

<p><b>THE HYPERVERSE AS THE ENTRY POINT INTO THE 2<sup>ND</sup> AXIAL-AGE</b></p>
<p>p.a. Ludger Heidbrink "Melancholia and Modernity"</p>
<p>From Keno Oneo, Mastermind of the Metabliss-Project</p>

① The more our everyday reality now evolves into the new, i.e., Evolutive-Reality, characterized by

the more important certain dimensions and concepts become that have so far been ignored in the discourses of current modernity:

<p>The new Orientation-- Concepts</p>	<ul style="list-style-type: none"> <li>A - The formative Power of <u>Utopia</u></li> <li>B - The assertive Power of <u>Mission</u> and "Radical-Hope" (Lear)</li> <li>C - The discovery of <u>Nowness</u> ("the Paradigm of the Instant" / K. H. Bohrer) as Space and Medium of Emergence</li> <li>D - The acceptance of Fractality, Diversity and <u>Rhizome-Dynamics</u> (at the expense of a supposedly clever "holistic thinking") ... organized as a Bottom-up process.</li> <li>E - The Rejection of the central Myth of Enlightenment, mainly focused on "Reason and History", in favor of <u>Inclusive-Fitness</u>.</li> <li>F - The Rejection of the human Spirit of the Absolute and the principle in favor of a Secularity and <u>creative everyday Life</u>, which serves as a universal Source of Meaning.</li> <li>G - The Overcoming of a culturally aestheticized Fear of Contingency ("tormented stupidity" (W. Benjamin) in Favor of a <u>Happy-I</u> ... embedded in <u>Self-Empowerment</u>.</li> <li>H - The Erosion of "Inclusion" (= pathological Obsession for Limitations and Addictions) in Favor of <u>Noetic-Categories</u> (Spaceless-Space / Love and Timeless-Time / Freedom)</li> <li>I - The increasing Rejection of Strategies of Resignation, such as Transcendence and Re-Mythologization in Favor of "Poetological Reflections" ("Fore-Feeling of Nature" / Hans Blumenberg), <u>Autopoiesis and Co-Evolution</u></li> <li>J - Growing Disbelief in the Concepts of a "Social and cultural Rationalization (which was coded as the Intelligence of Progress) in Favor of a novel <u>Idealistic-Humanism</u></li> </ul>
---	---

If one summarizes these aspects, one gets the following picture:

② Modernity has developed its power of progress from the energy of a "historical resignation". Basis for this power of resignation were primarily three strategies:

- 1.- "Re-Mythologization" (the old Myth-Set: the Beyond, the Absolute, the Truth)
- 2.- "Aestheticization" (the Sublime)
- 3.- "Re-Naturalization" (Ideology of Nature).

In the current phase of modernity, it can be experienced that these three strategies are less and less capable to get the side effects of our positive innovation- and progress- actions under control. This means:

**The future-instruments  
of today's modernity  
(innovation and progress)  
generate real challenges  
that can no longer  
be managed by mythologies,  
aesthetics and nature-ideology.**

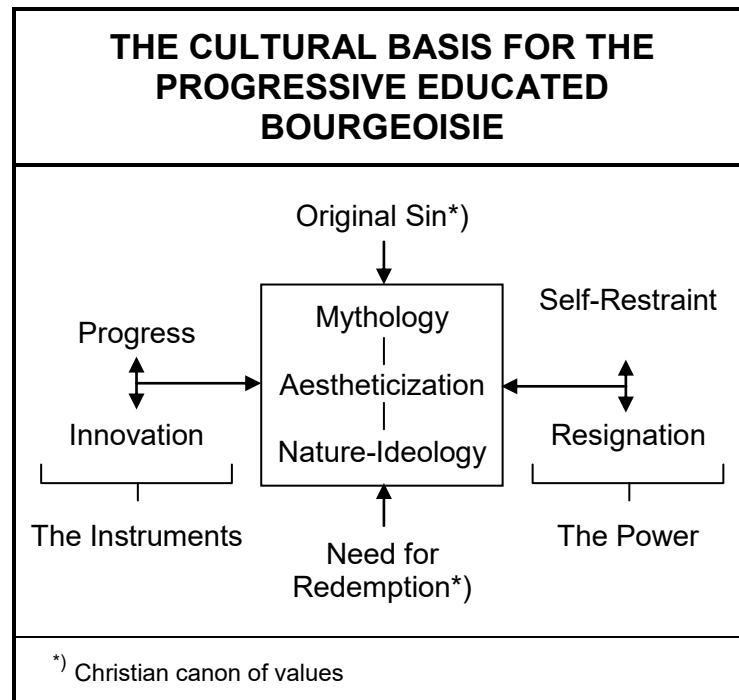

What are these real challenges? They can be outlined as follows:

- a.) The energy of resignation that has led our culture to the positive instruments of innovation and progress

in the form of mythology, aestheticization and nature-ideology is gradually losing its power.

- b.) The energy of resignation that has led our culture to the positive instruments of innovation and progress in the form of mythology, aestheticization, and nature-ideology is successively losing its power.

The result is the model of a smart and emancipated educated middle class (bourgeoisie):

- c.) The new, Evolutive-Reality ... i.e. growing complexity, acceleration and contingency ... are positive "Yields" of innovation and progress. But this new Evolutive-Reality is increasingly becoming the source of a permanent crisis, because we are spiritually-culturally unable to exploit the new Evolutive-Reality constructively and productively:

**We  
unconsciously / consciously  
fight the positive results of  
our strategies of innovation  
and progress.**

- d.) The cultural basis of the bourgeoisie (see b) principally is not able to develop those concepts which would be necessary to make the existing Evolutive-Reality the engine and substance of a new kind of Future-Intelligence:

**The emancipatory  
repertoire of the  
educational- bourgeoisie (middle class)  
is beginning to fail.**

Summarizing these aspects, the following statements result:

- The underlying force of modernity is weakening...continuously.
- However, the goals and instruments of the educational- bourgeoisie remain and continue to be applied and implemented with a successively weakening power.
- This results in a mental Future-Competence that is getting dumber and dumber regarding the challenges of the new, Evolutive-Reality.

All in all:

**The cultural and  
intellectual Power of  
the modern Educational-Bourgeoisie  
blocks the development of a  
better quality of a Future-Intelligence.**

- ③ The educated-bourgeoisie as representative of the "Epoch of Theory" (Joas) and as shaping agent for the "power of Better-Knowledge" can and will hardly do anything in terms of the development of the better Future-Intelligence:

**The Intellectual-  
Intelligentsia of the Elite  
has no interest in developing  
a new kind of Future-Intelligence,  
because this new Intelligence  
does not fit their criteria and goals  
of the Educational-Bourgeoisie.**

Through this "refusal to work" of the Bourgeois-Elite ... combined with their ever more stupid Future-Competence ... what is called "the Present" turns into a permanent crisis:

**Our Society becomes  
a daily Crisis.**

However, since the learning and optimization program of the Intellectual-Elite is fixated on

**"One learns  
from mistakes",**

this permanent crisis, which basically is a mix of the Past and the Present, becomes the Set-Point Generator for Future-Decisions. The effect:

**The Negativity of  
the Now-Crisis becomes  
the raw material for supposedly  
clever Future-Developments.**

**The Betterment of the Future is  
sacrificed to the Now-Crisis.**

This creates a problematic Meta-Strategy for all decisions and actions that are future-oriented. In other words:

**The Evolution-Fitness of  
Western-oriented Democracies  
is on the way to Failure.**

If one has a present that is a permanent crisis and if one does not have a Future-Intelligence that is able to shape the Future 2 and 3 (= Emergence-Competence), then two problematic streams will result:

Stream 1

The political system intervenes ever more frequently and intensively in the concrete reality of people's Lives:

**The permanent Loss  
of personal Freedom is  
justified and enforced by  
alleged Crisis-Problem-Solutions:**

<p><b>The attractor of "Freedom" is damaged.</b></p>
--

Stream 2

Through the Now-Crisis, which is set to "permanent", numerous conflicts and divisions arise in the " Social-System" (N. Luhmann) of Society ... i.e. a continuous Dissolution of Belonging and Identification.

If everyday Life becomes Crisis-Management, destructive stress energies arise, which damage and erode the Common and the Dignity of a Nation:

**The Collective-Spirit  
of Society loses its solidarity.**

Under such conditions, material and financial distribution struggles, struggles for position and privileges, and struggles for the right and better values automatically arise:

**If the Future is made worse and worse and more negative, a War of Values occurs:**

**The Attractor of We-ness (Love) is damaged.**

Stream 1 damages Freedom, i.e. Autonomy. Stream 2 damages We-ness, i.e. the lived Love. Now, however, Freedom and Love (along with Now-ness) are the central Attractors of Evolution.

Herbert Pietschmann (quantum physicist) has described the basic characteristic or the Essence of Evolution as follows:

**Evolution occurs in the permanent interactions of Differentiation (= Freedom) and Unification (= Love).**

All in all: Due to the failure of the intellectual strategies of shaping the future, we continuously live in a reality which reveals itself as a "crisis".

This actual Reality causes an increasing Longing of Humans for

more Freedom	}	The 3 Criteria of Noetic and Woke-Values
more Love		
more Nowness		

④ In case of a War of Values, the disputes focus more or less consciously on the 3 criteria described under 3. On this basis, two strategies are then usually activated:

The second stream defines itself as "progressive and ecological" (green politics). It sees itself as an ideological fighter that wants to activate the "eternal Values" of Reason. For the followers of this stream, it is less about restoration than about organizing turnarounds ... Climate Turnaround, Energy Turnaround, Transportation Turnaround, Urban Planning

Turnaround, etc.

This stream combines the elitist Self-Image of the educated Citizen with the Responsibility-Ethics of "Better-Knowledge".

Looking at both streams, it is relatively simple to recognize the dominant belief pattern that unites them:

- The Unknown (Contingency) is the Cause of the actual Permanent-Crisis:

**The typical European Fear of Contingency  
is reinforced/feedbacked here.**

- The philosophical principle of "Hope" (Ernst Bloch) ... and coupled to it the pragmatic concept of "Radical-Hope" (Lear) is rejected as "irresponsible" " or "naive-irrational", because there is no evidence that the "allegedly Better" can emerge this way:

**The old myth-set**

- **the Beyond**
- **the Absolute**
- **the Truth**

Fear of Contingency and the old Myth-Set are the Foundation for the 1st Reality-Generator, i.e. for the following mental strategies:

- Ratio-Worldview
- Cognition-System
- Logic of thinking

Thus, the 1st Reality-Generator (which is neuronally established by the 1st Defluence) becomes the Savior in the Crisis. Meaning:

**The 1st Reality-Generator,  
which is a main cause  
of the permanent Crisis,  
acts as a Savior.**

**The arsonist  
appoints himself  
to the fire fighter.**

What happens thereby? A constant Failure in Problem-Solving is organized ... caused by the Denial and Exclusion of a new kind of Future-Intelligence, which is deliberately not developed (among other reasons, because it can only be developed digitally and Bottom-up).

The negative effect:

**One organizes with  
much Politics and Intellectuality  
a steady Improvement for  
the Worse of the existing  
Permanent-Crisis.  
One refuses the Learning  
and Help of the  
Now-of-Creation (Nagual).**

**One refuses to develop  
that Meta-Consciousness  
in Cooperation with the Nagual,  
which can be "the raw material"  
for the Development of both  
the new kind of Future-Intelligence  
and Inclusive-Fitness.**

- ⑤ As shown in ① through this Policy of Denial (staging itself as "Reason") the new Evolutive-Reality can neither be grasped nor productively harnessed. The result:

**The self-generated  
Permanent-Crisis is  
linked to the new Reality,  
i.e. the Growth of Complexity,  
Acceleration and Contingency**

A - The new (better) Reality created by us Humans is declared a scapegoat.

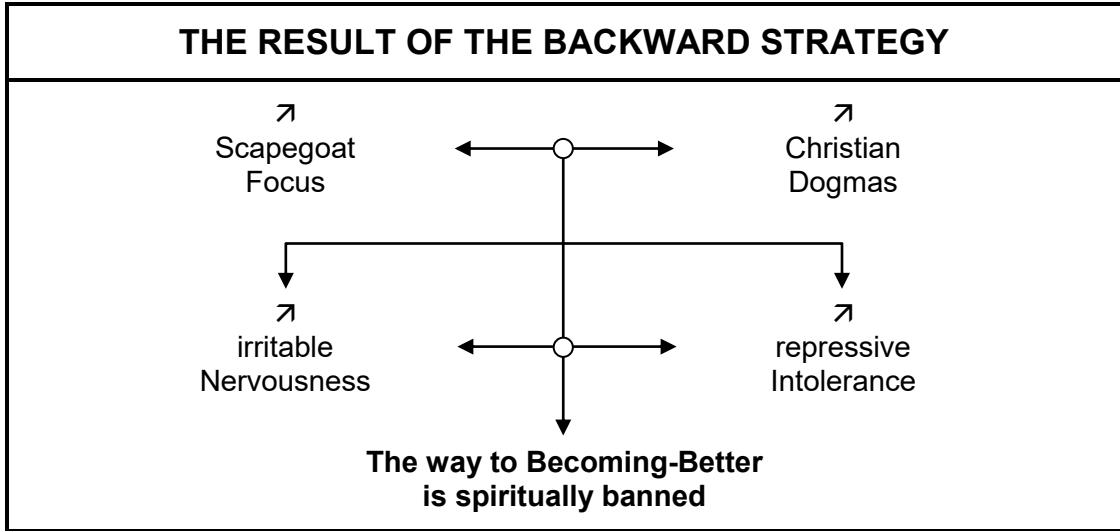

B - At the same time the European-Christian Dogmas are reactivated:

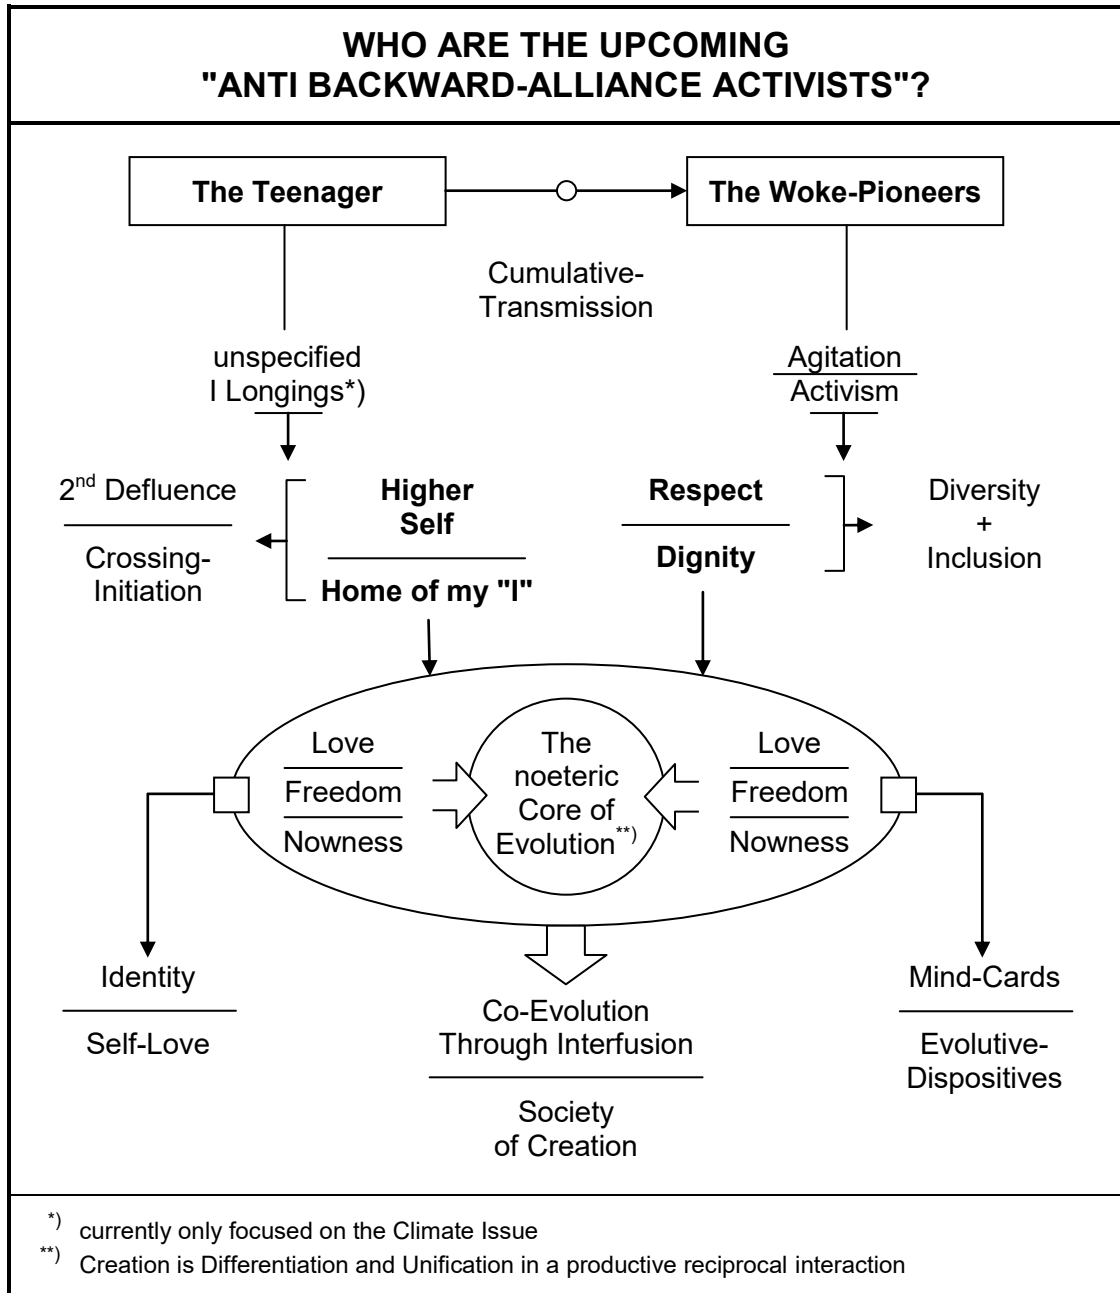

- the Original Sin of Mankind
- the principle Need for Redemption of Mankind.

Once the Scapegoat-Focus combines with the old Christian Dogmas, both an irritable nervousness and a Climate of repressive Intolerance arise in the collective-spiritual field of Society.

The new and absolutely necessary Orientation-Concepts outlined under 1 (from meaningful Utopias to Rhizome to Idealistic-Humanism) are thereby marginalized and sometimes offensively defamed. As a sketch:

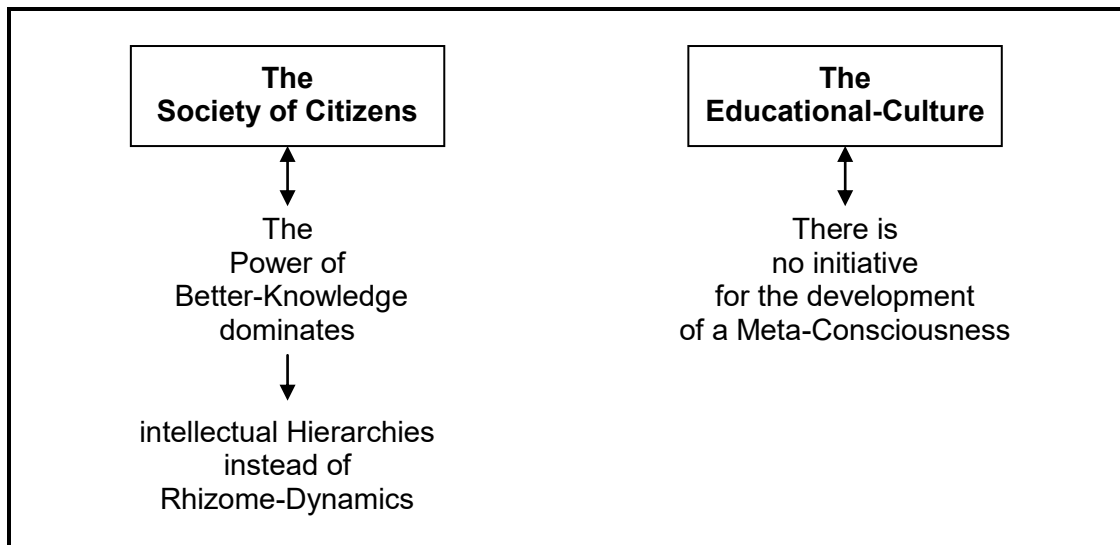

6) Currently the Backward-Alliance succeeds in tying the Teenagers to the conflict topic "Climate", i.e. to make them blind to their real I-Longings. That means: A real problem (= Climate) is made into a "Magic Cap" for the deliberately intended and purposefully practiced denial of the future.

This "Magic Cap" is made up of two components:

This tactic of "magic cap" works quite well at present, because the second stream in the camp of the Backward-Alliance ... i.e. the activities of the green-ecological Elite of Reason ... is staging itself as "clearly progressive" and "future-shaping": Whoever saves the world may well instrumentalize the old but now ineffectual spirit.

On this footing, two intentions are fairly cleverly enforced (by politics, NGO's and media):

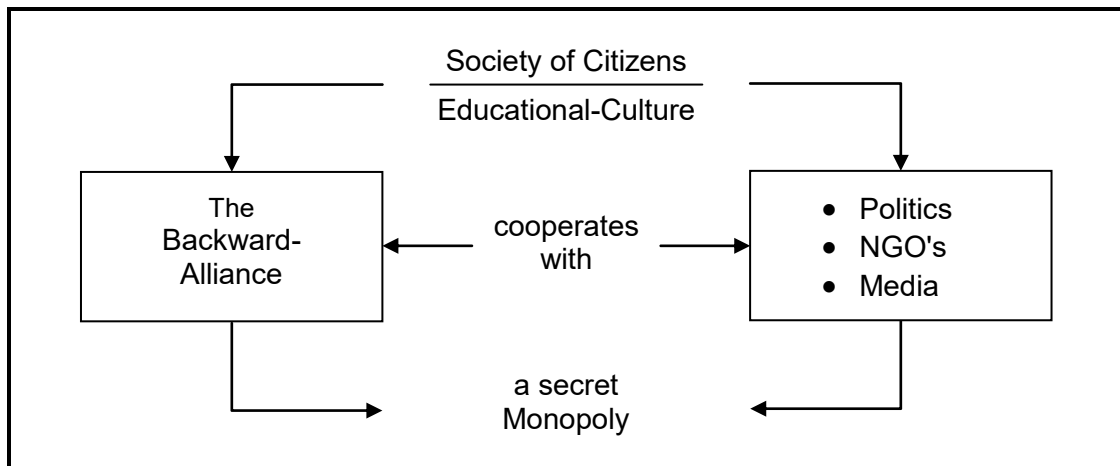

- A - There must be no "Society of Creation" (keyword: no Rhizome-Dynamics).
- B - No intellectual innovation may be developed outside the official culture (keyword: no Meta-Consciousness).

The following is true for both A and B (2 official original quotes from politicians in Brussels):

**"We need to  
break or contain  
the power of GAFAM."**

**"The EU Digital Acts  
are milestones to  
fight digital monopolies."**

Political power is used to enforce A and B's intentions. This makes it evident that (at least in Europe) the following constellation exists:

7 This means: There will be no "Society of Creation" and no Bottom-up rhizome if the Backward Alliance succeeds in

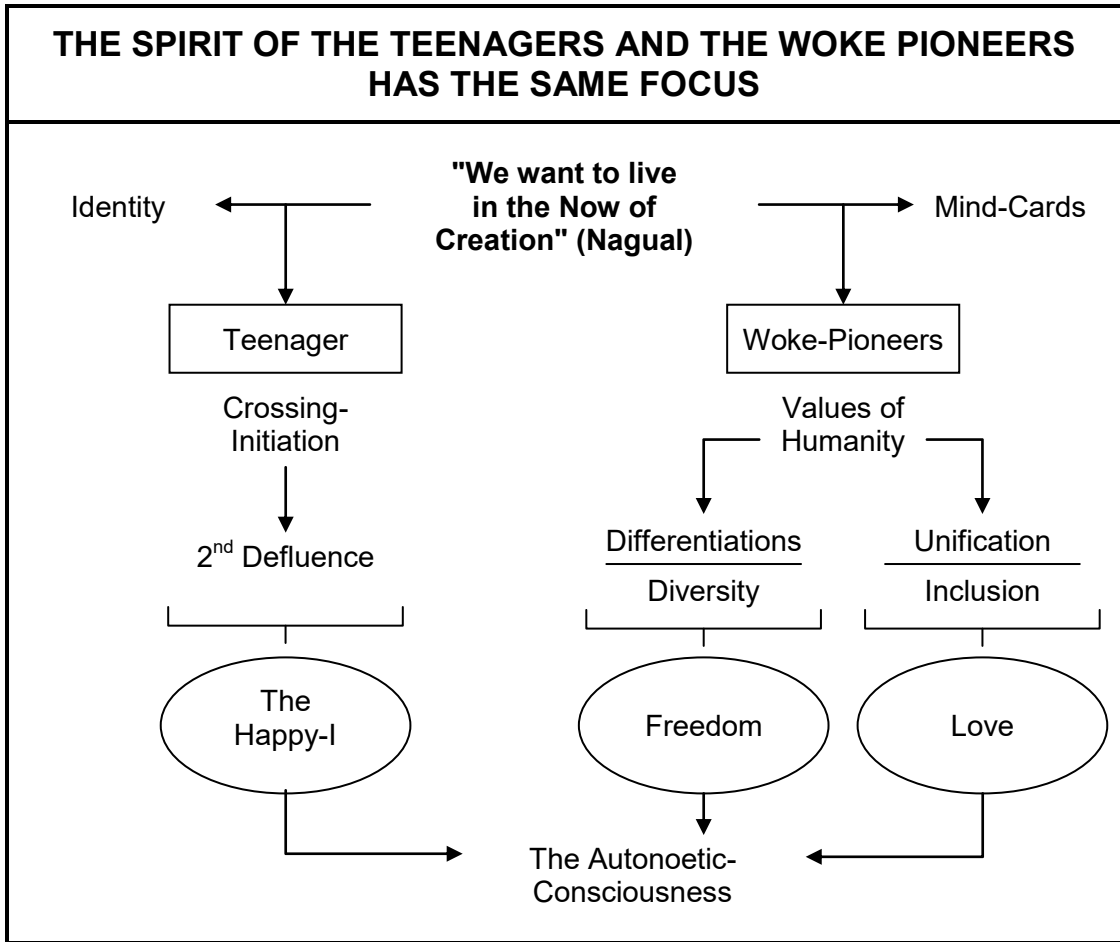

**preventing  
the Hyperverse.**

But: If this does not succeed, the following developments will prevail in the context of the Hyperverse:

- The programmatic of social media "Give People a Voice" will be extended to "Give People the Now-of-Creation."
- The hitherto untapped "autonoetic consciousness" (LeDoux) will be activated and ritualized by both the Teenager and the Woke-Pioneers ( fueled, among other things, by the function of Metabliss).  
The result is:

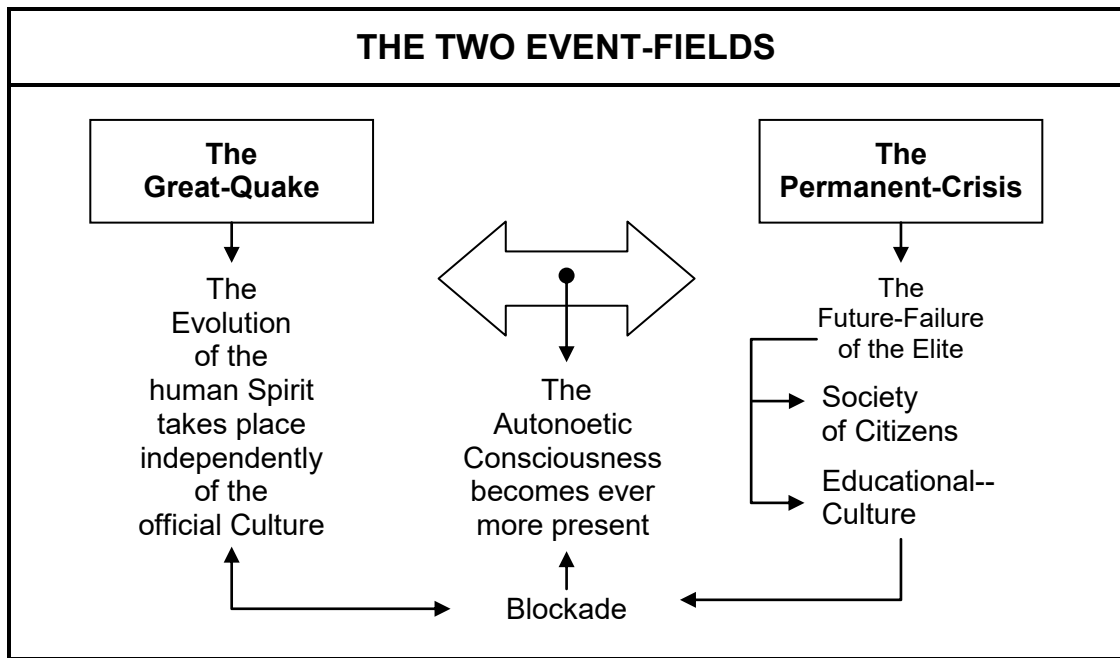

**We are the Better.**

It is to be expected that the aspirations of the Teenagers and the aspirations of the Woke-Pioneers ... thus the users of the Hyperverse ... will get an increasing influence in our society. As a sketch of this:

The Hyperverses will become the "creative and magical space" that will help the Teenagers and the Woke-Pioneers to make the Nagual productive ... for their I, for their Life and for their World.

But what will happen if the Hyperverses will not materialize ... in other words, only a couple of Metaverses? Then the Permanent-Crisis will remain or even intensify. Most likely then two events-fields will interconnect:

If the Hyperverse will not materialize, it is very likely that the Meaning and the positive Chance of the Great-Quake will be integrated into the "home-made" Permanent-Crisis in a way that mankind's entry into the

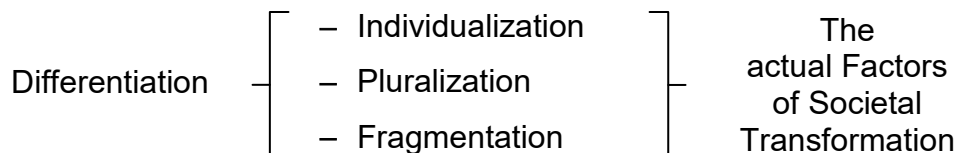

### 2nd Axial-Age

will not be possible. That would be a great loss. And it would decisively damage the "Spirit of Democracy".

The Great-Quake is based on the positive Evolution of the Human-Spirit: from Religion to Science ... i.e. from the "Power of the Holy" (Joas) to the Progress-Concept of Modernity.

The past drivers of this positive evolution were

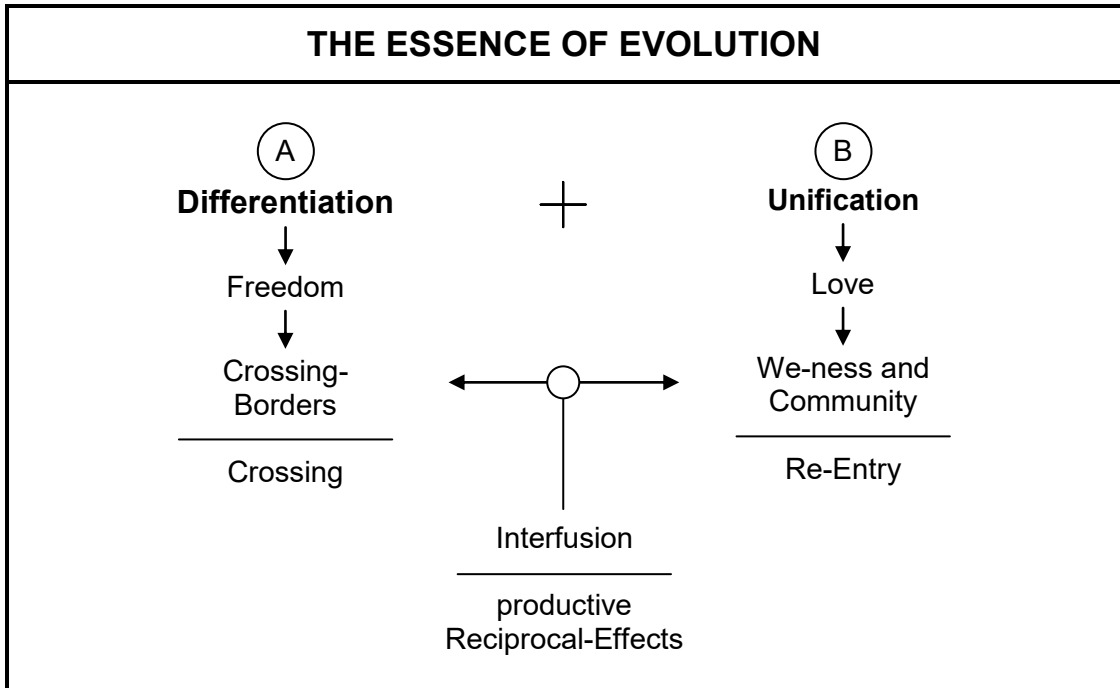

So far, the drivers of this positive evolution have been

i.e., a continuous and long-lasting Growth of Differentiations.

Now, however, Co-Evolution is only practicable if the human aspect ... i.e., the Spirit of Humanity ... as far as possible also consists of Evolution. But Evolution is not only Differentiation. Evolution is Differentiation for a better Unification.

The Essence of Evolution is thus based on the following Interfusion:

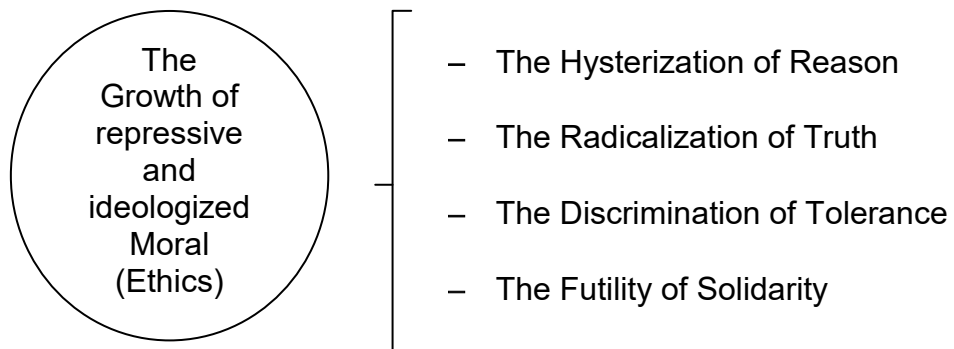

If there is no Hyperverse ... that is no unification of Metaverse and Metabliss ..., the coming Metaverses will clearly dynamize the sector of Differentiation (A). But there will be little or weak Dynamization of the sector of Unification. As a formula:

**A lot of Crossing.  
But too little Re-Entry.**

When this situation occurs ... i.e. strong Growth in Differentiations and Stagnation in Unification ..., the "home-made" Permanent-Crisis devours or destroys all positive options of the Great-Quake. Then a System-Crisis unfolds.

The consequence would be the mixing of such a System-Crisis (often called "Modernity-Crisis") with the Erosion of those Values, which we have developed and established as a positive Foundation of our Civilization. Specifically:

When the System-Crisis combines with the Growth of repressive and ideologized Morality, it will be difficult to find a way that will lead us to a

**democratic Praxeology  
of Co-Evolution**

And if we cannot empower ourselves to spiritually develop and socially anchor Co-Evolution,

**we will not be able to  
manage the entry  
into the 2nd Axial-Age.**

In a way, it could signify the end of that idea which we call "Democracy".

From this viewpoint, it is more than problematic if the spiritual-evolutive possibilities of digitality are blocked or marginalized by the slogan that has been publicized for years,

**"We must manage  
to humanize digitality."**

**We invented Digitality  
in order to be able to  
develop that Consciousness  
which can lead  
our Consciousness  
into Co-Evolution.**

**Co-evolution means  
more Humanity.**
