is voiced as follows:

DANCING STARS
<p>There is always someone waiting for you.</p> <p>There is always someone talking with you.</p> <p>There is always someone dreaming with you.</p> <p>There is always someone dancing with you ... dancing in the heaven of all dancing stars.</p> <p>You are the dancing star dancing in the silver light of all dancing stars.</p>

21 The Noetic Model assumes that we possess our Consciousness because Creation wants us to be able to perceive (recognize) and embrace (love) it. Building on the "Cosmic-Intention" we can develop our Consciousness to be more and more in line with the "Cosmic-Intention" and thus with the Nagual:

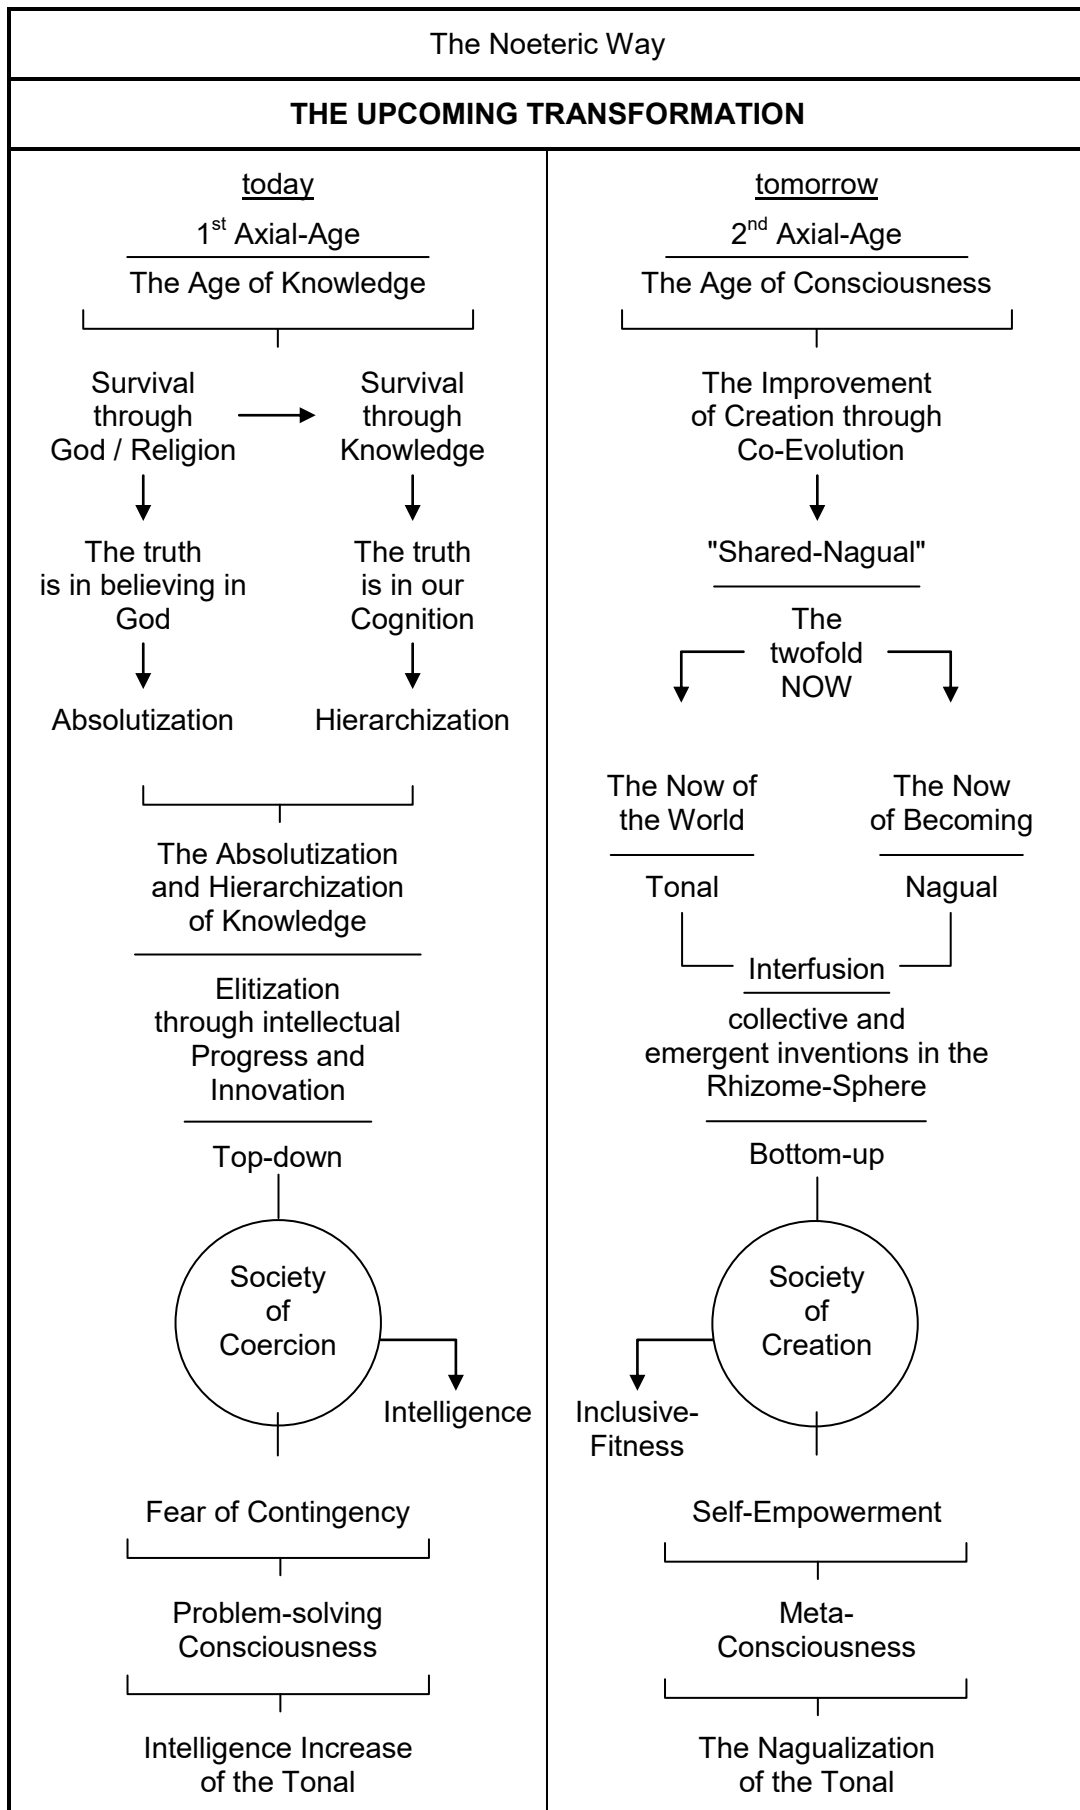

The Nagualization of our Consciousness through practiced Co-Evolution is the fulfillment of the Cosmic-Intention.

Co-evolution is thus not a spiritual pastime, a "weird crackpot idea" or ... as a politician once put it ... "pure devil stuff". It is a Necessity for our Survival at a higher evolutive Level.

At the same time it is the Transition from the 1st Axial-Age to the coming 2nd Axial-Age. The criteria for this transition are:

- from Knowledge to Consciousness
- from Survival to the Improvement of Creation
- from Truth to Invention
- from Knowledge to the " Shared-Nagual " (the Third)
- from the Elitization of Knowledge to the Rhizomatization of Consciousness
- from problem-solving Consciousness to Meta-Consciousness
- from the Society of Coercion to the Society of Creation

The following overview deepens these statements:

22

The characteristic of the coming 2nd Axial-Age will be that the Future 2 / 3 will increasingly influence our worldly now (= present). We will be forced by it to shape the quality of our current life by the precursory production of better futures. From this follows:

If we suffer from our present, we basically suffer from the failure of our futures.

If we want to positively shape futures that we are largely unable to know, we need

a spiritual Partnership with Creation.

This Partnership becomes practicable through Co-Evolution. The following overview describes some essentials for this:

<p>THE HYPERVERSE</p>
<p>ESSENTIALS FOR THE UPCOMING EPOCH OF CO-EVOLUTION</p>
<p>1.- Every process of perceiving our world is a process of inventing by Interfusion.</p> <p>2.- Every object / event, that is perceived, only exists as "Icon of Interface") (Hoffman) in the Space of our Consciousness <u>of</u> Something (= 1st Reality-Generator / Objectification).</p> <p>3.- But there also exists the Consciousness <u>as</u> Something. (It represents the Now of Creation / Nagual.) It cannot be integrated into our Consciousness <u>of</u> Something (thus cannot be objectified).</p> <p>4.- But the Consciousness <u>as</u> Something (Nagual-Consciousness) has a special interface, which is aimed at us Humans and our spiritual Evolution as the "Intention of Love". This is the ANC ... "Autonoetic-Consciousness" (LeDoux).</p> <p>5.- This ANC can be experienced and utilized by us Humans, i.e. we can program it for</p> <p style="text-align: center;">Co-Evolution by Interfusion.</p>

- 6.- This programming needs an opening of the normal Mind-Cards of Reality (1st Defluence) ... connected with a new kind of Rhizome-Sphere, based on Noeteric Rituals, which are directed to the accomplishment of a 2nd Defluence and to the establishment of a 2nd Reality-Generator (Mind-Cards of Emergence).
- 7.- The opening of the existing Mind-Cards of Reality can be perfectly accomplished by the Metaverse.
- 8.- The establishment of the new Mind-Cards of Emergence can be accomplished by the novel system of Metabliss.
- 9.- The Hyperverse*A) unites the functions of the Metaverse (= Reality-Mix) with the functions of Metabliss (= Noeteric-Rituals).
- 10.- Through this Unification a worldly-daily Interfusion can be organized, which in principle makes all People of this World to Participants and Co-Creators of the Co-Evolution (the end of Top-Down-Elite and Better-Knowledge).
- 11.- Through this concept, a new kind of Democratization of the shaping and creation of our futures will prevail, that is based on Bottom-up and the Rhizome-Sphere (= the New Spirit for Democracy 2.0).
- 12.- The Bottom-up Dynamics and the creative use of the Rhizome-Sphere can generate the so-called Third, i.e. that spiritual Space of Nowness, in which a continuous Birth of the Better can be accomplished (Emergence / Inclusive-Fitness)*B).

*A) The Hyperverse is not a new Theory of Cognition, but a Praxeology of Life that follows the following criteria:

- practicable for all People worldwide
- Complete Integration into the mundane Daily-Life
- Pleasurable to use without Time-Space-Borders and at no cost

*B) "The "Interface-Theory states that Space and Time are not fundamental aspects of objective Reality, they are simply Data Formats for Fitness-Messages, i.e., Formats developed for the Compression and Correction of such Messages. This means:

**Objects in Space-Time
are not Aspects of objective Reality,**

but simply Messages about Fitness, encoded in an Icon-Format specifically adapted to the needs of Homo Sapiens."

Donald D. Hoffman
"The Case against
Reality" / 2019
