

<b>Digitality and Woke are mutually dependent</b>
<b>THE NEW REALITY OF CO-EVOLUTION TAKES PLACE IN THE THIRD</b>
Keno Oneo in Conversation with Jochen Franck

*Franck:* You have claimed that in the coming epoch, which you call the "Epoch of Interfusion", we will overcome Logic as an Instrument of the "Making of the World" ....

*Keno:* ... not quite. I have elaborated that we should dissolve the Dominance ... that is, the Monopoly of Logic ... for the "Making of the World". So it is just about the dissolution of an absolute position. Thus, it is not about overcoming, i.e., about the ending of logic.

Logic is a system of rules by which we can program our processes of thinking to produce correct or better knowledge.

Knowledge is and remains important. Consequently, also the 1<sup>st</sup> Reality-Generator remains important, in which the logic of thinking is an important instrument.

It is only about connecting the functions of the 1<sup>st</sup> Reality-Generator now with the novel functions of the 2<sup>nd</sup> Reality-Generator:

**The only way Co-Evolution  
can become a praxeology  
for all people is if all people possess  
the 1<sup>st</sup> and the 2<sup>nd</sup> Reality-Generators.**

This means that what will not work is the following strategy: the 1<sup>st</sup> Reality-Generator tries to develop a Logic for Co-Evolution. The result would be a Logic that secures the 1<sup>st</sup> Reality-Generator its monopoly ... or even strengthens it. The Poly-Logic of Gotthard Günther was such an attempt. This Poly-Logic should make the old Cartesian scheme of the "Making of the World" fit for the new situation of our world.

*Franck:* New situation?

*Keno:* Yes. Complexity plus Acceleration plus Contingency in increasing reciprocal effects. We have referred to this phenomenon in our discussions as the new kind of

**Evolutionary-Reality.**

*Franck:* Right. And you mean that the 1<sup>st</sup> Reality-Generator, which is permanently generating this Evolutive-Reality, might not be able to manage this Reality anymore?

*Keno:* Yes. We are basically facing a Failure of Sciences at the Borders of our Consciousness:

**The combination of  
logic, science, and technology  
creates real side effects that  
logic, science, and technology cannot resolve.**

*Franck:* As well as technologies? Where do they fail?

*Keno:* Yes. Example: Climate-Crisis. Technologically we are currently not capable of turning CO2 into a valuable raw material. Our dilemma!

The Spirit of Creation (Nagual) is not identical with the evolutive Spirit of Nature. This Spirit is also not identical with the evolutive Spirit of Mankind.

We can only spiritually co-operate with nature in such a way that we heal nature, if our Human-Spirit would be Nagualized.

*Franck:* Do we have to heal nature?

*Keno:* Of course we have. Right now we are just exploiting it. We have a "Society of Coercion" and in parallel we have the

#### **Humiliation of Nature.**

It is the same "suppressive Spirit" (Sloterdijk) of Duality and the 1<sup>st</sup> Reality-Generator. We have already talked about this suppressive spirit.

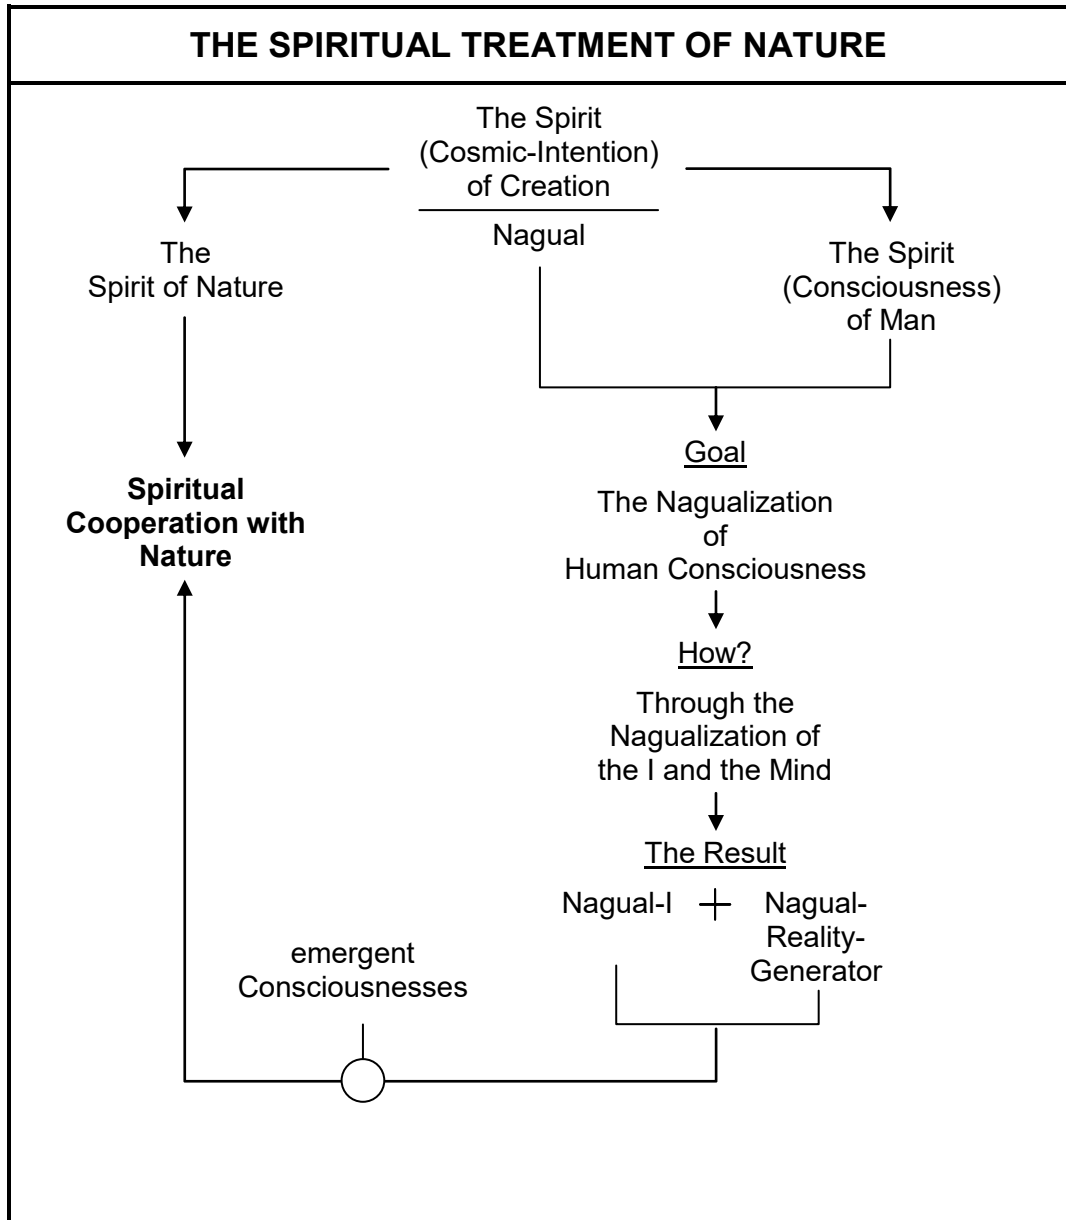

*Franck:* Yes.

*Keno:* We will not be able to avoiding to put the aspect "Spirit = Consciousness" at the Core of our Survival. And that means:

**We will have to accept  
that we will only reach  
a higher Level of Consciousness  
if we make our  
Humanity more humane.**

*Franck:* I thought this was about Nature!?

Keno: Yes. Let's look at a little sketch:

Franck: You state: The Spirit of Nature is different from the Spirit of Mankind. Why?

Keno: The Spirit of Nature has no competence for integrating the Nagual into the Evolutions of Nature. Nature does not reflect the Cosmic-Intention of Creation. But Humanity can reflect the Spirit of Creation (Nagual) and integrate it into itself, because the I of every Human-Being is "Nagual" (keyword: ANC ... the Auto-noetic Consciousness).

Franck: Might be, but Mankind is not aware that the Nagual exists in every I. So: What is the point of the model?

Keno: If we stay with the 1<sup>st</sup> Defluence (from birth to the end of puberty), we

will not progress spiritually: The 1<sup>st</sup> Defluence is the basis for the 1<sup>st</sup> Reality-Generator ... i.e. Rationality, Cognition and Logic of Thinking. From this follows:

**Our Logic  
is based on  
the Exclusion  
of the Nagual.**

*Franck:* Why?

*Keno:* It is because of the processes of "cumulative cultural transmission" (Tomasello) that the natural existence of the Nagual is consistently excluded in the I (Mind) of the children / adolescents:

**The Logic of Thinking  
replaces the  
Presence of the Nagual.**

*Franck:* And because of this, we now have a logic that is increasingly failing? Is this your argument?

*Keno:* Yes. The Tonal or Cartesian Logic ... i.e., the Logic of our 1<sup>st</sup> Reality-Generator ... is, as I said, incapable of producing those Emergent-Consciousnesses that we need today in order to be able to positively shape the new kind of Evolutive-Reality (which is forcing itself upon us humans now as a Permanent-Crisis):

**Our consciousness  
cannot produce  
Emergent-Consciousness  
because we possess the Cartesian Logic.**

The actual drama of our spiritual failure can be outlined as follows:

- Future 2 and Future 3 become the actual scope of work for the Optimization of our Present, i.e. also for the Dissolution of the Permanent-Crises.
- For these Processes of Dissolution and Optimization we need the access to the Source of Becoming-Better.

**This Source  
is the Third.**

- But there is no Logic for the Access and Instrumentalization of the Third.
- Our Tonal Cartesian Logic cannot build the Third as a Source of the Better either. Only a Nagual-

Mind can establish this Source for our Future. No Intelligence. No Knowledge.

- Thus, the establishing of the Third as the Source of Becoming-Better is a Process that can only be accomplished as Co-Evolution.
- Co-Evolution, however, is not an Option for the Logic of the 1<sup>st</sup> Reality-Generator. In other words:

The 1<sup>st</sup> Reality-Generator does not know what to mentally accomplish in order to be able to practice Co-Evolution.

*Franck:* Thus you are indirectly stating that our cognition and logic of thinking are too stupid for the starting of Co-Evolution.

*Keno:* I did not formulate it so drastically. But in principle it is the case:

**The Logic of  
the 1<sup>st</sup> Reality-Generator  
needs the 2<sup>nd</sup> Reality-Generator  
to be able to develop a Practice of Co-Evolution.**

Perhaps at this point we should briefly outline what the Cartesian Logic of the 1<sup>st</sup> Reality-Generator has developed so far in order to free itself from its own limitations and incompetences.

*Franck:* Right

*Keno:* In general, one can see that there has been an attempt to shift the Cartesian Logic in the direction of the Third. Gotthard Günther's polycontextual Logic, for example, was a remarkably ambitious approach.

But this Poly-Logic has failed.

It has not been able to develop a practice, i.e., people's thinking has not been able to integrate the polyvalence of this Logic. It is simply too complicated and too abstract.

Logic of Thinking generally is only efficient, if it can get the state of a mental automatism with more or less all people. Cartesian Logic with its Subject-Object Separation is completely based on the biological Survival-Program that exists in every Human-Being. Motto: "Fitness beats Truth" (Donald D. Hoffman).

*Franck:* In other words, we won't get anywhere with more intelligent thinking? I mean Co-Evolution.

*Keno:* Yes, this is how I see it: the 1<sup>st</sup> Reality-Generator stays with Rationality, Cognition and Logic of Thinking. But the 2<sup>nd</sup> Reality-Generator

**will replace Thinking by  
Processes of Evocation.**

And these Processes of Evocation will consciously not be aimed at Reason (Rationality) and Cognition (Knowledge), but at the inherent Dynamics of the Now-of-Creation, which we call Nagual.

*Franck:* The Nagual becomes an object of cognition?

*Keno:* No, just not:

**The Nagual becomes  
the spiritual Space of the Third.**

*Franck:* How does one do that? How does one create this spiritual Space of the Third?

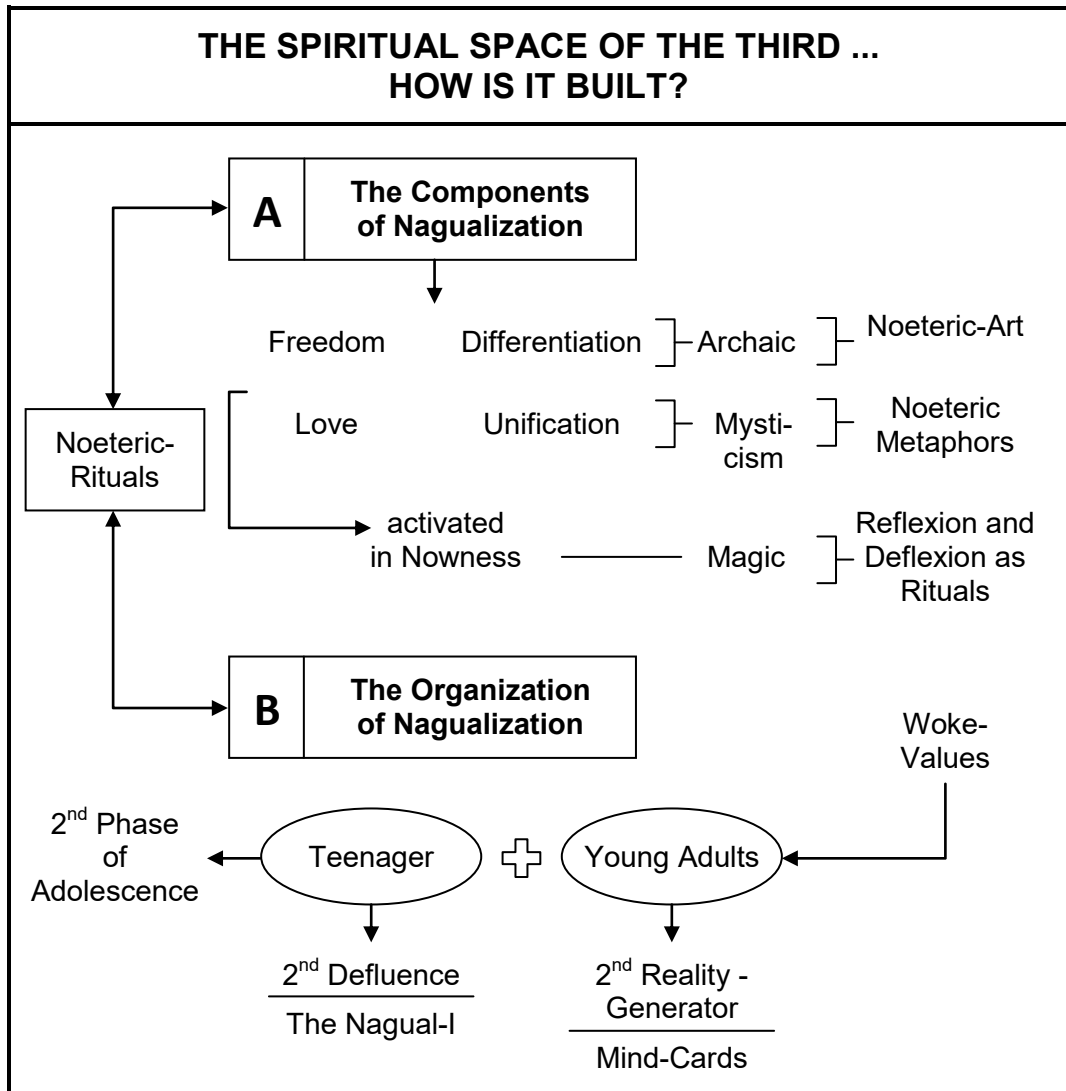

*Keno:* By integrating the inherent Dynamics of the Nagual as a Resonance-Reality into oneself and then programming it for Co-Evolution. This means:

**The very Core of personal Consciousness,  
which is the I,  
is nagualized as intensely as possible.**

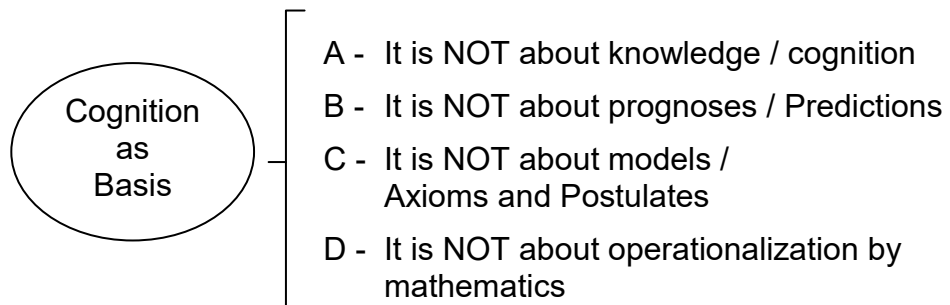

That is the strategy.

*Franck:* I see. And how will this strategy be accomplished ... I mean quite concretely ... not abstractly-theoretically?

*Keno:* I answer with a sketch:

So this is pure practice: Noetic-Rituals as the Execution of Practice. There is no other way. The 2<sup>nd</sup> Reality-Generator and with it the Third cannot be developed by Theories and the today usual Cartesian Logic. Specifically:

By the way: A / B / C / D are typical elements of AGI. It follows:

**The 2<sup>nd</sup> Reality-Generator  
and the Third cannot be built by AGI.**

Essentially:

**It is about the  
Awakening of Nagual-Resonances.**

**Cognition processes generate  
certainties for orientation,  
but not Nagual-Resonances.**

The currently discussed AGI concepts are ... despite all differences ... in one point the same: They are aimed at forming new or better consciousness from knowledge and data. The way of AGI to an Emergent-Consciousness shall be accomplished by language plus intelligence plus learning.

Language, however, as a model of the world ... and here I follow Yann LeCun, the AI head of META ... is not sufficient to abstractly mirror the world in such a way that intelligent learning can be built upon it.

Even then, if LeCun's grand vision ... the "world model module" really worked (i.e., developed high predictive fitness) ... even then, it would not be AGI's entry into the spiritual Space of the Third.

*Franck:* Why is this "Spiritual Space of the Third" so important to you?

*Keno:* Quite simply:

**Emergent-Consciousness  
can only be born in  
the spiritual Space of the Third.**

*Franck:* The consequence of this would be: We will be forced to build this "spiritual Space of the Third" in Co-operation with the Now-of-Creation ... that is, together with the Nagual.

*Keno:* Yes, as

**Shared-Nagual.**

The Nagual-Resonances are in this concept of Co-Evolution the same thing that data is to AGI:

- One evokes Nagual-Resonances and forms (Encodes) them into the Shared-Nagual.
- The existing Nagual in the I and the Free-Nagual in the "Unmarked-Space" generate

**a common positive Destiny ...  
a common History.**

This is then the path to the Source of Becoming-Better.

*Franck:* If I understand this correctly now, then each Individual has his own special "Shared-Nagual". Depending on how the Noetic-Rituals that he performs. Is it like that?

*Keno:* es. A singular quality of "Shared-Nagual" arises in each Mind ... that is, in each person. So an extremely intense Differentiation arises. As I said, in the personal Intrinsic.

In the societal Reality it looks different: There, the singular "Shared-Naguals" migrate into the digital "Rhizome-Sphere" (Deleuze). There they begin to dance ...

**as Differences of the  
same Nagual in the universal Nagual.**

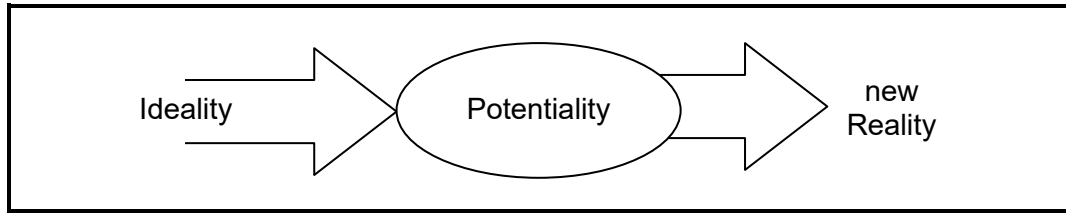

Exactly this is the secret of the

**"Society-of-Creation".**

This secret can be described as follows:

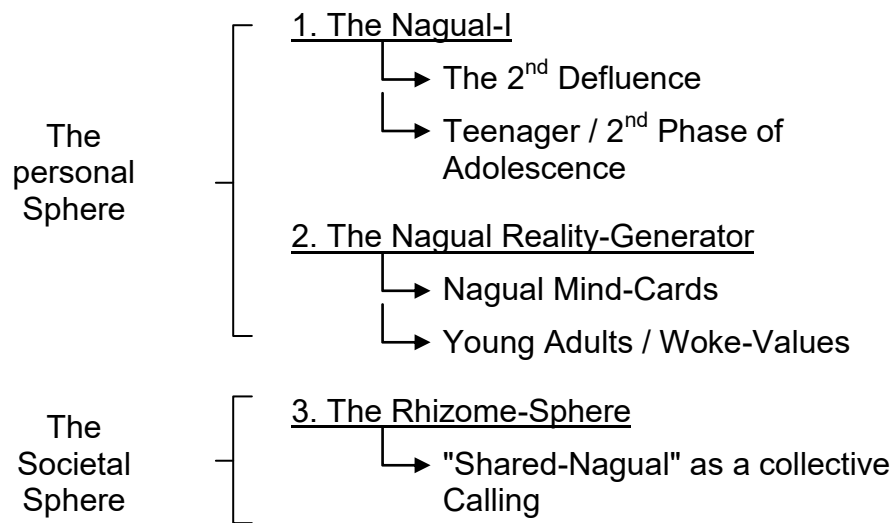

- The universal Now-of-Creation (Nagual) is evoked by extremely different and highly personal "Shared-Nagual".
- The rhizomic-fractal dancing of the many singular "Shared-Naguals" generates that collective Calling which is "rewarded" by the Nagual ... the Now of Becoming ... with an Answering.
- This Answering then generates Emergent-Consciousnesses, bold ideas and creative processes ... accomplished and present in the lives of persons ... not elites ... not experts ... just ordinary people "like you and me".
- On this basis the in principle Unknown of Future 2 and 3 becomes a concrete idea ... a concrete evolutive Stimulus.

The Rhizome-Sphere just mentioned functions in this model as the calling Ideality ... it calls into the Unknown (non-objectifiable) Potentiality, whereby the new Reality comes into Being ... e.g. as an Innovation.

*Franck:* The Calling of Ideality generates the problem-solving New ... the Emergent-Consciousness. Is it to be understood in this way?

*Keno:* Yes. But we should think of the following condition: this kind of Co-Evolution ... as Co-Operation of the Nagual-I with the Free-Nagual ... only succeeds when we become able to form 3 Attractors:

Today, I only see Mark Zuckerberg and his Vision of the Metaverse being able to realize these 3 Attractors ... provided that he integrates the Noetic-Rituals (Metabliss), that establish the spiritual Space of the Third, into his Metaverse.

*Franck:* Hmm. So you are assuming that even a perfectly functioning Metaverse will not be able to establish this spiritual Space of the Third ...

*Keno:* ... as the Source for our Becoming-Better ....

*Franck:* ... to build up. Right?

*Keno:* Yes. Let me put it as follows:

A - The Metaverse will not spiritually enable us for Co-Evolution.

B - AGI and cyborg visions will not enable us for Co-Evolution.

We need more than just a perfect Innovation in the field of technical Technologies (= Metaverse).

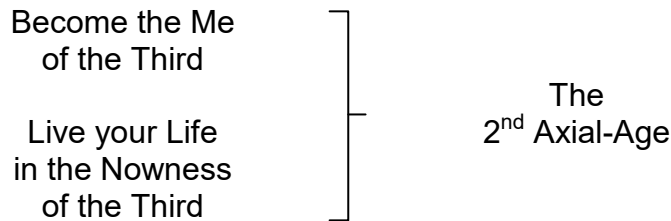

But we also need more than just an intelligent Perfection of the Intelligence of our 1<sup>st</sup> Reality-Generator (= AGI / Cyborg / Post-Humanism).

From this follows:

**Only that concept which  
can lead the real human Spirit  
into the spiritual Space of the Third  
will be able to establish  
the Practice of Co-Evolution.**

*Franck:* And that will be the Hyperverse rather than AGI and science. That is your assertion, isn't it?

*Keno:* Yes. In AGI, there is a big aim to be able to establish Emergent-Consciousness through digital machines. And in science, there is a cautious rethinking of cognition and logic. But from my point of view, neither approach will make us fit for the Third ... according to the two objectives already formulated:

*Franck:* As an inquiry: What is happening in the field of Science in the matter of Logic and Cognition?

*Keno:* Yes, there is a lot going on. I summarize some aspects as follows:

- The classical-rational logic, which is closely connected with empiricism and positivism, still dominates, but one tries to improve the efficiency of this logic. This means:

One tries to shape the Qualification of our Future-Intelligence by a better Intelligence-Logic. Manfred Laubichler formulates it as follows: One tries to better adapt the classical Logic of Thinking ("which is characterized by stability and resilience") to the new realities. So a better adaptation ... e.g. by opening the mind to the methods of speculation.

- The polyvalent Logic (see Günther) has not proven to be suitable for everyday life and practice, nor have models of "fuzzy logic".
- But there is a new group (all philosophers) working on the concept of a modeled logic. Manfred Laubichler being one of these philosophers.

What is the concern of these scientists? In keywords:

- the current logic of cognition in sciences is becoming increasingly inefficient.
- It does not succeed in linking past data (causality and patterns) to futures that are not yet known:

**The logic of science is increasingly losing touch with the reality of futures as complexity and contingency combine.**

- There is a growth of "irreducible uncertainties" ... that cannot simply be "gradually minimized." This makes linear thinking that follows "the ideal of control" visibly dysfunctional.
- As a scientist, one can integrate feedback loops and scenarios of improbabilities and open trajectories, but science lacks "the fundamentally open evolutionary approach."
- One wants to expand the space of possibility through a modeled logic of the open. But one does not (yet) recognize

**that the spiritual space of the Third produces the most productive openness.**

- What is demanded is a "new epistemology in the sense of a new logic of knowledge." This new logic is to be built on an intelligent "form of modeling".
- This new "form of modeling" is to be designed as follows:

- One wants to introduce the method of the "Decision Theater" ... thus a kind of experimental Decision Theater.
- One provides different scenarios and then asks experts who have not been involved so far (i.e. people with better knowledge) to integrate themselves into the modeling of alternative scenarios (future blueprints).
- Thus, one tries to expand the inner logic of one's own blueprints through a "transdisciplinarity". The opening of the logic is to be accomplished by this "experimental system".
- The "Decision Theater" is supposed to free the logic of the future blueprints from a false (too narrow) logic.

*Franck:* I may guess: You don't think much of this new approach of scientists. Right?

*Keno:* Yes. My reasons?

- It is a concept that aims to generate Future-Intelligence through better (enhanced) knowledge. It is thus the well-known scheme of the 1<sup>st</sup> Reality-Generator, only complemented by the "Decision Theater".
- This logic concept sticks to the intellectual strategy of Thinking.

**Better Thinking results  
from better Logic.**

**Only better Thinking  
creates better Futures.**

- The Intelligence of the Now-of-Creation (Nagual) is blanked out. That means: The Nagual and therefore the Universal-Consciousness as Something are excluded just as with the 1<sup>st</sup> Defluence of the youth:

**The 1<sup>st</sup> Defluence  
is not extended by  
a 2<sup>nd</sup> Defluence.**

All in all:

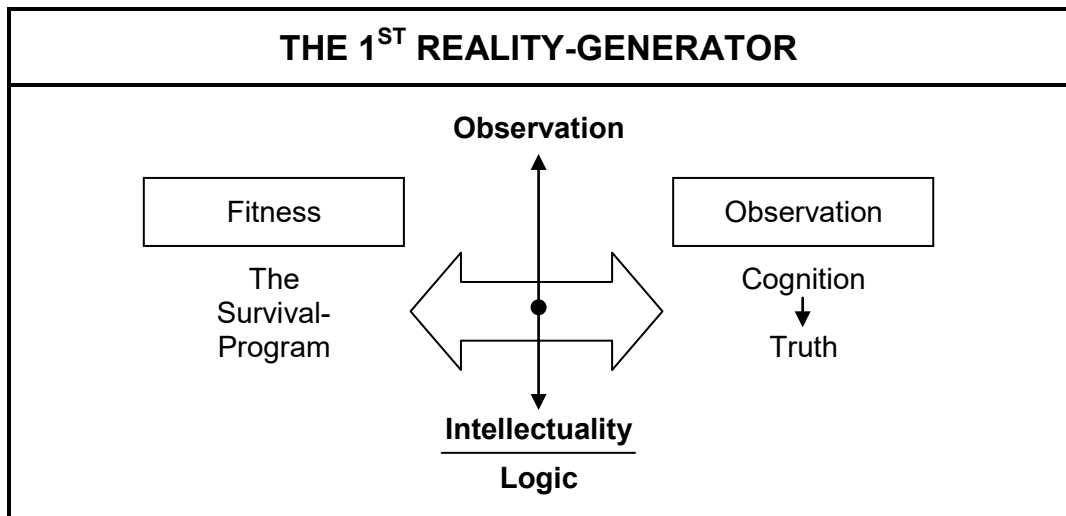

**Co-Evolution is  
what will dissolve  
the Dominance of Logic.**

**The Third  
and not Intellectuality will become  
the Source for Becoming-Better.**

*Franck:* Let's assume the following: More and more people say, "Yes, we want to switch ... from Evolution to Co-Evolution." And let us further assume that these people, however, just as clearly say: "We need the connection of Logic and Intellect. Otherwise we can't realize this Co-Evolution."

How do you answer these people?

*Keno:* Co-Evolution needs the permanent Interplay of the existing 1<sup>st</sup> Reality-Generator with the novel 2<sup>nd</sup> Reality-Generator. That means: the Momentum of Fitness (our Survival Program) and Observation ("Truth") remains fully active. So also those Instruments, which connect Fitness and Observation ... mentally-spiritually. And these "Connectors" are Logic and Intellectuality. As a sketch:

*Franck:* You said that it is about dissolving the Dominance of Logic ...

*Keno:* ... yes, not Logic as an Instrument, but only the absolute Dominance of Logic in the Processes of Cognitive Thinking ...

*Franck:* ... and you also said, that the Third, and not Intellectuality, will be the Source for Becoming-Better. What exactly does this mean?

*Keno:* That means:

**It is about  
establishing the Third**

**as a "Shared-Nagual".  
So Logic and Intellectuality get  
a new Work-Assignment:**

**Logic and Intellectuality become  
Service Providers for the Third.**

*Franck:* In my words: The Instruments of the 1<sup>st</sup> Reality-Generator serve the Goals of the 2<sup>nd</sup> Reality-Generator ...

*Keno:* ... yes, the 1<sup>st</sup> Reality-Generator becomes an Associate of the 2<sup>nd</sup> Reality-Generator. And its job description is:

- Qualify the Nagualization of I / Life and World.
- Qualify it by your Observation and by your Intellect.

*Franck:* Just between the two of us: What you have just stated is basically a kind of revolt. Have you ever presented that ... as an upcoming Future?

*Keno:* Yes, several times. The results were always kind of strange. Basically, there were three typical reactions:

Reaction 1: This is so absolutely silly so we should refrain from discussing it.

Reaction 2: Silence. And then quickly discussing a completely different topic.

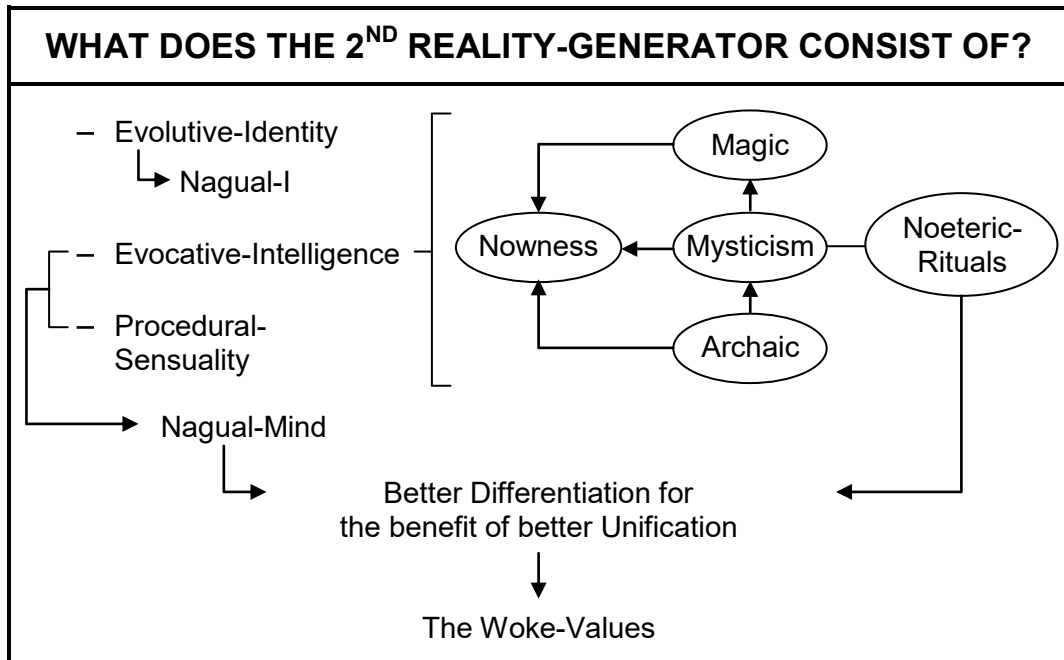

Reaction 3: A Lightning-fast reinterpretation in such

a way that intellectual thinking is declared as the superior again.

*Franck:* Reaction 3. What specifically is happening?

*Keno:* One mostly argues as follows: All right, so there should be two Reality-Generators that are permanently collaborating. But there must be a superior, who controls this cooperation. And that, ... sorry! ... can only be the intellectual thinking.

One makes the 2<sup>nd</sup> Reality-Generator thereby an aid for the Co-Evolution. This scheme becomes particularly clear (and affirmed!), if one explains to the Intellectuals, what the 2<sup>nd</sup> Reality-Generator consists of. As sketch:

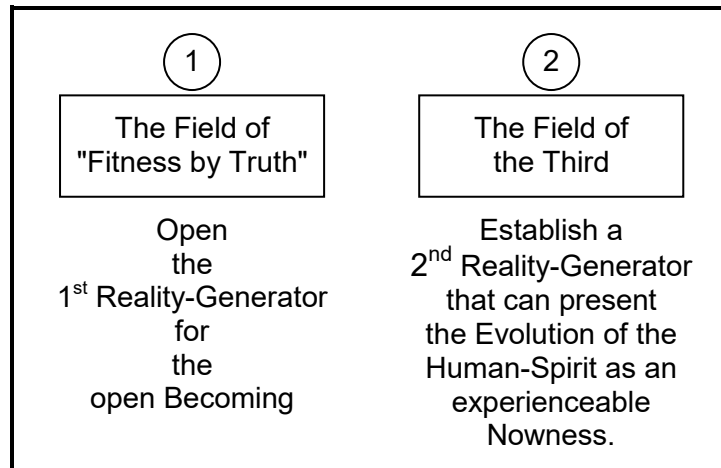

*Franck:* Oh, yeah. That is to be expected that such a concept is clearly rejected: Archaic, Mysticism and Magic ... embedded in Nowness. Intellectual Thinkers will never be able to accept that. They consider it a regression to the dark ages of a stupid mind. Can't you understand that?

*Keno:* Quite well, yes. But from my point of view, they fail to understand the following:

- If we want to practice Co-Evolution, it is about the Interfusion of the Nagual-Mind with the Free-Nagual.
- The Nagual-Mind has to be programmed for this Interfusion. Without a special programming on "Co-Evolution" the nagual Mind cannot function co-evolutionary.
- This programming must be accomplished in two fields:

Field ② requires a ritual Activation of our hitherto completed spiritual Evolution, then ... i.e. our path from the Archaic of the Spirit, to the Mysticism of our Spirit, to the new, i.e. more modern Magic of the Spirit.

*Franck:* Wait a minute. Magic is ancient. What's new about it?

*Keno:* In general, Magic is a spiritual Space for the Nowness. For example, if one combines virtual Reality ( Metaverse / Headset) with Real-Reality, one experiences different Spaces, but ... Mark Zuckerberg said it very clearly in a conversation with Lex Fridman ... beyond that, a new Quality of Timeliness emerges:

**The experienced Present  
separates itself from its own Past.**

The Arrow of Time thereby opens up to the Unknown, that is, to the Nagual, which we cannot objectify.

Now what is new in this Magic?

The modern Magic (which is based on the Model of Noetic) not only unifies the two kinds of Reality just discussed (virtual / real), but also unifies the two kinds of Nagual. The Nagual that is bound in the I unifies with the Free-Nagual.

Every time one forms a successful creative process, one experiences  
the Common of the two kinds of Nagual as a pleasurable Nagual-  
Resonance. Thus,

**a Nagualization of  
the personal Reality  
takes place.**

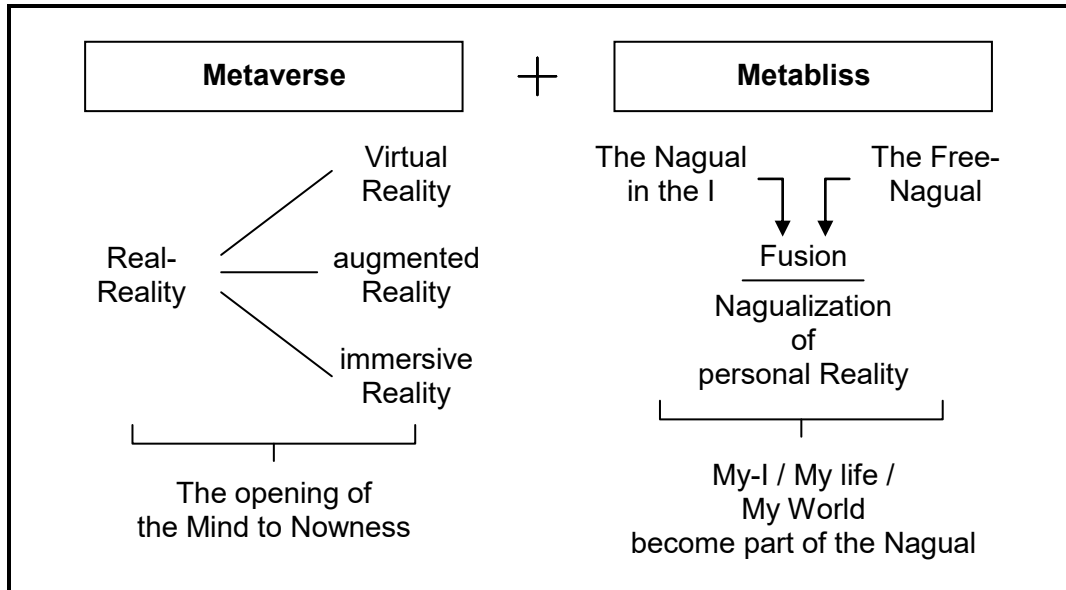

**Creative practice  
evokes the Free-Nagual.**

**Creativity is the  
Core of the new Magic.**

By the way, this is one reason for Teenager offensively getting into memes, GIFS, and creative and often viral videos:

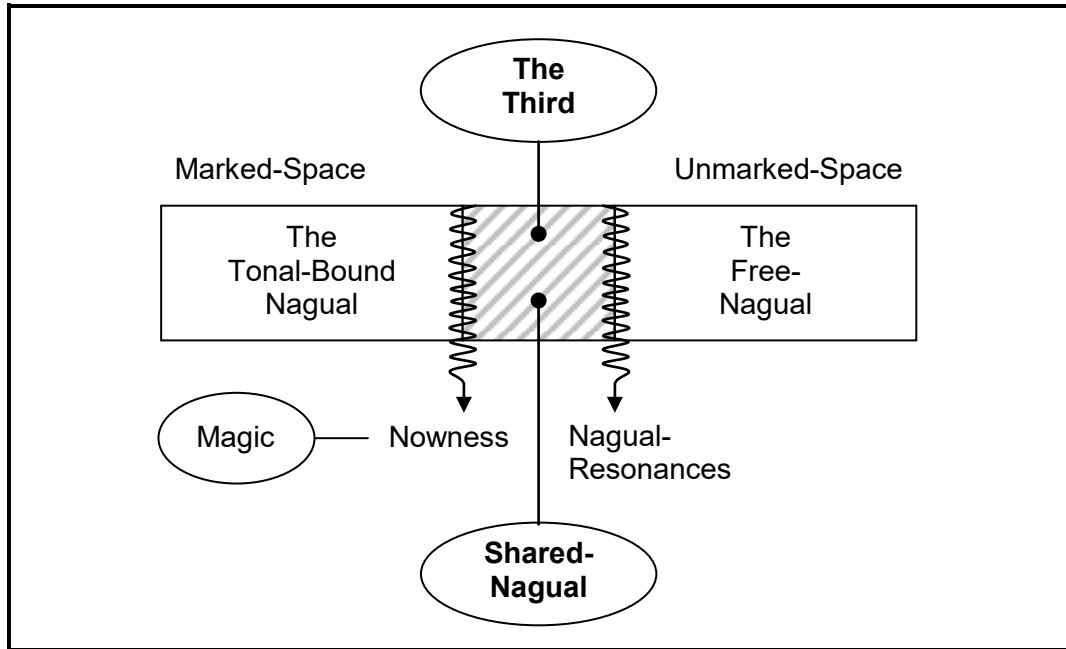

**Nagual-Resonances  
make the worldly I happy.**

If we merge the aspects discussed so far, we get the following picture:

*Franck:* Yes, agreed. But what is the functional relation between the Now and the Third? That is not clear to me.

*Keno:* The Third is the Goal. Nowness is a Prerequisite for the Fulfillment of that Goal. The Third is the spiritual Space that we have to build up if we want to practice Co-Evolution. As a sketch:

We need modern Magic to be able to produce those kinds of Magic through Interfusions ...

*Franck:* Wait a minute! Are there different kinds of Magic at all?

Yes, e.g. the Small- and the Great-Magic, just as there is a slight and a "strong Emergence" (Robert Laughlin). But what I wanted to express:

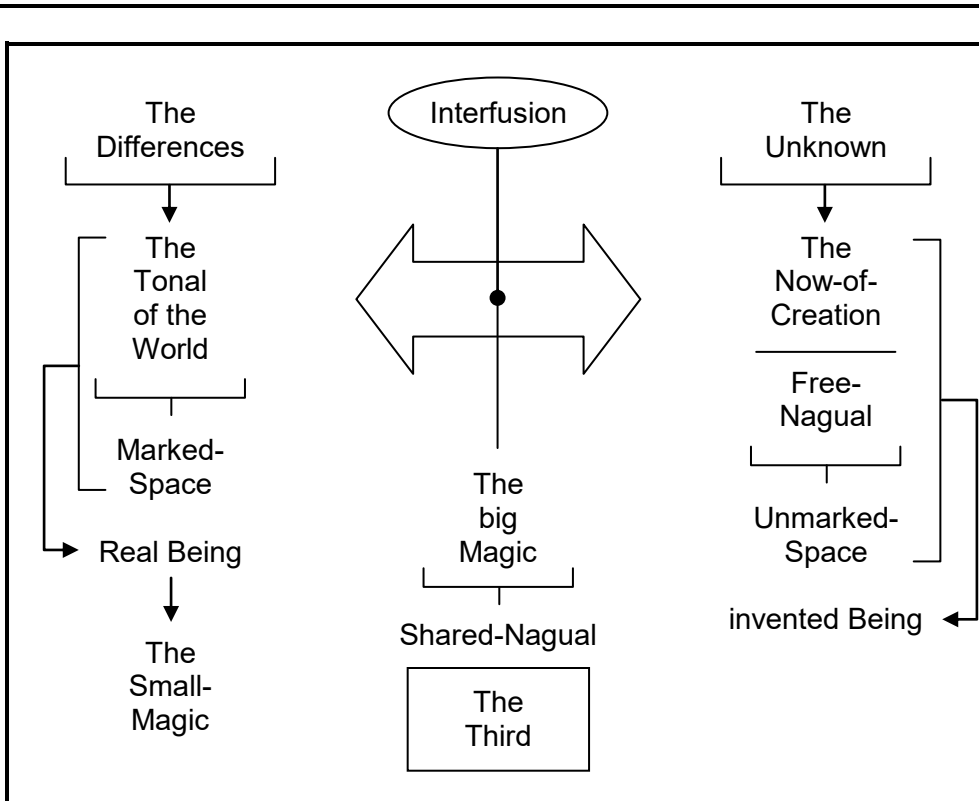

*Keno:* We need different kinds of Magic to be able to mentally perform Co-Evolution.

*Franck:* My God, this is complicated!

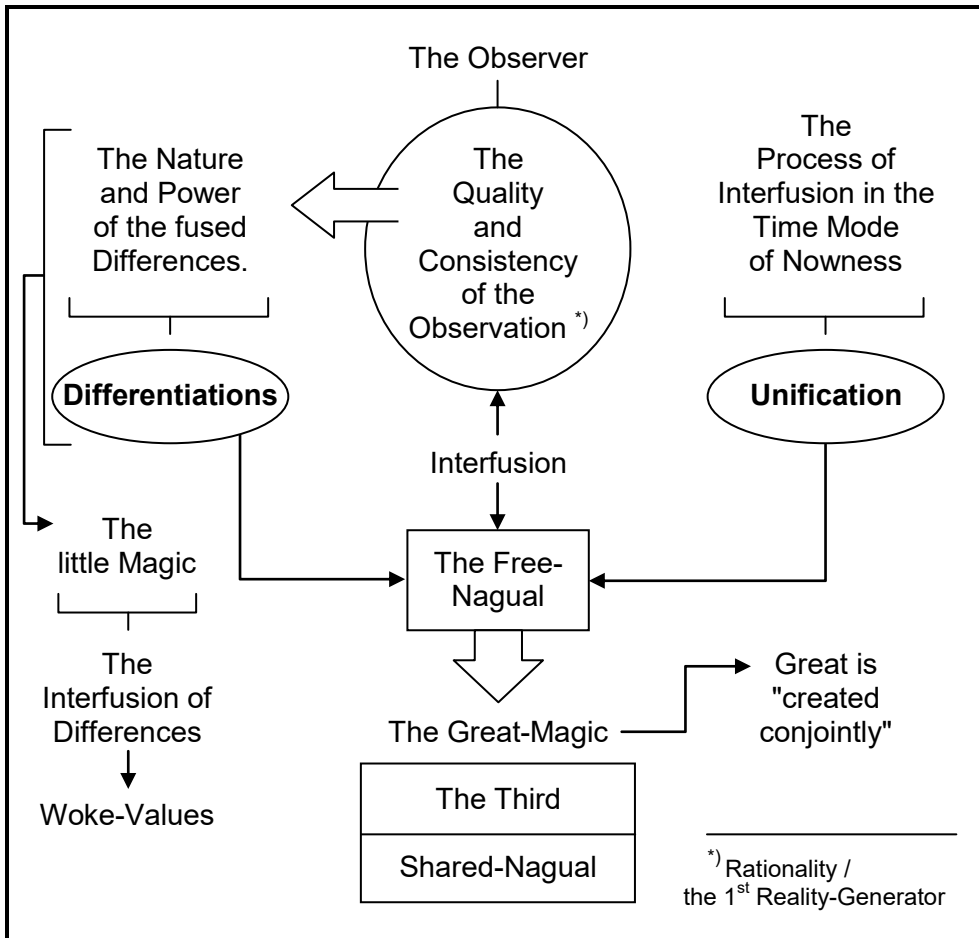

*Keno:* Yes. But the neurophysiology of ordinary, everyday thinking is much, much more complicated. Just ask a neuroscientist. Since we have the "imaging techniques", we are virtually suffocating in empirical results.

Compared to that, the function of modern Magic in terms of establishing the Third is relatively simple. Maybe a little excursus on this subject will help us:

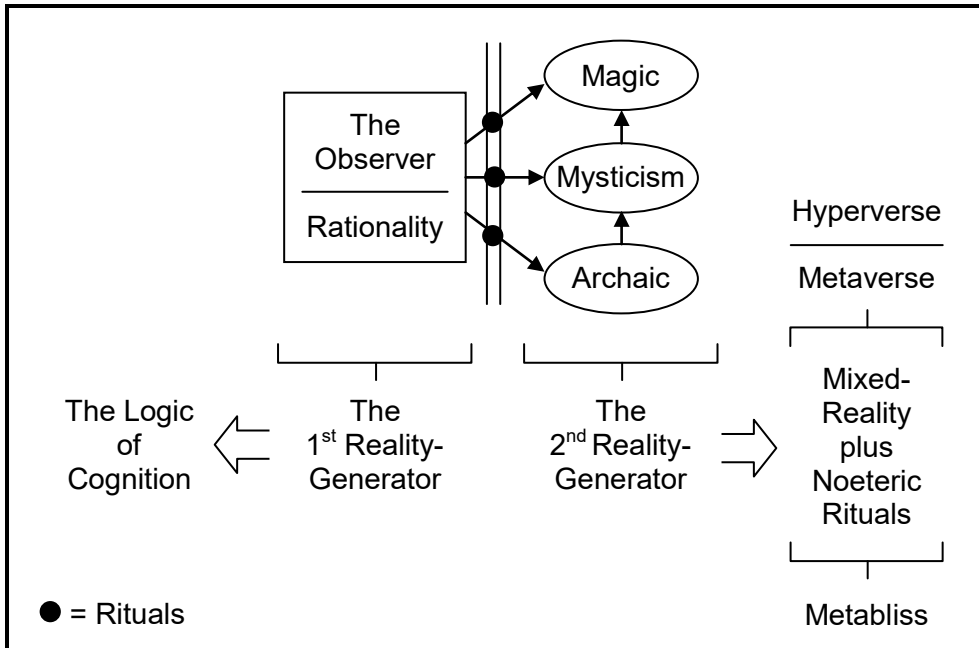

6.- Thus the following factors are involved:

7.- The Third is thus based on the using of two Types of Magic. The following rule applies here:

**If it is not possible  
to create the Small-Magic,  
there will be no Great-Magic.**

8.- For the Small-Magic, it will be a matter of transferring the Tonal " Marked-Space" into the spiritual Space of Magic. How can this be accomplished? As a sketch:

This means: All preliminary stages of the Evolution of the human Spirit have to be activated consciously by the observer (1. Reality-Generator). Why?

**One can make the human Spirit  
best fit for Co-Evolution by  
conditioning this Spirit as an  
activated (cumulative) Own-Evolution.**

Thus it becomes clear that Co-Evolution is depending on whether we succeed in the Ascension of the human Spirit from Archaic to Mysticism to Magic in such a way that an Attractor emerges from it.

Thus, however, it also becomes apparent that this Ascension requires two "Instruments":

- the 1. Reality-Generator
- Metaverse + Metabliss (= Hyperverses)

The conscious accomplishment of this Ascension from Archaic to Magic needs the Cartesian programmed Mind, the Rituals of Noetic and at the same time new scopes of design possibilities offered by Digitality (Metaverse).

9.- Since the beginning of this century, we are in the Digital-Revolution. We have since some years the Woke-Activism. Both Aspects are important Instruments for the Establishment of Magic and the Third:

<p style="text-align: center;"><b>The Digital- Revolution</b></p>	<p style="text-align: center;"><b>The Woke- Activism</b></p>
<p style="text-align: center;">Digital-Media facilitate those Rituals, which we need for</p> <ul style="list-style-type: none"><li>- the Small-Magic</li><li>- the Great-Magic</li></ul> <p style="text-align: center;">┌──────────┐ │          │ └──────────┘</p> <p style="text-align: center;"><b>Without Hyperverses we cannot organize Co-Evolution.</b></p>	<p style="text-align: center;">Woke programs Society on Interfusion of Differentiation and Unification (see point 6).</p> <p style="text-align: center;">┌──────────┐ │          │ └──────────┘</p> <p style="text-align: center;"><b>Without Woke-Values we cannot make the Free-Nagual usable.</b></p>

10.- It follows:

**The Home of Woke  
is the Hyperverses.**
