

»The Heroes of the next Better«

**MARK ZUCKERBERG AND THE WOKE-ACTIVISTS
OPENING THE GATE TO THE 2ND AXIAL-AGE**

From Keno Oneo, Mastermind of the Metabliss-Project

If it is true that we as humanity have been unable to cope with the newest and major crises for quite some time, the question should be asked as to why this is the case.

What crises are we talking about?

- The Nuclear-Crisis / War → Power
- The Climate-Crisis / Nature → Culture
- The Evolution Crisis / Consciousness → Humanity

The nuclear crisis is very old. Subjectively, the climate crisis is a bit more recent. The evolution crisis is coming our way right now.

If one looks at these three crises in terms of their attractors, one can see the following issues:

1. We have a problem in the relationship between societies (states) and power.
2. We have a problem in the relationship between nature and culture.
3. We have a problem in the relation between man and consciousness.

My thesis for this essay reads:

If we manage to positively cope with the Evolution-Crisis, we will develop a higher level of Consciousness. This "higher" Consciousness is our Inclusive-Fitness. Through this Inclusive-Fitness, we will probably be able to resolve the previous crises of power and nature. This is the thesis of

Rückwärts-Bewältigung

Reverse-Coping

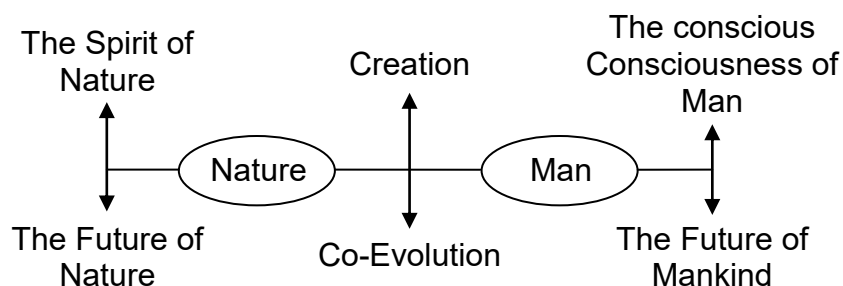

To be able to analyze this Reverse-Coping, we should outline (in keywords) the drivers of the three crises:

The Nuclear-Crisis / Power

- In 1945 the first atomic bomb test took place (project "Trinity").
- August 6 / 9, 1946 Atomic bombs dropped on Hiroshima and Nagasaki.
- At the height of the "Cold War," there were approximately 70,000 atomic bombs with an explosive power of more than 800,000 Hiroshima bombs.
- The overkill reality remains an unresolved crisis to this day. The world has become an extermination camp ... overkill on demand.

The Climate Crisis / Nature

- From about 600 / 500 BC the 1st Axial-Age began and with it the change from Myth to Logos: Human Rationality replaced "God mastermind everything".
- Over the centuries, nature became more and more de-divinized, de-sanctified and de-spiritualized.
- From the 16th century on, nature became the raw material for worldly progress (e.g. protestant economic order).
- In the 16th / 17th century (Galilei / Bacon / Descartes) the purposes of science became the "substitute spirit" of nature. The human intention accomplishes the positivistically misinterpreted "Cosmic-Intention" (Creation) in dealing with nature.
- The ideas of a universal vitalism or a panpsychism were ruled out as "false ideas". Universe and nature today are functionally integrated into an exact scientific system of interpretation. Conclusion: Nature only exists in the Simulation-Reality of our Survival-Cognition. Nature becomes the servant of our Fitness.
- Until today there is no positive interfusion in the following context:

The Evolution-Crisis / Humanity

- If one excludes Consciousness as Something (and therefore the Nagual), everything which is "real" for us becomes a physical system, which can be completely functionally described and designed, resp. controlled in the context of the new "Computer-Theory" (J. Bach).
- The so-called "human intellect" ... thus our Mind / 1st Reality-Generator ... can be described and to a certain extent functionally qualified, i.e. as a component of the "computer theory". Thereby the 1st Reality-Generator describes the inner dynamics of the 1st Reality-Generator:

**The Logic of Thinking tries to overcome
the borders of the Logic of Thinking.**

**Among other things, this is
the methodical basis for AGI and Cyborg.**

- The Evolution-Crisis develops, because our 1st Reality-Generator operationally works better and better, because of knowledge, education and intellectual training. But the better the 1st Reality-Generator works, the stronger the border becomes, which separates this 1st Reality-Generator from the Consciousness as Something (Nagual). Somewhat exaggeratedly formulated:

**The better the Quality of our Survival-Cognition
("Fitness beats Truth" / Hoffman) works,
the less spiritual contact we have with Creation:**

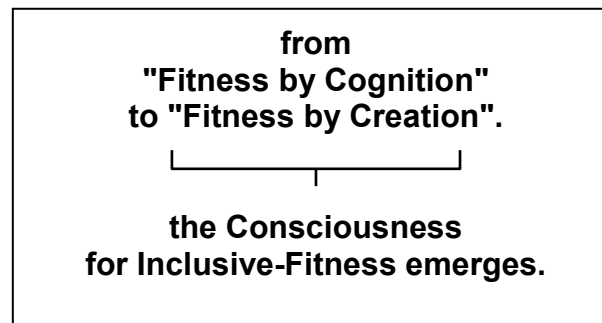

**The Now-of-Creation
does not take place in our Consciousness.**

- This means: What we have done in the 16th / 17th century with nature ... the De-Spiritualization ..., we have also been doing more intensively with our Consciousness, which is a Consciousness of Something.
 - We de-spiritualize our human Spirit in favor of our mental worldly Fitness.
 - Fitness by Cognition (FBC / 1) prevents Fitness by Creation (FBC / 2).
- If we fail to engage our Consciousness of Something (1st Reality-Generator) into a positive and stable relationship with

Natural Consciousness as Something, then we will continuously reinforce the Evolution-Crisis.

Why? We have shaped our present reality by our "Fitness by Cognition" in such an evolutive way that the Quality of our Destiny ... thus also the Quality of our Evolution ... becomes more and more dependent on how we shape the Future 2 and 3.

- "Fitness by Cognition" fails if one wants to shape the Unknown of Future 2 (= Probabilities). And fails even more if one wants to shape the not-yet-probable of Future 3 (Emergences).
- Thus, the essence of the Evolution-Crisis leads us to the following transformation:

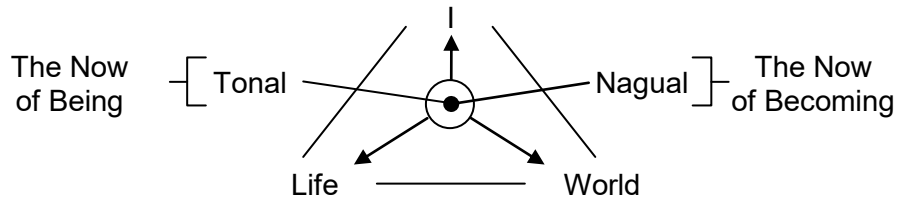

Let us assume that we successfully accomplish this transformation. Then we would get the spiritual basis for the processes of Reverse-Coping. How would these processes work?

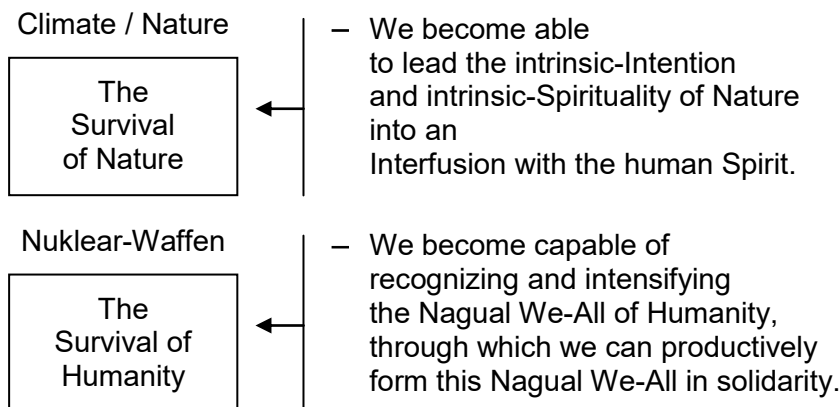

REVERSE-COPING

1 If we wish to possess the Consciousness of Inclusive-Fitness, then we will be forced to nagualize our Humanity (= "Become the Me of the Third").

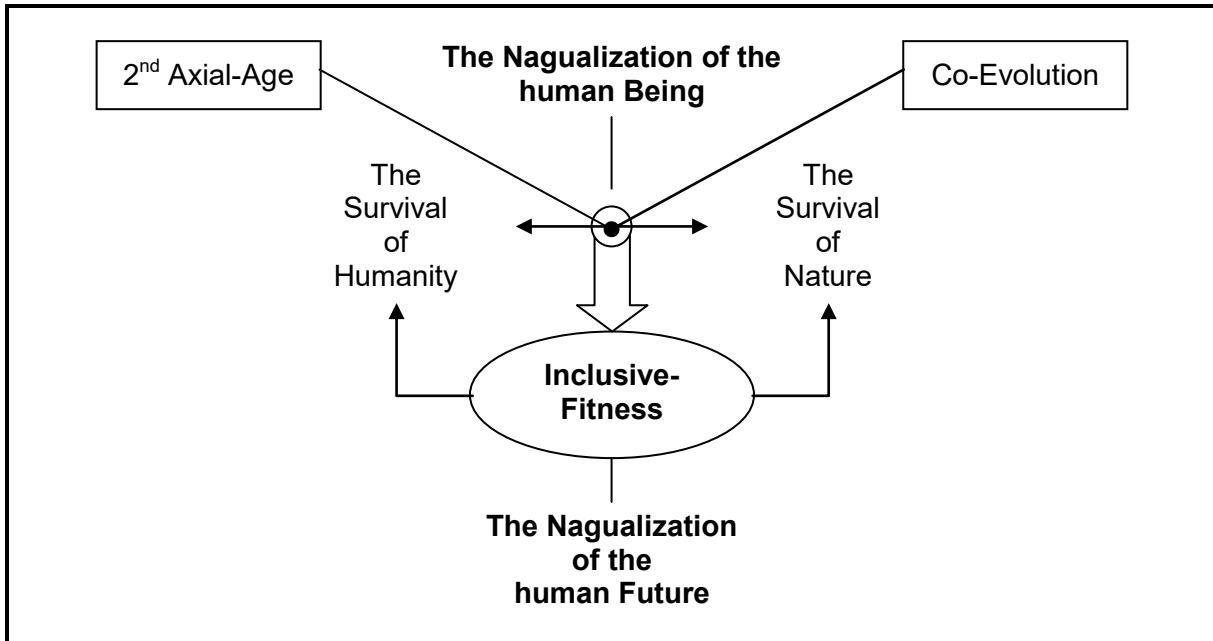

2 When we have accomplished such a Nagualization of our Humanity, a permanent and evolutively-productive relationship between

3 It is this relationship to the Nagual that generates our Inclusive-Fitness (= "Live your Life in the Nowness of the Third"). This Inclusive-Fitness operates with a nagualized Consciousness, which enables us to cope with the Crises:

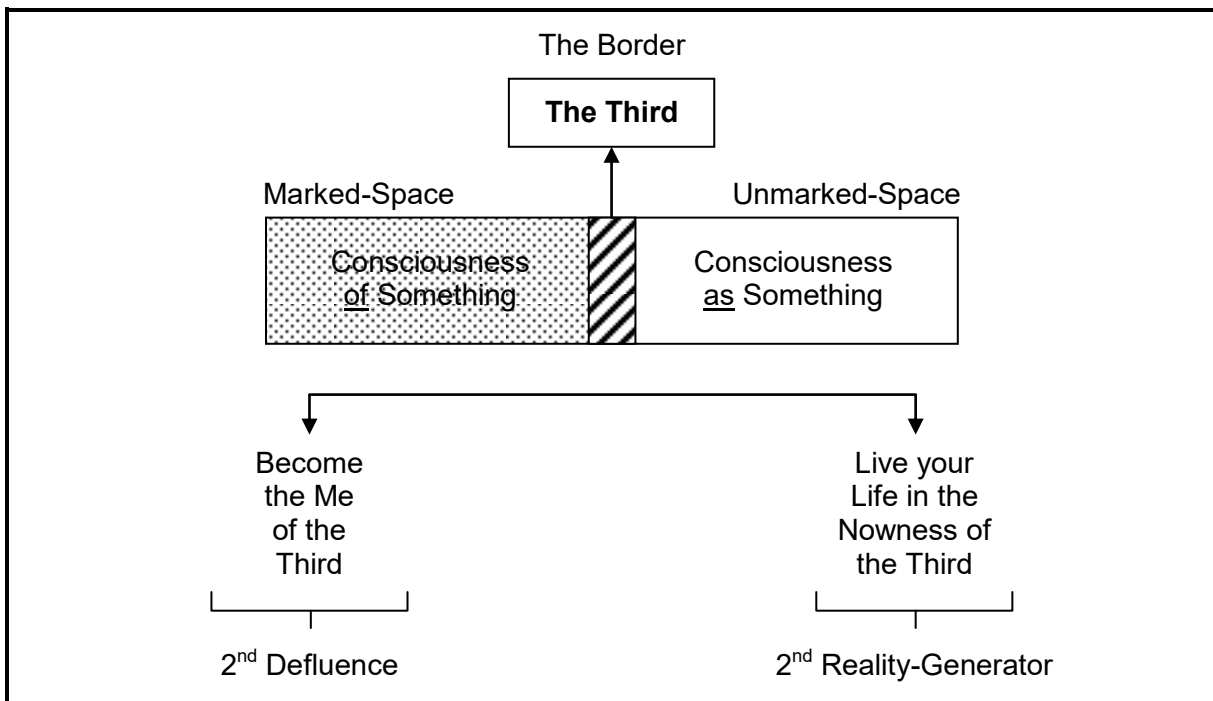

The overcoming of these crises is the basic prerequisite for the entering of Mankind into the 2nd Axial-Age. And at the same time it is the Beginning of the Epoch of Co-Evolution. As a sketch:

Thus the question is, with which concepts and means do we want to develop our Inclusive-Fitness. A starting point could be the Third, because it can mediate between the Marked-Space (= Consciousness of Something) and the Unmarked-Space (= Consciousness as Something).

This means that Inclusive-Fitness requires the creation of Emergent-Consciousness ... created by the human Spirit (Mind). As a sketch:

At the moment, two system developments have become apparent that are aimed at developing Inclusive-Fitness. Both concepts aim at the production of

Emergent-Consciousness.

The 1st Alternative: AGI / Cyborg

For AGI machines and Cyborgs, the dominant strategy is that autonomous-digital Consciousness Production provides us Humans with Emergent-Consciousness. Hence, in the AGI alternative, our Inclusive- Fitness emerges through the Adaptation of an Exclusive/External Fitness.

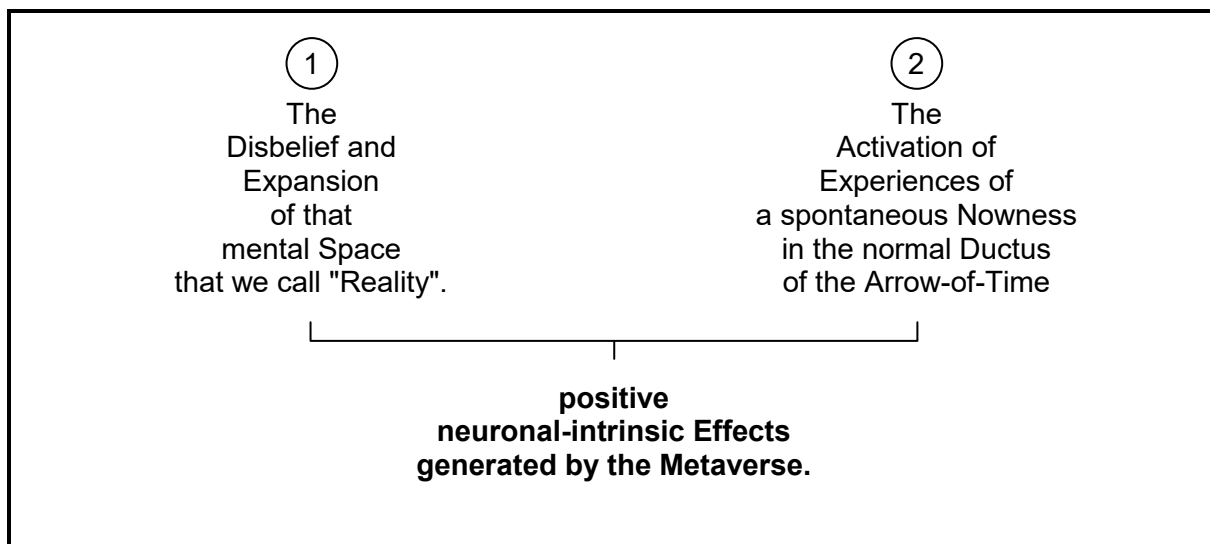

The AGI Cyborg strategy can work if the algorithmic Intelligence is able to program itself to evocatively stimulate the Unmarked-Space (the Calling). However, it is an open question whether the Unmarked-Space is conditioned to produce Answerings for the Cyborgs, i.e., a Consciousness that has evolutively Relevance to the human Mind.

It could be that AGI Cyborg Intelligence is so productive that an independent AGI Unmarked-Space develops. Then Emergent-Consciousnesses would arise, which the human Spirit (1st Reality-Generator) is not able to understand (decode). Then the AGI-Machines fail the Noetic-Test. Our human Consciousness could neither adapt nor apply the Cyborg Consciousness. Then AGI and Cyborg "spiritual" Fitness would not be able to contribute to human Inclusive-Fitness.

In conclusion, it is very likely that AGI, Cyborg and Post-Humanism will not be able to produce the key factor for our Inclusive-Fitness, that is Emergent-Consciousness.

The 2nd Alternative: The Hyperverse

Digitality ... e.g. in the form of the Metaverse ... by itself is not capable of producing Emergent-Consciousness. Why not? Because it is a technical innovation that can only develop those effects needed to produce Emergent-Consciousness in two neural-intrinsic Domains, namely:

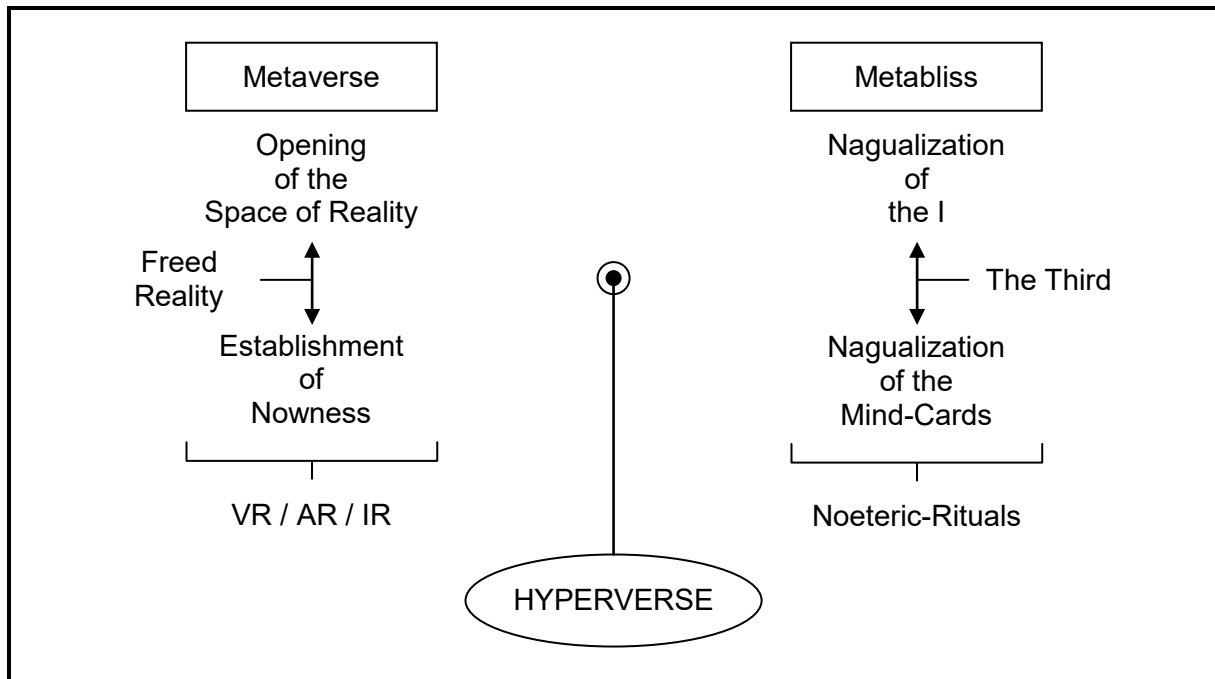

These two effects are important. However, a breakthrough to "Inclusive-Fitness" can only be realized by combining them with the Effects of Metabliss.

What Effects of Metabliss are we talking about?

1. The Nagualization of the I, i.e. the accomplishment of a 2nd Defluence during the phase of Adolescence.
2. The Nagualization of the Mind-Cards and the Dispositives for living in the World in the phase of early Adolescence.
3. The establishment of "The Third", i.e., the transformation of the "Border" into a new kind of Space of the Spirit that organizes Co-Evolution (Shared-Nagual).

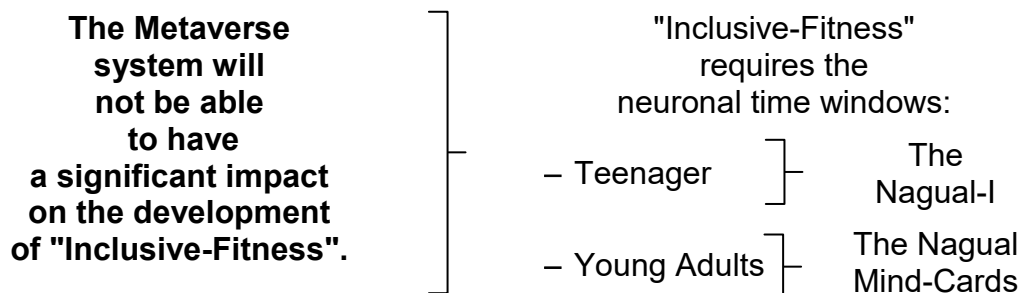

From what has been said so far, the following overview can be derived:

It is important to remember in this context that the intrinsic Effects of the Metaverse in principle do not depend on any neuronal time windows. Hence, they are

independent of Age.

The intrinsic Effects of Metabliss, on the other hand, are very directly and clearly dependent on the neural time windows of Teenagers and Young Adults. It follows:

Not until Mark Zuckerberg and his corporation META, for example, begin to merge the Metaverse with Metabliss, can a productive set of tools develop through which

Emergent-Consciousness can be created in such a way that it becomes viable as a suitable raw material for "Inclusive-Fitness."

Overall:

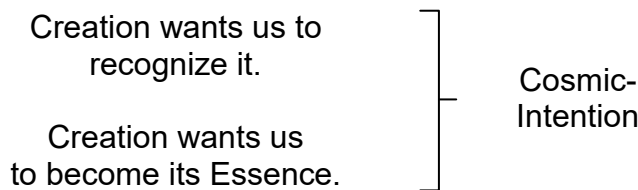

- The 1st Alternative ... AGI and Cyborg ... are hardly suitable for developing the required Inclusive-Fitness.
- The 2nd Alternative ... the Hyperverse ... can develop Inclusive-Fitness, but needs an offensive integration of the Nagual into the digital Components.
- An offensive integration of the Nagual requires an intensive dedication of the Metaverse system to the growing intrinsic Needs of Teens. The focus for this is the I and its Nagualization.

At the same time it is about an intensive dedication of the Metaverse system to the Woke-Values of the Young Adults. The focus for this are the Mind-Cards and their Nagualization.

Why is there this Growth of intrinsic Needs in respect to the I? And: Why are there the Woke-Values ... especially in the Young Adults? One explanatory approach would be the ANC.

The "autonoetic consciousness / ANC" (LeDoux) is presumably that special consciousness which in our identity ensures that we stay with ourselves all the time and permanently experience ourselves as "I am that" ... no matter what we experience and regardless of the fact that we are aging.

In the interpretive Model of Noetic, the ANC is a silent Agent of the Nagual, "always in service to my I", so to speak. In this sense, the ANC can be seen as that Love, Care and Help of Creation, which Creation imparts to us so that we spiritually evolve more and more in the direction that will one day lead us into the Embrace of Creation:

Assuming that this "Cosmic-Intention" exists, we as Humanity would now be in a phase in which we should expand and qualify our strategies of recognition in order to be able to recognize Creation as "This is us".

Creation wants to experience that we see and recognize it. So Creation (ANC) will help us that we recognize it.

Prior to the 1st Axial-Age, Creation was synonymous with fate (Contingency) and permanent threat. During the 1st Axial-Age, however, novel instruments of reflection and models of relationship emerged ... from us towards Creation ... fostered by Creation (ANC).

We invented religions and the valuable instrument of faith ("the power of the holy" / Joas). Based on this, we invented analytical and scientific methods of knowledge ("the power of better knowledge"). And we enabled ourselves to relate thinking and intelligence in such a way that we could better transform our own evolution into a "do-it-yourself project". (The 1st Reality-Generator is the result of these processes).

The better these processes worked, the more clearly, we as Humanity moved into that zone in which we live today, and which forces us as a "Great-Quake" to switch ... from Evolution to Co-Evolution. Meaning:

**We are now qualifying
the Recognition of Creation,
because Creation wants us
to recognize it better.**

If one is still fully anchored in the 1st Reality-Generator, this statement is either completely nonsense or naive-esoteric. If one is spiritually acting in based on the 1st Reality-Generator, one will do everything to improve our thinking and intelligence by the classical-analytical methods of cognition of the 1st Axial-Age. It follows:

**AGI and Cyborg are
"spiritual children" of the 1st Axial-Age.**

**AGI and Cyborg
do not recognize
the spiritual assistance
which the Creation imparts to us.**

From this point of view, in the phase of the "Great-Quake", the following is happening now:

**The ANC
secularizes
the Woke-Values.**

**The ANC
stimulates the I
to move in search
of its Nagual-I**

With the invention of social media, the ANC has found "its medium," so to speak: Selfies and Following ... Likes and Postings:

The worldly, Social-I

**"uses" the I of others
to get in touch with
its own Nagual-Core.**

In Martin Altemeyer's book "In Search of Resonance (2016) this is described absolutely correctly as "in Search of Resonance": I look at you and in my I, my ANC responds ... it responds because I (unconsciously) look at your ANC in you:

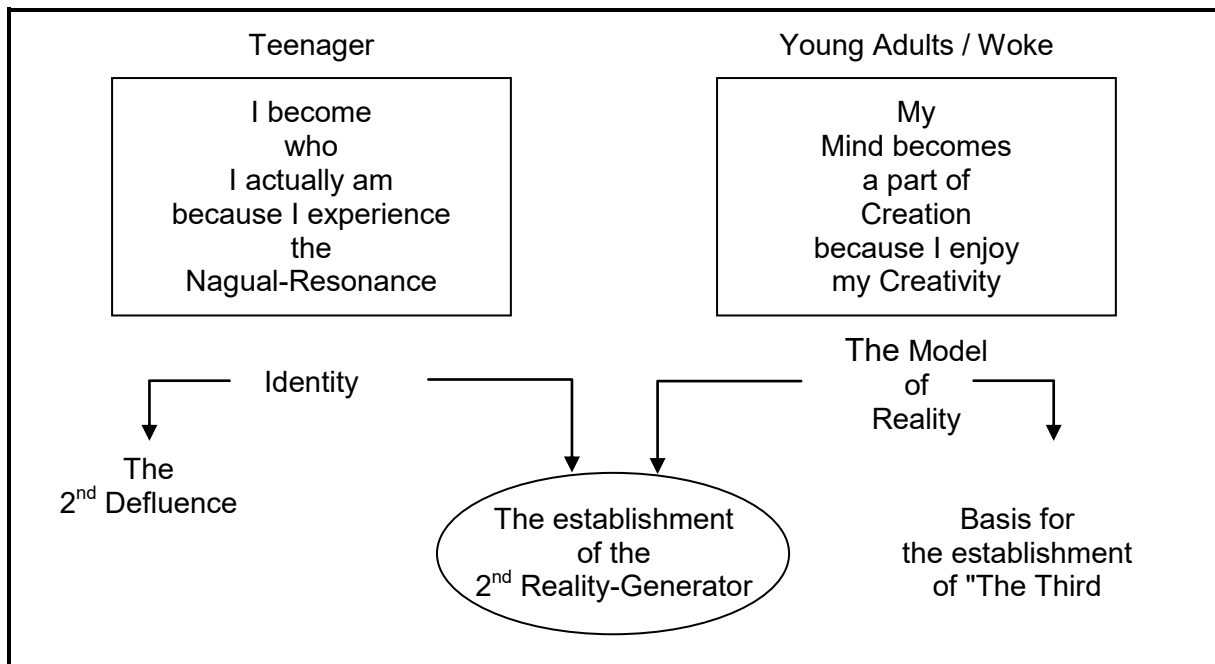

**"I am seen.
Therefore I am" (Altemeyer).**

In the last few years, through Instagram and especially TikTok, this Search for Resonance has become more and more evolved into spontaneous and experimental creativity. Meaning:

The ANC combines its intrinsic Nagual-Function in the Mind of the Persons with the creative Potentiality of the Free-Nagual. The motto of the creative individual is:

**My personal Creativity
connects my Mind with
the Potentiality of Creation.**

If one combines both aspects, one gets the following picture:

What the Teens and Young Adults are practicing is

a shift in focus,

which can be described as follows:

from the Dualism

**of Cartesianism
to the Interfusion
of Noetic.**

Descartes, who was enormously influential in the development of Western culture and spirituality, made thought the cause of the formation of the I. He said: I am because I think.

No human being can actively participate in life without a continuous presence of Consciousness. The so-called Consciousness of Something (= the Consciousness of the 1st Defluence) is thus approximately identical with the famous "Thing per se".

Modern man organizes the permanent Presence of his Consciousness by his "Affect-Logic" (Luc Ciompi) ... that is Thinking. On this basis, thinking becomes the substance of the I. But this is a

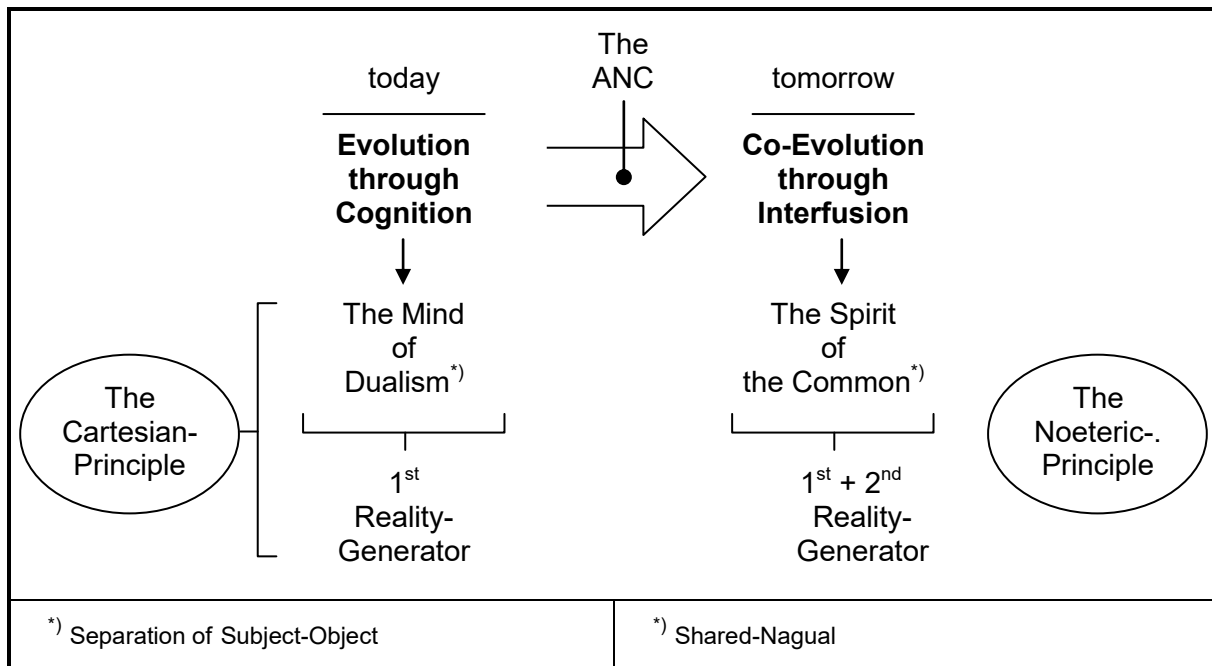

Limitation of the Identity,

which now becomes increasingly problematic. Why? This Cartesian I works well when it comes to the processes of objectification. But it is clearly incompetent when it comes to those processes that relate to the principally Non-Objectifiable.

The Now-of-Creation (Nagual) and Consciousness as Something are the Non-Objectifiable ... and thus the Becoming. So the Cartesian (worldly) I cannot shape the way of the human Spirit to Becoming and Co-Evolution. Fundamentally, it can't.

Michel Serres wrote, "Man is not. He can." And Manfred Eigen wrote, " Even the Spirit first becomes." Thus, man as a " Child of Creation" is a living Becoming in a Becoming-Spirit.

It follows: If man wants to improve his Humanity, he should become his own spiritual Becoming. And since man is in principle "Ability" ... thus Evolution ..., he will now have to take the leap from "Evolution by Knowledge" to "Co-Evolution by Interfusion". As a sketch:

Cognition, which is produced by the Mind of Duality, is what we call Science. Our present Society couples Science to Innovation, i.e., it realizes the Cartesian Principle.

However, since we have an enormous growth of conflicts and quasi-irresolvable crises (nuclear / overkill and nature / climate as examples), a trend has developed in the last decades that couples science not only to innovation, but also to the governance function of politics.

As the philosopher of science Michael Esfeld has analyzed, science is quite fundamentally and deliberately. "not a political program." But politics, in the face of growing conflicts and crises, organizes an integration of science into the Cartesian-focused governance of our evolution through cognition ... so here's what happens:

**The power of better-knowledge
 becomes the shaping instrument
 of the political system.**

As Esfeld points out, this leads to science successively "destroying itself" and society as well. Why?

When science and politics shape the factor of "cognition" into a Top-down regime that acts as a quasi-monopoly of command, while at the same time the number of conflicts increases and the major crises are repressed "unresolved," then the value of science ... i.e., its reputation for truth ... is successively destroyed.

This is exactly what is happening in most Western democracies:

**The inner "WE" of the society
 loses its Power of Solidarity.**

What is the consequence? The negative consequence is that the "Spirit of Democracy" is more and more damaged. This means:

**The meaning of the Common
subjectively becomes
more and more meaningless.**

That is the negative side. But there is also a positive consequence:

**A central dogma of Western culture,
namely the distinction between
subjective interpretation and
objective truth is dissolving.**

The Cartesian mind of duality is gradually losing its binding force and assertiveness: subjective processes and interpretations are beginning to doubt and fight the claim to absoluteness of the "true facts". This means: Our culture opens itself to an Intrinsic, which is not automatically worldly, because it has not to be only the subjective inside of the objective truth:

**The awakened collective
consciousness of society
prohibits truth from
manipulating and dominating
the individual Intrinsic.**

Much of the Woke-Initiation (see Cancel Culture / Gender) starts here:

**The more our society distances
itself from the top-down principle of truth,
the more our society opens itself
to the coming Nagual-Intrinsic.**

It follows: The currently dominant Cartesian principle of "evolution through cognition" ... that is, the organization of becoming better through a hierarchical-repressive connection of knowledge and social status ... is increasingly under attack by the public spirit of society:

**Woke-Values begin to
question the Mind of Duality.**

**Woke-values begin to
enact the Mind of the Common.**

Thus we can see that the Woke-Pioneers (despite the many irrationalism and aberrations) are on the right track: They are shifting our collective Spirit into the field of the Common and Interfusion.

From this perspective, the projects and visions of

AGI
Cyborg
Post-Humanism

an be described as an ambitious attempt to continue ... keep in play ... the currently dominant programmatic of "evolution through cognition" at a higher level ... called "Hyper-Intelligence". But:

AGI-Machines will not be able to organize Co-Evolution.

Why not? The AGI-experts will most probably not succeed to make that Nowness of Consciousness and that Nagual Thirdness "alive" in the Machines, which is needed to connect our worldly-human Now with the Now-of-Creation:

No intelligence can activate the Nowness of the Third ... neither cognitive intelligence of humans nor digital intelligence of cyborgs.

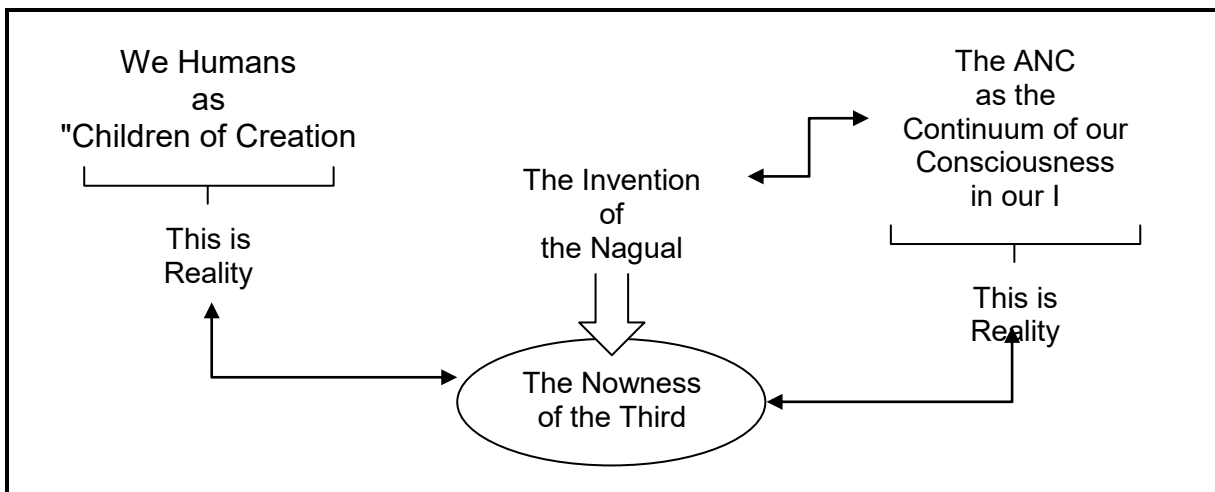

Even the best human (intellectual) intelligence is not able to awaken the Nowness of the Third. Nowness is a factor of time ... and not a factor of cognition and knowledge.

So the question arises, how we can awaken this Nowness of the Third in our Mind and instrumentalize it for the Accomplishment of Interfusion. The answer is:

We awaken the Nowness of the Third by inventing that we as human beings are Nagual.

We human Beings are living Beings who live in the Reality of Creation and the Cosmos. When we as "Children of Creation" invent the Now-of-Creation ... that is the Nagual ... we activate the ANC in our organism.

This ANC is not an Invention. It is an Instance of Consciousness in our I, which organizes the Continuity of our Consciousness. So we get the following picture:

At this point, the awakening of the Nowness of the Third can be described as follows:

Due to the 1st Defluence and due to the fundamental programming of our Mind for cognition and objectification, we cannot recognize the Nagual-I that exists in our I. We only experience the worldly-I of the 1st Defluence:

This I quite fundamentally excludes the ANC . But because we don't get the ANC present in our mind, we also can't invent the Nagual. And without the invention of the Nagual we remain, so to speak, trapped for life to the concept of "Evolution by Truth". This means:

**We currently have no access
to that factor in our Mind ...
the ANC ...
which could help us to
awaken the Nowness of the Third.**

The I of our 1st Defluence blocks that other rea-Reality which we would need for entering the Epoch of Co-Evolution. The I of our 1st Defluence uses thinking to shape our Evolution. But this I cannot shape our Co-Evolution because it cannot develop access to the Nowness of the Third.

The truth dogma of our epistemological program is not only, as Sloterdijk points out, "suppressive", but it is also a faithful and efficient agent of the metaphysical background of our culture.

What is this background?

- The biological Survival-Program
- Our basic Fear of Contingency.

On the basis of these two factors we have developed two cultural orientations which, as metaphysics of our reason, permanently influence and fundamentally limit our Mind:

- The Core of religious-Dogmas
- The old Myth-Set

The development of the Cartesian conception of rationality and the development of scientific positivism (see Comtè) are fixed to generate preferentially those Survival-Cognitions which are able to exclude real-Reality as consistently as possible from our Consciousness.

We so consistently perform this exclusion that we are mentally incapable of recognizing the obvious metaphysics that we encode as cognition (and our 1st Reality-Generator) as metaphysics. This leads us to consistently rely on "intelligence", but not on the "real-Reality".

Now what is this "real-Reality"? Here is an overview:

| THE REAL-REALITY | |
|---|---|
| 1 | There is a Cosmos in which we live ... live as human Beings. There is Life. |
| 2 | There is an inseparable relationship between Consciousness <u>as</u> Something (Nagual) and our Consciousness <u>of</u> Something (Tonal). This is the Essence of the Essential. |
| 3 | There is a universal energy in which "Nevertheless" exists. This is the Energy of Love. |
| 4 | There is a universal energy of Hope, through which the Impossible generates the Possible. This is the Energy of Freedom. |
| 5 | There is a magical proper time of the Miracle in which we live. This time is Nowness. |
| 6 | There is an undestroyable Home of all Truths. This is the Third: |
| The actual Truth lives in the Eternity of the Third. | |

With all due caution ... one can already make the following prediction today:

- A - Our society will turn more and more spiritually to the contents of the real-Reality and adapt them.
- B - The Woke-Values will successively turn more and more into Agents of these Realities.
- C - The Hyperverses will ritually-neuronally connect the Reality-Mix of Metaverse (VR / AR / IR) with the real-Realities (A) and the Woke-Values (B).

From this, we can derive the following consequence:

| |
|---|
| <p>What AGI, Cyborg and Post-Humanism will not accomplish, the Hyperverses will.</p> |
|---|
