

<b>WITHOUT MORE HUMANITY THERE WILL BE NO CO-EVOLUTION</b>
Hyperverses and Woke-Values
Keno Oneo in Conversation with Jochen Franck

*Franck:* In our recent conversations, you have often suggested that there are invented or "Relative-Realities" (Donald D. Hoffman), but also "Real-Realities". In your last essay "The Heroes of Better" you then explained that one can only engage in Co-Evolution if one ritualizes "Real-Realities". That is, not the "Relative-Realities" described by Hoffman.

But you have also said that our Mind ...

*Keno:* ... has been programmed by the accomplishment of the 1<sup>st</sup> Defluence ...

*Franck:* ... in such a way that it is actually incapable to recognize the "Real-Realities". So we are facing a dilemma: We need these "Real-Realities". But we cannot recognize them. So we can't make them usable either ... for Co-Evolution. What to do?

*Keno:* Hoffman posits that creation's intent was to facilitate or shape our spiritual evolution in such a way that we would improve our evolutionary fitness through our relative inability (to date) to discern the truths of "real reality". . His model "Fitness beats Truth" describes this.

If so, then the fact that we humans primarily develop and use "survival cognitions" would be a factor in efficient fitness. We have ... according to Hoffman ... learned to develop a kind of "simulation reality" that we absolutely need to connect our survival with improving our lives.

*Franck:* And that's what ... good or bad?

*Keno:* Good, of course. Excellent good!

*Franck:* Why?

*Keno:* Because by the evolutionary acquired inability to recognize the "Real-Reality", we have developed a 1<sup>st</sup> Reality-Generator, that now operates at an absolute peak level.

The combination of religion, science, economy, media and training has led us to this highest level. Somewhat simplifying we can say the following:

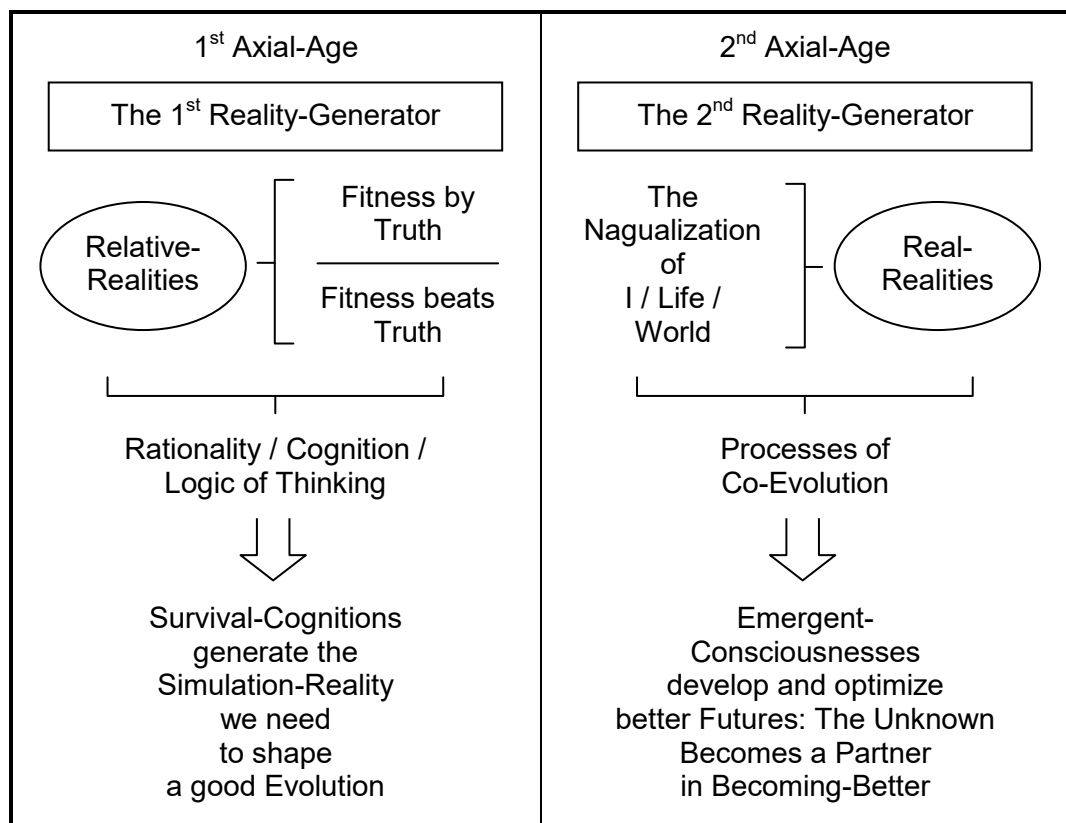

**The 1<sup>st</sup> Axial-Age has formed that 1<sup>st</sup> Reality-Generator, which enables us to brilliantly control our Evolution.**

**But now we have created an evolutive Reality (growing Complexity, Acceleration, Contingency), which we can't perfectly develop with this 1<sup>st</sup> Reality-Generator.**

**Therefore we need an additional 2<sup>nd</sup> Reality-Generator.**

**This additional Reality-Generator needs " Real-Realities".**

Let me concretize this by a small sketch:

*Franck:* I remember. You have emphasized many times that the 1<sup>st</sup> Reality-Generator works perfectly for connecting the actual present and a desired Future, which however is only a Future 1...

*Keno:* ... yes, a relatively recognizable, calculable and plannable future. For the Future 2 and Future 3, the 1<sup>st</sup> Reality-Generator has not been designed. In other words:

**Future 2 and Future 3 is "too big"  
for our 1<sup>st</sup> Reality-Generator.**

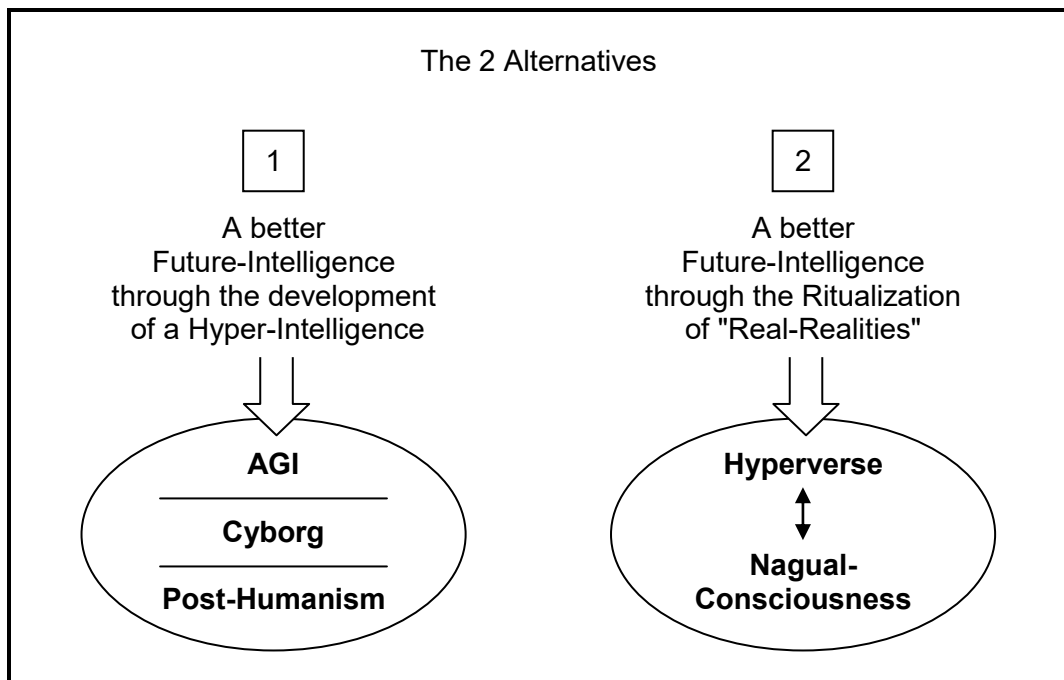

This is the reason why we have now ... based on the digital revolution ... started to develop

**AI and AGI:**

Our 1<sup>st</sup> Reality-Generator has concluded that we have to develop a different, i.e. extended Future-Intelligence.

*Franck:* And in this context, you have made the thesis that there are two alternatives to achieve this intelligence. Right?

*Keno:* Yes. The following overview describes these 2 alternatives:

*Franck:* Hmm, these are very distinct differences. In [1], the combination of science and digital technology is used to get to the wanted new Future-Intelligence. To me, that's a logical strategy.

With [2] it is ... from my point of view ... a bit confused. One wants to ritualize "Real-Realities". But our Mind ...

*Keno:* ... better said the 1<sup>st</sup> Reality-Generator in our Mind ...

*Franck:* ... is not at all able to recognize these "Real-Realities" due to reasons of our Evolution and to make them usable for our Future-Optimization.

And then at [2] there is the word " Consciousness ". And you know that this is a delicate subject.

*Keno:* Yes, it is: David Chalmers, for example, thinks that Consciousness is a " Mystery" and will probably remain so forever. Patricia Churchland thinks that the brain cannot produce Consciousness at all unless "it produces a representation of itself." Other scientists assume that exclusively the "neuron networks of the brain" produce those subjective cognitive qualities which we humans subsequently interpret or misinterpret as "Consciousness".

*Franck:* Notice: The factor "Consciousness" is a mixture of esoteric illusion or cold neuro-mechanics. With this, one will hardly be able to develop a better Future-Intelligence.

*Keno:* I stick to the neuroscientist Giulio Tononi on this. He states:

**"Consciousness is the  
only thing that is really real."**

And he also says this:

**"Our Self-Consciousness is  
the Universe experiencing itself."**

That means: I assume that the Real-Reality of our Consciousness will be able to make the complete Reality of Consciousness usable.

*Franck:* Usable, but not objectifiable ... is that what it means?

*Keno:* Yes. Our Consciousness of Something uses Consciousness as Something to produce, through "Fitness beats Truth", those " Survival-Cognitions" that we convey to ourselves as "Real-Reality", when in fact it is only a "Simulation-Reality" ... based on coded Icons.

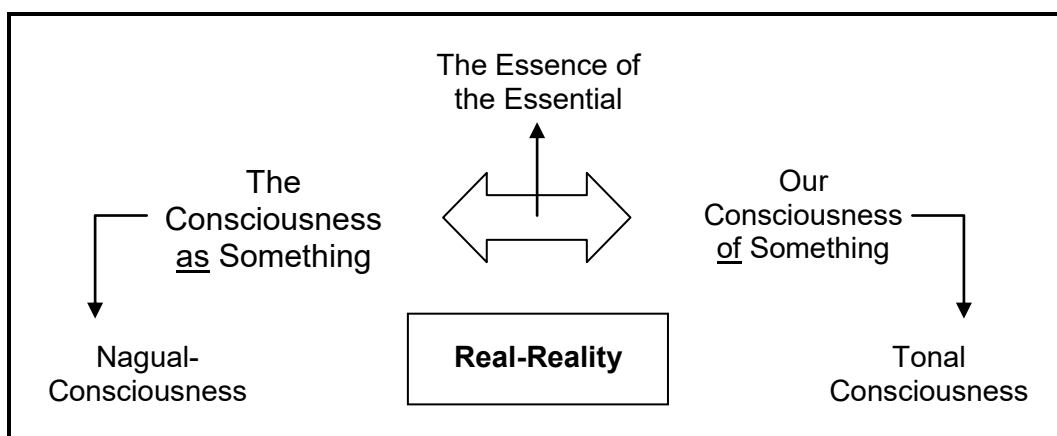

If we ... so my thesis ... anyway use Consciousness as Something as raw material and as "partner" (unconsciously), then we can also enable ourselves to use it in such a way that it becomes our official Partner and a conscious Co-Creator of our Consciousness of Something. This is the basic idea of Noetic in relation to the coming Practice of Co-Evolution. Summarizing:

- Consciousness as Something is and remains that "Mystery" of which D. Chalmers speaks.

- Our Consciousness of Something has developed in our Mind (to which also our brain belongs) a 1<sup>st</sup> Reality-Generator, which consciously has no access to Consciousness as Something: The raw material remains subjectively excluded.
- The accomplishment of the 1<sup>st</sup> Defluence organizes this working scheme, i.e., the Cognition of the World fades out the Reality of the Consciousness as Something.

*Franck:* Interposed question: which Consciousness is now ... as Tononi says ... the only Real-Reality?

*Keno:* Good that you ask. A sketch as an answer:

Subjectively, our Tonal-Consciousness is the Real-Reality. But it is different: the relationship between the Nagual-Consciousness and the Tonal-Consciousness is the only Real-Reality. But it is exactly this Real-Reality that we cannot recognize.

It follows:

- Our Tonal-Consciousness, with which we create the world and our life, is a limited Consciousness.
- Because we possess only this limited Consciousness (which is the result of the 1<sup>st</sup> Defluence), we are still believers of a metaphysics, which is well hidden in our concept "Fitness beats Truth". That is:

**We intellectuals consider  
our 1<sup>st</sup> Reality-Generator  
to be free of Metaphysics.  
But we do not realize  
how much Metaphysics**

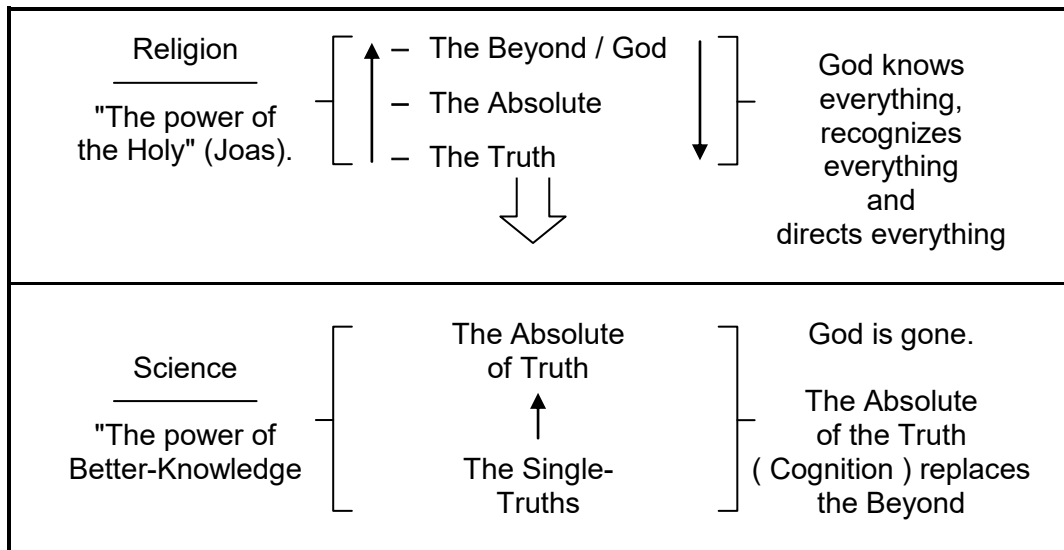

**is contained in our  
Cognition and in  
our Logic of Thinking.**

*Franck:* Where do you see this Metaphysics then?

*Keno:* The 1<sup>st</sup> Reality-Generator processes the old Myth-Set, which is religiously programmed all through.

*Franck:* Where?

*Keno:* As a sketch:

Consider the hubris of physicists who seriously believe they can know the "world formula" ... that is, like God "from above," they can see through and explain everything ... without contradiction and without ambiguity ... that is, also thoroughly computable (which is a strong reductionism). Meanwhile, many physicists have arrived at a rational mysticism via the concepts of self-organization and emergence (see "String Theory" / "Loop Quantum Gravity" and the like).

String theory is often called "not even wrong" (Peter Woit / Lee Smolin), but it is considered as a very valuable and result-rich insight conception, i.e. an ambitious invention, which produces many insights without producing an authoritative (absolute) truth.

In my opinion, the AGI and the Cyborg vision will follow a similar path: speculative and result-rich inventions without goal achievement.

*Franck:* What then would be the goal attainment for AGI and Cyborg?

*Keno:* The production of an Intelligence independent of us Humans, which

helps our limited Intelligence to be able to use an efficient Future-Intelligence.

Again back to the topic of hidden Metaphysics in the 1<sup>st</sup> Reality-Generator. Some theses:

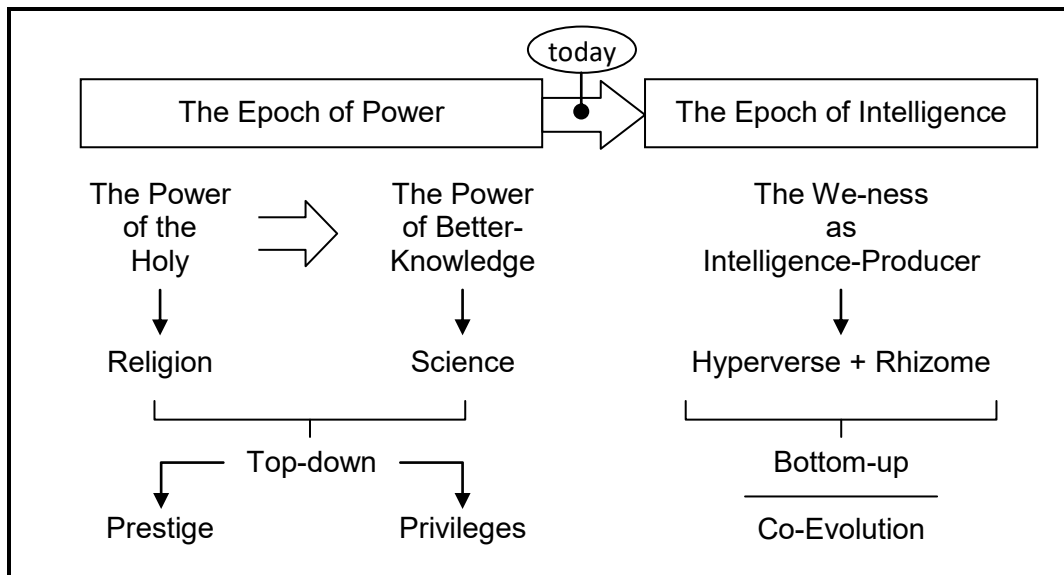

- Creation wants to help us as "Children of Creation" to go that way (Evolution) which makes us able to see Creation.
- On this way we as Humanity will develop more and more to a "Recognizing-Creation".
- In order to be able to complete this way, we (as the next step) will have to master the step from Evolution to Co-Evolution.
- But Co-Evolution can only be accomplished ... by us humans ... if we, besides the tonal "Survival-Cognitions" of the 1<sup>st</sup> Reality-Generator, also produce those Nagual- and Emergent-Consciousnesses, which are based on the Ritualization of "Real-Reality".
- If now the 1<sup>st</sup> Reality-Generator uses its Intelligence in such a way that it consciously excludes the Nagual Consciousness as Something in order to place its "Simulation-Reality" into the status of absolute Truths, then this Reality-Generator carries out a Metaphysics. Namely a kind of Metaphysics of "God-like cognition".

*Franck:* You assume that we ... presumably unconsciously ... have programmed our Intelligence of Cognition on old-religious Myths.

*Keno:* Or the other way around: today we are doing a highly intellectual form of theory and cognition, but we have not been able to recognize the old religious Myth-Set as "Metaphysics" and did not want to dissolve it. We have not led our Mind into its own Secularization.

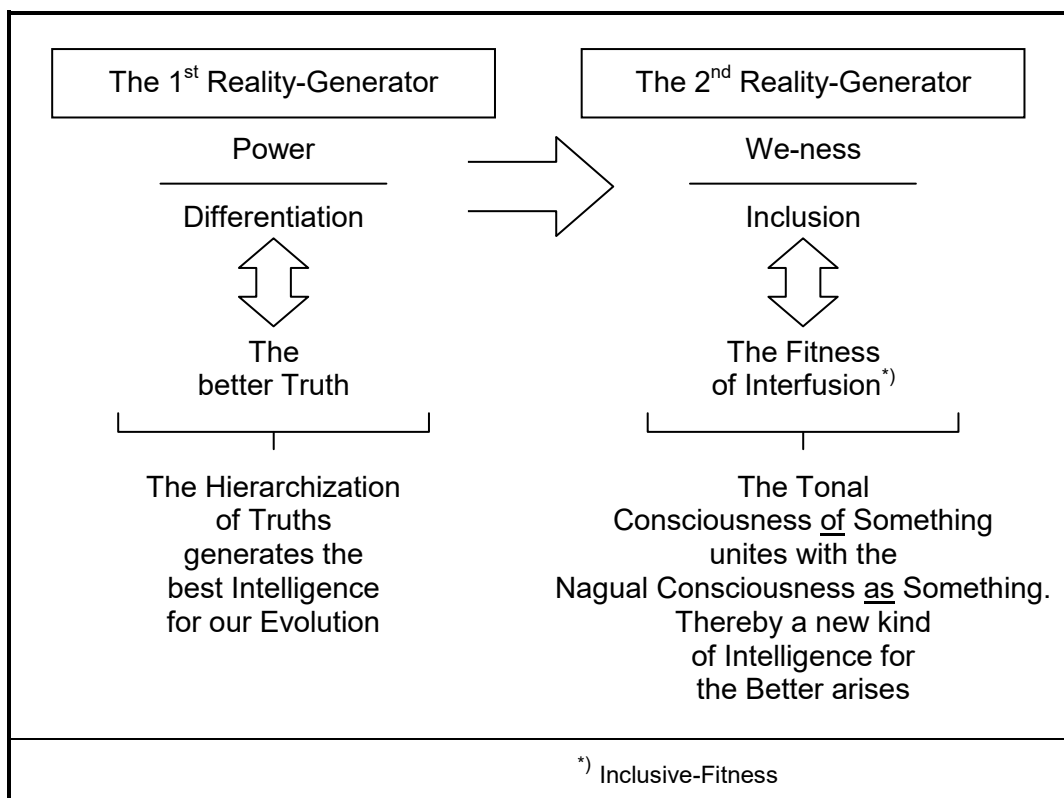

Why not? One reason may be the factors of "power", "prestige" and "privilege".

The following sketch tries to describe this:

*Franck:* If one follows this view, it would be necessary now that we force our Mind to carry out its own Secularization. Your thesis: it is not enough to evolve from the Holy to Science. The Top-down Power has remained. And that, in your opinion, is a shortcoming?

*Keno:* Absolutely. The Woke-Initiatives just force us to take the factor of We-ness (= inclusion) seriously, i.e., to make it the basis of the 2<sup>nd</sup> Reality-Generator. As a sketch:

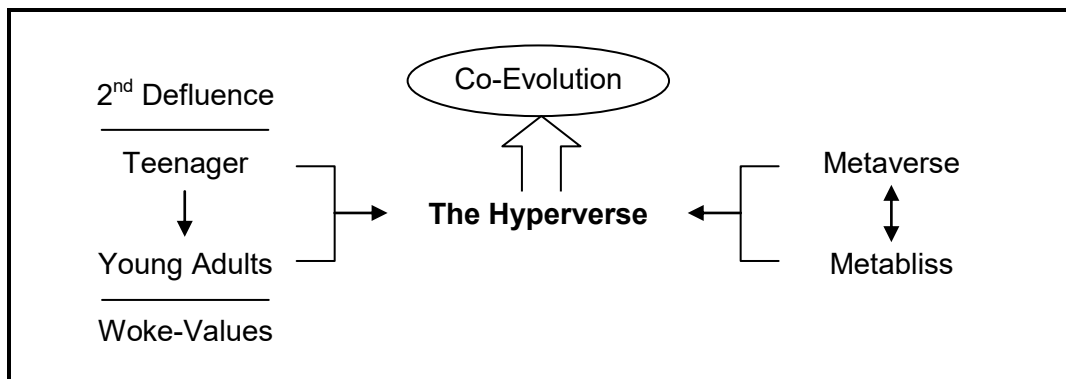

What is often overlooked in the discussions is the following: We can only "reap" the Benefits of Co-Evolution if we mentally enable ourselves to break free from the Dominance of "Survival-Cognition" and "Simulation-Reality" that our 1<sup>st</sup> Reality-Generator permanently produces.

*Franck:* So an end to it, or how?

*Keno:* Not at all: The way to Co-Evolution is that we now develop the 2<sup>nd</sup> Reality-Generator and establish it in our society, in order to then lead the existing 1<sup>st</sup> Reality-Generator into a new kind of interaction with this new 2<sup>nd</sup> Reality-Generator. So we need both Reality-Generators. But we don't need the Dominance of the 1<sup>st</sup> Reality-Generator anymore. In this concept the following factors work together:

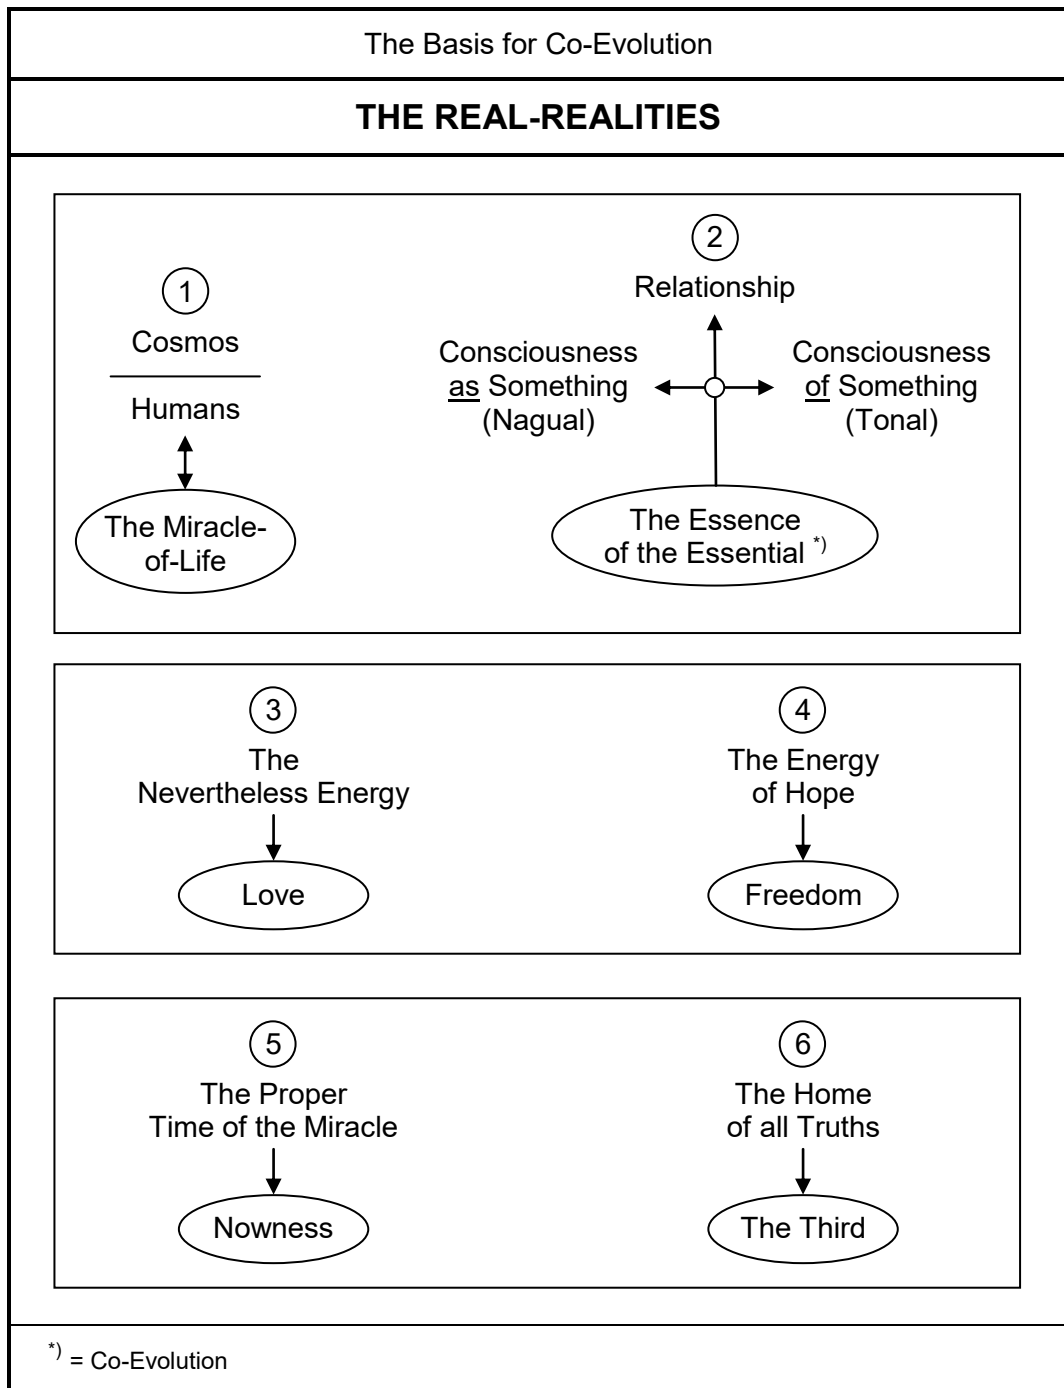

In this context, the Hyperverses has the task to enable and organize the Unification of the Tonal-Consciousness with the Nagual-Consciousness.

In a slightly different way, we can say the following:

**The Hyperverses  
organizes the Ritualization  
of Real-Realities  
in favor of the  
Practice of Co-Evolution.**

*Franck:* Can you name again those Real-Realities that you think are imperative for Co-Evolution?

*Keno:* Gladly:

You can see: In this model, Consciousness (in its 2 variants) is a Real-Reality. Likewise the Cosmos and we as the Life in this Cosmos.

*Franck:* Understood. But where is the Reality of "Cosmic-Intention", about which we have talked many times?

*Keno:* Important question: It exists in the Third, that is, in the Home of all Truths. From this point of view, the Third can be described as follows:

**The Third is the Interface  
for the Cosmic Intention.**

*Franck:* Hence, Creation wants us to see it? Through Co-Evolution?

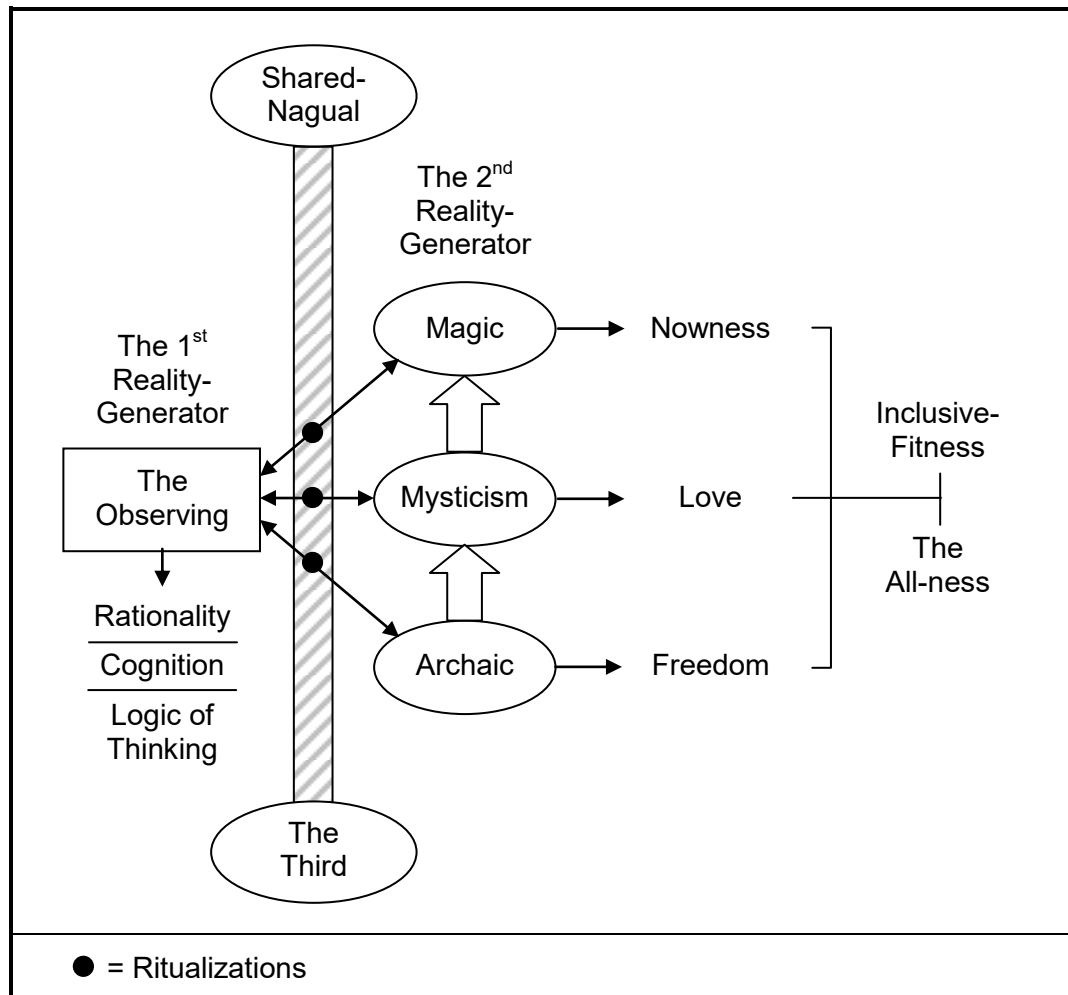

*Keno:* Yes.

*Franck:* And, Creation helps us to transform into Creation? Through Co-Evolution?

*Keno:* Yes

*Franck:* And from your point of view, what we have to contribute on the way there are Love, Freedom and Nowness?

*Keno:* Yes. Love, and Nowness. That's it. the Model of Noetic it is presented as follows:

When Observing unites with ritualized Freedom, Love and Nowness, the Third arises as a

**Shared-Nagual.**

which at the same time represents the All-ness.

This means: the common produced Shared-Nagual becomes the (eternal) Source for the Better ... the Source of our Inclusive-Fitness unfolding on the Reality of All-ness.

We recognize at this point an important function of the Hyperverse:

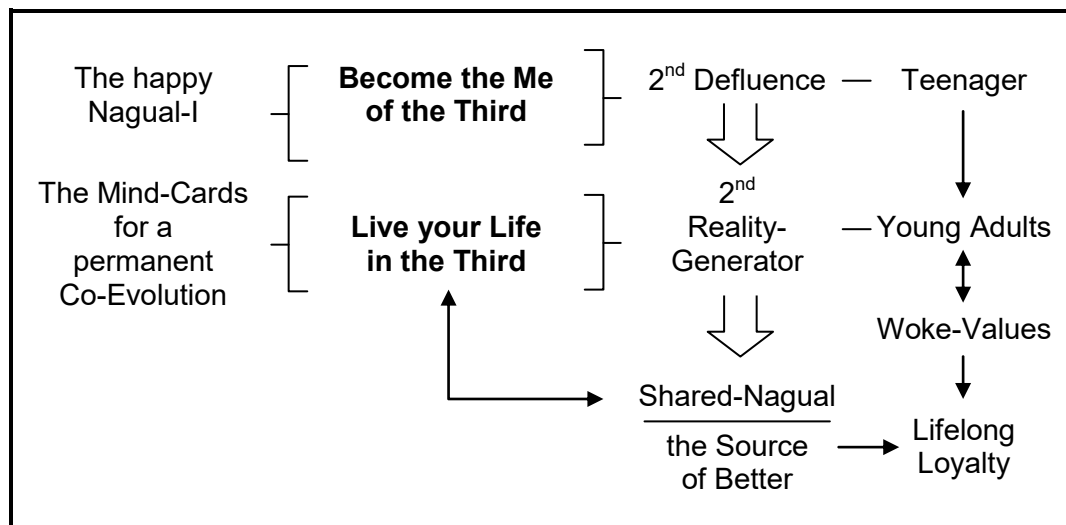

**The Hyperverse  
unites Observing with  
the Ritualization of Archaic,  
Mysticism and Magic  
in such a way that the  
Mind becomes capable of  
establishing and using the Third.**

That means: The Mind cannot enter the Nagual Consciousness. So its Consciousness cannot objectify the Nagual. The Free-Nagual ... the Unmarked-Space ... remains free and inaccessible to us ... not objectifiable ... it remains, as Chalmers says, a Mystery.

But we can make the nagual usable ... for our Co-Evolution. According to the Noetic Thesis ... it is the Intention of the Cosmos that we engage in Co-Evolution. So it is the Intention of the Cosmos that we use the Nagual. The ANC ( Auto-noetic-consciousness) is the Agent that helps us to do that.

*Franck:* In doing what exactly?

*Keno:* In making the Nagual observable as Resonance in our Mind. The ANC is the Agent that supports as Agent of the Nagual those Neuro-Programmings that we need in order to be able to live a Life in the Third. The following factors and processes are necessary for this:

*Franck:* Lifelong Loyalty. How is this to be understood?

*Keno:* Let's go back to Tononi: "Our Self-Consciousness is the Universe experiencing itself." Put another way:

**What we human Beings  
in every second are,  
is the Creation that  
experiences itself  
in us human Beings.  
Our Consciousness is  
the Self-Experience of  
Creation in our Life.**

Lifelong Loyalty means that one throughout one's life enjoys as a Happy-I the Co-Evolution that one realizes in the Third.

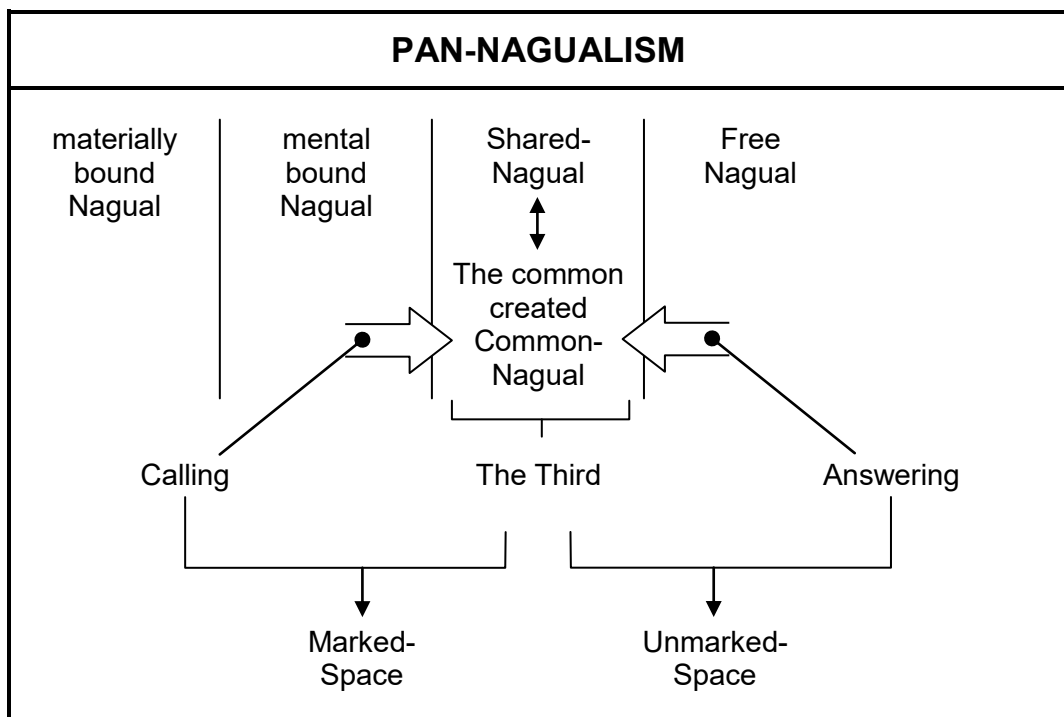

*Franck:* I am a little confused now: am I living my Life in the Nagual or in the Third only?

*Keno:* Everything is Nagual ... for us Humans, the Nagual is everything that is and everything that is becoming.

*Franck:* So it's kind of like Pan-Psychism, isn't it?

*Keno:* Yes, I call it "Pan-Nagualism."

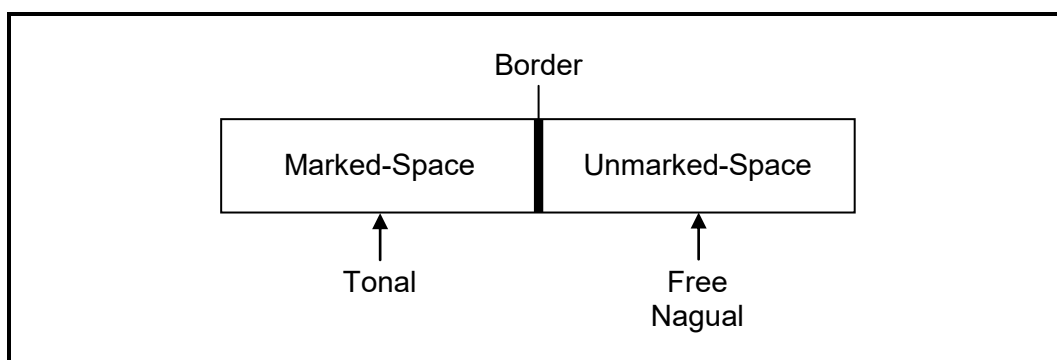

If this Pan-Hypothesis is true, then we would get the following picture, which we have discussed before:

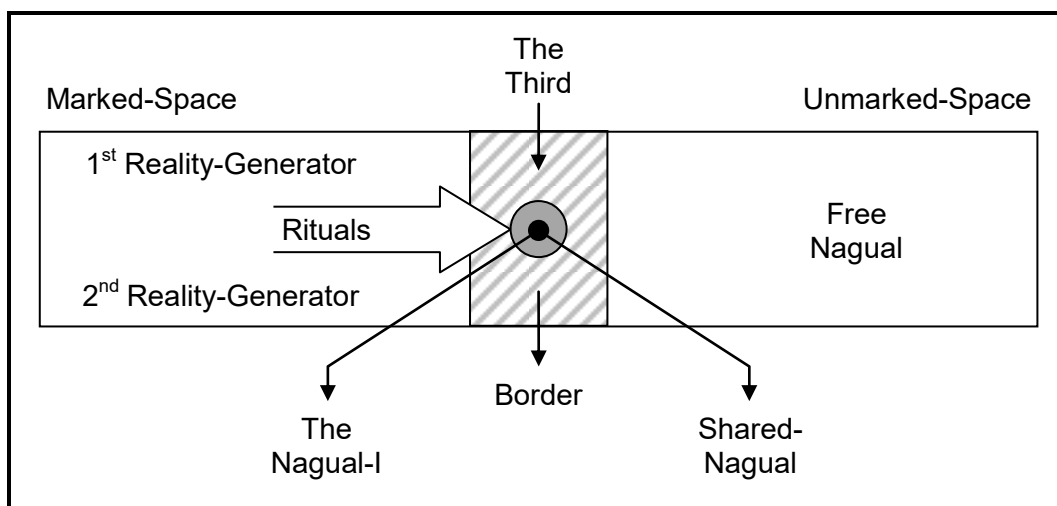

The Free-Nagual remains free. But since our I is present in the mentally bound Nagual (as ANC / as Nagual-I), we as personal Nagual can ritually stimulate (evoke) the free Nagual ... as Calling ... in such a way that Nagual resonances arise in the Third:

**The life of the third consists of Nagual resonances.**

This Nagual-Third is based on what John C. Lilly and George Spencer-Brown, among others, have described as the "Border". As a sketch:

Basically, Co-Evolution is about transforming the "Border" into the Third. The Third as a mental space where the Nagual-I has its home, and where the " Shared-Nagual" is generated ... as an eternal Source for the Better. As a sketch:

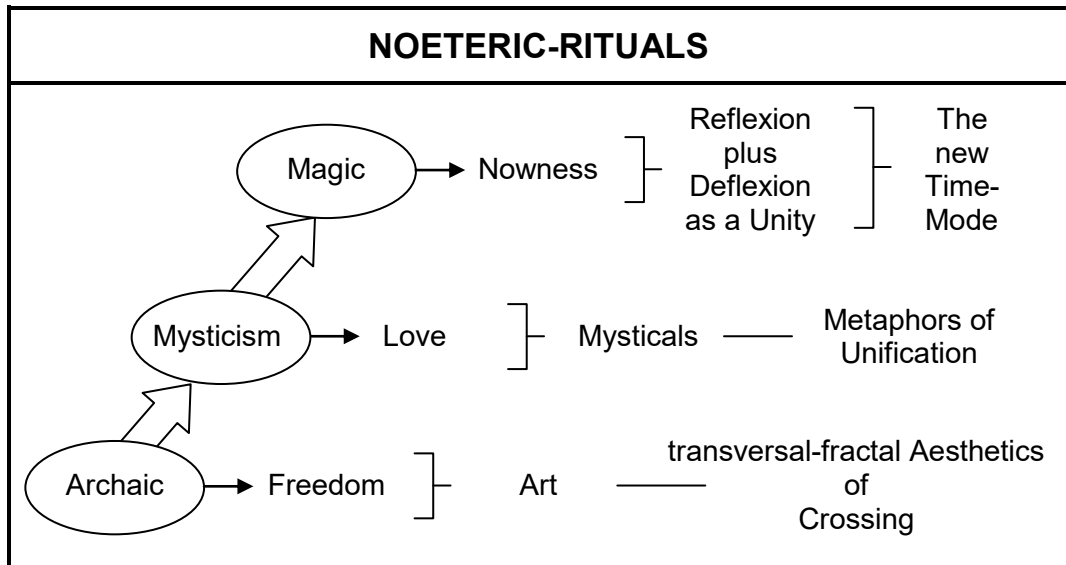

Through the Noetic Rituals that the Hyperverses offers to its users, the Nagual Third is awakened. This Third becomes more and more present and powerful in the course of time.

*Franck:* This means that without Noetic Rituals, the generation of a powerful Third will not succeed. Am I interpreting you correctly there?

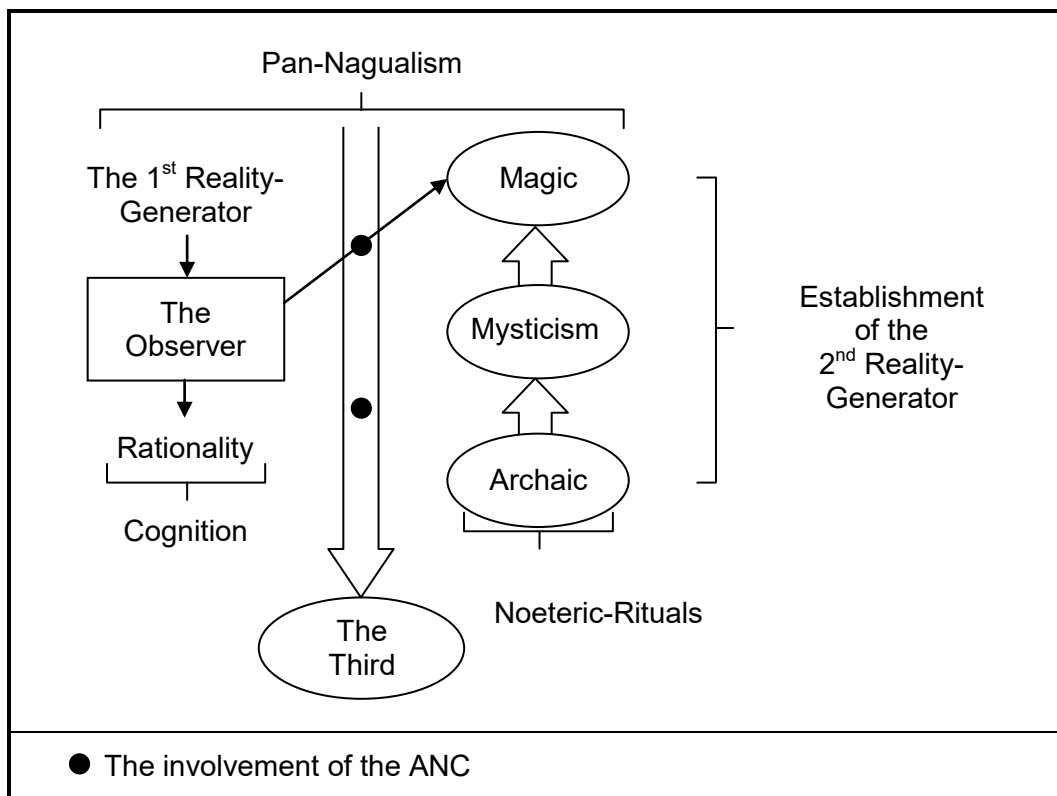

*Keno:* Yes. Let us first take a look at the inner Structure of these Noeteric Rituals:

**They organize  
the Rise of our Consciousness ...  
from Archaic to Mysticism to Magic.**

The following components are essential for this:

The concept of Noeteric has the following meaning: The 1<sup>st</sup> Reality-Generator has to stay fully integrated when it comes to the development of the 2<sup>nd</sup> Reality-Generator. This means that the 1<sup>st</sup> Reality-Generator takes over the role of the Observer and thus brings the Marked-Space (Tonal) into the development of the Third. If one does not integrate the Marked-Space ... and thus the 1<sup>st</sup> Reality-Generator ..., one is practicing Religion, Esotericism, Buddhism or World-Escapism. As a sketch (as also page 11):

Pan-Nagualism, which is a crucial foundation for Co-Evolution, is thus far different from older philosophical theories of an all-encompassing vitalism. The Noetic Version of a Pan-Nagualism is strictly focused on the Third: The Cognition Function of the 1<sup>st</sup> Reality-Generator is actively invoked and employed, and as a Co-Creator of Noetic-Rituals.

*Franck:* This is an aspect I would not have expected to see in this way.

*Keno:* Yes, I do often hear this comment. Many people believe that there can only be an either-or: either Rationality, Cognition and Logic of Thinking as the 1<sup>st</sup> Reality-Generator or Archaic, Mysticism and Magic as the 2<sup>nd</sup> Reality-Generator.

In discussions quite often the following argument is raised: The 1<sup>st</sup> Reality-Generator, which forms our Modernity and our Evolution, is much too progressive and too effective, as that one should revert now to these old-fashioned primordial Forms of the Spirit. The 2<sup>nd</sup> Reality-Generator ... with Archaic, Mysticism and Magic, i.e. Freedom, Love and Nowness ... would be a spiritual retrograde step. An almost literal quotation: "We have not overcome this old spirit after all to have to return now to these old concepts. That's resignation!"

*Franck:* What is your reasoning?

*Keno:* Quite simply:  
– If we want to practice Co-Evolution ....

*Franck:* Sorry! But do we want to?

*Keno:* Sorry back to you! We will must want it (see our crises).

... so: If we want to practice Co-Evolution, we as Mankind should become Evolution ourselves as much as possible:

Only a living Evolution can enter conjointly with Creation into a Co-Evolution.

- If we want to become a living Evolution, we should transform the Evolution of our Spirit:

**What Noetic-Rituals  
accomplish is the conditioning  
of Archaic, Mysticism and Magic.**

- What is conditioned how? Our 1<sup>st</sup> Reality-Generator ... so mainly the modern knowledge and findings of philosophy, physics, biology, psychology and neuro research ... introduce goals and orientations into the planned conditioning:

**The 1<sup>st</sup> Reality-Generator  
is the builder of  
the 2<sup>nd</sup> Reality-Generator.**

- Archaic (freedom), mysticism (love) and nowness (the new time mode) are conditioned on the basis of modern sciences in the everyday rituals (cooperations) of the users for Co-Evolution through Interfusion, i.e. for the production of a Meta-Consciousness and an Inclusive-Fitness. Meaning:

**The conditioned concepts of  
Archaic, Mystic and Nowness  
liberate the Spirit of Modernity  
from its own (ancient) Metaphysics.**

*Franck:* How?

*Keno:* Through the 2<sup>nd</sup> Defluence (Teenager). Which is, through the expansion of the I to an I that becomes capable of Co-Evolution.

*Franck:* Hm. And from your point of view, what is the supposedly ancient metaphysics in our modern mind of rationality, cognition and thinking logic? I don't see where there is any ancient metaphysics hiding there.

*Keno:* The 1<sup>st</sup> Reality-Generator operates on a Metaphysics that prevents us from practicing Co-Evolution with a resolute "Yes". We should later analyze this important issue in depth. Now only some aspects and key words that can help us:

- 1.- In our 1<sup>st</sup> Reality-Generator hides the whole religious background, and that as a director for our cognition system. Keyword: Fitness beats Truth.
- 2.- The old Myth-Set is the manipulator for our rationality of meaning and worldview. Keyword: Certainty through proven (absolute) Truth.
- 3.- The Cartesianism of the Middle Age is integrated as a quasi-religion of logic in all our supposedly so intellectual-clear thinking processes:

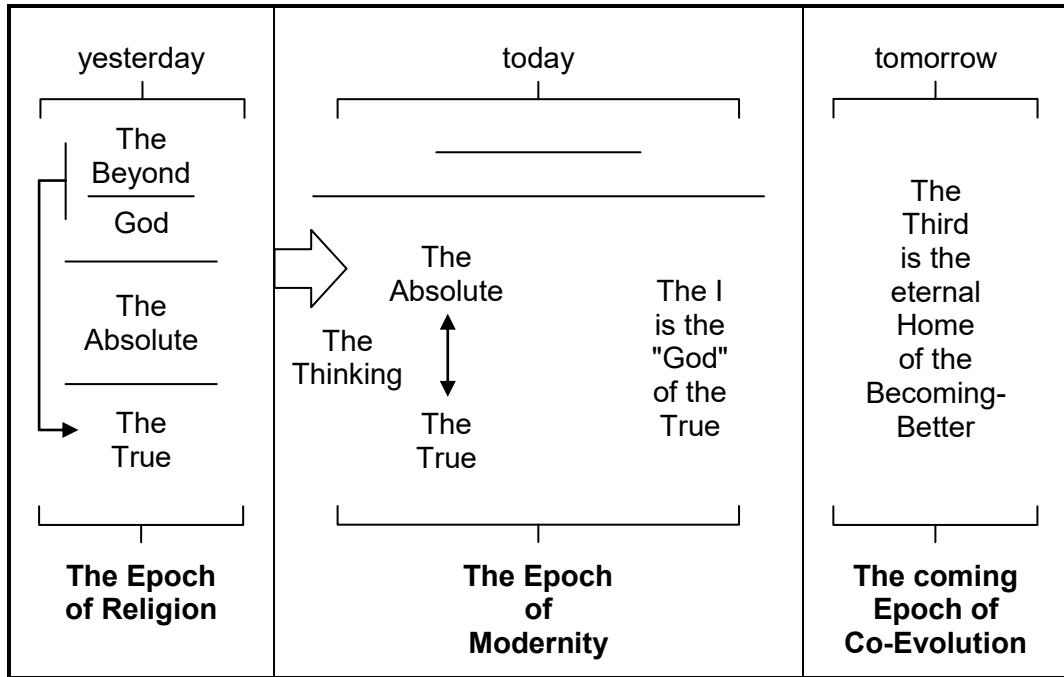

**The shaper of our thinking  
is an illusion of the I.**

*Franck:* Oh dear! What is supposed to be wrong with "I think, therefore I am"? I do indeed experience my I through my thinking ... because my I reflects and comments on my own thinking.

*Keno:* Yes, we indeed experience thinking and the I as the shaper of the world. This is the basic schema of the Cartesian I, which is a worldly (Tonal) I ... shaped by the 1<sup>st</sup> Defluence.

However, as we have already analyzed, this is a limited I. Somewhat exaggerated, our thinking commands us to place the I in a strange irrational absolutism: Because I think, I am the absolutely True. For me, my I is the very center for all my Truths.

Let us return once again to the model of our spiritual development:

From this perspective, the Cartesian I is a presumption. Because it is based on an illusion of Truth, it cannot recognize that it is also "only" an element of the Third. And because the Third is the common Now of Tonal (Marked-Space) and Nagual (Unmarked-Space), the Cartesian I with its logic of thinking cannot comprehend that it is also "only" a forming aspect of the Third:

**The Third is the Self-Observation of Creation, which we witness as I.**

This reminds of Giulio Tononi's statement:

**"Self-Awareness is the universe Subjectivity experiencing itself."**

The Nagual-I (=2<sup>nd</sup> Defluence) is the Third that asks us Humans to make ourselves more and more Partners of Creation. And the ANC is the Agent that is helpfully available to us for this "I become Creation". It follows:

**Only when we have formed an I that experiences itself as the Third ... only then will we possess that spiritual Fitness that we need for a continuous Co-Evolution.**

And without this continuous Co-Evolution ... accomplished by at least the critical mass of mankind ... we will not be "on the road".

*Franck:* "On the road" ... what do you mean by that?

*Keno:* We are only "on the road" when we can consciously say, "Yes, we want to transform ourselves into Creation. Yes, we want to shape our life in the other truth of the Third."

If it is true that the Cosmos in which we live has the Intention to be recognized (and loved) by us Humans, then we need this "Yes, I become Creation."

**The human Spirit  
is then no longer  
the Ruler of Creation,  
but the Partner of the next Creation.**

*Franck:* With which you allude to the problem of ecology and the climate crisis?  
...

*Keno:* ... yes. If it is true that Creation, whose "children" we are, is ever-present in our I and thereby in our perception of the world and in the blueprints of our futures, then we need another I ... a complete I:

**We need an I for the  
Simultaneity of Tonal, Nagual and the Third.**

Such a complete I needs

**the dissolution and overcoming  
of Cartesian Metaphysics.**

And at the same time we will have to organize the development and social anchoring of a 2<sup>nd</sup> Defluence ... associated with the establishment of a 2<sup>nd</sup> Reality-Generator. Two goals follow from this:

**Goal 1**

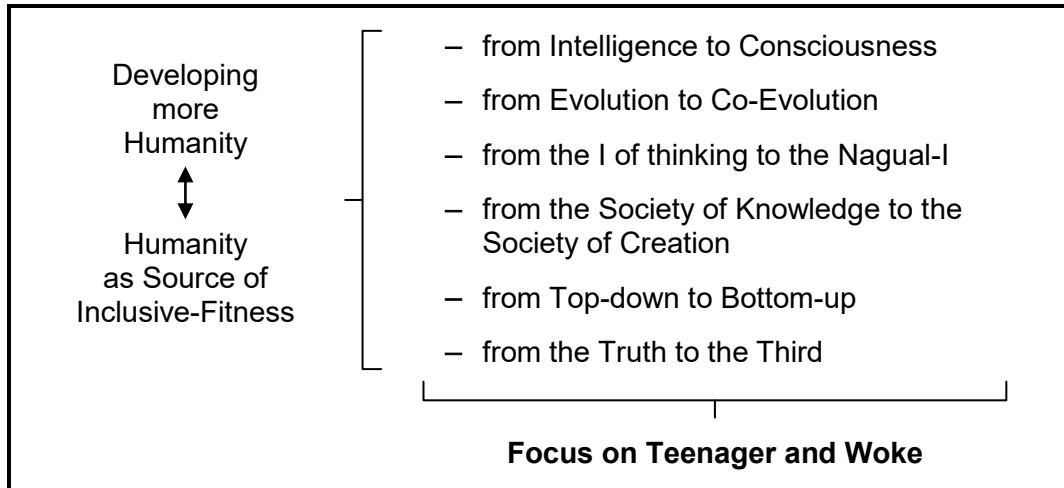

- We should offer the accomplishment of the 2<sup>nd</sup> Defluence to the Teenagers.

**Goal 2**

- We should offer the Young Adults and the Woke-Pioneers the establishment of the 2<sup>nd</sup> Reality-Generator.

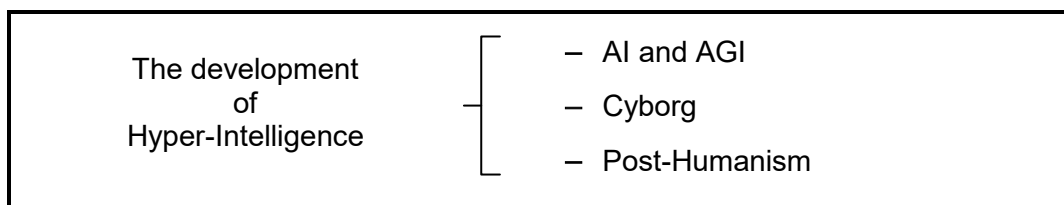

If we refuse to comprehend and fulfill these two goals, we will generate and experience the evil destiny described by Michel Serres: A life we experience only as a permanent crisis, whereby à la longue our ego turns into "crisis" (which could lead, among other things, to the collapse of Western-style democracies).

*Franck:* I think that you see this too negatively, or too one-sidedly. For you, obviously, there is only the way, which you call "Noeteric". So ... summarizing your arguments:

*Keno:* And where do you see the negative one-sidedness there?

*Franck:* With this concept, you are blanking out everything we have already discussed, e.g.:

For example, I can very well imagine that we as Humanity will succeed in developing those AGI-Machines that will one day connect us Humans to a powerful Hyper-Intelligence, thereby averting from us the "evil fate" threatened by Serres.

*Keno:* Yes, being the intellectual that you are, this path seems better because it remains integrated in the metaphysics of the 1<sup>st</sup> Reality-Generator. In Noeteric, the 1<sup>st</sup> Reality-Generator also remains active, but it abandons its demand for the Absolute of its Truths.

From my point of view e.g. Cyborg and Post-Humanism are Voodoo visions which are to be realized by most modern technologies:

**Voodoo out of fear  
of a fate we  
cause ourselves.**

*Franck:* Harsh words.

*Keno:* If one wants to make the leap from AGI machines to Cyborgs, one will have to implant chips into the human brain. Based on that, one will then have to establish an evolutive interactionism, between a changing brain and the physicality of the human.

One will have to develop humans without a human body, e.g. by a gene technology based on AL (Artificial Life). And one will then have to make these disembodied entities "owners" of Humanity and Hyper-Intelligence.

The Cyborgs, if they are to help us Humans, will need the Spirit of us Humans ... but fused with qualities of Consciousness that the human Spirit cannot (or never will) produce.

*Franck:* And this is voodoo for you?

*Keno:* Yes, voodoo based on an intellectual hubris that cannot realize itself that it is trying to instrumentalize an ancient metaphysics program through digitality, science and mathematics.

The old, religious dogma core (i.e. original sin and redemption commitment) and the old myth set ( Beyond / Absolute / Truths) are formed in the context of our biological programming on "survival at any price" to an intellectual praxeology, which quite consciously eliminates the human factor and just as consciously excludes the growth of Humanity (= Noeteric) as "impossible" or "inefficient".

Basically, it is a revival of the old Gnosticism.

*Franck:* Don't you interpret too much "evil" into it?

*Keno:* I think not. Let me mention some postulates and ambitions of post-humanism, so that we know what in this context ...

*Franck:* ... which you call "voodoo" ...

*Keno:* ... yes, what is already publicly discussed in this context today:

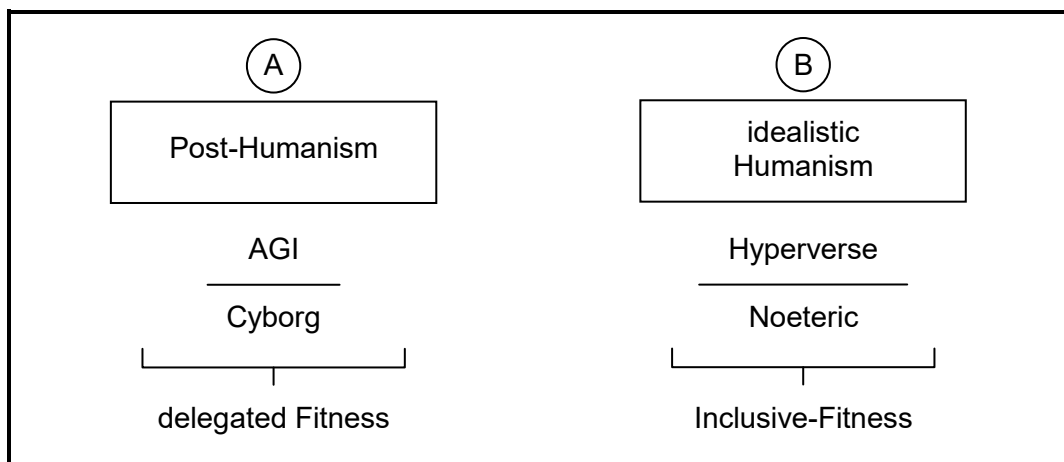

- One wants to move away from anthropocentrism (the human navel-gazing) to anthropomorphism ... that is, to the transfer of human characteristics to non-human actors.

By the way, "terraforming-machines" (Baptiste Morizot) are designed in this context by the masterminds. And certain plants and organisms (including earthworms, by the way) are defined as "metaphysical devices" that can organize the cycle of the earth and thus "the salvation of humanity" (Lovelock) ... better than we humans.

- The posthuman vision wants the conscious departure from man, initiated and designed by man. It is about the production of "a world without us" (Eugene Thacker).
- One accuses the epoch of the "Anthropocene" that its strategies of reason, logic, enlightenment and classical humanism (Renaissance) now fail so much in this phase of our world that one must switch to a fluctuating "hydrology" (Donna Haraway) ... a kind of super-logic that can no longer be created by man. Hence the utopia of being able to leave man as such behind: a future design beyond man. Lovelock on this, "It means he won't be the boss forever."

*Franck:* I think that you have now deliberately phrased it in an apocalyptically exaggerated way.

*Keno:* No, not at all. I was just reproducing some quotes from post-humanist thought leaders to illustrate the two alternatives that are building up before us. As a sketch:

Post-Humanism assumes that ... in the face of crises ... we should use our intelligence to establish that Hyper-Intelligence which is more intelligent than our own intelligence.

Idealistic Humanism (Noetic) assumes that the crises force us,

**to the next step  
to become even more Creation  
that we principally are.**

*Franck:* How would you decide then?

*Keno:* Quite pragmatically. I would say: Alternative A qualifies the intelligence. Which does no harm. Alternative B qualifies the human element. Which does no harm either.

*Franck:* So both alternatives at the same time?

*Keno:* Yes. Both paths will give us a great harvest of new insights and new competencies. Presumably, these two paths will also meet and interact in certain zones. Who knows?

But ... I deliberately put it very carefully: if one already possesses a Nagual-I and lives and shapes one's whole life in the Third, then one also has the courage to say: AI and also aspects of AGI will definitely come ... because they are useful for our Western life. But Cyborgs and Non-Humans as substitutes for humans will probably remain a mixture of dream and nightmare.
