

CYBORG OR HYPERVERSE? WHAT WILL TAKE US FURTHER?

Keno Oneo in Conversation with Jochen Franck

Franck: At the very end of our last conversation ... you stated, "If we want to have a better World, we don't need better Intelligence ... we need a better Humanity." That sounds sympathetic at first glance, but is quite problematic at second glance.

Keno: I actually had expected you to disagree with this statement, or at least to question it strongly. Given that, where is the core of your criticism?

Franck: It took us humans about 4 billion years to be able to develop our present intelligence for progress ...

Keno: ... yes, that's right ... it was a long way ...

Franck: ... and I believe that our successful progress intelligence can definitely be enhanced by our Mind ... specifically by combining smart thinking and the new digital possibilities

Keno: You are thinking of AGI and also the Cyborg-Vision?

Franck: Yes. My model is actually quite simple: we have now become so intelligent that we can develop a technical-algorithmic Super-Intelligence. This type of intelligence might even qualify our existing progress intelligence in such a way that we will ... eventually ... get the

Future-Intelligence and Inclusive-Fitness

that you so often call for.

Keno: I understand you're not arguing against Future-Intelligence and Inclusive-Fitness. Right?

Franck: That's right. I want us to go down the road to Cyborg-Intelligence.

Keno: I would have a different take on that. Let us perhaps look at an overview first:

Franck: Yes, that is your argument: The Betterment of our Humaneness is the Prerequisite ...

Keno: ... and therefore also the cause ...

Franck: ... for Co-Evolution. And based on that, you assert that Co-Evolution is not a process of Progress, but a novel Quality ...

Keno: ... or Level ...

Franck: ...of Intelligence. Right?

Keno: Yes, very true. Progress and Evolution are based on the principle described by Donald D. Hoffman as follows:

**Fitness
beats
Truth.**

The Alternative that is now becoming apparent ... meaning the Investment in a better Humaneness ... follows a different principle:

**Nagual
qualifies
Consciousness.**

Franck: The Nagual replaces Fitness. And Truth is replaced by Consciousness. Hmm. That's a pretty radical perspective.

Keno: Maybe. But we should consider the following:

**If we as Humanity succeed
in making the Nagual
the Qualifier of our Consciousness,
we won't need Cyborgs.**

Franck: Well, many experts have a completely different view on this. I just finished studying Frank Wilczek's book, Fundamental Ten Keys to Reality (2021). He is a Nobel laureate in physics ...

Keno: ... yes, of course I can't keep up with that! ...

Franck: ... and he writes (I quote verbatim):

"It may take a long time before universally usable autonomous artificial intelligences (AI) reach human levels. But the motivation to develop them is strong and progress unstoppable, so it will probably be within a century or two... Thanks to their superiority in speed of thought, perceptual power, and physical strength, cyborgs and masterminds will replace the homo sapiens as the vanguard of intelligence... It is possible that genetic engineering will produce creatures with superhuman abilities. They will be more intelligent, stronger, and (I hope and expect) more empathetic than today's humans."

Keno: Yes, yes ... I know these visions. There are numerous of them. But ...

Franck: ... what bothers you about them? ...

Keno: ... sadly, it's just Religion. An inhuman Version of Religion. A modern Myth of Redemption, based on the ancient Judeo-Christian dogma-core of original sin and the principle Obligation of Redemption. And this in combination with the ... already several times discussed ... old Myth-Set, i.e. the Beyond, the Absolute and the Truth. In addition, the ancient fear of chaos of man (contingency as destroying fate).

All rather simple-minded Narrations ... far away from the necessary Self-Respect, Self-Empowerment and Self-Love of Humans to their own Humanity.

The Times of Myths ... and here I follow Jean-François Lyotard ... is over, thank God. Only anxious people need old religious Myths. And only desperate people need this technical kind of Redemption.

Franck: Ok, what do the future generations need?

Keno: Well, they need that which will only evolve once one lets the Myths die. And what is that? Basically, the Opposite of Fear. So Freedom, Love and Nowness:

- Freedom from Addiction to Truth (Creation instead of dead Certainty).
- Love for the Creation (Nagual), whose "Children" we are.
- Nowness as the Intelligence of the Third (Shared-Nagual)

The Woke-Values already represent these first Values and Foundations of the coming Co-Evolution.

Franck: You claim that the Woke activists will initiate the Co-Evolution? Really?

Keno: Quite simply. The Woke-Values are right (but the current actionist enforcement strategies are very often problematic). The Woke-Values secularize the Autozoetic-Consciousness (ANC), i.e., they force us to put the Power of Differentiation in the service of a much better Unification (We-ness and Humaneness).

So if Wilczek, as a physicist, hopes that the "superhumans" called cyborgs should become more "empathic" than we humans, this is, in my view, merely the combination of an academic hubris with the old-religious dogma core.

Let's go back to the core of the conflict:

Thesis 1: Better Progress-Intelligence can only exist if we succeed in developing a better Humanity. Better Humanity can only exist if Humanity becomes able to nagualize its Being (nagualizing the World and the I). Keyword: Nagual qualifies Consciousness by Co-Evolution.

Thesis 2: Better Progress-Intelligence can only exist if AGI and Cyborg succeed in producing an Emergent-Consciousness superior to that Consciousness which we humans are able to create for our own Co-Evolution.

Basically, we recognize two very different paths here:

The Cyborg-Vision	The Hyperverse-Vision
<p>Man invents those AGI-Machines which produce that Consciousness for us that we need for the Improvement of our Futures (Exclusive-Fitness).</p>	<p>Man as "Child" of Creation unites with the Now-of-Creation (Nagual) to develop a new kind of Inclusive-Fitness (Co-Evolution as basis)</p>

Franck: Thus Exclusive-Fitness ... based on the Cyborg-Vision or Inclusive-Fitness ... based on the Practice of a Co-Evolution organized in the Hyperverse. Is that how you see it?

Keno: Yes. Inclusive-Fitness means: we co-evolve with the Nagual an "eternal" source of becoming better. Keyword:

Shared-Nagual.

This "Shared-Nagual" belongs to the Nagual as well as to us. It continuously produces the respective Consciousness that we Humans need in order to be able to make ourselves and our world better.

Exclusive-Fitness is different: Together with our Intelligence we develop those Intelligence-Machines which are superior to us in Intelligence. So we follow the Progress-Intelligence of AGI-Machines.

Franck: Do we follow the Intelligence of AGI or do we follow the Nagual-Consciousness that we Humans create?

Keno: It is not about the Consciousness of Something (Coded Icons), but about the Consciousness as Something (the Nagual-Consciousness). If we want to create the Future 2 / 3 already today, we need

Emergent-Consciousness.

Franck: What exactly do you understand by this?

Keno: It is a Consciousness that is not expectable and also not plannable. It is a Consciousness that has to be born, as a Child of Potentiality, so to speak.

Emergent-Consciousness is not generated by observing the World or by Thinking about the Future (Predictions):

**Emergent-Consciousness
is generated by combining
Courage (Radical Hope) and Ideality.**

Only Humans can generate this kind of Courage and Ideality. What we therefore need is

an Idealistic-Humanism.

Franck: That is, more Humaneness. I can understand that. But Idealism as a Generator of Emergent-Consciousness? To me, that's inconceivable. For me Idealism is pretty close to "Illusion" or "Retro-Romanticism". In other words, impractical and inefficient.

Keno: The Idealism in question here is different from historical Idealism. It arises from the Nagualization of the I and the Mind-Cards (Reality-Generator). So by the 2nd Defluence. If the human being recognizes, experiences and loves himself as a "living Nagual", the spiritual Competence for Idealism automatically unfolds in him. (He practices it through his real Life.) And at the same time he gets something like an inner Order for Radical-Hope (Courage). It follows from this:

**If one wants to create Cyborgs,
which can produce
Emergent-Consciousness, one will fail.**

Why? The raw material from which one can create Emergent-Consciousness is the original relationship between the human-worldly Consciousness (Marked-Space) and the Nagual Consciousness as Something, which we Humans in principle cannot recognize, because it is the "Unmarked-Space" (George Spencer-Brown).

The following three Categories exist in our worldly Consciousness of Something:

- 1 The things and events of the world (Icons of objectification)
- 2 The things that are only intrinsically and not physically existent (Qualia, e.g. the experience of colors)
- 3 The now of creation (Nagual) and its "agent", i.e. the auto-noetic consciousness (ANC).

If one tries to shape category 1 in such a way that one can qualify category 2 (and this is what AGI-Machines are all about), then one will have to develop a concept that is programmed to cause a kind of leapfrog into the emergent through a consciously intended over-complexity or critical self-dynamics. AGI Intelligence generates its Emergence through a deliberate creative Crisis of Over-Complexity.

Franck: In my words ... the AGI programs must be given the freedom and potency to behave as creators.

Keno: Yes, it is like that.

Franck: And why should this not be possible?

Keno: Quite simply:

**The AGI-Machines and the Cyborgs
cannot become Creators,
because they are not
"Children" of the Creation.**

Franck: And why should we Humans beings be able to become Creators?

Keno: Because we carry category 3 inside us. Because we are Nagual-Beings, but we do not know yet how to integrate this "Nagual-Being" into our worldly Waking-Consciousness.

Franck: So we are already carrying everything inside of us. But we do not yet have a Consciousness that leads us to where this "Everything" is waiting for us. Correct?

Keno: Yes. We have the 1st Defluence through which we are given a Consciousness of Ourselves in the World and of the Being of the World (see Tomasello's research on the subject of "Cumulative Cultural Transmission").

But we, as Humanity, have not yet been able to develop a System that can connect our Worldly-Consciousness with the Now-of-Creation (Nagual) ... that is, a System for the 2nd Defluence.

Franck: Implicitly you are saying that we will have to develop the 2nd Defluence ...

Keno: ... but what can become functional only now through Digitality and Metaverse ...

Franck: ... so that we can socially develop the Practice of Co-Evolution, the Novel Future-Intelligence and Inclusive-Fitness?

Keno: Yes. The core of everything we have discussed so far is placed here:

THE QUESTION OF ALL QUESTIONS
<p>Do we succeed in developing and establishing a practicable System for the 2nd Defluence?</p>

What do we recognize? It is we humans. Only we humans. If we can provide humans with a stable connection with the inner nagual (e.g. ANC) and the free nagual in the context of a 2nd Defluence, then this Nagualization of being human will be able to "deliver" those Emergent-Consciousnesses that AGI and cyborg cannot. Neither "in a century or two" (Frank Wilczek) nor in the short term. As a sketch:

The Cyborg-Vision	The Hyperverses-Vision
<pre> graph TD A([AGI-Machines]) --> B[Self-Generating algorithmic learning phases] B --> C[The generation of Emergent-Consciousness through intentional over-complexity in a digital system that can program itself autonomously] </pre>	<pre> graph TD A([WE Humans]) --> B[Die 2nd Defluence] B --> C[The Nagualization of our I and our Mind-Cards for the World generates Emergent-Consciousness] </pre>

In other words:

We, as Nagual-Beings, are the best Cyborgs in the World.

Franck: Apparently, you assume that the AGI concept of critical-productive super-complexity will not be able to generate the desired digital Hyper-Intelligence.

Keno: Yes - your assumption is correct.

Franck: But couldn't it be that Emergent-Consciousness is digitally called or generated ... and that is by the Appearance or Provocation of a Over-Complexity ... a kind of creative Chaos. This Over-Complexity would then be something like what was the so-called "Primordial-Soup" of Creation many billions of years ago.

Keno: Yes, it might be. But then Creation, which would be originated from it, would be different than we Humans will need it.

Franck: But our description of "creation" is perhaps also only fantasy and illusion. Who knows?

Maybe Creation is even interested in the fact that ... finally! ... the cyborgs are invented, because by this the "Cosmic-Intention" gets a more intelligent partner. Then your model of the Co-Evolution could be accomplished on a higher level of intelligence ... completely in the interest of Creation therefore.

Keno: Let's check again what is "real" for us Humans. This could be helpful:

- Are World, Earth and Cosmos observable and existent? → Yes, they are existent.
- Is Creation as Evolution real existent? → Yes, it is existent.
- Are we as Humanity existent? → Yes, we are existent.
- Is the experiencing of Time and Future existent? → Yes, it is existent.
- Am I as a living Being, as a Human-Being and therefore as a conscious "I" existent? → Yes, it is existent.

So 5 x yes. The next question is: Who or what organizes this Certainty of "it is existent"? Who is the maker of "it is existent"? The answer is:

**That which is
existent for us
becomes existent
in our Consciousness.**

Franck: So far I can follow. But what follows from this?

Keno: If our Consciousness is the Truth of the Existent, then the Emergent-Consciousness sought by AGI can also become present only in this Truth of the Existent. It follows:

**Whatever Consciousness
the Cyborgs will generate ...
it will not be able
to become present
in our Consciousness.**

To put it a bit exaggerated: The cyborgs would have to make us humans into zombies without consciousness first, so that they can transfer their cyborg consciousness into us afterwards.

Franck: That's an interesting perspective. You say that Cyborgs will probably be able to produce Emergent-Consciousness.

Keno: Yes, might be.

Franck: But you also say that this Cyborg-Consciousness cannot become present in our Consciousness ...

Keno: ... yes, that it cannot become our Reality ... it remains "non-existent" ... whatever it is.

Therefore ... from my point of view ... the next stage of our spiritual Evolution will not be called "Cyborg", but "Nagual" ... Consciousness as Something ... invented by our Consciousness of Something.

Franck: Please explain.

Keno: The Nagual is an Invention, so to speak, an Invention for inventing. Since the Nagual ... whatever it could be ... cannot be objectified ... meaning it cannot be made "worldly" ..., it should be invented in such a way that it can become useful for our worldly development. In other words:

**We have the spiritual Freedom
for inventing the Nagual.**

**As "Children of Creation",
we have the Freedom for
the Betterment of our World
by Inventing the Better.**

We are free in this aspect to utilize and to exploit the "Space of the Spirit" ... and as John C. Lilly wrote, that is free from the Borders of Truth. Lilly argues something like this:

- In the Space of our Spirit, there are no Borders.
- But we create Borders, e.g. through thinking, experiences and cognitions ... i.e. through what we consider to be "true".
- These Borders (Borders) of the True are Forms of Faith.
- These Borders can be overcome because there are no Borders at all in the Space of our Spirit.

Basically, we recognize the following alternatives here:

Franck: In my words, in the Cyborg-Vision, we Humans become the Partner of the Cyborgs. In the Hyperverse-Vision, we Humans become the Partner of the Nagual.

Keno: Yes, very well expressed.

Franck: The Cyborgs are our technical Invention.
The Nagual would then be our Noetic-Invention.

Keno: Yes, it is like that. But there is an important distinction:

- The Invention of the Cyborgs is focused on a specific AGI intelligence and generates the hope that this kind of Intelligence could generate the desired Emergent-Consciousness that we cannot conceive.
- The Invention of the Nagual is focused on mentally instrumentalizing the currently unavoidable Border in the Space of the Spirit in such a way that Emergent-Consciousness can be generated ... through a Co-Evolution that takes place in the "Third".

Franck: This sounds very abstract. So: where do you specifically see the difference?

Keno: Yes, let me be more precise:

- A - In the Cyborg-Strategy, the Emergent-Consciousness is created by the Hyper-Intelligence of the AGI.
- B - In the Nagual-Strategy, the Emergent-Consciousness is co-created by the Consciousness as Something ... as a "Shared-Nagual", which we call "the Third".

Franck: Where do you see more opportunities ... with A or B?

Keno: With B. It could happen, as I said, that the Hyper-Intelligence of the Cyborgs (A) generates a kind of Consciousness, which in principle cannot become present in our Human-Consciousness.

By the way, something like a sequel of the famous touring test is emerging here ... a "Noetic-Test", so to speak:

**Can the Cyborg-Consciousness
become a creative Partner in
our Human-Consciousness?**

From my point of view, I would use both strategies in parallel. With variant (A), we will certainly be able to reap a great harvest ... even if the Cyborgs fail the Noetic-Test.

With variant (B), it is not at all possible that it will not work:

**The use of the Nagual
is guaranteed to generate
Emergent-Consciousness.**

Franck: Wow. That's a very big promise! Can we critically analyze that some time?

Keno: Gladly, please go ahead.

Franck: How do you know that Consciousness exists as Something? It is, as you say yourself, absolutely not objectifiable. So you can't claim that there is this "phantom". It is not in our Consciousness. Therefore it is not suitable to become our spiritual Partner for the Idea of Co-Evolution.

Keno: This is a legitimate (and also frequently asked) question. To answer it, I have to ask you to dive with me a little bit into the Model of Noetic.

Franck: Oh yes, I would love to.

Keno: When we started our Neuro-Lab "Mind-Design" about 30 years ago, we were focused on the following question:

**Is there a
Quality of Consciousness
that is able to
make our Mind more productive,
more creative and innovative,
and at the same time
making our I happier?**

**Is there a
Super-Consciousness?**

In other words, as a formula: Happy "I" and a successful Mind.

That was the starting point. Building on this, the following statements can be made:

1. The sought Super-Consciousness only has its existence in our Mind, if we invent it as the Nagual.
2. The Nagual ... that is the Now-of-Creation ... is that Invention which lets us invent better.
3. It is a matter of inventing about what is not present as Truth, i.e., that does not create a Border to the "Space of the Spirit" (Lilly). So it is a matter of inventing an Invention that constitutes its Presence in our Consciousness in such a way that it does not become present as a "Border of Truth". As a formula for this:

**It exists
in order not to exist.**

This is the Third.

**The Third is
the Nowness of the Paradox.**

4. The 1st Reality-Generator, which is based on the 1st Defluence, automatically creates that Border, which separates us from the Third, by its mental processes. So it will be a matter of developing an additional 2nd Reality-Generator.
5. The 1st Reality-Generator (and with it the 1st Defluence) has built up a very efficient Neuronal-Network in the brain, which is primarily programmed for

Fitness by Truth (FBT).

This is the Zone-of-Conversion in the brain.

This zone transforms the incoming signals of now-being into the reality of certainties (objectifications, evaluations, predictions, etc.).

6. The 2nd Reality-Generator that needs to be established is based on another Zone that needs to be established in the Brain:

The Zone-of-Emergence.

This Zone is also a Neuronal-Network. But it has a different function:

**The incoming
Signals of the Now-Being
and the real lived Life
in the real World are
integrated into
the Now-of-Creation (Nagual).**

7. So the 2nd Reality-Generator has the task to develop a far-reaching Nagualization, consciously as a Complement to the Certainty-Effects of the 1st Reality-Generator. As a sketch:

Franck: What exactly is nagualized?

Keno: Here are 4 areas:

1	The Nagual as My-I	2 nd Defluence ----- Essencing	It's all about the Teenager
2	The Nagual as Mind	Mind-Carting	Create the Dispositives of the Better
3	The Nagual as Life	Fulfillness	Live in the Nowness of Freedom and Love
4	The Nagual as "The Third"	Shared-Nagual	Harvest the Intelligence of "The Third"

These 4 areas of Nagualization create what we have described ... in terms of META and Mark Zuckerberg ... as follows:

**It is about building a
Monopoly for the Better.**

The basis for this Monopoly is based on the following premises:

- It's all about the Teenager
- The Chain of all Generations
- Lifelong Loyalty
- Shared-Nagual

Franck: As you know, I automatically cringe at the word "Monopoly". That word scares me. It terrifies me. I don't want a Monopoly! Absolutely not!

Keno: I can understand that. But if you take a closer look, you and I are living in a Monopoly that can be called a

Society of Coercion

... a rather invisible, because ideologically intensely penetrated,

Monopoly of Power.

Franck: You leave me speechless! You plead in the context of Noetic for more Freedom, Love and Nowness ...

Keno: ... i.e., I plead for the Secularization of the Autonoetic-Consciousness (ANC), as we can recognize it in the first beginnings by the
Woke-Values ...

Franck: ... yes, maybe, but where do you see the current Monopoly of Power then?

Keno: It's pretty invisible as a Monopoly, because it's so successful as a Monopoly and Ideology, because it's supported and permanently reinforced back by an unmanageable number of Promoters, Agents, Institutions, Media and believing followers.

Franck: But if it is accepted and carried by so many people and Institutions, then it is not a Monopoly after all.

Keno: An Ideology can become a "hard" Monopoly. Even if there are only a few thousand supporters and people accepting it.

From my point of view, the "Society of Coercion" ... that is, a Society and Culture programmed almost unilaterally for

the Power of Better-Knowledge

... is a Monopoly ... a Monopoly of Differentiations.

Franck: But is it really bad, then? Or wrong? Or harmful?

Keno: Let's put it this way: the Advantage of the Power of Knowledge is that this Power has replaced the historical Power of the Holy. So loosely based on Donald D. Hoffman:

**Science
beats
Religion.**

The Epoch of the Power of Knowledge has ... primarily in the 19th and 20th centuries ... led to an Explosion of Innovations. Without this explosion, there would be no Digitality. And it is precisely this Innovation of Digitality that is now beginning to wrest its Authority from the Power of Better-Knowledge ... and faster than the privileged Elites of the Knowledge-Power would like. Keywords here:

- The Bottom-up-Creativity in the digital Rhizome-Sphere disempowers the "holy order" (Hierarchy) of Knowledge.
- Humanity becomes the Source for a better Consciousness and for a better Future-Intelligence.
- The desired "Better Humanness" will not be enforced by the Intelligence of AGI of the Cyborgs, but by the combination of Metaverse (Reality-Mix) and Metabliss (Noetic-Rituals) in the Hyperverse.

Franck: Don't you see all this too absolutely and also too pessimistically?

Keno: A counter-question: Are we living in the time of the Great-Quake ... that is, in the Epoch of a Transition?

Franck: Yes, I think so. But basically, we just have the situation that we cannot solve the many current problems satisfactorily, so that avoidable crises arise from it. As I said, I still believe that we certainly have a Crisis of Thought and Intelligence (which is why I have since become a fan of AGI). But we certainly don't have a Crisis of Better-Knowledge.

Keno: Not a Crisis of the Power of Better-Knowledge? Let's look at a little overview:

Franck: What do you want to illustrate? You claim that a Society and a Culture built on hierarchized Better-Knowledge will automatically be repressive, don't you?

Keno: Indeed, I see it this way: Because of Digitalization ... primarily because of the Billions of Users of Social Media worldwide ... a Morphic-Field has emerged, which now unites more and more with the Presence of the ANC. The first result is the manifestation of the Woke-Initiatives:

**We want a Society
in which the Intelligence of Differences
is permanently deployed,
for the Growth of Human-Dignity.**

Franck: But there is nothing against it! Dignity ... more dignity ... what intellectual would object?

Keno: Now you are simplifying your argumentation a bit too much. Let us analyze more precisely:

1. What will increase the Intelligence of the Differences in the Future?
Answer: The Nagual.
2. What will increase the Growth of Human-Dignity?
Answer: The Nagual.

Thus, we can see that we need the Nagual ... that is, the Now-of-Creation ... in order to finally (!) positively relate or unite Differences (Innovation) and Unification (Dignity).

Currently it is the case that the Dignity of the Human-Being is that raw material which too many people need in order to be able to fulfill the officially proclaimed Obligation for Resilience ... which basically requires Bravery ...:

**People are brave
because they have Dignity.**

Franck: Maybe, but how can one change that? Can it be changed at all?

Keno: Yes. The key to Becoming-Better is the Invention and Programming of the Nagual ...

Franck: ... stop. An Invention cannot be programmed.

Keno: Yes, it works very well indeed. In terms of Efficiency ... Efficiency for the Practice of Daily Co-Evolution.

But the process of Nagual-Programming will only be successful if we help Teenagers to develop a happy Nagual-I. This is where it all begins:

**We need Millions
and Billions of Happy-I's.**

Franck: This objective is what we have already discussed under the heading of

Idealistic-Humanism.

Right?

Keno: Yes. We need the dissolution of the old background ... combined with the Invention of the Nagual and a clear commitment to the Self-Empowerment (Dignity) of Man.

Let's briefly touch on this again in keywords. What is it about?

Dissolution	New-Development
<ul style="list-style-type: none"> • biologically conditioned Fear-of-Contingency • the Core of religious Dogma <ul style="list-style-type: none"> → Original-Sin → Obligation of Redemption • the old Myth-Set <ul style="list-style-type: none"> → the Beyond → the Absolute → the Truth • Power as wisdom for Evolution <div style="text-align: center; margin-top: 10px;">  <p>The old Background</p> </div>	<ul style="list-style-type: none"> • The Nagual as an Invention for co-evolutive Inventing • Meta-Consciousness as Reality <ul style="list-style-type: none"> → 2nd Defluence / Happy-I → 2nd Reality-Generator / Future-Intelligence • Self-Empowerment / Dignity • Inclusive-Fitness / Idealistic-Humanism • 2nd Axial-Age <div style="text-align: center; margin-top: 10px;">  <p>The New Horizon</p> </div>

In this context we get to clear statements:

- Without Hyperverse we will not be able to organize the New-Development.
- Without Hyperverse we will not be able to make our Humanness the Source of Emergent-Consciousness.
- Without Hyperverse we will not be able to realize the entry into the 2nd Axial-Age.

Franck: And this brings us back to your statement at the end of our last conversation:

**If we want to have a better World,
we need a better Humanity.**

Keno: Yes, thanks for reminding us of that. Following on from that, we can say:

**Anything that leads us
to a better Humanity,
is evolutively efficient.**

**Whether it is through
Cyborg-Intelligence,
it is good.**

**Or if it is done
through the
Co-operation of the Nagual,
it is also good.**

Franck: Whoops. But you don't really believe that going the Cyborg path is going to lead us to this "more Humanity." That's the way it is, isn't it?

Keno: Yes. There are three aspects here:

1. I believe that the Cyborg-Strategy cannot develop and offer Emergent-Consciousness that will become so present in our Consciousness that we can become more human as a result of it. The Cyborg-Strategy will not pass the Noetic-Test.
2. But even then, if Cyborg-Intelligence did work (maybe in 100 years?) ... even then it would violate ANC and the flourishing of Woke and Dignity. Most people will oppose it because it would make the factor of Suppression (Coercion) even more severe and suppressive.
3. Even then, if ... as Wilczek speculates ... in "a hundred to two hundred years" Cyborg-Intelligence could work ... even then it would be more than useless. Why?

Cyborg-Intelligence would be too late. The present Society of Coercion is the result of the 1st Axial-Age. If we cannot establish a Society of Creation ... that is, no entry into the 2nd Axial-Age ... we will no longer have Democracy ... to be more precise:

**Our Democracy 1.0
will not be able to survive
without an Idealistic-Humanism.**

Franck: Pretty gloomy picture. And this from you, the eternal optimist! That amazes me.

Keno: I know everything will be good ... because of Co-Evolution and the Nagual as a Partner for the Creation of the Becoming-Better.

Franck: How do you know that?

Keno: When one permanently lets the Now of one's Nagual-I cooperate with the Now-of-Creation (Nagual), the Nagual is whispering to you:

"Everything will be good."
