

<b>The start into the 2<sup>nd</sup> Axial-Age</b>
<b>WOKE WILL MAKE DIGITALITY THE ENGINE FOR THE BETTER</b>
Keno Oneo in Conversation with Jochen Franck

*Franck:* You have emphasized relatively often in our conversations that we will use the Digital-Revolution to change the "Work Contract" that we have between our Culture, our Brain and our Consciousness ...

*Keno:* ... yes, to change it in such a way that we become able to develop a better Future-Intelligence.

Basically, we can only now ... presumably caused by the Digital-Revolution ... realize that there is a Reciprocal-Effect that will become of great Importance to Humanity as a whole. As a sketch:

*Franck:* You have often pointed out that our rational-cognitive Future-Intelligence

*Keno:* ... organized by the 1<sup>st</sup> Reality-Generator ....

*Franck:* ...is less and less capable of shaping the new Evolutive-Reality ....

*Keno:* ... that means growing complexity, acceleration and contingency ...

*Franck:* ... intelligently and progressively. You call this inability "Future-Stupidity"... a nasty word!

*Keno:* Well, if the normal Intelligence is failing more and more often when being confronted with the Evolutive-Reality ... which by the way causes a Permanent-Crisis ..., then this Intelligence is becoming less and less intelligent ... and that is this Stupidity.

My reasoning is:

- The consciousness of modern people is in principle unfree, because the typical duality, on which our cognition strategy is based, only works, if a consequent subject-object-separation is made.

**The separation of  
subject and object  
generates the truth of the world.**

- But this "true world" is and remains merely a mixture of construction (invention) and coding (language).
- The more one tries to absolutize this kind of "true objectivity," the more radically the subject and the subjective are excluded.
- However, Invention and linguistic Encoding are eminently distinct Achievements of the Subject. It follows:

**The Subject removes  
the Subjective of the World  
from the present World.**

*Franck:* And this is supposed to be wrong?

*Keno:* No, not wrong, but unfree.

*Franck:* Please explain.

*Keno:* What one perceives is present as an "intentional subjectivity" in every process of perception. That means: in the process of perceiving, my personal intentional subjectivity cooperates with the "intentional subjectivity" of the perceived object or event that presents itself. Tommaso Campanella: "There can be no perception without the perceiver assuming a likeness to the perceived." In the words of Alan Towey "joint perception". That is:

**In the "Space of the Spirit" (John C. Lilly),  
the Subjects of the Word cooperate.**

**Without this  
Cooperation and Unification,  
there is no "true" World ...  
there is no Objectivity ...  
there is only a universal WE.**

**The Truth of the World is  
neither the Person nor the Object.**

**The Truth of the World is  
the Space of the Spirit, which is  
entirely made up of  
Cooperations and Unifications.**

**Consciousness as Something is  
an eternal Process of We-ness.**

*Franck:* Stop, stop! Now these are simply your theses. I personally experience it completely differently. I know that I am "I." And I know that the table at which we both are sitting right now is an object. No cooperation. No processes of unification. Merely crystal-clear cognitions.

So: where is there an unfree consciousness? My personal consciousness is completely free ... free to the real world ... free to the recognition of reality.

*Keno:* The fact that you see "crystal clear objects" ... that is, objects free of invention, language, cooperation and association ... proves, in my view, that your consciousness is unfree. It is not allowed (or not possible) to integrate the creation process of the objective into the observing consciousness:

**The intellectual-cognitive Mind  
sees only half of the world.  
It is unfree for the missing half.**

*Franck:* Let's assume that this unfreedom actually exists in my consciousness ...

*Keno:* ... so basically a ban on perception and therefore also a ban on recognition ...

*Franck:* ... what disadvantage would this have in your opinion?

*Keno:* You would permanently misprogram your brain. You would develop and establish mind-cards (and then belief-systems are built-in in them), which ensure that your Intrinsic is and remains worldly-objective.  
Meaning:

- The objectifying Mind produces a permanent "Depersonalization" (Ludovis Dugas).
- The Thinking produces a strange ("eternal") Loop of Cognition-Blindness.

*Franck:* Please be specific: what does this mean?

*Keno:* Specifically:

- You as a person take place only outside of yourself.
- You as a person have only a limited ("halved") empathy:

**You love yourself  
and your world,  
but you are incapable  
of loving yourself and the World  
as a Process of Creation...**

**You cannot love the Now-of-Creation...  
You therefore have no Empathy for the We,  
which is the Eternity of our Consciousness.**

*Franck:* Whew! That's kind of very old-fashioned or even esoteric, don't you think?

*Keno:* Hmm. I consider the "physical ontology" (Donald D. Hoffman) in which you obviously believe in... that is your "crystal clear objectivity ... is very esoteric and old-fashioned, because it excludes three aspects:

- 1 – Everything that exists is a universal We.  
In this We-ness all things and events of our World are present.
- 2 – Unification in the mode of Nowness is the Creation in which we are all alive.
- 3 – We-ness and Nowness generate Consciousness as Something ... and this is the raw material for our Thinking and for our Processes of Objectification.

*Franck:* So We-ness and Nowness? But where are the things, the objectifications and the differentiations? Now you exclude!

*Keno:* All events of the world exist in the We-ness, which is universal. So all Differentiations, Innovations and Futures are the participants in this We-ness, which generates in the "Space of the Spirit" that Nowness, from

which then the raw material for our thinking arises.

*Franck:* Ultimately, you claim that our Thinking and our Objectivizations ...

*Keno:* ... thus also our permanent Stream of Differentiations and Innovations (Progresses) and Futures ...

*Franck:* ... are dependent on a universal We-ness, which is available to us as universal Consciousness.

*Keno:* Yes. This is how the World looks, if one pushes aside the allegedly modern Mind ... i.e. our unfree Consciousness ... i.e. if one looks at the World with a

### **liberated Consciousness ...**

as it is "different". It follows:

**The liberated Mind recognizes  
that the Quality of its Consciousness  
is not dependent on Thinking,  
but on the Quality of the lived We-ness.**

Our We-ness is the Eternity of that Consciousness which our Mind uses to recognize our World and to improve our Futures. It also follows:

**The better the We-ness  
that we really live becomes,  
the better the Quality of  
Consciousness that we use  
to improve our World becomes.**

Thus we recognize a central Maxim for the coming Epoch of Co-Evolution:

**Let us improve our We-ness,  
so that the  
Consciousness of the Better  
can strengthen in our Mind.**

*Franck:* A better We-ness ... as an insider's tip for a better Evolution. This is indeed a new thought.

*Keno:* Well, not new. Romanticism and the philosophy of Idealism were already on this plateau. But the conceptions of that time had ... from my point of view ... two problems or limitations:

- 1.- One was too much bound to the Jewish-Christian cultural canon. Keywords: Orientation towards the Beyond instead of Nowness. Absolute Truths instead of "Flow of Inventions". Hierarchized Power Structures instead of fluctuating Rhizomes ... in short:

**Elitist Top-down  
instead of creative Bottom-up.**

- 2.- At that time (transition from the 18th to the 19th century), there were only books. No internet. No digitality of interconnections and productive interfusions. And no AI yet, either.

*Franck:* Well, we now have the Digitality (see 2.). But the old Myth-Set ... i.e. Beyond, Absolute and Truth ... is still dominant. Our culture is ... as you say ... steeped in Judeo-Christian myths and dogma.

*Keno:* Yes, that's true. But the Rhizomes are coming, and with them the creative Bottom-up Dynamics. They are happening because Mark Zuckerberg invented and operationally enforced Social Media ("Give People a Voice"). Without Mark Zuckerberg, we could neither understand nor realize the central Maxim of Co-Evolution just discussed.

*Franck:* Just Mark Zuckerberg?

*Keno:* No, of course not. The Autonoetic-Consciousness (ANC) is equally involved. And, very recently, so are the

**Woke-Pioneers.**

*Franck:* We should elaborate on that.

*Keno:* Gladly.

What is Woke ... or what are the Woke-Waves? I define it as follows:

**Woke is the  
public Secularization of  
Autonoetic-Consciousness (ANC).**

And what the ANC is, we had already defined a long time ago:

**The ANC is the  
Connecting-Consciousness between  
the Universal Consciousness as Something  
and our human Consciousness of Something.**

The ANC is thus a mediator that is biologically-genetically present in every Human-Being ... automatically ... from birth. From my point of view, the ANC represents the Simultaneity of our biological Survival-Program at the same time with what Albert Einstein called "Cosmic-Intention" ...

*Franck:* ... and that means concretely what?

*Keno:* It is that Now-of-Creation (Nagual) which consists of Love, Care and Help ... that is, an intentional Aspect of Creation specifically directed toward us Humans ... as a

**Help to Becoming-Better.**

*Franck:* Good. That's the ANC. And what does Woke have to do with it?

*Keno:* We ... as humanity ... currently find ourselves in a culturally-evolutive Phase in which we can ... or must ... qualify our own Evolution:

**from Evolution  
to Co-Evolution.**

So: we are currently trying to find a way to make this Now-of-Creation (Nagual) our Partner ... the Co-Partner for the Betterment of our Futures.  
Meaning:

- We are in the process of developing a conscious "We" with Creation.
- For this "We" to develop, we need our own, i.e. human "We".
- This human "We" ... that is, our We-ness ... is not powerfully present.

*Franck:* Who demands that we must have this "We" present?

*Keno* And now the ANC comes into play. If the motto is: Love cooperates with Love, then that means concretely for our Life-Practice:

**We should become a  
Society of We-ness,  
so that we as a Society  
can practice Co-Evolution.**

So we need from ANC those Helps and Impulses of Consciousness that can guide and enable us as a Society to We-ness. In other words:

- Woke is ANC as an Agent for Help.
- Woke will activate the ANC secularly and publicly so that we can develop that We-ness that the Nagual needs to be able to act as our spiritual permanent Partner.
- Without Woke, no help from the ANC.
- Without ANC no Woke-Waves.

**Without Woke no  
Co-Evolution.**

*Franck:* But I am annoyed by a lot of what is understood by "Woke" at the moment. Is there an explanation for this?

*Keno:* I will try to find an answer to that:

1. Woke encounters rejection by those people who have a set of Mind-Cards in which the ANC has been largely excluded (among other things by the 1st Defluence).
2. From about 35 years on, people cannot build up significantly additive and new Dispositives. Consequently, such "old daddies" as you (sorry!) have no Mind-Cards for the adaptation of ANC in their everyday Consciousness.

Because there are so many ...

*Franck:* ... I know, "old daddies" ...

- Keno:* ... because the group (between 24 to about 35 years old) that is currently engaged in the Mind-Carding Process is relatively small, and because the Values and Norms of our Culture and Society have not developed a relationship with the ANC, there is no official support for the ANC ... e.g. no focus on the 2nd Defluence.
- Franck:* However, you claim that the ANC now ...
- Keno:* ... through the woke activists ...
- Franck:* ... can play a role in our everyday secular life ...
- Keno:* ... indeed, has a Voice. The Voice of Youth ... the Voice of the Culture to come, where Creation is at the Center.
- You remember: Creation is Differentiation and Unification (Herbert Pietschmann) ... thus Diversity and Inclusion ... the general credo of the Woke-Pioneers.
- Franck:* Again, I am annoyed by many Woke activities. And you claim that I am the only cause with my old or wrong Mind-Cards.
- Keno:* I didn't say that. The matter is a bit complicated. We should analyze it more thoroughly later. Now it will suffice if I briefly touch upon some aspects.
- Franck:* Go ahead, young man!
- Keno:* Thank you for "young." My arguments are:
- Woke acts as an Agent of Creation. Woke actualizes ANC in our mundane reality, which has no relation to ANC because our collective-cultural Consciousness knows only the 1st Reality-Generator ... that is, the Duality of Subject and Object.
- But ANC presents the mediating and creatively shaping Third because it wants to help us as Humanity ... help us to instrumentalize the Common of Subject and Object.
- The Third is that Space of the Spirit in which Impossibilities are transformed into Probabilities for Becoming-Better.
  - Thus, the Rejection of Woke is also a Reaction of the 1st Reality-Generator and our Culture built upon it for the evolutive Instrument of the Third that is created by Unification:

- We do not want a Culture of Unification because we have a Culture that organizes its Progress through Differentiation.
- We want to stick to our Programmatic of

**Innovation through  
Differentiation.**

That translates into:

We cannot imagine that Progress can be shaped through Differentiation that serves Unification:

**Secular Progress  
through Progress in  
the Spiritual-Space of Unification.**

*Franck:* A Differentiation that qualifies the Level ...

*Keno:* ... and the Intensity ...

*Franck:* ... of Unification by serving We-ness. This concept is not conceivable for me.

*Keno:* The envisioned Co-Evolution is based on the continuous Cooperation of two "Lovers" ... 1.) Humanity loving Creation and itself as Humanity and 2.) the Now-of-Creation (Nagual) loving us as Humanity and "Evolution in Action".

*Franck:* Co-Evolution as Cooperation of two Lovers. That is shrill!

*Keno:* Evolution is relatively simple. One transforms the recognized problems of the present into innovations. That's it. It is not much more.

For that, you need clever analyses and border crossings ... that is, creative differentiations: Crossing for Innovation.

*Franck:* What's wrong with that?

*Keno:* Yesterday (20th century) it was spot on and efficient. Today (21st century) it is increasingly wrong, because inefficient.

Our "today" is identical with the future we invented. If the quality of the futures now becomes more and more important, the focus shifts: from the near future 1 to the more distant futures 2 / 3. And for these futures our mental programming "Crossing for Innovation" is no longer sufficient:

**We need Emergences,  
not just Innovations.**

*Franck:* Yes, I'm with you on that. But as a question: can we generate the Emergences of Future 3 only through Co-Evolution?

*Keno:* Yes.

*Franck:* I'm speechless.

*Keno:* Future 1 works with our 1st Reality-Generator, which is focused on Differentiation and Innovation.

Future 2 needs more. The fact that we are already living in a permanent Future-Crisis proves that the scheme of differentiation / innovation no longer works properly. Future 2 needs what I call "the Dance of Probabilities".

Future 3 needs the Third, i.e. that "Space of the Spirit" in which Impossibilities ... are transformed through Ideality and We-ness ... into novel (partly unplannable) Probabilities. This is the new Future-Intelligence. Future 3 needs what I call "the Birth of Impossible Possibilities."

If we want to have a new kind of Intelligence for the Futures 2 and 3, we need

**the Fusion of  
Woke and  
Metaverse and  
Metabliss in  
a Hyperverse.**

*Franck:* That blows my mind!

*Keno:* Why?

- Woke is the way to productive and creative We-ness.
- Woke is the way to instrumentalize the Third.
- Woke is the way to an Ideality (Love) which is able to transform the Potentiality (= Nagual) into better Reality ... so Woke is the prerequisite for the establishment of a Praxeology of Co-Evolution.
- This Co-Evolution follows the program:

**We no longer organize  
the Quality of our Futures  
in an elitist and Top-down way,  
but through the Interaction  
of Differentiation and Unification  
in the societal Reality of a digital  
"Rhizome-Sphere" (Deleuze),  
which can be called "Hyperverses".**

- Woke and Metaverse (plus Metabliss) democratize the Betterment of our Futures. If we do not succeed in this ...

*Franck:* ... you mean this spiritual kind of Democratization? ...

*Keno:* ... yes, then we will experience the Agony or the Self-Destruction of our Democracies.

Our so-called Western-Values, which now form the foundation of our democracy, will not be able to prevent this.

*Franck:* Actually, why not?

*Keno:* Because the Values of our Progress-Organization do not carry any Woke-Values. We talk a lot about Love and We-ness. But the Progress on which our Democracy is built is primarily Differentiation and Top-down (i.e., Exclusion).

Our Western-Values are rooted in the Judeo-Christian narratives of religion. And they have caused our deep-rooted (biological) Fear of Contingency to become the instrument of our Knowledge-Culture:

**We believe in  
the progressive power  
of Better-Knowledge and Innovation.**

**But we are unable  
to believe in the  
Progress-Power of Love  
and Interfusion.**

Love and Interfusion have been excluded as "personal Intrinsic". They are treated as a "private matter." They interfere with the Accomplishment of Progress through Better-Knowledge.

What the Woke-Initiatives want is the Abolition of this Exclusion in favor of Humanity and We-ness.

*Franck:* But Humanity and We-ness have no competence for what you call for, namely "Emergence replaces Innovations" and "Future 3 becomes our Today".

*Keno:* I think that's certainly true as a snapshot. We have not yet developed evolutive concepts that make Humanity and We-ness productive ... more productive than "innovation through differentiation" or progress through the "hierarchization of Better-Knowledge".

But: this strategy of progress generates innovations (but hardly emergences), but it has the following disadvantage:

**The negative side effects  
of our strategy of progress  
begin to turn the Now of our World  
into a Permanent-Crisis.**

**These side effects begin  
to divide our society  
and successively damage  
the "Spirit of Democracy".**

In such a situation, to focus on "we need to strengthen the resilience of citizens" is pretty close to a mixture of incompetence, resignation and cynicism.

*Franck:* All right. Let's take the Woke-Values as a way to the Better. How then do we organize this way?

*Keno:* Through the Hyperverse.

*Franck:* My God, Digitality again: more Humanity through more Digitality! Are you serious?

*Keno:* We need Woke as suppliers of those Values that will make We-ness productive. To succeed, the Woke-Values need an active and public space ("space for staging"). Specifically:

**If the Woke-Values do not get an active space in the Internet 3.0 / Hyperverse, the positive and transformative Values of Woke will successively lose their power.**

*Franck:* Yeah, something like that.

*Keno:* That's why it's so important that Mark Zuckerberg expands and qualifies his Metaverse into the Hyperverse, It follows:

**The Hyperverse will socially enforce Woke-Values.**

On this basis, we can make a first, preliminary definition of the Hyperverse:

**The Hyperverse is that digital Generator that enables our Society to invent and collectivize those "Streams of Consciousness" that connect us as Humanity to the Now-of-Creation (Nagual) in such a way that we can transition: from Evolution to Co-Evolution ... from the Intelligence of Differentiations to the Intelligence of We-ness.**

**The Hyperverse is the key to the 2nd Axial-Age**

*Franck:* Let's leave it like this.

*Keno:* Thank you.

*Franck:* But the question remains whether Woke is really doing everything right, isn't it?

*Keno:* Yes, absolutely. My answer to that:

- Woke is doing a lot of things wrong, because Woke wants to force the absolutely necessary We-ness through Activism, Agitation and Struggle.
- If Woke is not integrated into a Hyperverse soon, Woke will first radicalize and then successively weaken.
- But if Woke can be integrated into a Hyperverse, Woke will become the spiritual Set-Point-Generator for the Epoch of Interfusion.

**The Hyperverse  
transforms the Activism of Woke  
into a sovereign  
Form of Leadership.**
