

WHAT CAN THE HYPERVERSE ACCOMPLISH?

WE NEED A DIFFERENT CLASS OF INTELLIGENCE

Keno Oneo in Conversation with Jochen Franck

Franck: In our last conversation, you stated that we are gradually drifting into a new kind of crisis, which you called an Evolution-Crisis. I have been thinking about this and the following has not become clear to me: Is it a Crisis of Thought or is it a Crisis of Consciousness?

Keno: It's a Crisis of Future-Intelligence. We lack an Intelligence for the Future 2 (the Unknown) and for the Future 3 (the Not-Yet-Possible). And we lack this particular intelligence because with our Mind ... the 1st Reality-Generator ... we are not able to get in touch with Consciousness as Something. To that extent, it is a Crisis that is placed in the relationship between Mind, Thought and Consciousness.

Franck: But we do have consciousness. Every human being has it. Where exactly is the problem?

Keno: We have a consciousness that is extremely consistently programmed, through the 1st Defluence completed in childhood, to objectify the world in such a way that we can survive well. Thus, the 1st Defluence follows a neural program that Donald D. Hoffman has described as follows:

**"Fitness
beats
Truth."**

We construct and encode those "icons" that we need to be able to develop orientation, decision, and action in such a way that we survive, or live as best we can.

Franck: And this program of the 1st Defluence is now wrong?

Keno: No. Absolutely not. We need it. And it will therefore absolutely remain. Our problem lies in the following:

**We have created an
explosion of innovations
in the 19th and 20th centuries,
and each innovation increases our reality space.**

**This creates what we have discussed as
"the New Evolutionary-Reality":**

- **growing Complexity**
- **growing Acceleration**

– **growing Contingency**

The problem with these three developments is that they drastically change our "today" ... that is, our present ... as follows:

We are forced in our " Today " to shape the Future 2 and 3.

Future 1 is primarily a mixture of trend-extension ... i.e. Predictions ... combined with problem-solving blueprints. Our 1st Reality-Generator is programmed to cope with this strategy, through problem analysis, prediction and assignment of plans. This is a very cognitive procedure. And it works.

Future 2 / 3 are beyond both analysis and prediction. Future 2 is dominated by the Unknown, in which Probabilities are dancing. And future 3 is dominated by the Not-Yet-Possible. In general, the following is true:

The cognitive competences of our 1st Reality-Generator fail more and more, the more the Quality of our Destiny shifts to Futures 2 and 3.

Franck: Now your thesis is ... as I understood it ... that it is wrong to rely now exclusively on intelligence ... on making our intelligence smarter through "Better-Knowledge".

Keno: Yes, a large spectrum of AGI ambitions are aimed precisely at this cognitive qualification through algorithmic knowledge.

Franck: And you said in our last conversation that making our Humanness more human will be at least as important. Why?

Keno: The more human our Humanness becomes, the more of "Now-of-Creation" (Nagual) activates in our Mind. In other words:

**Humanness
nagualizes
our I
and our Mind.**

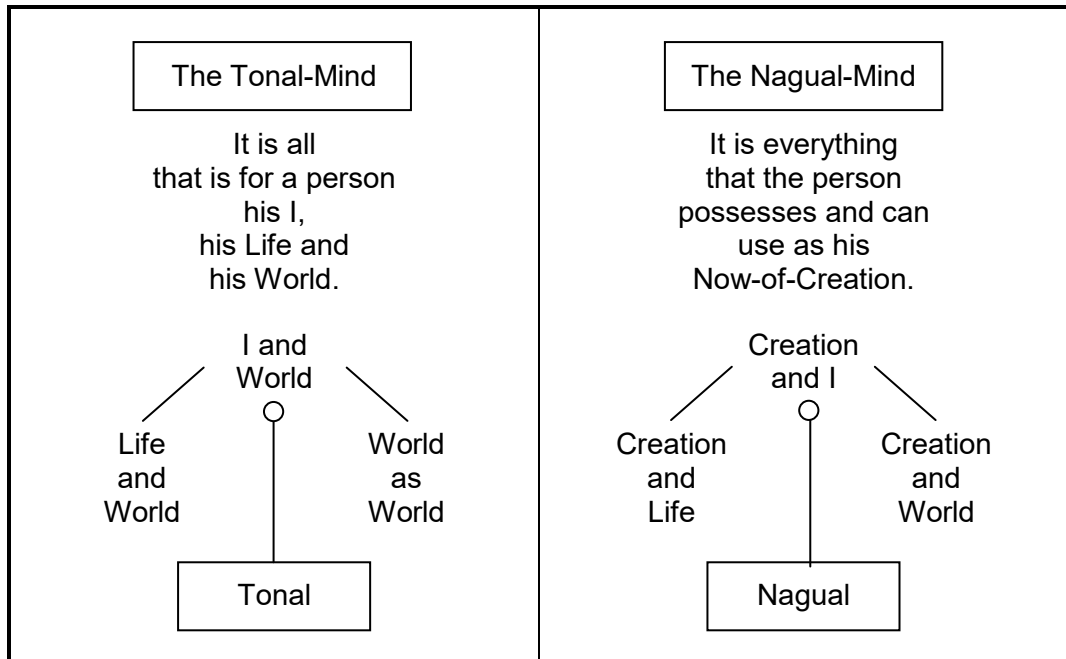

And the more Nagual is in the Mind, the better becomes the Resonance relationship between the Mind and the future, which consists of differently formed Creation Processes. From this follows:

If one wants to successfully create the futures 2 / 3, one needs a Nagual-Mind.

The 1st Reality-Generator, which we all have because it is the result of the 1st Defluence (which we all accomplish in childhood), is not a Nagual-Mind. It is a Tonal-Mind.

Franck: You should specify that.

Keno: Gladly. I'll try a little sketch:

To put it in a nutshell: The Tonal-Mind is part of the World-Present and has only a limited Future-Radius. The Nagual-Mind is predominantly filled with that Nowness, which comes towards us from Creation:

The Tonal-Mind organizes Fitness through Cognition.

The Nagual-Mind organizes the Fitness through Creation.

With the Tonal-Mind of the 1st Reality-Generator we cannot develop a far-reaching and qualified Future-Intelligence. We do imagine that we can develop AGI-Machines that can do something like what can be called Future-Intelligence. But it is about employing the Now-of-Creation in our Now-Tonal.

How much Now-of-Creation can we integrate into our worldly Now?

Franck: So that Nagual which we have available in the Now of our World and Mind is the substance for an efficient Future-Intelligence. Can we put it that way?

Keno: Yes, very well. And that's why it's all about

the Nagualization of our Tonal.

But this Nagualization only works if we make our Humanness more human.

Franck: Why exactly?

Keno: The Human-Being is a Child of Creation. The more Nagual ... as Now-of-Creation ... becomes active in a Human-Being, the more human this Human-Being becomes. Somewhat exaggeratedly said:

**A Human-Being is
only then completely human
when he is entirely Creation.**

Franck: Ok, got it. The Nagual makes Humanity more human. That is your first thesis. And if the Nagual becomes present in this more human Humanness, then this Nagual can cooperate with that Creation which exists in the Futures 2 and 3. That is your 2nd thesis. So it is a matter of man developing a mental concept so that the Now-of-Creation centered in him can cooperate with that Creation which we experience as "Future". That is your 3rd thesis.

Keno: Compliments. Very well described!

From this we can derive a concept with 2 goals:

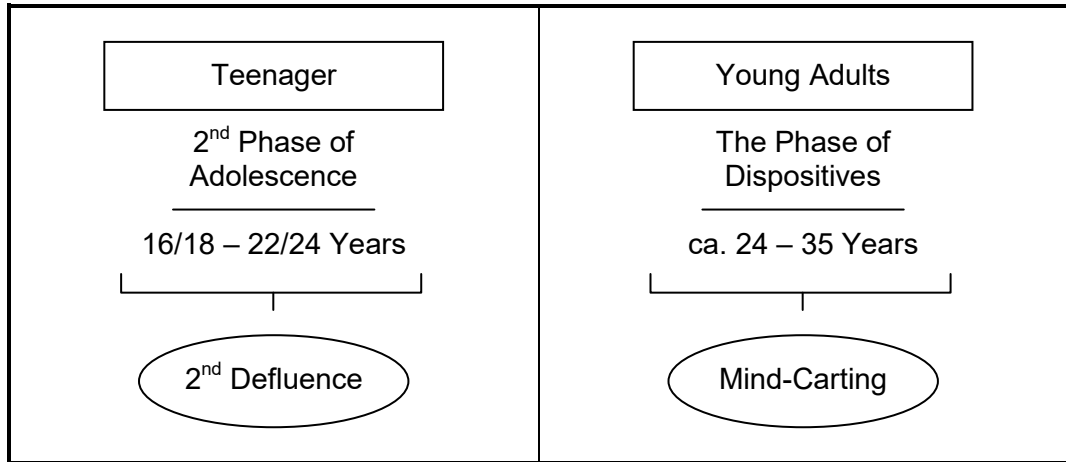

1. Use the Humanness of people to make the Nagual more present and powerful in people.

This Goal becomes attainable through the Organization of the 2nd Defluence ... realized by the Teenagers in the 2nd Phase of their Adolescence.

2. Program the present Nagual concretely on the Cooperation with Creation in favor of an efficient Future-Intelligence.

This Goal becomes attainable through Noeteric-Rituals that build a special set of Mind-Cards ... Mind-Cards that provide the Mind with the Competence for Interfusions. These Mind-Cards are most intensively established in the stage of establishing Dispositives ... i.e. Young Adults up to about 35 years of age.

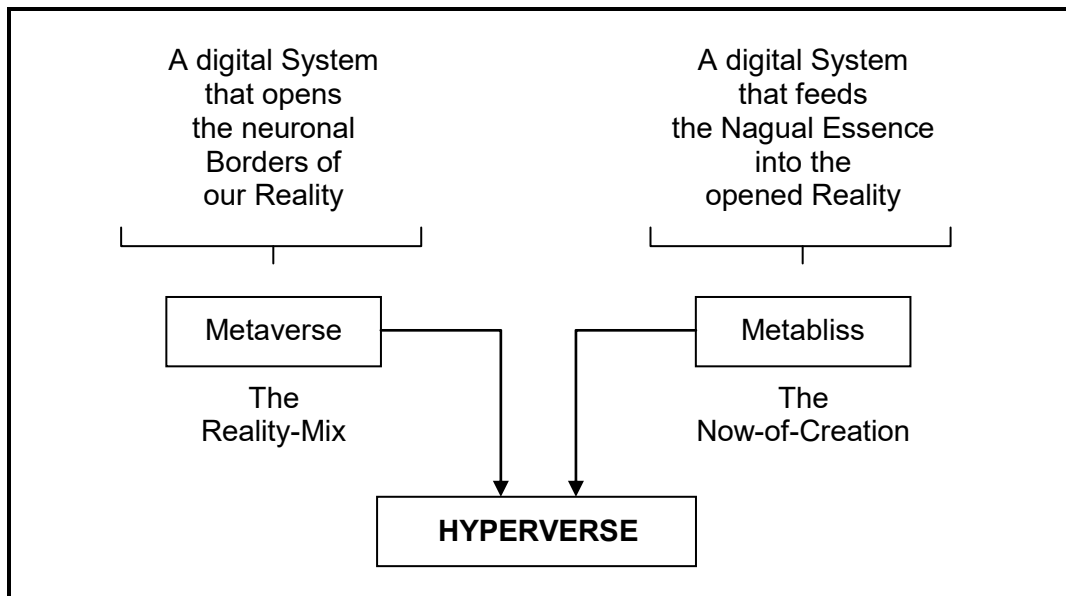

As a scheme:

This is our way to a novel Future-Intelligence, which we will need in order to be able to positively shape the coming Evolution-Crisis. That's all that is needed: the Accomplishment of the 2nd Defluence and the Accomplishment of Mind-Carting.

Franck: That is very provocatively formulated: We do not need more. Merely the 2nd Defluence for the Teenagers and the Mind-Carting for the Young Adults. That's it.

Keno: Yes, that's all we really need! And if you compare that with the extremely ambitious and intellectual developments of AGI, Cyborg and Post-Humanism, then that is both simplistic-pragmatic and very humanely. What does one need? One needs the Hyperverse. As a sketch:

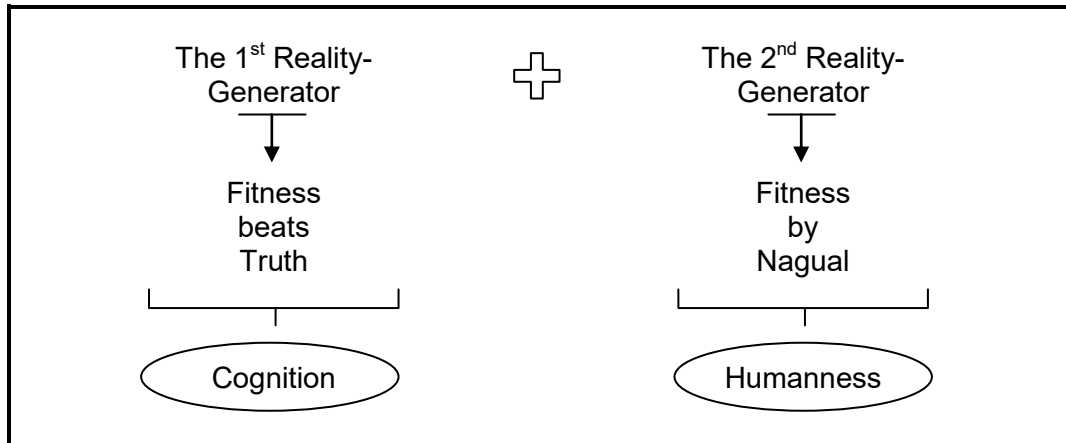

Franck: So you see Metaverse and Metabliss as one functional Unit?

Keno: Yes. Both systems mutually need each other. Metaverse creates the opened Space. Metabliss fills this Space with Nagual. The result is the already mentioned Nagualization of the Tonal.

And only through this Nagualization ... I am quite sure! ... we will be able to switch: from Evolution to Co-Evolution.

Co-Evolution will only become possible, if we manage to activate two different Reality-Generators in a cooperative way:

From this point of view, Mark Zuckerberg's large-scale project "Metaverse" is the key for the development and for the social establishment of the 2nd Reality-Generator.

Franck: With this you indicate that you see a kind of competitive situation ... on one side the AGI-Machines, Cyborg and Post-Humanism and on the other side the project "Hyperverse". Right?

Keno: Personally, I assume that the vision of the AGI experts, which is aimed at replacing the 1st Reality-Generator of man by an autonomous non-human intelligence that can program and intellectually qualify itself, will not work. And I further assume that the digital Hyper-Intelligence will not be able to create the 2nd Reality-Generator.

But we need this 2nd Reality-Generator to be able to cope with the coming Evolution-Crisis. So the AGI, Cyborgs and Post-Humanism can't help us. Here's why:

- It's about Evolution. It's about our very Survival. So we need a Fitness-Strategy for our successful Evolution.
- Our 1st Reality-Generator has been programmed by Evolution to "Fitness beats Truth".
- This Fitness generates in our Mind a "Reality" consisting of those "Icons" we need for worldly and current Survival. Our Cognition ("Perception" / D. D. Hoffman) is therefore a Survival-Cognition (= Tonal). Not more and not less.
- Our Evolution so far has not trained us to perceive the "real

Reality". We therefore live our lives in a "Simulation" of Reality coded (and culturally authenticated) by us. In Hoffman's words:

We live in a relative Reality.

- In essence, it is a Simulation-Reality. This kind of reality is predominantly made up of "fitness points" that have become so well established that we "cumulatively culturally pass them on" (Tomasello) in 1st Defluence (childhood):

**We bequeath
our Simulations.**
- It can be assumed (and there I again follow D. D. Hoffman) that it was not in the interest of the evolution shaping us to develop that cognition which does not belong to the survival cognition. Thus the "not being able to recognize" the real reality explicitly belongs to the biological strategy of evolution.
- The so-called "real Reality" is not passed on in the 1st Defluence because it is not part of our Survival-Strategy. We teach the children and the generations to follow us only the entry into our Simulation-Reality.
- The training of our children cooperates in the 1st Defluence with biological-neuronal programs, which are present "from birth" in the mind of the children: The biological and neuronal functional automatisms and our culture-bound survival cognition thus work hand in hand to produce the most efficient simulation reality possible in the Mind of the coming generations.
- But this also means: This Simulation-Reality does not contain any Strategies for the Recognition and Instrumentalization of the real Reality.
- In the very center of this real Reality is the interaction of worldly Consciousness (Mind) and the Nagual-Consciousness as Something:

Since we exclude this real Reality, we do not know that we Humans are the Miracle of a Creation that accompanies and promotes our human Evolution in such a way that we successively evolve into that Creation that was our Beginning and will be our permanent "Now".

- The now coming Evolution-Crisis is thus a Consciousness-Crisis in relation to the adaptation of the real Reality. From my point of view it will be a matter of developing a 2nd Reality-Generator which enables us as mankind to be able to use an extended and therefore wiser Reality-Strategy.

Franck: From "Fitness beats Truth" to "Fitness by Nagual." That's the expansion you mentioned that we now have to culturally organize. Is that right?

Keno: Yes. Basically, we already have an inkling of what's coming. The following alternatives are emerging:

- | | | |
|--|---|------------------------------------|
| 1. To Continue as before... only more intelligently than before | } | Fitness
beats
Truth |
| 2. The development of a digital Hyper-Intelligence (AGI). | } | Fitness
by
Cyborgs |
| 3. The Establishment of a Hyperverse as a Ritual-System for the Nagualization of I, Life and World | } | Fitness
by
Nagual |

The following observation is interesting: The intellectual and scientific Elite favors alternative 1, i.e. making the existing Intelligence smarter ... smarter thinking.

The nerds (the coming elite?) flirt quite clearly with the 2nd alternative. So shifting Intelligence from Humans to AGI-Machines and Cyborgs.

The 3rd alternative is completely rejected by the intellectual and scientific Elite (with a few exceptions).

Franck: And what do the nerds say?

Keno: They are laughing their heads off. For them, the concept of a "Nagual" ... defined as Now-of-Creation ... is nothing more than "the old rag of God and such" (to quote a literal statement from a nerd).

Franck: Well, there's something to that. For example, if I ask you to list the central Criteria for effective Nagual-Ritualization, it sounds very esoteric and religiously backwards indeed.

Keno: Let's do a test. I enumerate what goes into effective Nagual-Ritualization in the context of the Hyperverse, and you assess that.

Franck: Ok.

Keno: I'll start. Here's what's needed:

1. A digital system that can open up and expand our concepts of reality ... so VR, AR and immersion ... the Metaverse.

Franck: This is definitely not esoteric. This is ambitious digital technology. This is reality.

Keno: 2. The Invention of a "Nagual," i.e., a Now-of-Becoming that can and will cooperate with the human Spirit.

Franck: This is clearly esoteric and, in my view, belongs to the genre of fairy tales with a naive illusionary character.

Keno: 3. The Miracle of Life and the associated Mysticism of Being

Franck: Also clear: fairy tale. Where is the miracle? But nice story.

Keno: 4. The ANC ... the "Autonoetic-Consciousness" ... thus a representative of the Nagual, which causes and maintains the steadiness of the personal Consciousness in the I of every human being.

Franck: Hm. That is difficult to judge. Yes, there is something in my I that I subjectively experience as "immortal" or "supratemporal". But presumably it is merely the old narrative of the "divine soul". So I am undecided on this point. Is there anything else?

Keno: Yes.

5. Love ... defined as an energy that becomes more and more amplified as you give it away without self-serving intentions ... to other people and to the whole world.

Franck: I know it. And enjoy it. Yes, that may be a "real Reality" ... a thing in itself, so to speak. As, presumably, Freedom might also be such an aspect of real Reality.

How is this to be judged? Is it old esotericism? Is it a compensatory illusion? Are Love and Freedom merely Inventions to comfort us?

I believe that this point could be quite "real". Yes, Love and Freedom ... I would judge that to be a real Reality.

Keno: Let us now take stock:

	"I don't know"	<u>Esotericism</u> Fairy Tale	Real Reality
The digital System of Metaverse			×
The Nagual		×	
The Miracle-of-Life		×	
The ANC	×		
<u>Love</u> Freedom			×

Franck: And what does that tell us?

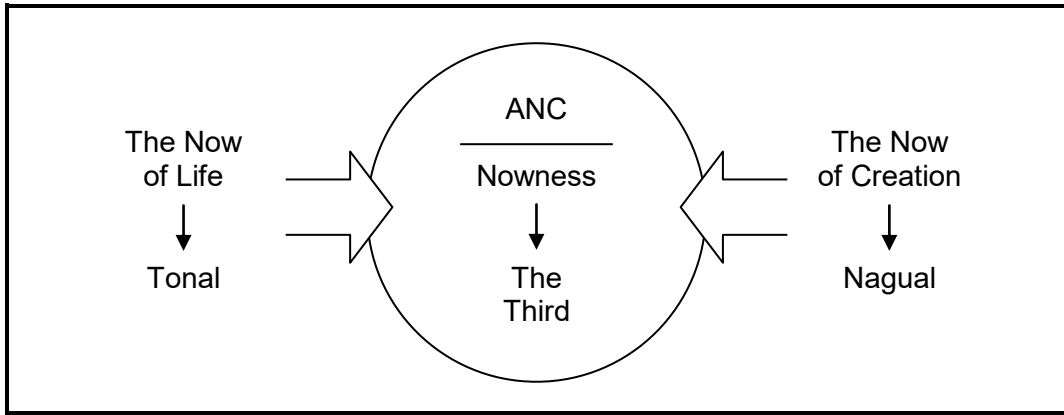

Keno: It tells us that you as a person have been programmed pretty well or even too well for "Fitness by Truth". All that we humans need for qualifying our consciousness (i.e., for producing Inclusive-Fitness) ends up in the trash can of esotericism and fairy tales for you. That means:

- Your cognitive Intelligence is too closely connected to Survival-Cognition and Reality-Simulation.
- You use "Truth" in order not to have to deal with the real Reality.
- The logic of thinking of your 1st Reality-Generator can only accept and allow that reality which is "logical" for the 1st Reality-Generator. This is what Michel Serres criticizes as " Invariance for Teleonomy".

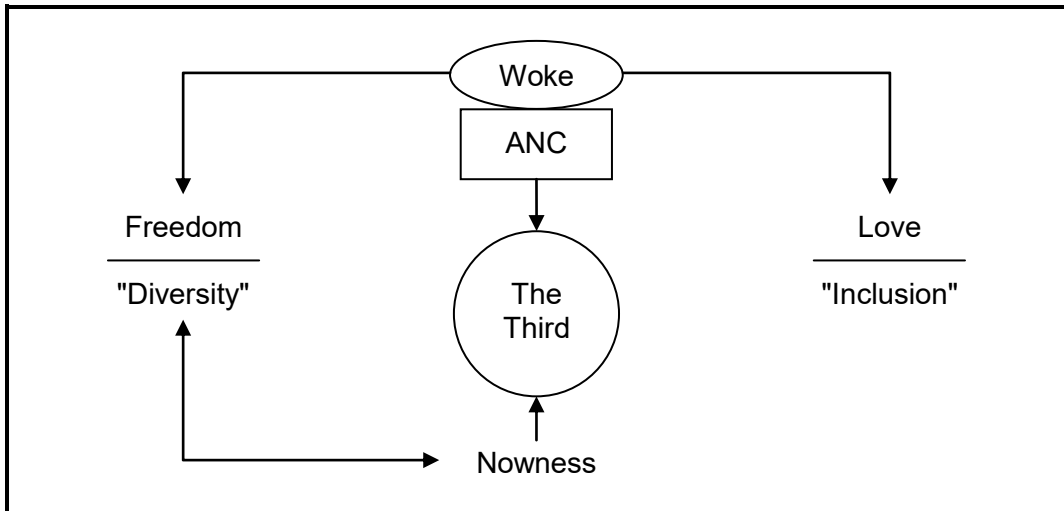

Franck: But I beg you: I have classified love and freedom as "real Reality".

Keno: Yes, and the ANC as "I don't know."

The ANC is that subjective Nowness which we need in our Mind to be able to connect the Now of our Life with the Now-of-Creation. As a sketch:

The Woke-Initiatives are aiming exactly at this scheme, which I call "Noetic":

The Woke-Initiatives have begun to secularize the ANC. In this respect, the Woke activists (who, by the way, are currently producing an extremely large number of mistakes and gaffes) are on the right track. In other words:

**The Woke-Initiatives
will force the Spirit of our Society
to go the path of Inclusive-Fitness.**

Franck: Please explain.

Keno: Inclusive-Fitness needs the Instrumentalization of the Nagual. So it is about the Nagualization of the I and the Mind.

This Nagualization needs the human being, more precisely the activation of the human in the human person.

This "more" of Humanness is claimed by Woke. And in the Noeteric-Rituals of Metabliss / Metaverse it is awakened and mentally anchored (as Mind-Card). From this follows my prognosis:

**If Woke
and Hyperverse combine,
the Visions of Cyborg
and Post-Humanism
will not survive.**

Franck: Maybe, but that doesn't change the fact that the basis of Noeteric and Metabliss basically satisfies a humanistic tinged Backward-Longing.

Keno: You think this is a concept for losers and die-hards?

Franck: No, that's what you said. I was just suggesting that it may not be as modern or progressive as you make it out to be.

Keno: Let's clarify that, please.

The three stratagems that the human mind has at its disposal to bring its own evolution positively "forward" are:

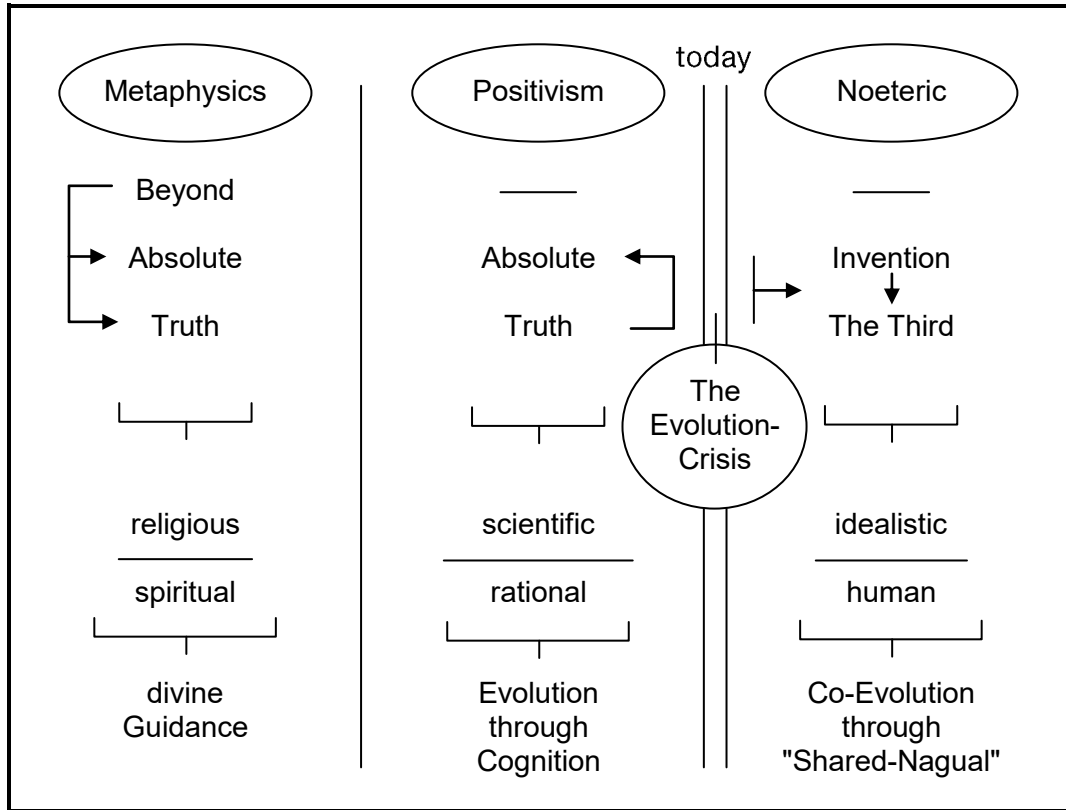

- Faith
- Truth
- Invention

The 1st Axial-Age (ca. 500 B.C. to ca. 2,000 A.D.) brilliantly completed the journey from faith (religion) to truth (science).

When humanity strongly connects its Survival-Fitness with fear of Contingency ("evil fate"), belief systems and religions will dominate.

Cognition at that stage is strongly focused on metaphysics.

When mankind carries out its Survival-Fitness more self-confidently, the "Beyond" will be eliminated as far as possible. Then metaphysics will be overcome and the Absolute and Truth will move to the center of spiritual Evolution. As a sketch:

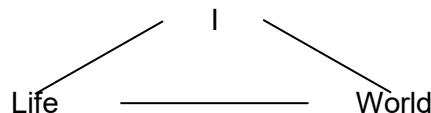

Michel Serres has written that the connection between the absolute and truth, typical of empiricism and positivism, is the ancient core of metaphysics in modern positivism.

From this point of view, what the coming Evolution-Crisis forces us to do, is the following:

- We separate ourselves from the old (hidden) core of metaphysics.
- We are at the same time overcoming positivism and with it the concept of survival knowledge (Fitness beats Truth).
- We begin to empower ourselves as human beings to connect those

real Realities

to our Relationship-Triangle

that can make

the goal of "more Humanness generates Inclusive-Fitness"

attainable.

Franck: If we take the real Realities ...

Keno: ... for example Consciousness as Something, Love and Freedom

Franck: ...if we are to instrumentalize these Realities for our spiritual advancement, we will somehow have to force ourselves to pull the "Simulation-Reality" composed of "Fitness Points" described by Hoffman and you from the pedestal of its dominance. Am I correct?

Keno: Yes, very correct. Positivism, which is currently dominant, needs Simulation-Reality in order to be able to connect Truth with the Absolute:

**What used to be "God"
has now become
the Truth of Cognition.**

From this point of view, the ideology of positivism is a religion of known truths. And so that this religion can retain and increase its power of belief, spiritual access to "real Realities" is blocked as much as possible.

Franck: You mean: The 1st Defluence is absolutely vital. But a 2nd Defluence is pushed away that there is no access to the Consciousness as Something?

Keno: Yes. That is my statement.

Some years ago we were invited to a large-scale international workshop. The topic: Expanded Consciousness. More than 100 people showed up.

With my lecture I tried to present the relationship between Creation and the I. At the beginning the hall was still quite full, because people obviously found the announced topic interesting. But the more we ... clearly stimulated by skeptical questions ... came to the understanding that the 1st Defluence imposes a worldly-limited and unhappy I on the I, the more empty the hall became. By the time we got to the topic of the worldly I embracing its nagual I, things got uneasy. Much murmuring.

Suddenly a relatively young man stood up and said (no, he shouted!): "You are obviously advocating a schizophrenic I-Conception. That after all is sick!"

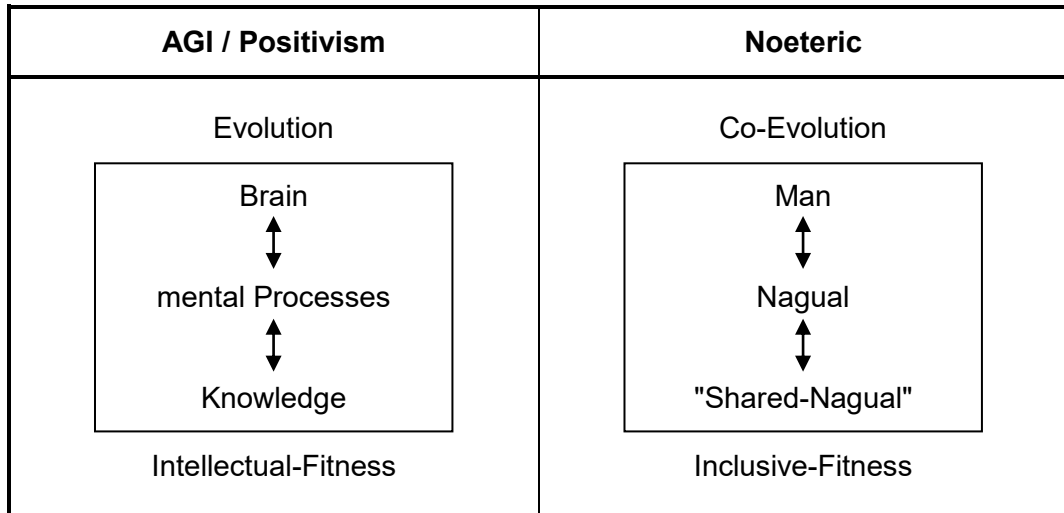

At the closing forum (two days later), "identity" was also an official agenda item. What happened? Only 6 people showed up in the room. And up on the podium sat a quantum physicist, a professor of mysticism, and me. The fire had gone out. So the three of us on the podium had a nice chat.

Franck: So the idea of a 2nd Defluence violates the Positivism of Science. That's how I interpret your statements.

Keno: Yes. What does Positivism say? As a short formula:

**The ideology of positivism
is that truth which preferentially
produces those truths
which can reinforce
belief in that ideology.**

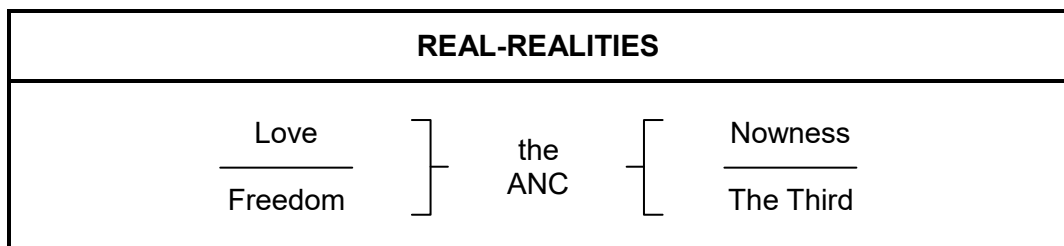

If positivism is set on inventing that Spirit (Mind) which could connect human Life with Consciousness as Something (= real Reality), then concepts emerge in which the relation between the functional matter of the brain and observable and predictable knowledge is ultimately a mathematization of rules (which, by the way, is a basis of AGI-Machines and Cyborgs). As a sketch:

Based on positivistic and intellectual fitness, it will be difficult to invent a concept that enables us humans to continuously improve our own consciousness, regardless of crises and "through harm one becomes wise". It follows:

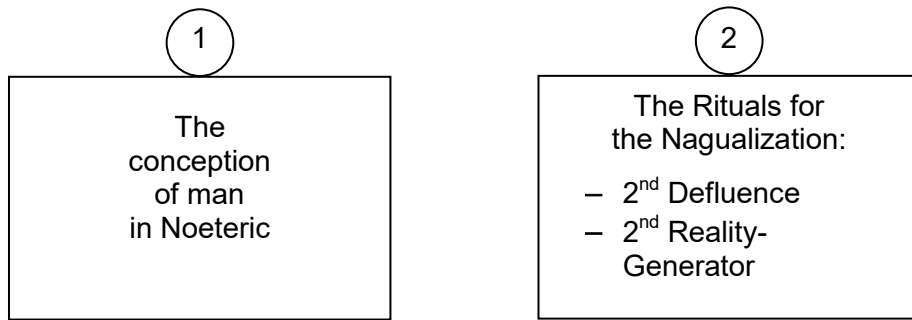

**We will have to learn
to turn a recognizing Consciousness
into a Self-Evolutive Consciousness.**

If we want to develop such a Self-Evolutive Consciousness, we should recognize, accept and instrumentalize those essential real Realities that can free us from the ideology of positivism (and from the dominance of the 1st Reality-Generator). These real Realities are:

Franck: What is the mental key that opens the gate of our consciousness so that we no longer exclude the real Realities?

Keno: Here are two areas:

Franck: We both have analyzed the conception of man of positivism once briefly a long time ago.

Keno: Yes, based on the statements of Peter Sloterdijk. He says among other things: We need a "transdualistic logic", which is based on a "multi-valued logic" (Gotthard Günther), in order to be able to unite the Mind with its own creative potential.

If this unification of mind and creation succeeds, a conception of man emerges that favors "egalitarian and emancipative processes" in order to be able to dissolve old power-dispositives. The new conception of man is based on "an ethics of hostile and domination-free relationship". Sloterdijk therefore sees an

**interconnected
inter-intelligence**

at the center of the new conception of man.

Franck: Hm. That does indeed sound a lot like Woke.

Keno: Yes. For Sloterdijk, the goal of the coming generations will be for "the good to prevail, in the sense of good technology."

Franck: And Sloterdijk makes this sound like a call for the Hyperverse:

**Enforcing the good
in the world through a
good technique for innovations.**

Keno: Yes, but Sloterdijk is blanking out the Illogical and the eternal Paradox of the Third:

**In the Third lives the Miracle
that waits for us,
because we are actually the Third.**

Franck: Actually? Yes, as long as we do not organize the 2nd Defluence ... for which we urgently need digitality ... as long as we will permanently intellectually exclude or mentally destroy the Third:

**We need the 2nd Defluence
in order to be able to
understand and love ourselves ... as Humanity.**

This is what you describe as Noetic.

Keno: Yes. Let's assume that we can organize an effective 2nd Defluence via the Hyperverses. What conception of man would then become present in our mind and in our society?

NOETERIC
Man is a living Creation whose Spirit is on the way to transform into the Essence of Creation.

The Third is needed to put our Spirit on the way to that Creation which we can become. Thus it can be seen that the Third is the Common ... Shared-Nagual.

Based on this Noetic-Model, we now can make the following statements:

- Religion has shifted the Third to the Beyond.
- Positivism permanently excludes the Third as the "Troublemaker of Logic".
- Noetic sees in the Third as the Arrival of our human Spirit.

Perhaps you can understand that I am always a bit sad when intellectual positivists like you, place Noetic in the corner of backward longings and "fairy tales for adults".

From my perspective, religion is ancient. And positivism is getting old now. And both conceptions will ... I predict ... fail when it comes to methodically generating the Emergent-Consciousness we will need to shape a positive destiny through the use of our Inclusive-Fitness. So we should take the coming Evolution-Crisis as an opportunity to be able to perform an upward optimization, so to speak.

Franck: How would this be accomplished?

Keno: We use the Evolution-Crisis to be able to organize and establish the 2nd Defluence and the 2nd Reality-Generator through the Hyperverses. This creates a new Quality of Future-Creation ... a specific Consciousness for the Future 2 and 3 ... the Intelligence for Co-Evolution.

Only then, when we have socially established this mental competence for Co-Evolution (which means that we live in a "Society of Creation"), we will get a grip on the Climate-Crisis and the problems of Nuclear-Overkill.

And only then, when we can instrumentalize Human-Being, Creation, Nature and Spirit (Cosmic-Intention) in a new kind of relation to each other ... only then we will be able to cope with the still unresolved major crises. This means:

**We will have to make
our Humanness more human
in order to understand
that we do not need
the Strategy of Domination (Nature)
and Conflicts (Wars) anymore.**
