

**Noetic and Woke****OUR FUTURE LOOKS GOOD!**

Keno Oneo in Conversation with Jochen Franck

*Franck:* You are assuming that we as Mankind should enter the Epoch of Co-Evolution in order to create a good destiny for ourselves.

*Keno:* Yes, that is how it is.

*Franck:* You are assuming that an everyday Practice of Co-Evolution ... that is, a Practice for We-All ... can only be established successfully when we recognize the spiritual Value of the Third. In other words, by learning to love the Third.

*Keno:* Yes, very true.

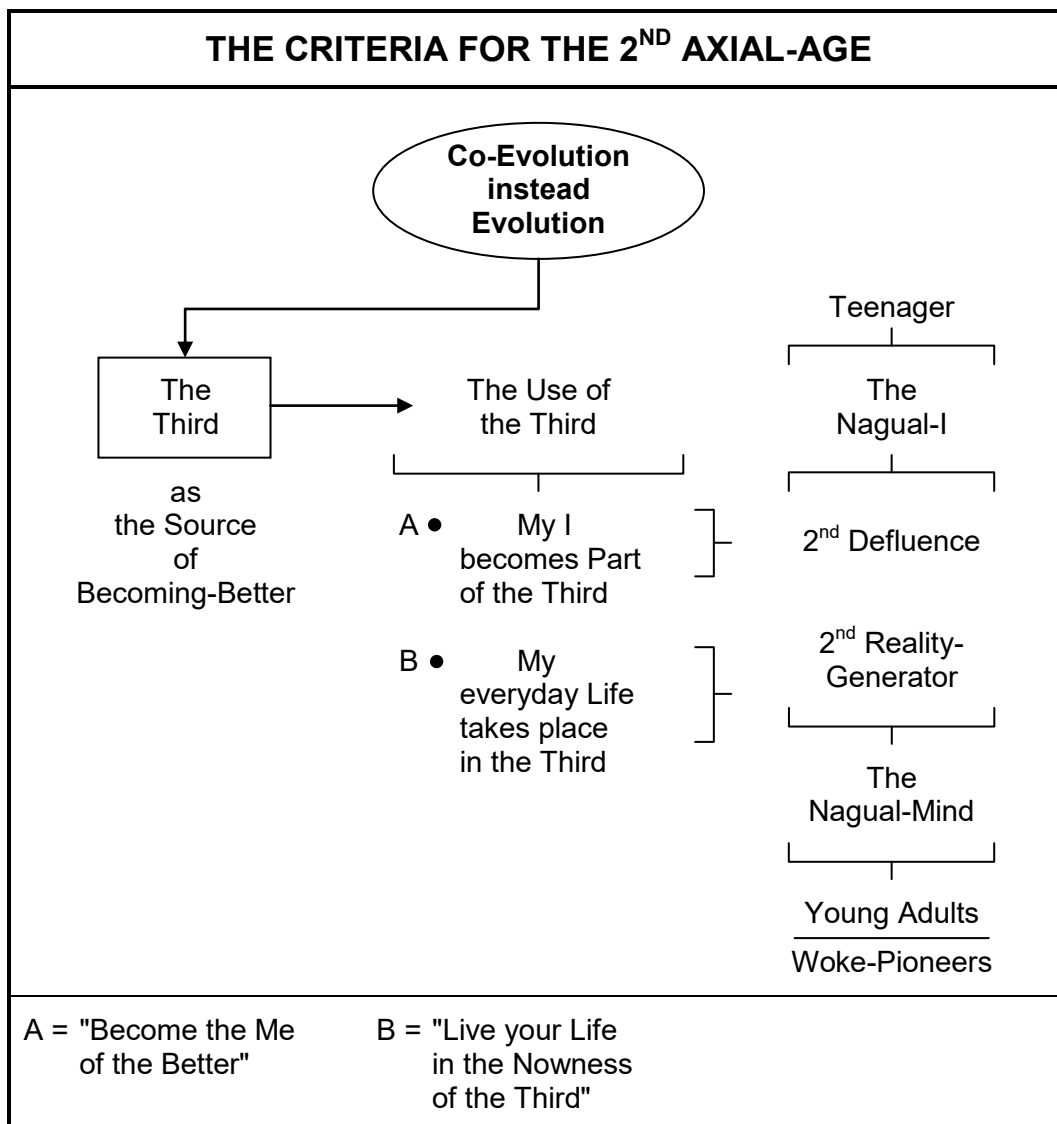

*Franck:* You are assuming that using this Third will only succeed if we lead our I into the Third ...

*Keno:* ... for which we need the 2<sup>nd</sup> Defluence...

*Franck:* ... and if we then form and carry out our daily Life in this Third ...

*Keno:* ... for which we need the 2<sup>nd</sup> Reality-Generator.

Let's presenting the factors involved in the following overview:

*Franck:* What has not become clear to me so far are the relationships between the Third and the Nagual, and the relationships between the Nagual and our Consciousness. We should elaborate on that.

*Keno:* The Nagual is a Real-Reality when we invent and realize the mental Access to it. This Realization requires the accomplishment of the 2<sup>nd</sup> Defluence and the Nagualization of our Mind through a special Mind-Carting. Then the Nagual is present in our Mind as Now of Creation ... as Nowness.

But presence is not enough. It is also about the cooperation of the Mind (controlled by the I) with the Nagual in the Mind. So one needs a mental instrument that makes this cooperation possible ... an interface, so to speak.

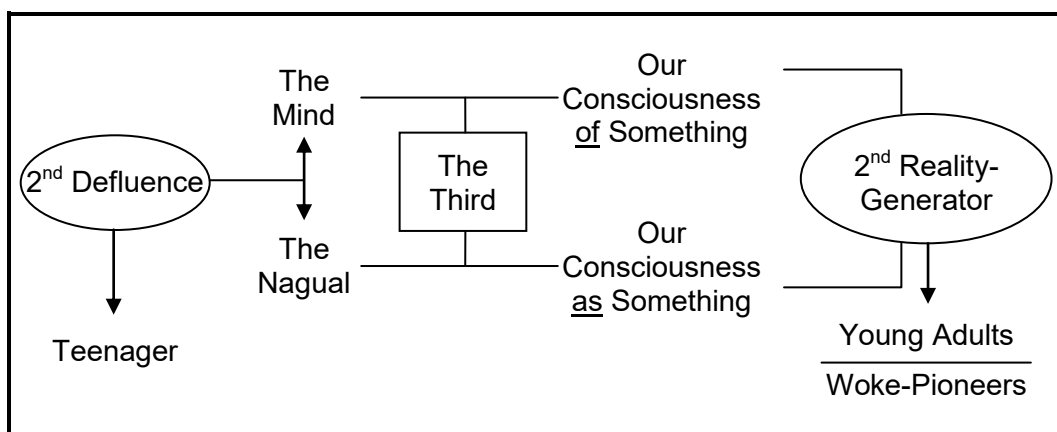

This interface is the Third. So a mental system of rules which replaces the classical Logic in order to enable the principle non-logic of the Third to the Interfusion with the Nagual (which is present in the Mind):

**The Third is  
a system of rules of non-logic  
that enables the human Spirit  
to be able to cooperate with  
the non-objectifiable Nagual.**

As a concept: The human Spirit can only cooperate efficiently with the Nagual, which cannot be objectified in principle, if it develops and uses an Interface, which is specially programmed for the Non-Objectifiable. This Interface is the Third ... the eternally Illogical.

*Franck:* Alright, understood. Now, what is the relationship between the Nagual and our Consciousness?

*Keno:* Here I would like to answer first with a sketch:

If we want to use the Third as an Interface between Mind and Nagual, we need an Operator that is not focused on the mundane Tonal, but on the Nagual ... a "dashboard" for the Nagual, so to speak. The 1<sup>st</sup> Reality-Generator, which is currently the Monocrat in our Mind, cannot be this "dashboard". Therefore we need a 2<sup>nd</sup> Reality-Generator.

But this 2<sup>nd</sup> Reality-Generator can only be built up, if we complement our Consciousness of Something (that is the Objectifier) with a Consciousness as Something.

*Franck:* Stop. This isn't possible. You yourself have very often emphasized that we Humans definitely cannot objectify Consciousness as Something ...

*Keno:* ... which is ultimately the Raw-Material for our Objectifying Consciousness of Something.

*Franck:* That means: we use this unknown Consciousness as Raw-Material, but by using it, it does not become an Element of our observable World ... to the Tonal ...

*Keno:* ... yes, absolutely right: it does not become recognizable in our 1<sup>st</sup> Reality-Generator, which, as you know, is based on the following functions:

- Rationality
- Cognition
- Logic of Thinking

Thus, our Cognition fails quite principally in recognizing Consciousness as Something. But Non-Cognition does not mean that we are destined to Non-Use.

If one switches off the 1<sup>st</sup> Reality-Generator, so to speak (keyword "meditation"), one can get into a

### **Resonance-Contact**

with the Consciousness as Something.

But this Resonance is not identical with using ... in the sense of a productive Cooperation.

So we need the 1<sup>st</sup> Reality-Generator as "Driver" and at the same time the 2<sup>nd</sup> Reality-Generator as "Car". From this follows:

### **Co-Evolution only works in the mental Cooperation of the 1<sup>st</sup> Reality-Generator with the 2<sup>nd</sup> Reality-Generator.**

*Franck:* Interposed question: And the brain?

*Keno:* It is an important Fulfillment-Assistant, which we need for the co-evolutionary Cooperation.

From this point of view it makes only little sense if we ... equipped with the empirical Sciences of the 1<sup>st</sup> Reality-Generator ... try to objectify the functions of the Brain in the Interplay of the two Reality-Generators.

It can't hurt if we know the processes in the brain, but it should be clear for us:

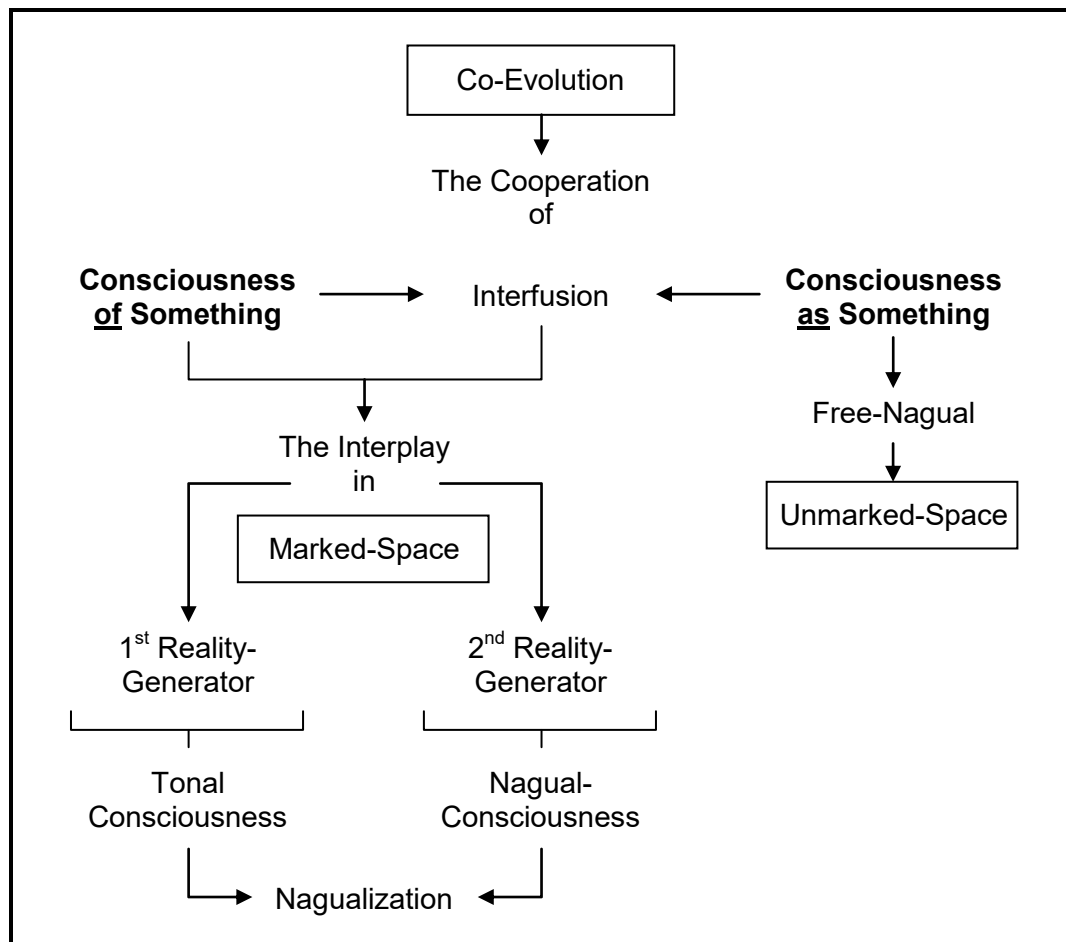

**The spiritual processes  
in the Interplay between  
the 1<sup>st</sup> and the 2<sup>nd</sup> Reality-Generator  
are not causatively  
based on brain functions.**

**They are based on  
the processes of  
the Nagualization of  
the I, Life and World.**

**The brain is not the director ... the boss.  
The brain is the assistant.**

*Franck:* Very weird theory! I don't think any scientist will follow you there. The modern imaging techniques of brain research show impressively how much the brain is involved.

*Keno:* Yes, the brain is involved. As a helper of fulfillment. As a sketch in addition:

A little bit exaggerated: The brain is important. But it is never the Originator. In other words:

- The Brain is not "the Car."
- The Brain is not "the Driver".
- The Brain is not "the Dashboard".
- The Brain does not know "the Target".

In classical philosophy one would say:

**The Brain is an  
Epiphenomenon.**

*Franck:* And what does that mean?

*Keno:* An Epiphenomenon is a Being (Entity), which was caused causally, but has no significant causal effect itself.

Example: steam locomotive. The smoke from the locomotive is an epiphenomenon because it is considered non-causal to the locomotive's driving function. The smoke is necessarily (i.e., permanently) involved, but the smoke does not produce the locomotive's motion.

*Franck:* Who then is the Originator in the model of Co-Evolution?

*Keno:* The Cosmos. The Life. The Now-of-Creation (Nagual). The two Consciousnesses with their respective Reality-Generators in the Mind. The brain is always and also intensively involved. But the Brain is not the Originator.

Of course ... to stick to the picture ... the smoke is much better suited for analyzing than the movement. The smoke is matter. The movement of driving is primarily energy and time.

If we transfer this to the supposedly so big problem of consciousness, then we can say the following:

- Consciousness as Something is that Real-Reality which connects our Life with the Cosmic-Intention and the associated Now-of-Creation:

**Consciousness as Something  
is the Real-Truth of our Life.**

- In our Consciousness of Something, this " True-Consciousness" is very fundamentally present:

**We are the  
Now-of-Creation (Nagual)  
in every Second,  
even if we are not aware of it.**

- So our Mind ... equipped with the 1<sup>st</sup> Reality-Generator ... has no access to this Truth of our Life:

**The 1<sup>st</sup> Defluence obligates the recognizing  
Mind to organize the Cognition by establishing  
a Border.**

- If we would be able to dissolve this "Obligation to the Border" without at the same time also wiping out the Recognizing, we would be able to use the Nagual.
- But we cannot accomplish using without recognizing. Therefore we need the connection of recognizing (Drawing the border) and Integration:

**We need to  
become the Border.**

**We need to  
spiritually live in that Border.**

*Franck:* In what way is the Border related to the Third?

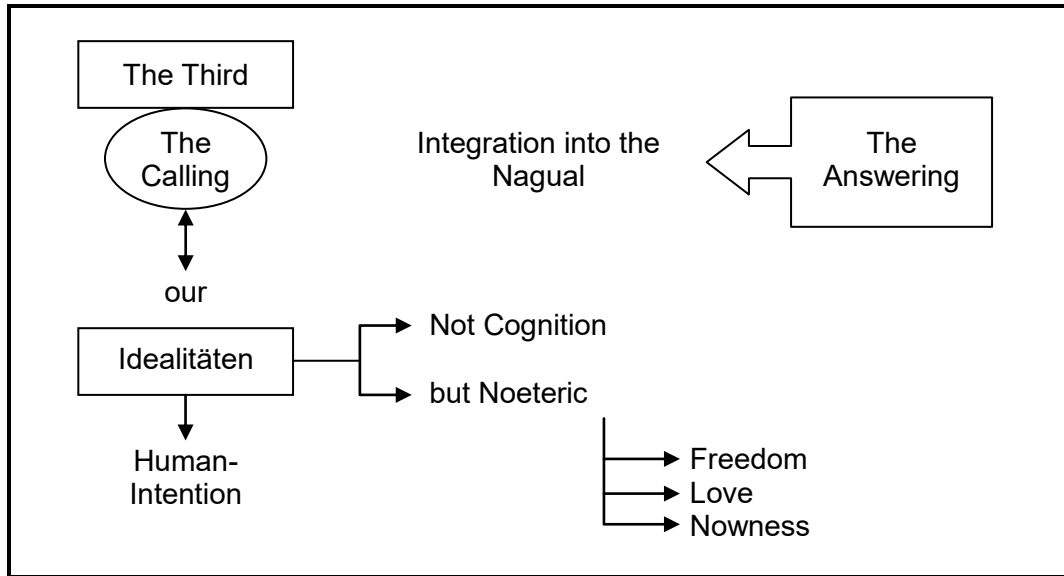

*Keno:* Yes, important question.

The Border creates the Cognition. If one wants to use this recognizing to get in touch with the qualities that exist behind the Border (as Unmarked-Space), then one should make the Border a spiritual Space:

**Third is that spiritual Space  
which we need in order to let  
the Intelligence of the Unmarked-Space  
flow into our Marked-Space.**

*Franck:* And what role plays the principled Illogic of the Third in this?

*Keno:* The Illogic of the Third is the function of Calling in the Concept of Co-Evolution. Only through Calling the Third can we engage in Co-Evolution, provided we give our Idealities into that Calling. As a sketch:

*Franck:* Hm. That would mean that we cannot practice efficient Co-Evolution at all without the Third and without our Idealities.

*Keno:* This is how I see it. With the Intellectuality of our 1<sup>st</sup> Reality-Generator, there will be no Co-Evolution:

**The Third is  
waiting for our Idealities.**

**The Third does  
not want our Intelligence.**

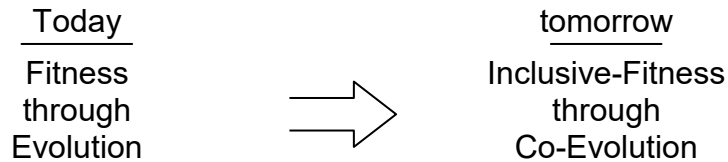

*Franck:* Oh, dear. Again such a bold sentence: the Third is waiting for our Idealities and not for our Intelligence. From my point of view, however, our cognitive processes of intelligence very essentially produce the supposedly so important Idealities ...

*Keno:* ... which by the way are the Core-Substance of Humanity ... Freedom, Love, Nowness ...

*Franck:* ... I mean: Without our intelligence we would not be on the plateau we have today.

*Keno:* Yes, that's right. Donald D. Hoffman: Fitness beats Truth. We've built this plateau because we want to survive. And we will still need the Intelligence of the 1<sup>st</sup> Reality-Generator. Definitely. But now we're transforming our strategy of Fitness:

If we want this Transformation, we need the Cooperation with the Nagual, and for this Cooperation the Third is our mental instrument.

*Franck:* So far, I have understood it. I can also follow you more or less ...

*Keno:* ... but the fact that this Third wants to have the Idealities of Humanity ... you don't like that. That's the way it is, isn't it? You find it presumptuous that the illogical Third obliges us, so to speak, to start with a better Humanity ...

### **Humanity as a mandatory ticket for Co-Evolution.**

*Franck:* Yes. That describes my discomfort quite well. For me, the specifically human is a substance that we should not misuse for Co-Evolution ... that is, shaping the future .... Humanity is too valuable. And for me almost all idealities are more or less self-pity for losers. Sorry, but this is how I see it!

*Keno:* Let's make it very simple:

- The Nagual and the Third don't care where the Idealities are coming from ... the important thing is that they are coming!
- The Nagual and the Third welcome every form of lived (authentic) Humanity ... no matter how it has been activated.

*Franck:* Yes, I can get along with that. So I stick to my concept: A powerful Ideality can well be the result of intelligent cognition. And an authentic Humanity can well be the result of a qualified Logic. So we don't need the overcoming of classical logic that you describe in your essay ("Logic or the Third"). Can you agree with that?

*Keno:* Only to a limited extent: We have in our Mind (1<sup>st</sup> Reality-Generator) the Cartesian Logic of Subject / Object. So a two-valued Logic. Gotthard Günther and other scientists have tried to develop a Logic, which could lead our Thinking into the Third ... e.g. the so called " Multivalued Logic" (Günther).

This logic exists. But only as a paradoxical logic of the own logic. So only in a "very sophisticated version". Such a logic can never become the mental automatism for the everyday life of all people.

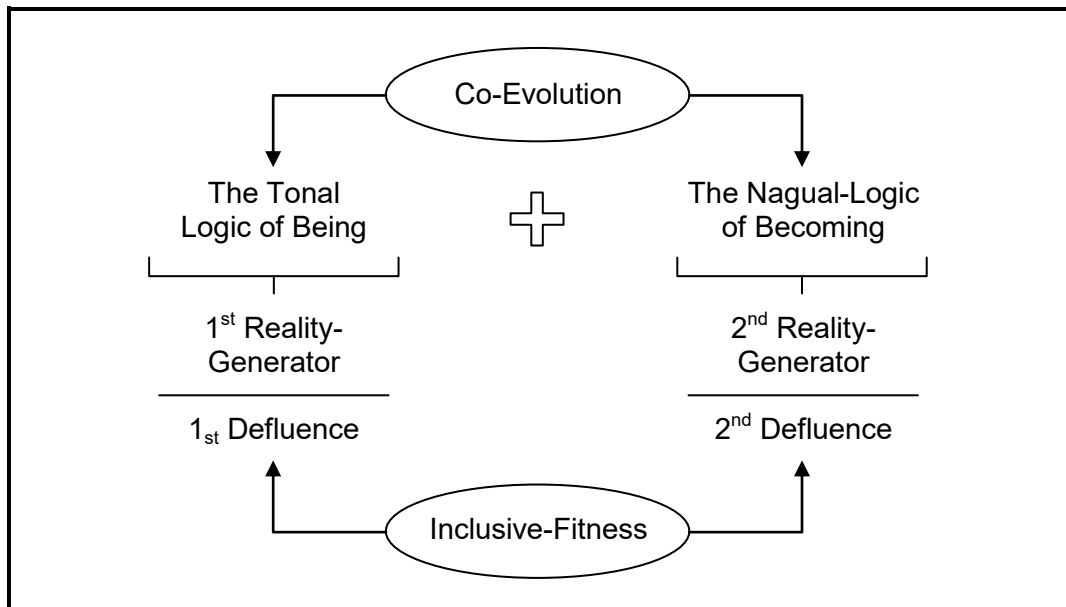

But the Cartesian Logic is such an automatism-for-all. Why? Because it is completely based on the accomplishment of the 1<sup>st</sup> Defluence:

**Cartesian Logic is  
the Logic of Survival.**

**It is therefore the best Logic  
for "Fitness for Evolution".**

But it is not an efficient Logic for Co-Evolution. It is only a logic of Being (Tonal) and not a Logic for Becoming (Nagual/Creation).

What we need is the Cooperation of two Logics in two Reality-Generators. As a sketch:

What is wrong with the philosophical debates and especially with the ambitions of

**Artificial General Intelligence**

**AGI**

from my point of view can be outlined as follows:

- ①. If the Tonal Logic of Being wants to integrate the Nagual Principles of Becoming into itself, it breaks at the truth of the Third.

- ② Only when the Tonal Logic of Being is ready to integrate itself into the Nagual Principles of Becoming, it will become useful on a higher Level.

With ① the Logic of Being (=1<sup>st</sup> Reality-Generator) insists on remaining the boss. But this only generates a mental incapacity for the coming Epoch of Co-Evolution. The fact that we as mankind could not develop an Interfusion with the Spirit of Nature for about 30 years is a proof for this spiritual inability, which by the way does not become less.

With ② the Logic of Being (=1<sup>st</sup> Reality-Generator) is permanently qualified by the Third. And this Third is the (for us) hidden eternal Source for the Becoming-Better.

*Franck:* Yes, this now makes some things clearer. But nevertheless: The Logic of the 1<sup>st</sup> Reality-Generator ... according to your own statement ... is an everyday automatism for all people ...

*Keno:* ... yes, based on the fact that all humans perform their 1<sup>st</sup> Defluence in some form, and as " Natural-Fitness".

*Franck:* Yes, may be. But the completely different Logic of the 2<sup>nd</sup> Reality-Generator is now really very complicated. In any case the 2<sup>nd</sup> Reality-Generator is not able to become the everyday automatism for all people. There I am quite sure.

*Keno:* It will be different, believe me:

- We got the digital revolution and the Metaverse from Mark Zuckerberg, because it is now time to overcome the autocracy of the 1<sup>st</sup> Reality-Generator with the concept of Cartesian Dualism and the two-valued, Tonal Logic:

**We step up ...  
to a higher plateau  
of our Evolution.**

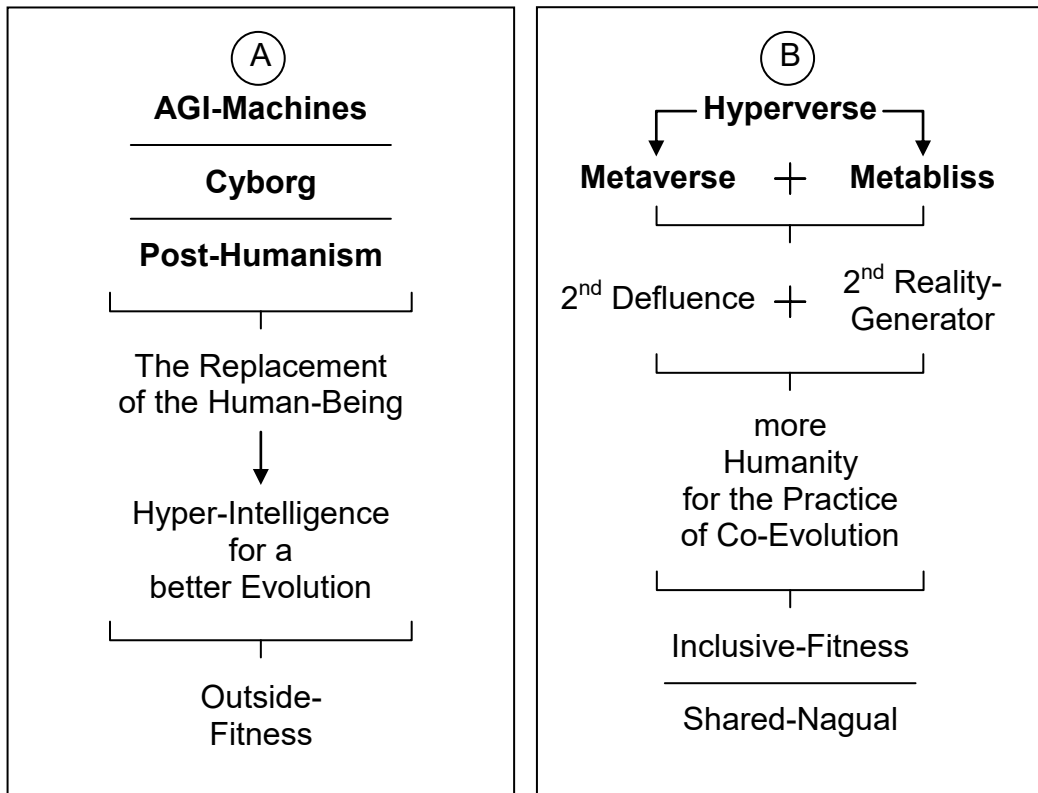

- We will get the Hyperverse, whereby we as Humanity will become able to unite our everyday Life with a Nagual-I and a Nagual-Mind:

**Our everyday Life will become a  
permanent Ritual of Co-Evolution.**

- On this background, the "Fight" of the two alternatives, which we have already analyzed, is basically already decided today.

*Franck:* Is it possible to be a little more precise?

*Keno:* Sure. We have 2 principle visions as alternatives:

My prognosis on this: The coming Teen-Generations will use the Hyperverses to (finally) get a complete I, i.e. a worldly- and a Nagual-I at the same time.

Connected to this, the Young Adult generations will integrate themselves more and more intensively into the Noetic Values and into the Woke-Values: Freedom (Diversity) and Love (Inclusion) united in the Power of the Third ( Nowness). We can call this process

**"the Woke-Revolution".**

This will establish a Nagual 2<sup>nd</sup> Reality-Generator, and based on that, a continuous Diffusion of the Nagual-Energies. This in turn will generate a societal (Morphic) Field that will drive Alternative (A)... i.e. Cyborgs as the boss of Humans and Post-Humanism as the Successors of Humans ... against the Wall:

**Our Future looks good!**
